A conservative research institution here (the Heritage Foundation) has just published the factually preposterous and morally repulsive thought that a "key reason" why academic achievement standards have fallen is that the federal government has "dismantled an academically demanding curriculum" by catering to "special-interest groups" such as the handicapped, and has "favored the disadvantaged pupils at the expense of those who have the highest potential to contribute positively to society."

Leave aside the philistine social analysis: the idea that profound changes in society's educational expectations and achievements are the result of recent Washington decisions rather than of complex and autonomous cultural processes. But note this dangerous doctrine: handicapped persons are among those getting too much public assistance because, by some cost-benefit criterion, they do not have the capacity to make a sufficiently "positive" contribution to society. Note the nasty premise: an individual's enjoyment of rights is conditioned by the individual's social utility.

It is almost demeaning to assure such analysts that equity is economical. Institutionalization of the retarded is almost never necessary and almost always an expensive incarceration of potential taxpayers. And physically handicapped persons are seeking removal of barriers to self-help.

Handiapped citizens are as fully citizens as those of us who are mentally non-handicapped or temporarily able-bodied. They are just beginning to have access to social benefits that other citizens take for granted. When P.L. 94-142 was passed in 1975, 25 percent of all handicapped children were underserved and another 25 percent had no educational programs at all; they were more excluded from society's basic benefits than black children were in 1954. Now just eight years later, we are invited to believe that federal largess toward disadvantaged pupils is a threat to America's meritocracy.

The Reagan administration's most serious self-inflicted wound has been its failure to practice creative exceptionalism. It has failed to find an area for action that is an exception to its domestic austerity and deregulation—action that would announce:

Although we conservatives believe government has been irrationally intrusive, we nevertheless know there are persons who cannot help themselves until government helps them. And we know there are conservative values that are not vivified until the federal government affirms them with strong regulations.

Instead, acting in part from unconservative fidelity to ideological abstractions, the Reagan administration aroused the anxiety of an enormous constituency—the handicapped and their friends. It did so with some contemplated "deregulations" involving P.L. 94-142 and Section 504, changes that Congress would never permit.

Even just a generation from now we will, I hope, be mortified by the memory of our complacent acceptance of the social segregation of the handicapped—as mortified as we are today by the memory of racial segregation. We are barely at the beginning of the last great inclusion in American life, the inclusion of the handicapped, and especially the mentally handicapped. This should have been, and still could be, the field where the Reagan administration confounds its critics and shows a subtlety in its conservatism.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, does my good friend have anything further to come before the Senate?

Mr. BYRD. Mr. President, I thank my good friend for his characteristic courtesy. I have nothing more.

Mr. STEVENS. Mr. President, there is an order to convene in the morning at 8:45; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. STEVENS. And there is an order already entered for a period for the transaction of routine morning business. Is that correct?

The PRESIDING OFFICER. That is correct.

RECESS UNTIL 8:45 A.M. TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent, in accordance with the previous order, that the Senate stand in recess until 8:45 a.m. tomorrow.

There being no objection, the Senate, at 7:24 p.m., recessed until tomorrow, Wednesday, June 29, 1983, at 8:45 a.m.

CONFIRMATION

Executive nomination confirmed by the Senate June 28, 1983:

DEPARTMENT OF EDUCATION

Madeleine C. Will, of Maryland, to be Assistant Secretary for Special Education and Rehabilitative Services, Department of Education.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

HOUSE OF REPRESENTATIVES—*Tuesday, June 28, 1983*

The House met at 12 o'clock noon.

The Reverend Anthony Failla, St. Finbar Catholic Church, Brooklyn, N.Y., offered the following prayer:

Lord God, all-giving and almighty, we ask You to help us perceive our deliberations in the full light of Your divine plan.

Our responsibility is great, for our power comes from Your people and our actions have far-reaching effects beyond our fondest intentions and expectations.

Help us to use all the resources and data at our disposal so that, where pertinent, we will be able to respond to emergencies and crises.

We ask You also to keep in mind that much of what we enact here has a result far beyond our mortal lifetimes. As we have received a bountiful and well-planned legacy, we ask Your guidance to bequeath to future generations the legal and programmatic foundation for a life of health, dignity for the individual, and a climate of freedom for all.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 366, nays 22, answered "present" 4, not voting 40, as follows:

[Roll No. 220]

Mr. ANNUNZIO changed his vote from "present" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

SUNDRY MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Saunders, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced

that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 272) entitled "An act to improve small business access to Federal procurement information."

The message also announced that the Senate further disagrees to the amendment of the House to the title of the above-entitled bill.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 273) entitled "An act to amend section 8(a)(1) of the Small Business Act."

The message also announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 48. Concurrent resolution providing for an adjournment of the Senate from June 29, 1983, June 30, 1983, or July 1, 1983 to July 11, 1983, and an adjournment of the House from June 30, 1983 to July 11, 1983.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

June 27, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I have the honor to transmit herewith a copy of the Certificate of Election received from the Honorable March Fong Eu, Secretary of State of the State of California, indicating that the Honorable Sala Burton was elected to the Office of Representative in Congress from the Fifth District of California in a Special Election held on June 21, 1983.

With kind regards, I am,

Sincerely,

BENJAMIN J. GUTHRIE,
Clerk, House of Representatives.

STATE OF CALIFORNIA, SECRETARY OF STATE,
CERTIFICATE OF ELECTION

I, March Fong Eu, Secretary of State of the State of California, hereby certify:

That according to the official returns of the Special Election held on the 21st day of June, 1983, and the statement of the result thereof on file in my office, Sala Burton was elected to the office of Member of United States House of Representatives, Fifth district, for the term ending on the third day of January, 1985.

In witness whereof, I hereunto set my hand and affix the Great Seal of the State of California, at Sacramento, this 24th day of June, 1983.

MARCH FONG EU,
Secretary of State.

SWEARING IN OF THE HONORABLE SALA BURTON OF CALIFORNIA AS A MEMBER OF THE HOUSE

The SPEAKER. Will the gentlewoman from California (Mrs. BURTON) kindly step into the well of the House. She may be accompanied by the senior member of the California delegation, as well as other members of the delegation.

Mrs. BURTON of California appeared at the bar of the House and took the oath of office.

The SPEAKER. The gentlewoman is now a Member of the Congress of the United States. Congratulations.

PERMISSION FOR SUBCOMMITTEE ON ENVIRONMENT, ENERGY, AND NATURAL RESOURCES OF COMMITTEE ON GOVERNMENT OPERATIONS TO SIT TOMORROW DURING 5-MINUTE RULE

Mr. SYNAR. Mr. Speaker, I ask unanimous consent that the Subcommittee on Environment, Energy, and Natural Resources of the Committee on Government Operations be permitted to sit tomorrow, June 29, 1983, should the House be proceeding under the 5-minute rule.

This request has been cleared through the minority.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

FATHER ANTHONY J. FAILLA

(Mr. SOLARZ asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLARZ. Mr. Speaker, the prayer this morning was offered by Father Anthony J. Failla, the pastor of St. Finbar's Roman Catholic Church which is located in the Bath Beach neighborhood of my congressional district in Brooklyn.

In addition to his pastoral responsibilities, Father Failla, who was ordained 26 years ago, serves as executive director of the Amico Community Center for Family Living, which is one of the outstanding social service agencies in the city of New York.

Father Failla is also active in a wide variety of community and civic organizations, including the Italian Board of Guardians and the Executive Board of the Bath Beach Civic Improvement Association, and on both of these organizations he serves on their board.

But insofar as my constituents are concerned, Father Failla's greatest contribution involves the reach of his spiritual commitments.

The prayer he delivered and the message and inspiration he provided this morning gives the House a rare opportunity to see what Father Failla does on a daily basis in the Lord's house at St. Finbar's in Brooklyn.

I am delighted to have been able to share him with the Congress today.

THE PRESIDENT AND THE BUDGET

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, the President has attacked the bipartisan congressional agreement on the budget and continues to threaten that the will of the majority shall not prevail, insisting that his way is the only way.

His way was proposed in his 1984 budget. It was overwhelmingly rejected in the Republican Senate Budget Committee and never even offered by the Republicans in the House.

We all need to be reminded of what the President's way was for 1984. He would increase military spending levels by $35 billion. He would cut medicare benefits by $1,700,000,000. Education programs would be cut by $1,200,000,000, employment and training programs by over $3 billion, medicaid by $300 million, child nutrition by $300 million, low-income energy assistance by $675 million, other energy investments by $1,200,000,000, and housing for the elderly by $150 million, to mention a few.

If the President believes that he can dictate these specific results by the wielding of a veto pen, he has misread the sentiment of the American people.

□ 1230

VASHCHENKO FAMILY ALLOWED TO EMIGRATE

(Mr. GIBBONS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GIBBONS. Mr. Speaker, along with millions of other free people around the world, we rejoice today on the release of the Vashchenko family, who had been guests in the American Embassy for a great number of years. I think there is an important lesson to be learned here. A U.S. delegation visited Russia last January. When calling upon a high official in the Kremlin, we raised the issue of the Vashchenko family and their freedom to emigrate. We were assured at that conference that the Vashchenko's would be allowed to emigrate if they would merely follow the Russian law which required them to return to there hometown and then to apply for an emigration permit.

We all know though they did eventually return to their own town and apply for an emigration permit and they have been allowed to emigrate.

It is a time that we can hope that this signifies that there will be a greater freedom of emigration from Russia. We hope that this is only the beginning of a whole string of favorable emigration matters that will be considered by the Russian Government and we all rejoice with the action that has been taken.

AMERICANS TO LOSE SOMETHING VERY PRECIOUS—"UNIVERSAL SERVICE"

(Mr. SWIFT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SWIFT. Mr. Speaker, Americans are about to lose something that is very precious, something that they take for granted, and something they use every day of their lives. Furthermore, they are going to lose it through a process that is virtually invisible.

What they will lose is called—in the jargon of the telephone industry—"Universal Service."

Universal service is the concept that everyone's telephone is more valuable to them if with it they can reach virtually everyone else in the Nation.

Policies have been adopted at the FCC that will wipe away universal service by loading new charges onto local rates that are so high many people—the poor, the elderly on fixed incomes, and so forth—will be forced off the telephone system. That hurts them. But it also hurts every other telephone user by reducing the number of people each of us can call.

Virtually every American has a mother or father, an aunt or uncle—someone whose income is so limited that sharp increases in rates for local telephone service would threaten their ability to continue owning a phone. But their telephone is a key means we use to keep in touch with them.

The FCC decisions will—by the Commission's own estimate—raise local rates by an average of $8 per month. It can be a much greater increase—up to $30 to $40 a month—in some high cost areas.

Some have said the solution should be a welfare system to see that the poor have basic service. That is just what we do not need: another welfare program, a system of phone stamps.

Right now, we have the finest telephone system in the world. We have universal service that works. We have affordable rates. And we all benefit from this system.

So today, I am introducing legislation that will deal with the very real issues growing out of technological and judicially dictated changes in our phone system in ways that will enable the United States to retain a superb phone system, keep telephone service universal for all Americans and do so in the context of the rapidly changing technology and marketplace in which the industry finds itself.

I commend this legislation to my colleagues for their study and consideration and urge their support on behalf of the local telephone consumers all over America.

DEPARTMENT OF AGRICULTURE REFUSES TO OPEN TO PUBLIC VIEW FOOD THAT BELONGS TO THE AMERICAN PEOPLE

(Ms. KAPTUR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. KAPTUR. Mr. Speaker, I rise on behalf of all unemployed, elderly, and poor Americans who need food.

Yesterday, I tried to visit Inland Center Caves in Kansas City, the largest of 700 warehouses contracted by our Government to store surplus food commodities. The total cost to our taxpayers for storing surplus food is over $1 million a day.

Despite earlier guarantees to the contrary, I as well as other Members of Congress, were not permitted to enter the caves because of our desire to take broadcast media to record a revealing story.

Let me give you some sense of the dimensions of this single enormous facility. It encompasses an area the size of 88 football fields. Close to half of that area—40 football fields—is stocked with butter and cheese piled 16-feet high.

In Kansas City alone, there are 727 million pounds of surplus dairy products.

I ask simply why did the U.S. Department of Agriculture refuse to open to public view the food that belongs to the American people? I ask why is Ohio's cheese allotment being cut from 239 to 66 carloads of cheese per month?

I intend to continue working with my colleagues to obtain the release of this food for Americans who need it.

WHAT IS THE ADMINISTRATION TRYING TO HIDE?

(Mr. ECKART asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ECKART. Mr. Speaker, the Republican administration obviously has something more to hide than briefing books. Yesterday, four Members of Congress along with our accompanying media were turned away from a factfinding mission to visit the world's largest storage of Government surplus foods run under Government contract by Beatrice Foods of Kansas City.

Beatrice Foods, which receives hefty sums from the taxpayers to store this commodity, interestingly enough just assured us on Friday that we could tour the facility. But, over the weekend someone caused Beatrice Foods to do an about-face. Yesterday they closed their doors to the American people.

Mr. Speaker, we do know what is going on there. Approximately 727 million pounds of surplus foodstuffs are sitting in warehouses in Kansas City, enough to feed the poverty-stricken Americans for a whole year.

I can understand why the administration might want to hide this. I would be embarrassed, too. But I do not understand what they are afraid of. Obviously someone is making a lot of money wasting a lot of food.

American people have a right to know and we have a right in this Congress to know what our Government is hiding. They are not building nuclear warheads, MX missiles, or nuclear submarines in those caves. They are storing Government cheese bought and paid for with U.S. taxpayers' dollars.

But then I guess four Members of Congress found out what Jimmy Carter recently discovered, that this administration is good at hiding a lot of things.

IT JUST ISN'T FAIR—IT'S DIRTY TRICKS

(Mr. WILLIAMS of Montana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILLIAMS of Montana. Mr. Speaker, the date was October 28, 1980; there was a Presidential debate between former President Carter and then-candidate Ronald Reagan.

A newspaper columnist has written "I remember that night. Jimmy Carter wore a blue suit, Ronald Reagan wore a suit of armor."

The question is: Where did he get that suit of armor? Well, it turns out now that Jimmy Carter's question-and-answer briefing book that prepared him for that debate was well, it was purloined.

And the chief of staff at the White House, James Baker III has said, he received the briefing book. He got it, he remembers, from William Casey.

Casey is the head of the CIA. I wonder who is going to investigate this matter.

The point is it is dirty tricks. It is as dirty a trick as was overseen by another Republican President, Richard Nixon. And "It just isn't fair" for the Republicans to jam the telephone lines to prevent people from calling into the Democratic telethon; it "just wasn't fair" to break into Watergate and "it just isn't fair" to have stolen Jimmy Carter's briefing book and so prepared Ronald Reagan for those debates. "It just isn't fair."

SALLY RIDE HAS PROVEN THAT NO FIELD OF EMPLOYMENT HAS TO REMAIN AN UNATTAINABLE DREAM FOR ANY WOMAN

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, it is ironic that at the same time we have sent the highly educated Sally Ride into space, the Reagan administration is withdrawing support for educational programs that made it possible for her to be there. We cannot effectively explore the final frontier until we have conquered the frontier of equal educational opportunity for all of our children. Sally Ride has proven that no field of employment has to remain an unattainable dream for any woman. It is time to move forward with title IX, to improve the quality of education for all our children, to make sure the opportunities are there for any child's inquiring mind that wants to explore them.

Women are entering institutions of higher education at record rates. Yet the Reagan administration and the Department of Education have passed up opportunities to appeal restrictive court decisions of title IX. Reagan administration officials have criticized title IX. The Reagan administration is sending a message to our Nation and to the world that it does not care about the quality of education for half of our children. If Einstein had been a girl, the Reagan administration would have told her to go home and play with her dolls.

PRESIDENT REAGAN SHOULD ACT FORCEFULLY TO SAVE LAND REFORM IN EL SALVADOR

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, I call on President Reagan to act forcefully to save land reform in El Salvador.

Yesterday, Christian Democrats charged that rightwing forces are trying to destroy the land reform program.

They fear that this would strengthen those who argue that violence is the only road to justice in Salvador.

Mr. Speaker, Central Americans have endured generations of oppression and degradation.

They are crying out for a victory of justice over greed.

The United States should heed the advice of the Pope, not the oligarchy.

We must not defend an unjust status quo, promoted by the privileged few.

We should reject those who would destroy land reform, and tolerate right wing death squads.

These reactionary forces mock our values.

They aid and abet communism, by creating the conditions that Communists exploit.

By keeping the heel of the boot on the necks of the poor, they are inviting "feet people" to America, in search of a better life.

MAINTAIN THE BROADEST POSSIBLE COMMITMENT TO TITLE IX

(Mrs. BOXER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOXER. Mr. Speaker, I welcome Congresswoman BURTON to the House, and it is fitting that today we speak about title IX.

Mr. Speaker, title IX of the Education Amendments of 1972 opened the door to educational quality for women. The choice of careers from science to sports would no longer be denied to women. Today we see attempts by this administration to narrow those opportunities.

The intent of Congress was clear; educational discrimination on the basis of sex is illegal. Title IX does not say discrimination in the lab is all right as long as women's sports are funded. It does not say no discrimination on federally funded research projects but no discrimination to women who want to take the basic sciences. It plainly and directly says discrimination on the basis of sex is illegal.

We must join the U.S. Commission on Civil Rights in urging the administration to maintain the broadest possible commitment to title IX. We must, I believe, by resolution of this body, make unmistakable our belief in and support for the broad opportunities title IX has provided for women and insist on their widest application.

Sex discrimination in education is illegal and immoral, and we are irresponsible if we do not act to end it now.

CONGRATULATING CONGRESSWOMAN SALA BURTON ON BEHALF OF THE PEOPLE OF GUAM

(Mr. WON PAT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WON PAT. Mr. Speaker, nothing could please me more than to join with our colleagues today to congratulate Congresswoman SALA BURTON as she is sworn in to her new office.

My friendship with your late husband is well known as is his love for the territories. I am confident that SALA will carry on in the great tradition of her husband and also reflect her own strong feelings on a wide variety of issues facing this Nation.

SALA BURTON has won her seat by virtue of hard work. She deserves to represent her district and I know she will prove to be one of the best Members of Congress, regardless of gender.

I wish her the best of success as she begins the hard work of representing her congressional district. I welcome her to the Congress and to the House Interior Committee. I know that all of us look forward to working with SALA in the days and months ahead and I certainly stand ready to do all I can to help her in any way I can. SALA, on behalf of the people of Guam, welcome to the House.

Thank you.

REFORM RULE ON LIMITING RIDERS TO APPROPRIATIONS BILLS

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, I think the Supreme Court's decision on the legislative veto was a correct one but it does present a problem on how to oversee and control the bureaucracy.

Some have argued as will be argued today or tomorrow on the floor that what we need to do is pass a joint resolution and get a Presidential signature on every regulation that the Government offers. I think that is an unreasonable and unrealistic approach.

But I do suggest that the leadership review the issue carefully, and we again look at the rules we passed in the Democratic Caucus last year limiting riders on appropriations bills and further limiting those riders that can be offered to the Appropriations Committee.

The power of the purse is the primary method for this Congress to control the executive branch. By limiting riders on appropriations bills, and those may be good riders as well as uncomfortable ones, we unnecessarily give up a power constitutionally given to us.

By limiting this power to members of the Appropriations Committee only, as it is under current rules, this process excludes all other Members of Congress, except in very unusual circumstances, to have that oversight power over the bureaucracy.

So, I suggest we seriously consider revising our House rules to renew the power of any Member to offer a rider on an appropriations bill so that we let the bureaucracy know that we intend to exercise our power in a constitutional and effective manner.

IN SUPPORT OF TITLE IX

(Mrs. BOGGS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BOGGS. Mr. Speaker, especially on this day when SALA BURTON has been sworn in as a Member of this House, I am proud to join my colleagues in cosponsoring House Resolution 190, which reaffirms congressional support of title IX of the Education Amendments of 1972. As we all know, title IX prohibits gender discrimination in educational institutions which receive Federal financial assistance.

Less than a week from today, everyone in the United States will celebrate Independence Day. On July 4, we recall our freedoms of association, speech, religion, choice of representation, and the right to pursue happiness. I think we should view title IX in the same context. Through this important statute, every American has the freedom to pursue his or her interests within our education system without discrimination based on sex.

Title IX works, and its results are borne out in statistics on gains that women have made in education and the professions. Since title IX was introduced in 1972, the share of professional degrees earned by women has quadrupled to 30 percent. By 1980, the percentage of female students in federally funded agricultural, technical trade, and industrial programs had risen from 8 percent (1972) to 28 percent.

In giving our youth an equal opportunity in education, we invest in the future of our country, insuring economic advancement and self-sufficiency for them and greater productivity and prosperity for our Nation. We must maintain a sound educational system by guaranteeing our Founding Father's call for equity and freedom from artificial restraints.

Regulatory or court-imposed attempts to limit the scope of title IX would be a giant step backward in the progression of our democracy.

The success of a broad interpretation of congressional intent in title IX was demonstrated by Sally Ride's magnificent performance on the space shuttle *Challenger* last week. Women are free to sharpen their talents through higher education and follow their dreams to the stars. It is our responsibility as legislators to make sure they have that chance.

WE DON'T NEED ANOTHER VIETNAM

(Mr. McCLOSKEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCLOSKEY. Mr. Speaker, yesterday I received a very, very short, but to the point letter which I believe is indicative of true grassroots and patriotic feeling in America. I cannot imagine any place more central to America than the Eighth District of Indiana. It comes from Princeton, Ind., deep down in Gibson County:

PRINCETON, IND., *June 23, 1983.*

CONGRESSMAN MCCLOSKEY: Please, please, don't vote on anything that gets us deeper into that stupid war in Central America.

Please, make them sit down and talk!

I know we are selling them arms, but put a trailer on them—they must talk before they get the arms.

Something must be done. We don't need another Vietnam.

Sincerely and loyally,

BETTY MCCANDLESS,
Americanism Chairman,
VFW Auxiliary 1147.

Ms. McCandless, a true American, stresses these are her individual views.

PARLIAMENTARY INQUIRY

Mr. SOLOMON. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. (Mr. BROWN of California). The gentleman will state his parliamentary inquiry.

Mr. SOLOMON. Mr. Speaker, I am just concerned with fairness. We have heard a lot about it on the floor here this morning, but I understand it is the Speaker's policy to recognize those Members who wish to address the House for 1 minute in the order in which they came.

We naturally give the Democrats first preference, but it seems in recent days we see Members sitting here, like myself, for an hour and 10 minutes now and then we have other Members coming in on the Democratic side in the last 5 minutes. I would hope that the Speaker would continue his policy of once the Democrats have been recognized in the order in which they came, followthrough with the Republicans in the act of fairness and then go back to those who came in later.

Is that the policy of the Chair, Mr. Speaker?

The SPEAKER pro tempore. It is in the discretion of the Chair to recognize Members as he sees fit; however, the Chair invariably seeks to be fair in his procedures. This Chairman certainly does seek to be fair.

Mr. SOLOMON. I knew the Chair would.

EVEN THE MOST VIGILANT HAS A BLIND SPOT

(Mr. SENSENBRENNER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SENSENBRENNER. Mr. Speaker, yesterday's Washington Times reported that hearing transcripts have been altered involving Government Operations Subcommittee investigations into the silver market and the synthetic fuels program. Both these investigations, together with the EPA hearings held last July in which altered transcripts have been previously discovered, were extensively covered at the time by the network news media. However, the networks have so far failed to give the American public any word of the criminal misconduct on the part of those who doctored these transcripts. The motto of this story is "Even the most vigilant has a blind spot."

CARGO PREFERENCE RESOLUTION

(Mr. ROBERTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROBERTS. Mr. Speaker, I would like to commend my distinguished colleague and good friend and neighbor from Nebraska for introducing this resolution today. It simply expresses the will of Congress that further expansion of cargo preference, is not in the interest of the United States and should not be imposed. The current cargo preference requirements are extremely burdensome to U.S. farmers and to U.S. agricultural exports. I urge my colleagues to cosponsor this resolution.

Let me say at the outset that I believe we need a strong merchant marine that can support our Navy and commerce during times of national emergencies. However, like most in the agricultural sector, I disagree with the use of cargo preference as a means to protect the national interest in a strong maritime industry at the expense of agriculture. Furthermore, I strongly object to any expansion of cargo preference.

Many of the legislative initiatives proposed this year would expand cargo preference to the blended credit program the USDA has implemented for export sales. This would be disastrous to our efforts to rebuild agricultural exports lost as a result of the U.S. grain embargo. The blended credit program is clearly a commercial program designed to meet foreign competition in interest rates on commercial exports sales. It does not fall under cargo preference requirements. Even during the heyday of subsidized U.S. agricultural exports in the 1950's and 1960's, commercial sales were traditionally exempt from cargo preference requirements whether subsidized or not. Expansion of cargo preference to the blended credit program would render it useless as a program to promote exports and continue the slump in export sales.

Given the current budget atmosphere of record deficits, it is unlikely

that Congress would increase USDA appropriations to pay the increased cargo preference costs. Expanded cargo preference will be paid by the U.S. farmers at a time when they cannot afford the additional burden. Once again, I urge your support for this resolution.

TITLE IX—A FAIR SHOT AT ACHIEVING EQUAL OPPORTUNITY FOR EDUCATIONAL ADVANCEMENT

(Mrs. SCHNEIDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHNEIDER. Mr. Speaker, recently, efforts have been launched through the courts to restrict the enforcement powers of title IX. If allowed to continue, such efforts will in effect take the teeth out of title IX's ability to fight discrimination in our educational institutions.

In response to the decisions of this past year, 170 of my colleagues have joined me in support of my resolution which reaffirms congressional support for the original, comprehensive enforcement powers of the title IX regulations.

Among my colleagues, I have found a tremendous lack of understanding about what title IX does and does not do. For instance, few Members will argue against the goal of equality in education. In fact, with the recent success of Dr. Sally Ride, Members have praised and expressed pride in the fact that a woman has broken yet another barrier of achievement. Yet, when we get down to defending programs and policies which guarantee equality to women, many Members shirk away from action.

Much of the hesitation, I believe, is due to misconceptions. Somehow, Members support equality in admissions or equality in specific academic programs but cannot support title IX because they are afraid it will weaken the hometown football team or reduce the local university basketball scholarships. For example under title 9 in NCAA intercollegiate athletic departments, colleges spend $2,156 on every female athlete and $5,257 on each male—a 144-percent difference. And while women's athletic budgets in the past 5 years have grown, men's budgets have also increased some 20 to 30 percent. Title IX does not take dollars away from men's athletic programs.

Last, an argument I hear almost daily speaks to the fact that men's sports generate revenue that women's programs do not. The truth is that close to 65 percent of all men's athletic programs failed to generate the sufficient revenues to cover expenses. This included football and basketball revenues as well.

Skeptics—wake up. Title IX does not mean coed dorms, coed bathrooms, or unisex basketball teams. It does mean a fair shot at achieving an equal opportunity for educational advancement. Surely, the next generation of women and men are entitled to this.

CONDEMNING PROTEST AT VIETNAM MEMORIAL

(Mr. SOLOMON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SOLOMON. Mr. Speaker, last week, I joined Congressman CHRIS SMITH and 22 other Members in signing a letter to Secretary of the Interior James Watt. We have asked him to keep this Saturday's protest against U.S. policy in Central America from being staged within obscenity-shouting and rock-throwing distance of our Vietnam Veterans Memorial.

The issue, Mr. Speaker, certainly cannot be free speech. Lord knows, any group of Marxists, peaceniks, and assorted sixties leftovers is certain to get their chance to mouth off in front of the TV cameras most any time they want.

But I, for one, resent seeing the polished black granite slabs of the Vietnam Memorial being used as the set for this anti-American extravaganza. Most of all, I resent seeing the names of 57,000 dead Americans used as silent extras in a loud and sordid production that will mock their patriotism and their sacrifice.

It is time to bring the curtain down on this mockery. It is really just a tired rerun of those street productions staged a few years back, with words and music by Daniel Berrigan and Abbie Hoffman.

This time, though, the arena is different. You can say what you want about the design and the setting of the Vietnam Memorial. But one thing is certain—we built it for our brave fallen soldiers, not Jane Fonda.

HOSPICES SHOULD BE ALLOWED TO SUBCONTRACT WITH MEDICARE CERTIFIED PROVIDERS

(Mr. BOEHLERT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOEHLERT. Mr. Speaker, over the past few years, health care providers and the Government have been searching for more humane ways to care for the terminally ill. Hospices provide a unified approach to death that combines medicine with humanistic concern for patients, giving them the chance to die with dignity and less pain among those who care about them most. As part of that effort, the Congress last year passed legislation designed to promote hospice care by making it eligible for medicare reimbursement.

Much attention has been focused on proposed regulations—now being rewritten—that would have severely limited the amount of care medicare would pay for. But a less noticed provision in the actual law could have an equally debilitating effect.

Included in the Tax Equity and Fiscal Responsibility Act were provisions to extend reimbursement under medicare to hospices—but only to those able to provide all of four specific core services directly to patients. As the law is written, a majority of hospices in the United States are prohibited from medicare coverage because they subcontract health care services—a practice current HHS regulations does not permit.

The effect of this regulation in New York State would be to make 92 percent of the hospices participating in the State's 3-year demonstration program ineligible for medicare. Similarly, 53 percent of the hospital-based hospices in the State would be ineligible.

We should be doing all we can to enable the terminally ill receive humane care at home. I strongly support the efforts to change portions of existing law to allow hospices to subcontract with medicare certified providers. Each community has to determine its own needs, resources, and objectives while offering a decent, compassionate approach to the care of the terminally ill.

□ 1300

TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

(Mr. McKERNAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McKERNAN. Mr. Speaker, as we talk about title IX today, I would like to share with my colleagues a brief article which appeared in the June-July 1983, Women's Equity Action League "Washington Report" on women in education.

While the success of title IX is proven in the vastly increased higher education accomplishments of women students, the growth in student opportunities since the passage of title IV has not yet translated into professional advancement for women in education. This report indicates that in the fall of 1980, over half of the college population were women. Participation in nontraditional fields has skyrocketed. Women went from 4 to 25 percent of business students, from 9 to 23 percent of medical students, and from 7 to 31 percent of law students.

But also in 1980, women held only 26 percent of the full-time faculty positions, only 10 percent of the professor-

ships, virtually the same as in 1970. Women on campus in 1982 were earning 85 percent of the salaries of their male coworkers.

Title IX has been a success. We need to continue with title IX, and I am proud to be a cosponsor of Congresswoman SCHNEIDER's legislation, and I encourage my colleagues to join me in this show of support for title IX.

EMPTY FIELDS, EMPTY STORAGE BINS, EMPTY STOMACHS

(Mr. STARK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STARK. Mr. Speaker, I want to present to my peers today another pertinent paragraph in the preposterous panorama known as PIK. Today's paragraph is entitled "Empty Fields, Empty Storage Bins, Empty Stomachs."

Mr. Speaker, under the payment-in-kind (PIK) program, the taxpayers are paying for empty fields. As a result of that program, the taxpayers are also paying premium prices for empty storage spaces. In Oakland, and in many other parts of the country, there are empty stomachs.

The facts about taxpayer payment for empty storage bins is detailed in the latest issue of Farm Journal.

Last year, with huge surpluses looming, the USDA through the Commodity Credit Corporation began leasing large amounts of storage space to deal with the grain. Then came PIK, which gave farmers the surpluses for not planting. However, the storage space remained under contract:

> As a result, the CCC could end up paying millions of dollars for storage space even though it no longer owns any grain. . . . With PIK payments already beginning in some parts of the country, the future of the grain stored under these long-term contracts is uncertain. What is certain is that the CCC is obligated to continue paying.

I hope that the USDA can at least be innovative in the use of this empty space, rather than letting it go to waste. The bins could be used to house the tens of thousands of homeless. Perhaps the Department could rent them to the Pentagon so that the homeless MX could be temporarily housed in these "grain silos."

More seriously, Mr. Speaker, our Nation's farmers are in desperate straits. PIK has helped them to make it through another year. Though I think PIK has benefited the farmers, I believe it was more by accident than design and that a much less costly and more effective program could have been designed. The boondoggles that have and are occurring, such as paying for nonstorage costs, are going to continue to cost the taxpayers billions and do nothing to solve the root causes of the farm problem.

CHILDREN ARE DYING OF STARVATION IN ETHIOPIA

(Mr. LOWRY of Washington asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOWRY of Washington. Mr. Speaker, I am concerned that sometimes we get so involved in crossing the t's and dotting the i's that we really miss the important things happening in the world.

Fifty to a hundred children are dying a day in Ethiopia. Fifty to a hundred children are dying a day in Ethiopia of starvation. It is feared that there will be up to 200,000 people die this year in Ethiopia of starvation.

Now, I do not think there is any magical answer to the Ethiopian disaster. I am not saying the United States can move ahead and just eliminate starvation in Ethiopia overnight. The problems are complex. But we can certainly do much more about it than we are. And when you have that sort of a international disaster going on in this world, a great nation should be saying: "What can we do to try to correct that?"

There is no excuse for not trying to save 200,000 lives. We have a responsibility to do all within our power to help the starving people of Ethiopia.

FAMINE IN ETHIOPIA

(Mr. DASCHLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DASCHLE. Mr. Speaker, I rise to voice my deep concern for the starving people in Ethiopia and my anger over our Government's response to this tragedy.

It is estimated that 100 children a day are dying of starvation in Ethiopia. And the death toll is expected to increase until the November harvest. Many have expressed the fear that the famine may take the lives of at least 200,000 people.

And what has been the response of the U.S. Government? It has been very little indeed. Catholic Relief Services requested food for Ethiopia in December, and 5 months later, the American Government finally released 4,000 tons of grain. And a month ago 70 Members of Congress wrote the Agency for International Development asking that we help fill the United Nations' request for $35 million for emergency aid for Ethiopia. And what has been our Government's answer? The answer has been no answer. No response has been made to the 70 Members of Congress.

While it is proper for the United States to weigh political considerations in our foreign aid decisions, the starvation of thousands of people, most of them children, should not be viewed as a political situation. Dying children are not Marxists, Communists, capitalists, or Socialists. They are desperate, dying human beings. And we should help them. We have the ability to help them.

Many of you have been reading the series by Jay Ross in the Washington Post about the famine in Ethiopia. The picture and the account of the 2-year-old girl who weighed 9 pounds, and who is surely now dead, really says it all. As a parent of three children, I compare them to this child in Ethiopia and also think of what the parents of that child are enduring, and I have no patience for the silence of the State Department and the hedgings of Jean Kirkpatrick. They bring to mind the words of Bob Dylan, "How many times must a man turn his head and pretend that he just doesn't see?"

THE IMPORTANCE OF TITLE IX

(Ms. SNOWE asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. SNOWE. Mr. Speaker, last week I was privileged to witness the launch of the space shuttle *Challenger*, which among many other important achievements, carried the first American woman into space. The thrill of Sally Ride's accomplishment was shared by each and every American.

This achievement was possible in large part because of the extraordinary determination and talent on astronaut Ride. But it was also a tribute to the two-decade long struggle to break down the barriers to equal educational opportunity for women. Our progress has been substantial, but the struggle is far from over.

Unfortunately, many of our hard-won gains remain in jeopardy. By the end of this week, the Justice Department will offer an opinion on the scope of title IX of the Education Amendments of 1972, the most important legislation guaranteeing women equal access to educational opportunities. At issue is whether title IX's prohibition on sex discrimination applies only to a program receiving direct financial assistance or extends more broadly to any school receiving, Federal financial assistance. To limit title IX to only those programs receiving direct Federal assistance would be an unconscionable retreat on this country's commitment to equal educational opportunity for women.

BRIDGES AND HIGHWAYS SHOULD BE SAFE

(Mr. MORRISON of Connecticut asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORRISON of Connecticut. Mr. Speaker, last night in Connecticut

we suffered a tragedy on one of our highways due to the collapse of a bridge on Interstate 95. At least three people are dead because of this tragedy, and I think it is important for the House to pause and reflect on why this has occurred.

Two things are important: First, the deterioration of our infrastructure around this country is not a minor matter. It is an emergency. The White House should not be asking us to defer spending on funds that are being collected from the highway trust fund. We need to move ahead on an emergency basis to make our highways and bridges safe again.

Second, much of the deterioration is caused by heavy trucks, a situation that will be further aggravated by the House's recent decision to override the views of States like Connecticut about the weight and size of trucks that should be traveling on these highways. States know best as to whether their highways are safe and can accommodate tandem trailers and larger trucks, and I hope this House will look favorably on reconsidering its mistake of last December in overriding the decision of States like Connecticut in this area.

HOUSE LEADERSHIP SHOULD COME CLEAN ON ALTERED TRANSCRIPTS

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, earlier today it was suggested that this administration might have something to hide. What I am convinced of at this point is that the leadership of this House must have something to hide, as well.

At least in the matter of the doctored and altered transcripts that have emerged from some of the committees of this House, we find that, stone by stone, the wall around here is getting higher and higher as the leadership does not allow a proper examination of that issue.

For example, some of us who feel that damage has been done by that incident asked that documents in the Government Operations Committee over the past 2 years be set aside for examination. That was done in a letter from the chairman of that committee. However, just today, just a few minutes ago, a member of the minority staff asked to begin review of those documents, to put them side by side and find out whether something has gone wrong. That was denied. These are public documents that we are asking to review, and it was denied.

We are dealing with criminal misconduct in this case, and the House evidently is not willing to be dealt in.

PERMISSION FOR SUBCOMMITTEE ON ADMINISTRATIVE LAW AND GOVERNMENTAL RELATIONS OF THE COMMITTEE ON THE JUDICIARY TO SIT ON TODAY AND TOMORROW, DURING 5-MINUTE RULE

Mr. SAM B. HALL, JR. Mr. Speaker, I ask unanimous consent that the Subcommittee on Administrative Law and Governmental Relations of the Committee on the Judiciary be permitted to sit on June 28 and June 29, 1983, while the House is considering amendments under the 5-minute rule.

The purpose of the meeting on the 28th is for markup on two public bills and several private bills, and the purpose of the meeting on the 29th is for a hearing on H.R. 2327, the Regulatory Reform Act of 1983.

The minority has been consulted and has agreed to this unanimous-consent request.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was not objection.

THE RELEASE OF 15 PENTECOSTALS BY SOVIET UNION

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, a little over a year ago, while in Moscow visiting Jewish refuseniks, I had the rare privilege to meet with the then seven Pentecostal Christians who had taken refuge in our Embassy. After about an hour of enlightening but heartbreaking conversation through an interpreter, we had a time of prayer led by Peter Vashchenko. Peter's words were moving, inspiring, and courageous. Despite setbacks, obstacles, and apparent futility, Peter was convinced that persevering faith and abiding hope would prevail in the end. I think it is highly significant that during our prayer he not only prayed for himself and his family and friends, but he prayed for all of those who are suffering oppression and religious persecution in the Soviet Union. He even offered a word of prayer—of forgiveness—for those who were responsible for his exile. I do not think any better example of Christian charity is to be found anywhere.

Mr. Speaker, today's heartening news of the release of the 15 Pentecostals is compelling testimony to their perseverence and faith in Jesus Christ.

Finally, Mr. Speaker, I think the Soviets should know that we are truly grateful for this positive gesture and that we look forward to additional signs of goodwill that will do much to mend and repair relations between the United States and the U.S.S.R.

A $73 BILLION TAX INCREASE

(Mr. COURTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COURTER. Mr. Speaker, last week the majority of this body passed the first budget resolution for 1984, and in the resolution were provisions that would increase taxes on the American people by $73 billion over 3 years.

Not one individual that I know took the well to explain in his own mind how best that $73 billion would be raised.

Mr. Speaker, I think this would be a better institution, I think Members would be a lot more intellectually honest with themselves and their constituents if, at the same time they voted to raise taxes by billions of dollars they came forward and explained to their constituents and the American people exactly what taxes they were going to impose and who would have to pay them.

A POINT OF PERSONAL PRIVILEGE

Mr. GREGG. Mr. Speaker, I rise to a question of personal privilege.

The SPEAKER pro tempore. The gentleman will state the question.

Mr. GREGG. Mr. Speaker, on July 21 and July 22, of last year, I participated as a member of the Science and Technology Committee in joint hearings before that committee. The printed hearing record of those hearings was not received until April 27, of this year. Upon review of that official record, I discovered that several statements which I had made during the course of those hearings were materially altered in such a way as to reflect upon my integrity and conduct during those hearings.

While the falsification of a House document is clearly a matter involving the integrity of the proceedings of this body, the alterations of my remarks, without my permission, affects my rights as an individual Member in my representative capacity. I therefore rise to a question of privilege in order to clarify the record on this matter.

The SPEAKER pro tempore. The gentleman states an appropriate point of personal privilege, and the gentleman is therefore recognized for 1 hour.

Mr. GREGG. Mr. Speaker, I take this matter of personal privilege extremely seriously. It is the first one that I have ever sought on this floor and, quite honestly, I hope it will be the last. Personal privilege in and of itself reflects a seriousness of purpose and a recognition that something extraordinary has happened within the legislative process. And in this situation, the extraordinary occurrence is

one of extreme severity and one which reflects and seriously threatens the integrity of this House and the processes of the House of Representatives.

The hearings which I have referred to were hearings involving five subcommittees of three major committees of the House of Representatives into the activities of the Environmental Protection Agency. The subcommittees involved were two from the Government Operations Committee, two from the Science Committee and one from the Commerce and Energy Committee.

The Government Operations Committee subcommittee chairman, Mr. TOBY MOFFETT of Connecticut, was the chairman of the hearing process. The Science and Technology Committee rooms were used as the location of the hearings. During that hearing process, there were numerous intense exchanges between the minority and the majority. There was a perception within the minority that we had been ill-advised and kept unadvised by the majority as to the manner and processes of the hearing, that witness lists were not made available, the testimony was not made available, that the direction and purpose of the hearings were not made available.

During one of these exchanges, when I was questioning the activities of the majority in this hearing—and let us remember that this hearing was taken down in a verbatim transcript by a court reporter who was serving the legislature at that time, and all witnesses were put under oath.

□ 1315

I asked a question, or made a point which involved the following statement:

I look at the staff over there, and I wonder how we have so many staff members on the majority side they did not have the time to get back to us.

That was what I said at the hearing. That is what appeared in an original transcript which we discovered. In the transcript as printed, which printing occurred under the auspices of the majority staff of the Government Operations Committee, Subcommittee on Environment, Energy and Natural Resources, that statement was reported in this manner:

I look at the staff over there and I wonder how we have so many staff members on the minority side they did not have time to get back to us.

The term "majority" which I had used was turned around 180° and replaced with "minority."

Further in the hearing I was discussing the activities of the EPA and the State of New Hampshire where we have had considerable contact with the EPA over hazardous wastes. My statement in the record was as follows:

There were no partisan attacks on the EPA's failure to come into New Hampshire.

That was my statement in the original record. I better make that clear. We are talking about two different records, what was the record that was actually created and what was the record as was alleged to have been created and printed. In the printed copy of the testimony as presented and put forward as the accurate statement of that hearing, that statement which I just read to you, the original statement being, "There was no partisan attack on the EPA's failure to come into New Hampshire," was changed as follows:

There were no partisan aspects to the EPA's activities in New Hampshire.

The two statements bear almost no relationship to each other. One involves what we did relative to the EPA, how we as Members of Congress and also as people working in the State, the State-elected officials, related to the EPA; the other statement, just the opposite, involves how the EPA related to the State of New Hampshire when it was working in New Hampshire.

Those are two of the changes which occurred to my statements at that hearing in that transcript. There were, however, over 112 other changes in that transcript, at least 20 to 30 of which were substantive changes, the intention of which was to change the direction, the meaning, the purpose of the minority member making that statement or to add meaning and purpose, and in some cases entire phraseology to the majority member who was making a statement.

There were also, during that hearing, a number of documents submitted for the record, at least eight, which never appeared in the record as printed.

Now, there was an underlying theme to the changes also, and I think that is important. The theme of the changes was to make Republican members who were participating in that hearing appear less knowledgeable, less competent, and unfortunately, ineffective, and to make the majority members, at least in two instances, the chairman of the hearing and one other member, appear to be much more responsive to points which were raised by Republican members than they had actually been.

Further, there were changes which went to the witnesses' statements. Witnesses who had been called by the committee to testify before the committee, their statements were changed without their authority and in a rather dramatic way.

On top of this, specific hearings which many of us last week talked about on this floor, which we had hoped was a single incident and one which just was an aberration of the system, we now discover that other transcripts from other hearings have been altered in material and substantive ways. Again, the Government Operations Committee, Subcommittee on Energy, Environment, and Natural Resources, while holding a hearing under Congressman MOFFETT, this hearing involving the Synthetic Fuels Corporation, it now appears, although we have not been able to get access to the original documentation but we think we have enough access to be fairly confident, that that transcript was doctored.

Another situation on another subcommittee, the Government Operations Committee, Subcommittee on Monetary and Consumer Affairs, in a hearing involving the silver issues which were raised back in 1980, it now appears, and we have definite documentation that those transcripts were dramatically altered in relationship to one of the testimonies of one of the people brought up here from the executive department to testify before that committee. That committee was chaired by the late Benjamin Rosenthal.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I will yield to the gentleman from Pennsylvania for purposes of debate.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, if I understand the point that the gentleman is making, what we are now finding is that we are not dealing with an isolated matter here as originally was perceived; we are dealing with a systematic attempt to change records in a number of very controversial matters, things took place in this Congress, which are 180 degrees different from the actual fact.

Do I understand the gentleman is saying that it goes to at least three very controversial hearings that were held in the Government Operations Committee?

Mr. GREGG. That is correct.

Mr. WALKER. The silver hearing was given a lot of media attention, there was an awful lot of talk about that around the country. There was television and media attention on that. The same thing was true of the synfuels hearing. The same thing was certainly true of the EPA hearing.

In other words, the final public document then reflects something wholly different from what the public was led to believe along the way, or at least the majority is attempting for the sake of history to make something appear different than what actually took place?

Mr. GREGG. That is correct.

Mr. WALKER. If the gentleman will yield further, I thank the gentleman, because I think that this puts the whole issue into some new light. What we are now finding is that the matters that concerned us because we were directly affected by those original tran-

scripts now go far beyond that and appear to be a systematic effort to change the record of this House.

That is a matter of the highest significance because it involves the very integrity of our proceedings, and I think the gentleman is to be congratulated for bringing this to us here on the floor, because we are dealing with a very serious matter that, as I mentioned earlier today, is a matter of criminal misconduct.

Mr. GREGG. The gentleman is absolutely right. It is a matter of criminal misconduct, and just to get the whole issue out on the floor, we are talking about a series of hearings which had substantive changes in the transcripts, and let us remember what these transcripts are used for.

First, they are used to establish legislative history, not only for this Congress as a body, but for all the court decisions which arise out of the laws which we create. The very essence of the system of this country is our laws, and yet the decisionmaking process on those laws is being threatened by the fact that we have changed, fundamentally changed, or somebody has changed in an organized manner, it would appear, the transcripts from these hearings.

Second, these transcripts as printed represent for us our history. This is the history of the U.S. Congress, the greatest deliberative body that has ever been brought forth on Earth, on civilization, and yet we, as a deliberative body, are finding that our transcripts have been changed and our purposes changed within those transcripts.

That goes to the fundamental issue of the integrity of this House.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. GREGG. Yes, I would be happy to yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. I thank the gentleman for yielding.

Mr. Speaker, I believe that there is one further very serious issue that has not been given too much discussion, and that is the potential of someone being prosecuted and convicted of perjury based upon a doctored record.

In all of the EPA hearings held last July that the gentleman has raised his point of personal privilege on, the witnesses were sworn to tell the truth, and they gave their oral and written communications. However, if the oral and written communications were changed, as has been the case in some of the witnesses, then a witness could potentially subject himself to perjury based on a record saying something exactly the opposite of what he actually said.

This is a very serious offense, and given the emotionalism surrounding the Environmental Protection Agency during the administration of Ms. Burford, I think that we have got to look very seriously at the chilling effect that this will have on a witness wanting to come to appear before the Congress to tell us how an administrative agency is discharging its responsibilities under the law. If what appears in print is different from what is actually said and one is thus subjected to potential criminal prosecution as a result of this, certainly the Congress ability to conduct oversight investigations into executive branch functions is certainly going to be substantially hampered.

For that reason, I salute the gentleman from New Hampshire for bringing this issue to the floor because I believe that we are going to have to get through the wall of coverup that is coming around this issue, as the gentleman from Pennsylvania (Mr. WALKER) said earlier on today, and find out who has been doctoring these records, fire those people from the staff, and submit the matter to the Justice Department so that they can be prosecuted for what they have done.

Mr. GREGG. And it should be noted, of course, that the silver hearings were equally as controversial as the EPA hearings, and perjury could certainly arise out of either of these transcripts now that they have been doctored, and who knows what other transcripts? We have not had access yet to get into the other issues.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

Mr. Speaker, the gentleman has been talking about altering of transcripts of hearing records, but I must tell the gentleman, as he was discussing this issue, it brought back to mind other things that we might look into, and that is the question of what reports show as opposed to what was discussed in committee. Let me give an example.

On some hearings that I am personally involved in, there was an attempt made to insert into the record for the purposes of the report matters that had not been discussed within that hearing. I also remember a couple of other instances where subcommittee staff has put out as subcommittee reports, studies that have been done elsewhere, and that they then published as subcommittee reports and the subject matter was not a matter of the hearings.

So it goes far beyond just that very serious changing of transcripts that the gentleman is talking about, but also the reports are read many times in order to develop the history of what happened and how the legislation came into being.

So it is my impression that with the discussions here this morning and the things that I am personally aware of, that staffs who put those reports together really take some tremendous liberties. It is a serious, serious matter and I am glad that the gentleman has taken this opportunity to bring it before the full House. I commend the gentleman.

Mr. GREGG. I appreciate the comments of the gentleman from New Mexico.

I was not aware of these instances that he is referring to. I think that just reinforces my concern that we have some open and affirmative investigation of this whole issue, because clearly, at least within the Committee on Government Operations we are seeing a fairly extensive situation, and now the gentleman is talking about other committees with the report issue. We have got to get into this in an open way, I believe.

Mr. HILER. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Indiana.

Mr. HILER. I thank the gentleman for yielding.

Mr. Speaker, I think all of us naturally are quite concerned about what transpired in that particular EPA hearing last July, but I know the gentleman is also immensely concerned with other possible criminal conduct relating to other hearings.

I wonder if the gentleman might just bring us up to date on where the process stands in our trying to evaluate previous hearings and previous transcripts to check it with the printed record within the Government Operations Committee.

□ 1330

Mr. GREGG. Mr. Speaker, we wrote the chairmen of the Committee on Government Operations, Committee on Science and Technology, and the Committee on Energy and Commerce, and asked all of them to make available to us records of not only this hearing, the EPA hearing, but, in the case of the Government Operations and Science and Technology Committees, extensive records on other hearings in which the subcommittee is involved, in the EPA hearings, or would have been involved in, such as the synfuels hearing.

At this time part of the records have been made available to us, but the balance of the records, as, I believe, one of the Members in the 1-minute speeches this morning alluded to, are not being made openly available to us and our staffs. They are being made available to our staffs or to ourselves in our controlled environments, but without staff participation, and clearly we do not have the capacity or the ability to go through and, page by

page, compare the original transcripts with the printed transcripts, which is exactly what has to be done here. Thus we are being stonewalled a bit.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I am happy to yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. Mr. Speaker, is the gentleman from New Hampshire telling the House that the majority staff has got access to these transcripts and records but the minority staff does not?

Mr. GREGG. I could not allege who has access to them but clearly the minority staff does not.

Mr. HILER. Mr. Speaker, will the gentleman yield at that point?

Mr. GREGG. I am happy to yield to the gentleman from Indiana.

Mr. HILER. Mr. Speaker, may I ask, are we talking about transcripts of the actual hearings that took place?

Mr. GREGG. We are talking about the original transcripts, which in our opinion are public documents.

Mr. HILER. We are talking about the original transcripts which are supposedly the verbatim recordings of what actually happened in the hearing, and those are not being made available to minority staff to look at?

Mr. GREGG. That is correct.

Mr. HILER. It seems rather phenomenal to me that we have a situation here where we are taking the official public record of what transpired in this House and it is not being made available to our duly appointed representatives in order to look at that material to determine whether our remarks have been altered, changed, or whatever, including anyone else's remarks. It seems rather incredible to me that our staff people would be denied access to look at the original transcripts of the hearings that took place over the last 2 years.

Does that not seem rather outlandish to the gentleman from New Hampshire?

Mr. GREGG. I do not see how we can get to the bottom of this issue and determine what other committee hearings may have been changed or may not have been changed unless we as the minority members who serve on those committees and who are grieved by this situation have access to the original transcripts so that we can make a side-by-side comparison through our staffs, because clearly we are not going to do it. We do not have the time nor the capacity probably to do it.

Mr. HILER. Mr. Speaker, will the gentleman yield further?

Mr. GREGG. Yes, I am happy to yield to the gentleman from Indiana.

Mr. HILER. Mr. Speaker, it seems rather incredible to me that just today we had several 1-minute speeches taking place talking a great deal about whether the administration had access or did not have access to a briefing book in the debate several years ago—we have, I believe, one subcommittee that is currently having hearings on this matter—and we in the House of Representatives cannot even get the official transcripts of hearings that we participated in that have been altered.

Mr. GREGG. I agree that it certainly is ironic.

Mr. COATS. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Indiana.

Mr. COATS. Mr. Speaker, I am astounded to hear about the situation that exists here, and I think it certainly is a black mark on the proceedings of the House of Representatives that such a thing has taken place. It is apparently the epitome of arrogance that the committee staffs are exercising in terms of actually altering transcripts on a partisan basis to make the minority look bad. I think that is very regrettable. It is regrettable that this House has to even discuss such a situation.

I am curious about this. The gentleman has indicated that he apparently is currently undertaking his own personal investigation with his own staff; the Member himself has to make a side-by-side comparison between the original transcript and the altered transcript. Can the gentleman give me any indication of what official actions are taking place in this body in terms of an investigation in this matter?

Mr. GREGG. Mr. Speaker, the initial side-by-side comparison or the initial error which sparked the larger, more expensive discussion was found by a staff member of, I believe, the gentleman from Pennsylvania (Mr. WALKER). On the discovery of that, a written request was made to the chairman of the three committees involved or the subcommittees that were involved in this hearing to have a further, more extensive investigation, and the majority of the Committee on Science and Technology, under the direction of its chairman, the gentleman from Florida (Mr. FUQUA) on its own initiative, and aggressively, did a side-by-side review, which was totally accurate as far as we know—and I beleive it to be—and went the extra mile in trying to find out what type of errors had occurred.

Mr. COATS. And what about the other two committees?

Mr. GREGG. Well, at this time, once that had been done by the Committee on Science and Technology, we then asked for a hearing in the Science Committee, because the Science Committee had been the lead committee, although the chairman of the hearings had been Mr. Moffett from the Committee on Government Operations—the Committee on Science and Technology was technically the lead committee—we then asked for a hearing on the Science Committee, at which hearing the minority requested that we have a hearing on investigating further what happened so we could find out who made the changes and why they made the changes.

That request by the minority was defeated basically on a party line vote and replaced by a request by the majority to send the whole matter on this hearing, only the EPA hearing, to the Ethics Committee, at which time the monority requested that at least the Ethics Committee be directed to hold an open hearing, and that the documents which went to the Ethics Committee be still made available to the minority, because once the issue goes to the Ethics Committee, the document may not be available to anybody except the Ethics Committee.

That open hearing request was beaten on a party line vote, and the request for the documents was agreed to.

So we now stand with the Science Committee having passed a resolution to send the EPA hearing—not the synfuels or the silver hearing or any of the other Government Operations Committee activities, but the EPA hearing—to the Ethics Committee, and we have a request that we still be allowed access to the documents. But we have to remember that when it goes to the Ethics Committee, it becomes basically a closed investigation, and should the person or persons who are identified as having done this resign or quit, as long as they are a staff person and not a Member, then the Ethics Committee loses jurisdiction and the whole matter is mooted out.

So that is where it stands in the Science Committee. On the Government Operations Committee side, we have asked, as I was mentioning and as the gentleman from Pennsylvania (Mr. WALKER) mentioned, for access to more transcripts, original transcripts, of other hearings held by the two subcommittees which we have now identified as having changed transcripts, and so far our access to those transcripts has been limited in scope as to staff review of them, not in scope as to members' review.

Mr. COATS. Mr. Speaker, will the gentleman yield further?

Mr. GREGG. I yield to the gentleman from Indiana.

Mr. COATS. Mr. Speaker, did I hear the gentleman correctly to say that we have documented proof that original transcripts have been altered in such a way as to put the minority in a ludicrous position? We have documented proof of that, and yet when we asked the committee to undertake an investigation of this matter, the investigation was voted down on a partisan basis?

Mr. GREGG. Well, I would not say it was partisan. There was one Repub-

lican who voted with the majority. But the matter was sent to the Ethics Committee on what was essentially—well, it was a party line vote, yes. I suppose that is partisan.

Mr. COATS. Mr. Speaker, will the gentleman yield further?

Mr. GREGG. I yield to the gentleman from Indiana.

Mr. COATS. Am I correct in thinking that there may be some criminal violation here?

Mr. GREGG. There is no question but there are criminal violations.

Mr. COATS. Has the matter been referred to the Justice Department?

Mr. GREGG. At this time it has not been referred to the Justice Department.

Mr. COATS. What has to take place for the matter to be referred to the Justice Department?

Mr. GREGG. We are not absolutely clear on that, but I would anticipate there will be some move to try to refer this matter to the Justice Department.

Mr. COATS. Mr. Speaker, if the gentleman will yield just one more time, for the sake of the integrity of this body, whether we are talking about a Republican matter or a Democratic matter, a majority matter or a minority matter, for the sake of the integrity of this body and the integrity of the Members who sit in this body, I would think that every Member, whether Republican or Democrat, would want to get to the bottom of this and would want a full investigation. If a criminal violation has occurred, it ought to be prosecuted to the fullest extent.

We cannot continue to command to the extent we should the confidence of the public if we are not willing to undertake an internal investigation or an external investigation of acknowledged, recognized wrongs that have taken place in this body.

I think a great deal is at stake here, and I commend the gentleman for bringing it to our attention. I regret very much that the gentleman has found a lot of stonewalling and a lot of putting it under the rug and a lot of covering up on what I think is a very important issue.

Mr. DURBIN. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Illinois.

Mr. DURBIN. Mr. Speaker, I have listened with great interest to the debate over this topic that was considered last week in reference to stonewalling and covering up and the like.

Would the gentleman advise me, is this not the same matter that we discussed for almost an entire day last week in the Committee on Science and Technology?

Mr. GREGG. Yes; it is.

Mr. DURBIN. Is it not the same matter that we voted to refer to the Ethics Committee?

Mr. GREGG. Yes; it is.

Mr. DURBIN. And is it not true that the Ethics Committee is equal in its partisan breakdown?

Mr. GREGG. That is correct.

Mr. DURBIN. So there is no party advantage in referring it to that committee; is that not correct?

Mr. GREGG. Well, there is significant party advantage in referring it to that committee. The party advantage—I am not sure that party advantage is correct, but there is a significant advantage or effect in referring it to that committee versus having an open investigation within the Committee on Science and Technology.

Mr. DURBIN. Would the gentleman question the ability of this committee, the Ethics Committee, to operate in a nonpartisan manner?

□ 1340

Mr. GREGG. No; I do not question the ability of that committee to operate in a nonpartisan manner.

Mr. DURBIN. Could I ask the gentleman further, when this debate is finished, will we not both be handed at some point during the day a copy of the transcript of our spoken remarks here on the floor?

Mr. GREGG. That is correct.

Mr. DURBIN. And will we not both then have an opportunity to add, delete, change, or make wholesale fabrications in that transcript, the official transcript of the U.S. House of Representatives?

Mr. GREGG, Well, that is absolutely correct, but as the gentleman mentioned, first, we will have the opportunity to do that. Should the gentleman do that, I do not know; but it will not be done by a majority staff member with the intention of changing the purpose of the remarks.

Mr. DURBIN. If the gentleman will yield further for just one second, if I might finish.

I do not for a minute attempt to justify what has happened with the committee proceeding; but as we discussed in the committee, when we look to the proceedings on the floor of the U.S. House of Representatives, every Member after they have spoken on the floor is given an opportunity to make wholesale changes in the transcript, to change not only what was said, how it was said, to add or delete as the Member sees fit, and that ultimately becomes part of the official record.

What I would like to ask the gentleman is, will he join me in a rule which I will propose that will require that we deal with verbatim transcripts, not only on the floor of the U.S. House of Representatives, but also in committee activities?

Mr. GREGG. I certainly intend to join with the gentleman in that. In fact, I intend to be a plaintiff in a case on exactly that issue. I am hoping the gentleman will join me in asking for a full, open, and fair investigation on this issue.

Mr. DURBIN. I am confident that the House Ethics Committee will provide that.

Mr. HILER. Mr. Speaker, will the gentleman yield on that point?

Mr. GREGG. I yield to the gentleman from Indiana.

Mr. HILER. The point is, the Members of this body, whether they should or should not, currently have the opportunity to alter or extend their own remarks. The point at issue is someone else altering their remarks. I do not have the opportunity to alter the gentleman's remarks, nor does the gentleman have the opportunity to alter my remarks. We only have the opportunity to alter our own.

I would be happy to support the gentleman's resolution to have our words taken down verbatim, but that is not the issue here. The issue is that someone else has taken the remarks of the gentleman from New Hampshire and changed them.

Mr. SENSENBRENNER. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Wisconsin.

Mr. SENSENBRENNER. I thank the gentleman from New Hampshire for yielding to me.

First of all, my recollection of the rules of the House very clearly says that no Member has the right to make wholesale changes of his own or someone else's remarks spoken on the floor of the House of Representatives under leave to revise and extend. To revise remarks allows certain grammatical and diction changes to be made and extension of remarks allows extraneous material to be inserted in the RECORD.

Mr. GREGG. If I can reclaim my time just briefly, the two issues are totally separate.

Mr. SENSENBRENNER. But be that as it may, if one Member in revising the remarks of a colloquy on the floor changes the remarks to totally reverse the thrust of that colloquy and to totally change what the other Member that he was engaged in the colloquy has said, that raises a question of privileges of the House.

I remember some time in the not too distant past a colloquy between our colleague, the gentleman from Indiana (Mr. JACOBS) and our colleague, the gentleman from California (Mr. DANNEMEYER), did pose such a question of privileges of the House. The gentleman from Indiana (Mr. JACOBS) did rise once the RECORD was printed the next day and submitted a privileged resolution which was adopted reinstating the original meaning and thrust of the remarks that he had made on the floor; so I do not think that there is this wholesale changing of the CON-

GRESSIONAL RECORD under leave to revise and extend remarks; but there also is a way that this can be dealt with very quickly and very summarily, in effect the offending Member be publicly spanked on the floor through the adoption of a privileged resolution.

Mr. GREGG. Well, if I might just quickly respond to this issue of the Ethics Committee, I have the highest regard for the Ethics Committee. Certainly the membership is balanced and we have superb members on that committee, the best in the House.

But there are seven reasons why this matter should not go to the Ethics Committee, why we should have a different type of approach here. These seven reasons apply not only to the EPA issue, but, in fact, this goes beyond EPA now to two other hearings we are sure of, and we do not know how many others.

First is this issue of openness. The Ethics Committee by its own rules have to operate through a private investigation, it cannot move into an open arena until it has identified someone to charge, basically. The issue of openness here is critical, because we are talking about the credibility of the institution and we need to have an open hearing process to air this whole matter out so that the people who are relying on our transcripts can address the whole issue.

Second, there is the uniqueness of the situation. The Ethics Committee has not dealt with this issue before, where Members' remarks have been changed by staff. This is a unique situation. This is not a typical situation where the Member is dealing with a third party outside the institution.

Third is the scope and the question of how much scope the Ethics Committee would undertake. Well, I am sure they undertake a very broad scope; but if you were in a committee and trying to address your own House, I suspect you might even take a broader scope, because you would be maybe a little more aggressive in cleaning your own House.

Fourth is the effective resignation. If after going through the secret part of their investigation, the quiet part of the investigation, they identify someone who they think is responsible and bring a charge and that person resigns, that moots out the whole situation. The Ethics Committee no longer has jurisdiction; so you can theoretically have 3 or 4 months of investigation. They could, without any knowledge of what is happening, they could find that individual, that person could resign and the issue would have passed.

Fifth, we have the issue of the resolution which the Ethics Committee has tentatively drafted. As I understand it, it talks in terms of "may" instead of "shall." The Ethics Committee may report, instead of shall report, which I think should be firmer.

Sixth, we have the issue of what happens to the records. If the Ethics Committee takes jurisdiction under the rules of the House, everybody else loses access to these records. As aggrieved parties, the seven Members whose remarks have been changed in this hearing, and who knows how many other Members may be identified down the road, I think we should have access to these records.

Seventh, is the history of the Ethics Committee being just a quiet place, a place where you send things which basically dampen the whole issue down. Well, I do not think we should dampen this issue down. Quite honestly, I think until we get to the bottom of it, this issue should be blared forth.

I am a little disappointed to see that the national press has ignored it and especially some of the national press which is now making such a big thing our of another major issue, but one which is no more important than what we have here, which is a criminal issue.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. GREGG. Yes; I would be happy to yield.

Mr. LUJAN. Is it my understanding, or is my understanding correct, that the resolution that was passed out of the Science and Technology Committee to send it over to the Ethics Committee is only on that one hearing and the other two examples that the gentleman raised in the other subcommittees are not covered by that resolution, and so therefore if we just stick with the resolution that the Science and Technology Committee passed, those other two will go uninvestigated; is that correct?

Mr. GREGG. Both that resolution and the draft resolution that the Ethics Committee has worked on are confined to the July 20 and 21 hearings. They do not take up the synfuels or the silver hearings, or any of the others. We do not know what other hearings there are. We have to look at the record.

Mr. LUJAN. So that means that those two, the synfuels and the silver hearings, would go on and nobody would investigate them unless additional action is taken?

Mr. GREGG. That is correct, unless the committees took action, or the issue which the gentleman has raised so effectively, the issue of how reports are handled.

Mr. WINN. Mr. Speaker, will the gentleman yield?

Mr. GREGG. Yes; I yield to the ranking member of the Committee on Science.

Mr. WINN. Mr. Speaker, I thank the gentleman for yielding.

I have been in this House 17 years. I think this is a sad situation, that we have to have a Member bring up on the floor of the House a question of personal privilege.

I was one of those that was wronged. My testimony was changed in the one hearing on EPA.

The content of the hearing changes is what I think many Members of the House, particularly on the majority side, have completely ignored.

In my opinion, it is a blatant disregard for the Members' and witnesses' civil rights.

The gentleman in the well may well know that last week after the vote in the Science and Technology Committee, where as the ranking Republican I did not have enough support because my long-time friend and chairman of the Science and Technology Committee had the proxies in his pocket to make this basically a straight party line vote.

This situation that prevails now is affecting the reputation and the integrity of the U.S. Government through one of its representative bodies, the House of Representatives.

□ 1350

I started to say last week when we came back from that meeting, waiting in my office was a witness who read about this in the paper and presented me with an 11-page documented, underlined in red pencil and pen, the changes of the witness' testimony, his testimony that had been made in those EPA hearings. In my opinion that is why this is so important to the Members of the House of Representatives and our credibility.

Again I want to congratulate the gentleman from New Hampshire for taking this time on a question of personal privilege. In my length of service in this House, I think it is a sad commentary that we have to do this but it must be done and it must be brought out in the open. I congratulate the gentleman.

Mr. GREGG. I think that witness may have been subpenaed and he was certainly under oath when he testified. Think of the effect that this will have on other witnesses which this Congress tries to get before committees for the purposes of doing our business when they recognize that what they say may not even be printed correctly, even though they are under oath.

Mr. CARNEY. Will the gentleman yield?

Mr. GREGG. I am happy to yield.

Mr. CARNEY. I commend the gentleman for bringing up the point of changes in the statements that he made. It has become rather obvious that other Members' statements have been changed.

The gentleman from Kansas Mr. (WINN) points out the fact that wit-

nesses, not Members of Congress statements have been changed.

I would also like to bring out another aspect of this, and that is the additions and deletions to the record that were asked for and eventually never came about.

For instance, I asked that the gentleman from New Jersey, Mr. RINALDO's statement be entered in the RECORD. Indeed, the transcript shows that, but the final printing deletes the whole asking of the permission of the Chair, the Chair granting that permission, and the fact that Mr. RINALDO's statement was not put in. That happened also to the gentlewoman from Rhode Island who was there personally, and in deference to time felt that the hearing would move along more rapidly if she could have entered her statement.

She asked for that general leave to do so and it was granted. Her statement did not appear in the RECORD.

However, on the other side we see where statements that were not asked to be put in the RECORD were put in the RECORD. The addition of comments made by the chairman, for instance, were added to the RECORD. There is no reference to that on the original transcripts, and I think that we have to look at that aspect of this as well.

Again I commend the gentleman for bringing this to the attention of the whole House.

Mr. GREGG. I thank the gentleman from New York.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

A few moments ago when you were discussing the whole issue with the gentleman from New Mexico, it occurred to me that the most serious part of this entire matter was contained in some of that discussion because what we are concerned about here is something that has concerned this House for some time as we have dealt with the executive branch.

Over a period of years now in our dealings with the executive branch we have been concerned about abuses of power where we have seen executive agencies or the President himself engage in practices which appear to be an abuse of the power given him by the people and provided by the laws.

We have been concerned and we have held indepth investigations around here and we have done an awful lot of going to the press and having open and public hearings when we are dealing with those kinds of abuses.

Now we find an abuse of power within this body. It may be an abuse of power that goes beyond one committee. It may be an abuse of power that goes beyond a few subcommittees. It may be an abuse of power that cuts across the board. We do not know.

But the further we get into this matter, the more we find that it is systematic, that is is widespread, that there are problems in this body that need to be dealt with.

The only way that we can deal with those is the same way that we have dealt with executive branch problems of the same kind; that is, an open, public hearing where the American people can find out what those abuses are so that they can be a part of the correction process, because that is what will ultimately happen.

When the American people understand what has happened around here, they will force the kind of corrections that will bring about real change.

As the gentleman discussed with the gentleman from New Mexico, I think it became clear that this is a matter that goes beyond maybe the few committees that we have already looked at. It goes to the whole question of whether or not power has become corrupt right here in this body.

Again, I congratulate the gentleman for raising this point of personal privilege because it seems to me that it is an extremely serious matter and one that the American people need to have brought to their attention in full detail.

Mr. GREGG. I thank the gentleman.

Mr. LUJAN. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from New Mexico.

Mr. LUJAN. What I cannot understand is why this stonewalling. I do not see why this has become a minority and a majority dispute.

After all, the members of the majority, because there are more of them, have more to fear that their own testimony would be changed by staff. I really cannot understand why it has become a partisan issue, why there should be a partisan vote in committee and why there has been stonewalling on this problem.

Usually when you find stonewalling there is more there. I hope that the gentleman continues to dig. I would hope that he would hold off on introducing any kind of legislation just for a few days so that we can discuss this problem, bring more examples to his attention as we find them.

I will tell you for one that I am now dedicated to going and checking the RECORD. Where in the past I would get it and just initial it generally, and put it back, I figured that if my grammar was not perfect grammar that I could usually excuse it to other things, but I certainly now am going to look a little bit deeper into it.

I wish that all Members would look, both the majority and the minority, because I think that we have to bring out concrete examples, and maybe, maybe by bringing out several examples we can break that stonewalling.

Mr. KINDNESS. Mr. Speaker, will the gentleman yield?

Mr. GREGG. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

I have been considering this problem as the discussion has gone on. Having lived with some similar incidents in the Government Operations Committee staffing over a period of 5 years, of the sort referred to by the gentleman from New Mexico, not the extreme situation that has confronted the gentleman from New Hampshire and others more recently, and perhaps the extreme situation develops because we did not do quite enough in years past to stop this trend developing, at least in that one committee staff.

But it occurs to me that in the face of the stonewalling that is occurring there is an unfair tactic with which to meet that unfair tactic. I do not like the idea. But I suggested to the gentleman for consideration if the stonewalling continues that we make a part of the RECORD the names of all of the people on the staffs involved, put it right there in the CONGRESSIONAL RECORD. That subjects all of those people to a certain amount more of public stress, unfairly in the case of some, or most of them, no doubt. Perhaps that will bring forth some expressions from those who are not to blame, who do know who is to blame.

Mr. GREGG. I thank the gentleman.

Mr. WINN. Will the gentleman yield?

Mr. GREGG. I will be happy to yield.

Mr. WINN. I think the gentleman from Ohio makes a very good point there. In my remarks earlier I was going to point out that we, maybe in a broad brush, have accused the majority staff in general, and I do not think that is probably the case.

In many, many cases the majority staff has been, down through the many years, very cooperative.

But obviously I think the gentleman from Ohio and I know the gentleman from Kansas, as ranking Republican on the Science and Technology Committee, has had staff come to me down through the many years and frequently complain about the arrogance and the lack of cooperation by certain members of the majority staff and by certain members of the majority staff on their subcommittee.

But certainly it is not a broad brush, I do not think. I certainly do not think it is all of the majority members of the various committees involved.

But if we do not, to answer the gentleman from Ohio, if we do not do something like he suggests, and I am not sure that I agree with printing all

of the names of the committee employees there, but if we do not have the right to open investigations—that is my problem with the Ethics Committee, and I think many other Members that have been here for years would express the same thoughts and the same reservations—that if we, as Members of Congress, are brought before the Ethics Committee, in many cases there is never any kind of a report saying that they were innocent: they were not guilty.

□ 1400

But the papers and the other Members and our colleagues in the House know that they appeared before the committees down through the years. This is one of the weaknesses of our Committee on Standards of Official Conduct, Ethics Committee and we do not challenge the integrity of any of those individuals of the majority or minority.

I thank the gentleman for yielding.

Mr. GREGG. I thank the gentleman from Kansas. I would like to, in summing up, remind the Members that this now is not an isolated case. We are not only dealing with EPA hearings, we now are dealing with at least two other hearings that occurred, both of them in the Government Operations Committee.

That the severity of this, as a result of it, it is not only being isolated any longer but just because of what the intention was in the changes, threatens the ability of this Congress to function effectively, to get people to come to testify before us; it has a chilling effect as was mentioned on witnesses and even on executive department witnesses. And it clearly has a significant impact on those of us who are serving here and our ability to function effectively.

More importantly, I would like to sum up by saying that we need to have open hearings on this matter. We are going to suggest that a select committee be appointed. I think this is certainly appropriate when you consider the scope which I believe must occur in order to adequately discover and review this issue. It is not going to be defined or confined any longer to just one hearing and one transcript and who made the changes on that one hearing and one transcript. Having identified two other hearings and not having yet had access to the documents which would give us the ability to possibly identify other hearings if they exist, I believe it is essential that we move to a different type of forum, a forum which is specifically and uniquely charged to deal with this very, very serious issue. And within its unique charge, there must be openness, because this matter involves the public and the public's confidence in the Congress and the public must have access to the manner in which we redress that issue.

I thank those Members who participated with me today and I will yield before I close to the gentleman from New Mexico (Mr. LUJAN).

Mr. LUJAN. There is one point I would like to make and I think that having brought this to light on the floor today is an excellent thing that the gentleman has done.

But I think we should make the call today to other Members who know about this sort of thing happening in their committees, to other staff people, to let us know. Certainly staff people know what other staff people are doing. Certainly staff people know who amongst them is one that is prone to do that.

So, I think we should let out the call today to have some of those people contact the gentleman from New Hampshire, if they know of any further wrongdoings so that we might be able to make our case; that while sending it to the Ethics Committee is perhaps a step in the right direction, it is certainly a very, very small step that has been taken and not an adequate step in order to address the problem; that the problem must be addressed by a select committee, by some special investigator who cannot just shut down the investigation when somebody quits or for some other reason.

So, I would, at this point, say to others, to other Members, to staff people, to contact the gentleman from New Hampshire (Mr. GREGG), and give him specific examples so that we may be able to make our case.

Mr. GREGG. I thank the gentleman. I yield to the gentleman from Indiana (Mr. COATS).

Mr. COATS. I would just hope that the leadership in both parties of this House have listened intently today to the discussion that has gone on because I think this is a matter that goes to the very heart of what this place should be about, what the American people expect us to be about. It is very regrettable that the gentleman even had to ask for the personal privilege in order to bring this out in the open.

I know of his many attempts to do so and the many times that he has been thwarted in doing so, and the many roadblocks placed in his way.

It just occurs to me that along with the other suggestions that have been made here that if we cannot resolve this problem, do it in the open and come to a successful resolution, whenever we conduct an oversight hearing, in addition to swearing in the witnesses, that the words he speaks be the truth, the whole truth and nothing but the truth so help him God, we are going to have to bring forth the transcribers from the majority, stand them up in front of the committee and raise their right hand, with the other hand on the Bible and swear they will transcribe the truth, the whole truth and nothing but the truth so help them God and I think that is a regrettable situation. But that may be what we are going to end up with if we do not get to the bottom of this.

Mr. GREGG. I thank the gentleman.

I have only been here 3 years, but my respect for this institution, Mr. Speaker, is tremendous and I look around this room. There are Members on both sides of the aisle and the vast majority of Members, those especially who have been here much longer have a certain love and commitment to what this institution stands for and to the fact that it is the greatest deliberative body ever put together by civilized man.

When something like this happens I would hope that we as a body could take action which would make it clear to the American public that we are capable of cleaning our own House and of effectively redressing the issue.

I thank the Speaker very much.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

THE SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such roll call votes, if postponed, will be taken at the end of the legislative business today.

REQUEST FOR PERMISSION FOR COMMITTEE ON WAYS AND MEANS TO FILE REPORT ON H.R. 3021, HEALTH CARE FOR THE UNEMPLOYED ACT

Mr. GIBBONS. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight tonight, June 28, to file its report to accompany the bill, H.R. 3021, the Health Care for the Unemployed Act, which was sequentially referred to the Committee on Ways and Means.

The SPEAKER pro tempore (Mr. KILDEE). Is there objection to the request of the gentleman from Florida?

Mr. KINDNESS. Mr. Speaker, reserving the right to object, I do so just for the purpose of timing, to determine whether the ranking minority member has had the opportunity to focus on this request. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from New York.

Mr. CONABLE. Mr. Speaker, I thank the gentleman for yielding.

May I ask the gentleman if it is expected that this measure would be up this week as a result of the late filing.

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. KINDNESS. I yield to the gentleman from Florida.

Mr. GIBBONS. I thank the gentleman for yielding.

Mr. Speaker, I have no idea. I was just asked by the committee staff to do this because I think the time expires today and it is sequentially referred.

Mr. CONABLE. If the gentleman will yield further, I have no objection providing there is some understanding that the bill would not be brought up this week.

Mr. GIBBONS. Mr. Speaker, if the gentleman will yield, I do not control that, I am sorry; only the Speaker controls that, and the Rules Committee.

Mr. CONABLE. If the gentleman will yield further, without knowing more about it, Mr. Speaker, I would be constrained to object. I do not wish to cause problems for the gentleman from Florida.

Mr. GIBBONS. That is perfectly all right with me.

Mr. CONABLE. I am sorry we have not had the opportunity to discuss it before.

Mr. GIBBONS. Fine. I thought the request had been cleared with the gentleman. It is perfectly all right with me.

Mr. Speaker, I withdraw my request.

1984 OLYMPIC DUTY SUSPENSION

Mr. GIBBONS. Mr. Speaker, I move to suspend the rules and pass the joint resolution, (H.J. Res. 290), to permit free entry into the United States of the personal effects, equipment, and other related articles of foreign participants, officials, and other accredited members of delegations involved in the games of the XXIII Olympiad to be held in the United States in 1984.

The Clerk read as follows:

H.J. RES. 290

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That foreign participants, officials, and other accredited members of delegations involved in the games of the XXIII Olympiad to be held in the United States in 1984, and members of the immediate families and servants of such participants, officials, and accredited members, shall be permitted the duty-free entry of their personal effects, their equipment to be used in connection with the games, and other related articles under such limitations and conditions as may be prescribed in regulations by the Secretary of the Treasury.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. GIBBONS) will be recognized for 20 minutes, and the gentleman from Pennsylvania (Mr. SCHULZE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida (Mr. GIBBONS).

□ 1410

Mr. GIBBONS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this resolution (H.J. Res. 290) is a completely noncontroversial resolution, supported wholly by the administration, and will allow Customs to allocate their resources into areas such as security, rather than processing extensive amounts of paperwork connected with the import of equipment and personal effects to be used or consumed or later exported by those directly involved in the Olympic games of 1984.

This legislation is needed to allow Customs to efficiently handle all of the participants from the 112 participating countries in addition to the 20-percent increase in arriving traffic which is expected at the Olympics.

I would be happy to answer any questions my colleagues may have.

Mr. SCHULZE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Joint Resolution 290, a bill providing duty-free entry into the United States of the personal effects, equipment and other related articles of foreign participants, officials and other accredited members of the 1984 Olympiad. The bill is designed to facilitate entry into this country for participants and others associated with the Olympic games and to free Customs Service officials to perform additional duties that will necessarily arise from the expected 20-percent increase in incoming passengers.

If the items covered by this bill were later taken out of the country, as would be expected, no duty would be assessed in any case. However, existing customs laws require that such items be formally declared and a bond posted for their temporary entry. This will mean considerable additional paperwork for customs officials at a time when demands on their time will be greater than normal.

As I noted earlier, the Olympic games are expected to increase the flow of visitors to this country by as much as 20 percent. The resources and competence of the Customs Service will be tested during a period when the United States will play host to 112 participating countries. Many will be visiting the United States for the first time, and the efficiency and professionalism they encounter from our customs officials will provide an important first testimony to our system of laws and self-government.

Although providing security for travelers to the games is not the primary responsibility of the Customs Service, their responsibilities at the border provide an effective complement to overall law enforcement efforts to guard against terrorist activities. Unburdening customs officials from needless paperwork, as House Joint Resolution 290 is designed to do, will allow the Service to direct resources in the best possible manner. I am confident that Customs will develop carefully ahead of time, plans for passenger facilitation and security assistance designed to meet effectively and efficiently the needs associated with the Olympic games.

Mr. Speaker, I urge my colleagues to approve House Joint Resolution 290.

Mr. Speaker, I have no further requests for time.

Mr. GIBBONS. Mr. Speaker, I have no further requests for time and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. GIBBONS) that the House suspend the rules and pass the joint resolution, House Joint Resolution 290.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the joint resolution was passed.

A motion to reconsider was laid on the table.

OMNIBUS MINOR TARIFF AMENDMENTS

Mr. GIBBONS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3398) to change the tariff treatment with respect to certain articles, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3398

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—TARIFF SCHEDULES AMENDMENTS

Subtitle A—Reference to Tariff Schedules

SEC. 101. REFERENCE.

Whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a schedule, item, headnote or other provision, the reference shall be considered to be made to a schedule, item, headnote or other provision of the Tariff Schedules of the United States (19 U.S.C. 1202).

Subtitle B—Permanent Changes in Tariff Treatment

SEC. 111. CLASSIFICATION OF TEXTILE FABRICS.

(a) Headnote 5 of schedule 3 is amended to read as follows:

"5. (a) Except as otherwise provided in subsection (b) of this headnote, for the purposes of parts 5, 6, and 7 of this schedule and parts 1 (except subpart A), 4, and 12 of schedule 7, in determining the classification of any article which is wholly or in part of a fabric coated or filled, or laminated, with nontransparent rubber or plastics (which fabric is provided for in part 4C of this schedule), the fabric shall be regarded not as a textile material but as being wholly of rubber or plastics to the extent that (as used in the article) the nontransparent rubber or plastics forms either the outer

surface of such article or the only exposed surface of such fabric.

"(b) Any fabric described in part 4C of this schedule shall be classified under part 4C whether or not also described elsewhere in the schedules.".

(b) The headnotes to subpart C of part 4 of schedule 3 are amended—

(1) by striking out clause (vii) in headnote 1; and

(2) by inserting "or value" after "quantities" in headnote 2(c).

(c) Part 12 of schedule 7 is amended by inserting immediately after headnote 1 of part 12 headnote the following new headnote:

"2. This part does not cover fabrics, coated or filled, or laminated, with rubber or plastics provided for in part 4C of schedule 3.".

SEC. 112. DUTY-FREE TREATMENT TO WARP KNITTING MACHINES.

(a) Subpart E of part 4 of schedule 6 is amended by striking out item 670.20 and inserting in lieu thereof the following:

"670.20	Warp knitting machines	Free		40% ad val.
670.21	Other	5.9% ad val.	4.7% ad val.	40% ad val.".

(b) Item 912.14 of the Appendix to such Schedules is repealed.

(c)(1) The rate of duty in column numbered 1 for item 670.21 (as added by subsection (a)) shall be subject to all staged rate reductions for item 670.20 that were proclaimed by the President before the date of the enactment of this Act.

(2) Whenever the rate of duty specified in column numbered 1 for such item 670.21 is reduced to the same level as the corresponding rate of duty specified in the column entitled "LDDC" for such item, or to a lower level, the rate of duty in such "LDDC" column shall be deleted.

SEC. 113. CLASSIFICATION OF CERTAIN GLOVES.

Subpart C of part 1 of schedule 7 is amended—

(1) by amending headnote 1—

(A) by striking out "and" at the end of paragraph (a),

(B) by striking out the period at the end of paragraph (b) and inserting "; and", and

(C) by adding at the end thereof the following new paragraph:

"(c) the term 'with fourchettes' includes only gloves which, at a minimum, have fourchettes extending from fingertip to fingertip between each of the four fingers."; and

(2) by amending item 705.85 by striking out "textile fabric" and "or sidewalls".

SEC. 114. UNIFORM TARIFF TREATMENT OF PET TOYS.

Subpart A of part 13 of schedule 7 is amended by inserting immediately after item 790.55 the following new item:

"790.57	Toys for pets, of textile materials	8.5% ad val.		80% ad val."

Subtitle C—Temporary Changes in Tariff Treatment

SEC. 121. CRUDE FEATHERS AND DOWN.

Items 903.70 and 903.80 of the Appendix to the Schedules are each amended by striking out "On or before 6/30/84" and inserting in lieu thereof "On or before 6/30/87."

SEC. 122. CANNED CORNED BEEF.

Subpart B of part 1 of the Appendix to the Schedules is amended by inserting in numerical sequence the following new item:

"903.15	Corned beef in airtight containers (provided for in item 107.48, part 2B, schedule 1)	3% ad val.	No change	On or before 10/29/89".

SEC. 123. HOVERCRAFT SKIRTS.

Item 905.40 of the Appendix to the Schedules is amended by striking out "6/30/83" and inserting in lieu thereof "6/30/86".

SEC. 124. DISPOSABLE SURGICAL DRAPES AND STERILE GOWNS.

Subpart B of part 1 of the Appendix to the Schedules is amended by inserting in numerical sequence the following new item:

"905.50	Bonded fiber fabric disposable gowns, sterilized or in immediate packings ready for sterilization, for use in performing surgical procedures, of manmade fibers (provided for in items 379.96 and 383.92, part 6F, schedule 3) and bonded fiber fabric disposable surgical drapes, of manmade fibers (provided for in item 389.62, part 7B, schedule 3)	5.6% ad val.	26.5% ad val.	On or before 1/1/89".

SEC. 125. MXDA.

Subpart B of part 1 of the Appendix to the Schedules is amended by inserting in numerical sequence the following new item:

"907.03	m-Xylenediamine (MXDA) (provided for in item 404.88, part 1B, schedule 4)	Free	No change	On or before 6/30/86
907.04	1, 3-Bis[aminomethyl] cyclohexane (1, 3-BAC) (provided for in item 407.05, part 1B, schedule 4)	Free	No change	On or before 6/30/86".

SEC. 126. 4,4-Bis(A, A-dimethylbenzyl) diphenylamine.

Subpart B of part 1 of the Appendix to the Schedules is amended by inserting in numerical sequence the following item:

"907.06	4,4-Bis (a, a-dimethylbenzyl diphenylamine (provided for in item 404.88, part 1B, schedule 4)	Free	No change	On or before 6/30/86".

SEC. 127. FLECAINIDE ACETATE.

Subpart B of part 1 of the Appendix to the Schedules is amended by inserting in numerical sequence the following new item:

"907.21	Flecainide acetate (provided for in item 412.12, part, 1C, schedule 4)	Free	No change	On or before 6/30/86".

SEC. 128. CAFFEINE.

Item 907.22 of the Appendix to the Schedules is amended—

(1) by striking out "6% ad val." and inserting in lieu thereof "4.1% ad val."; and

(2) by striking out "12/31/83" and inserting in lieu thereof "12/31/85".

SEC. 129. WATCH CRYSTALS.

(a) Subpart B of part 1 of the Appendix to the Schedules is amended by inserting in numerical sequence the following new item:

"909.40	Watch glasses other than round watch glasses (provided for in item 547.13, part 3C, schedule 5)	6.2% ad val.	No change	On or before the 3-year period beginning on the date of the enactment of this item 6/30/86".

(b) During such time as item 909.40 (as added by subsection (a)) is in effect, the rate of duty on watch glasses provided for in such item that are products of a least developed developing country shall be 4.9 percent ad valorem.

(c) Effective with respect to articles provided for in item 909.40 (as added by subsection (a)) that are entered, or withdrawn from warehouse for consumption, on or after each of the dates set forth below, column 1 for such item is amended by striking out the rate of duty in effect on the day before such date and inserting in lieu thereof the rate of duty appearing below next to each such date:

Date:	*Rate of duty:*
January 1, 1984	5.9% ad val.
January 1, 1985	5.6% ad val.
January 1, 1986	5.2% ad val.

SEC. 130. UNWROUGHT LEAD.

(a) Item 911.50 of the Appendix to the Schedules is amended by striking out "6/30/83" and inserting in lieu thereof "6/30/88".

(b) Section 114 of Public Law 96-609 is amended by striking out "July 1, 1983" in subsection (b) and inserting in lieu thereof "July 1, 1988".

SEC. 131. FLAT KNITTING MACHINES.

Item 912.13 of the Appendix to the Schedules is amended—

(1) by striking out "(provided for in item 670.19 or 670.20," and inserting in lieu thereof ", and parts thereof (provided for in items 670.19, 670.20, and 670.74,"; and

(2) by striking out "6/30/83" and inserting in lieu thereof "6/30/88".

Subtitle D—Effective Dates

SEC. 141. EFFECTIVE DATES.

(a) As used in this section, the term "entered" means entered, or withdrawn from warehouse for consumption, in the customs territory of the United States.

(b) Except as provided in subsections (c) and (d), the amendments made by subtitles B and C shall apply with respect to articles entered on or after the fifteenth day after the date of the enactment of this Act.

(c) The amendments made by sections 112, 123, 130, and 131 shall apply with respect to articles entered on or after the fifteenth day after the date of the enactment of this Act, and to articles entered after June 30, 1983, and before such fifteenth day.

(d)(1) The amendments made by section 121 of this Act shall apply to articles entered after June 30, 1984.

(2) The amendment made by section 122 of this Act shall apply with respect to articles entered on or after October 30, 1983.

(3) The amendments made by section 128 shall apply with respect to articles entered after December 31, 1983.

TITLE II—CUSTOMS AND MISCELLANEOUS AMENDMENTS

Subtitle A—Amendments to the Tariff Act of 1930

SEC. 201. PACKAGING MATERIALS FOR MERCHANDISE ENTITLED TO SAME CONDITION DRAWBACK.

(a) Section 313(j) of the Tariff Act of 1930 (19 U.S.C. 1313(j)) is amended by adding at the end thereof the following new paragraph:

"(3) Packaging material that is imported for use in performing incidental operations regarding the packaging or repackaging of imported merchandise to which paragraph (1) applies shall be treated under such paragraph in the same manner as such merchandise for purposes of refund, as drawback, 99 per centum of any duty, tax, or fee imposed under Federal law on the importation of such material.".

(b) The amendment made by subsection (a) shall take effect on the fifteenth day after the date of the enactment of this Act.

SEC. 202. PUBLIC DISCLOSURE OF CERTAIN MANIFEST INFORMATION.

(a) Section 431 of the Tariff Act of 1930 (19 U.S.C. 1431) is amended—

(1) by striking out the period at the end of the paragraph designated as "Third" in subsection (a) and inserting in lieu thereof "; and the names of the shippers of such merchandise."; and

(2) by adding at the end thereof the following new subsection:

"(c)(1) Except as provided in subparagraph (2), the following information, when contained in such manifest, shall be available for public disclosure:

"(A) The name and address of each importer or consignee and the name and address of the shipper to such importer or consignee, unless the importer or consignee has made a biennial certification, in accordance with procedures adopted by the Secretary of the Treasury, claiming confidential treatment of such information.

"(B) The general character of the cargo.

"(C) The number of packages and gross weight.

"(D) The name of the vessel or carrier.

"(E) The port of loading.

"(F) The port of discharge.

"(G) The country of origin of the shipment.

"(2) The information listed in paragraph (1) shall not be available for public disclosure if—

"(A) the Secretary of the Treasury makes an affirmative finding on a shipment-by-shipment basis that disclosure is likely to pose a threat of personal injury or property damage; or

"(B) the information is exempt under the provisions of section 552(b)(1) of title 5 of the United States Code.

"(3) The Secretary of the Treasury, in order to allow for the timely dissemination and publication of the information listed in paragraph (1), shall establish procedures to provide access to manifests. Such procedures shall include provisions for adequate protection against the public disclosure of information not available for public disclosure from such manifests.".

(b) The amendments made by subsection (a) shall take effect on the fifteenth day after the date of the enactment of this Act.

SEC. 203. VIRGIN ISLANDS EXCURSION VESSELS.

(a) Section 441(3) of the Tariff Act of 1930 (19 U.S.C. 1441(3)) is amended to read as follows:

"(3) Vessels carrying passengers on excursion from the United States Virgin Islands, and return, and licensed yachts or undocumented American pleasure vessels not engaged in trade: *Provided*, That such vessels do not in any way violate the customs or navigation laws of the United States and have not visited any hovering vessel: *Provided further*, That the master of any such vessel which has on board any article required by law to be entered shall be required to report such article to the appropriate customs officer within twenty-four hours after arrival.".

(b) The amendment made by subsection (a) of this Act shall apply with respect to vessels returning from the British Virgin Islands on or after the fifteenth day after the date of the enactment of this Act.

SEC. 204. UNLAWFUL IMPORTATION OR EXPORTATION OF CERTAIN VEHICLES.

(a) Part V of title IV of the Tariff Act of 1930 (19 U.S.C. 1581 et seq.) is amended by adding at the end thereof the following new section:

"SEC. 627. UNLAWFUL IMPORTATION OR EXPORTATION OF CERTAIN VEHICLES; INSPECTIONS.

"(a)(1) Whoever knowingly imports, exports, or attempts to import or export—

"(A) any stolen self-propelled vehicle, vessel, aircraft, or part of a self-propelled vehicle, vessel, or aircraft; or

"(B) any self-propelled vehicle or part of self-propelled vehicle from which the identification number has been removed, obliterated, tampered with, or altered;

shall be subject to a civil penalty in an amount determined by the Secretary, not to exceed $10,000 for each violation.

"(2) Any violation of this subsection shall make such self-propelled vehicle, vessel, aircraft, or part thereof subject to seizure and forfeiture under this Act.

"(b) A person attempting to export a used self-propelled vehicle shall present, pursuant to regulations prescribed by the Secretary, to the appropriate customs officer both the vehicle and a document describing such vehicle which includes the vehicle identification number, before lading if the vehicle is to be transported by vessel or aircraft, or before export if the vehicle is to be transported by rail, highway, or under its own power. Failure to comply with the regulations of the Secretary shall subject such person to a civil penalty of not more than $500 for each violation.

"(c) For purposes of this section—

"(1) the term 'self-propelled vehicle' includes any automobile, truck, tractor, bus, motorcycle, motor home, self-propelled agricultural machinery, self-propelled construction equipment, self-propelled special use equipment, and any other self-propelled vehicle used or designed for running on land but not on rail;

"(2) the term 'aircraft' has the meaning given it in section 101(5) of the Federal Aviation Act of 1958 (49 U.S.C. 1301(5));

"(3) the term 'used' refers to any self-propelled vehicle the equitable or legal title to which has been transferred by a manufacturer, distributor, or dealer to an ultimate purchaser; and

"(4) the term 'ultimate purchaser' means the first person, other than a dealer purchasing in his capacity as a dealer, who in good faith purchases a self-propelled vehicle for purposes other than resale.

"(d) Customs officers may cooperate and exchange information concerning motor vehicles, off-highway mobile equipment, vessels, or aircraft, either before exportation or after exportation or importation, with such Federal, State, local, and foreign law enforcement or governmental authorities, and with such organizations engaged in theft prevention activities, as may be designated by the Secretary.".

(b) The amendment made by subsection (a) shall take effect on the fifteenth day after the date of the enactment of this Act.

Subtitle B—Miscellaneous Provisions

SEC. 211. FOREIGN TRADE ZONES.

(a)(1) The Congress finds that a delicate balance of the interests of the bicycle industry and the bicycle component parts industry has been reached through repeated revision of the Tariff Schedules of the United States so as to allow duty free import of those categories of bicycle component parts which are not manufactured domestically. The Congress further finds that this balance would be destroyed by exempting otherwise dutiable bicycle component parts from the customs laws of the United States through granting foreign trade zone status to bicycle manufacturing and assembly plants in the United States and that the preservation of such balance is in the public interest and in the interest of the domestic bicycle industry.

(2) Section 3 of the Act of June 18, 1934 (commonly known as the Foreign Trade Zones Act (19 U.S.C. 81c)), is amended—

(A) by inserting "(a)" immediately before the first word thereof;

(B) by redesignating paragraphs (a) and (b) as paragraphs (1) and (2), respectively; and

(C) by adding at the end thereof the following new subsection:

"(b) The exemption from the customs laws of the United States provided under subsection (a) shall not be available before June 30, 1986, to bicycle component parts unless such parts are reexported from the United States, whether in the original package, as components of a completely assembled bicycle, or otherwise.".

(3) The amendments made by paragraph (2) shall take effect on the fifteenth day after the date of the enactment of this Act.

(b)(1) Section 15 of such Act of June 18, 1934 (19 U.S.C. 810) is amended by adding at the end thereof the following new subsection:

"(e) Tangible personal property imported from outside the United States and held in a zone for the purpose of storage, sale, exhibition, repackaging, assembly, distribution, sorting, grading, cleaning, mixing, display, manufacturing, or processing, and tangible personal property produced in the United States and held in a zone for exportation, either in its original form or as altered by any of the above processes, shall be exempt from State and local ad valorem taxation.".

(2) The amendment made by paragraph (1) shall take effect on January 1, 1983.

SEC. 212. DUTY-FREE ENTRY FOR PIPE ORGAN FOR THE CRYSTAL CATHEDRAL, GARDEN GROVE, CALIFORNIA.

The pipe organ which was imported for the use of the Crystal Cathedral of Garden Grove, California, and entered in six shipments between April 30, 1981, and April 8, 1982, at Los Angeles, California, shall be considered to have been admitted free of

duty as of the date of each such entry. If the liquidation of any such entry has become final, the Secretary of the Treasury shall reliquidate each such entry and make the appropriate refund of any duty paid on such organ.

SEC. 213. DUTY-FREE ENTRY FOR SCIENTIFIC EQUIPMENT FOR THE ELLIS FISCHEL STATE CANCER HOSPITAL, COLUMBIA, MISSOURI.

Notwithstanding any provision of the Tariff Act of 1930 or any other provisions of the law to the contrary, the Secretary of the Treasury shall reliquidate, as duty free, the entries numbered 220286 (dated November 7, 1975) and 235380 (dated January 23, 1976) made at Chicago, Illinois, and covering scientific equipment for the use of the Ellis Fischel Cancer Hospital, Columbia, Missouri, in accordance with the decision of the Department of Commerce in docket numbered 76-00199-33-00530.

The SPEAKER pro tempore. Is a second demanded?

Mr. SCHULZE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida (Mr. GIBBONS) will be recognized for 20 minutes, and the gentleman from Pennsylvania (Mr. SCHULZE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, before I explain this bill, I think maybe I had better explain the process a little.

For all those who have ever examined the Tariff Act of 1930, which is our basic document from which we work, you are going to be impressed by the tremendous number of individual items there are in those tariff schedules that were adopted at that time by Congress. I have never counted them, in fact, I do not know anyone who has ever counted them, but let me say they fill volumes thicker than the Holy Bible. And I would guess there would be at least hundreds of thousands of individual items, perhaps a million individual items.

So it is that spirit and sense that we approach this problem. Occasionally there arises within the commerce and the changes that take place in the United States a need to adjust some of those figures, to clarify them, and to express Congress latest wish on the matter.

This proposal that we are taking up now and asking the House to suspend the rules on is about as noncontroversial as we can make a bill and still have any substance in it.

This bill is designed and pulls together some 23 other relatively noncontroversial bills and puts them all in one package so that we can consider them here without unnecessarily tying up the House on considering each one of these bills.

Each of these bills has a cosponsor in the Senate. And some may ask, "Why is that necessary?" I have found from experience that when this bill or these bills go to the Senate that sometimes they languish over there for a long period of time. The gentleman from Pennsylvania (Mr. WALKER) may remember, because I think he was about the only one on the floor last year, that we finally passed most of the bills last year after the House had completed most of its formal business. You could almost hear the sleigh bells jingling as we finished working on this.

I hope that that will not occur again because we offer these to the Senate in good faith and hope that they will take appropriate and speedy action.

Full hearings were held on all of these bills and on other bills. And the administration took a position on all of the bills. We heard from the administration. We heard from the sponsor of the bills. We heard from the supporters of the bills. We heard from the opponents of these bills. We had a markup in the Trade Subcommittee of all these bills. We then took all the bills to the Ways and Means Committee where we went through that process again of markup and amendment.

Then we consolidated all the bills so that we could consider them here all at one time.

There are two technical committee amendments at the desk that I would ask that we consider along with this motion and I assume that the motion to adopt those will be put at the time the Chair puts the question on the bill.

The SPEAKER pro tempore. The Chair will advise the gentleman that the amendments are included in the gentleman's motion.

Mr. GIBBONS. I thank the gentleman.

I will be happy to go through this long list of items if anyone wants me to and to discourse on each one of them, but I think at this time it would be better that I reserve the balance of my time.

Mr. SCHULZE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I join my colleague in support of H.R. 3398, an omnibus bill making miscellaneous changes in the tariff schedules and incorporating 23 separately introduced bills. Most of these provisions have encountered no opposition. They will offer duty relief to a wide range of domestic industries and thus will contribute to efficient and competitive domestic production. The combined impact of this whole package on the collection of Customs revenues is $4.23 million in 1984 and $7 million in 1985.

H.R. 3398 makes several types of changes. For example, it covers a group of products on which the duty will be permanently eliminated. These products are not produced in the United States and market studies show little evidence that they will be produced here in the future. For products that someday may be produced domestically, the bill provides temporary duty suspensions. In this way, Congress can review the effect of duty-free treatment on any potential for future domestic production.

A number of provisions adjust language in the tariff schedules in order to make classifications more uniform, equitable and easier to administer. Section 113 closes a loophole in the tariff distinction between work gloves and dress gloves and will save revenue by putting a stop to certain tariff evasions. Hence, the taxpayer and the consumer as well as domestic producers stand to benefit from this legislation.

H.R. 3398 is a good bill. It will reduce unnecessary tariff burdens on domestic industries and will thereby encourage economic expansion, especially in cases where domestic manufacturers of needed components only have the capacity to supply a limited segment of the domestic market. The provisions of this bill are important to the businesses involved and should be put in place without delay.

□ 1420

And, as the chairman of the subcommittee stated earlier, this is a distillation of originally 54 bills. Some others were added to that as we went along. There were in the neighborhood of 60, they were all scrutinized; and these were the 23 with the least controversy which will, when put together in this form, make a meaningful package and a step in the right direction.

Mr. Speaker, I urge my colleagues to join in support of H.R. 3398.

Mr. Speaker, I reserve the balance of my time.

Mr. GIBBONS. Mr. Speaker, I reserve the balance of my time.

Mr. SCHULZE. Mr. Speaker, I yield 7 minutes to the gentleman from Ohio (Mr. KINDNESS).

Mr. KINDNESS. I thank the gentleman from Pennsylvania for yielding this time.

Mr. Speaker, I rise in opposition to H.R. 3398—not the whole bill, but that is the circumstance. We have the bill here under suspension of the rules, and there is a part of the bill which, it seems to me, needs to be focused upon. It is regrettable that it was included in H.R. 3398.

The report to accompany H.R. 3398 says that it is a bill which incorporates 23 noncontroversial tariff and trade bills. But, unfortunately, section 211(a) of the bill incorporates what used to be H.R. 657, a very controversial measure. Indeed, H.R. 657 was

controversial enough that the Subcommittee on Trade deferred action on the bill when it came before that subcommittee earlier this month.

Section 211(a) is designed to do one thing: Single out bicycle manufacturers and prohibit them from enjoying the benefits of the laws that were enacted for all industries starting in 1934 and revised under the Celler bill of 1948.

The Foreign Trade Zones Act permits the establishment of foreign trade zones and subzones if certain statutory criteria are met. The act does not specify which company and which kinds of industries may apply to the Foreign Trade Zones Board for a zone. The act and the Board's regulations establish certain criteria and procedures for action upon a company's application.

Huffy Corp. has applied for a foreign trade subzone at its Celina, Ohio, bicycle plant in the Eighth Congressional District of Ohio. Its application has been pending before the Board for many months. The administrative procedure has not been completed. This bill would interfere with that.

Section 211(a) would shortcircuit the administrative process and deny benefits for which this one company would otherwise qualify under the law. It is blatantly discriminatory and unfair legislation. No commodity has ever before been excluded from foreign trade zone benefits by amendment to the Foreign Trade Zones Act. Historically, Huffy has produced its bicycles in American factories using American labor and predominantly American parts. Huffy is a major employer in Mercer County, Ohio, responsible for about 1,900 jobs in that part of the State. Unlike at least one major domestic manufacturer which has abandoned domestic production and now is a major importer of bicycles itself, Huffy has maintained its American production base.

Also, Huffy uses a lower percentage of imported bicycle parts on its domestically produced bicycles than do several of its domestic competitors. Unfortunately, the Huffy Corp. must import a substantial amount of bicycle parts. Some parts simply are not made in this country, while others are not made in sufficient quantity or lack the specifications required to satisfy Huffy and its customers' demands. Nevertheless, Huffy must compete against foreign bicycles that contain solely foreign parts which enter the United States at a lower tariff rate than the rates applicable to imported parts.

That is the problem. Huffy applied for a foreign trade zone subzone simply to reduce the cost associated with importing bicycle parts. The subzone would allow Huffy to pay bicycle duty rates on imported parts rather than the much higher bicycle parts rate. This duty, this saving in duty, should enable Huffy to produce more competitively priced bicycles. Frankly, I am interested in their producing more job opportunities without affecting job opportunities adversely in any other part of the United States.

The domestic bicycle industry is fighting a battle against imports, products that are built with 100 percent foreign parts. Unless leading companies such as Huffy can stay competitive, fewer domestic bicycles and fewer domestic parts will be sold. In fact, bicycle imports pose a much greater threat to parts producers than do imports of parts.

Incidentally, we are talking about the same situation here that brought Japanese car manufacturing into the United States. Only with the foreign trade zones and the applicability of the Foreign Trade Zones Act to the parts that they import into the United States could those Japanese manufacturers—Toyota, for example—produce cars in the United States profitably.

Now, if we were talking about excluding the automobile industry from the application of the Foreign Trade Zones Act, there would be a lot more people on this floor today, I am sure. But we are talking about bicycles today, an industry that is already hurt and hurting.

The National Association of Foreign Trade Zones presented testimony to the Ways and Means Committee on what is now section 211(a) of this bill. The association noted that the duty benefits available in foreign trade subzones as implemented specifically with the purpose in mind of encouraging employment and investment in the United States. In other words, it was the view of Congress and the executive branch that the tariff advantages provided by manufacturing in a foreign trade zone created employment and investment in the United States and that otherwise would be made in foreign countries. The association concluded that prohibiting the entry of bicycle parts into foreign trade zones would frustrate this policy objective, lending to more bicycles being manufactured overseas and imported, and fewer bicycles being manufactured in the United States.

Now, what has the Ways and Means Committee done with section 211(a) of the bill?

They have not categorically prohibited the application of the Foreign Trade Zones Act to bicycle manufacturing, no. It is approximately a 3-year hiatus. June 30, 1986, this provision would expire. Why is that? Because it is patently unfair to apply it at all, and certainly to apply it permanently; so we are just going to hurt them a little bit.

I ask you: Please do not support H.R. 3398. It needs to be brought to the floor under circumstances that allow its passage without the unfairness that is included in section 211(a).

□ 1430

I think it is quite clear that in the administrative procedure before the Board, Huffy has made an offer to limit application of the benefits the Foreign Trade Zone so that only the historical level of parts imported could be utilized. There would be no increase in imported parts, and I understand that several domestic parts manufacturers have indicated that they could not object to the Huffy application if amended in that manner. Indeed, two of the six parts-producing firms mentioned in the Ways and Means report have gone along with them, including Excel Corp. and Franklin Park, Ill.

Mr. SCHULZE. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. FRENZEL), a member of the committee.

Mr. FRENZEL. I thank the gentleman for yielding this time to me.

Mr. Speaker, I would like to associate myself with the remarks of the distinguished gentleman from Pennsylvania (Mr. SCHULZE) and those of the distinguished chairman of the subcommittee, the gentleman from Florida (Mr. GIBBONS).

This is the standard duty suspension amalgamation of bills which our committee brings to the House a couple of times a year. We have culled from the subcommittee's long list those that we thought were especially difficult. We have reserved them for further consideration and will present some of them later.

We are now presenting an amalgam of 23 bills for the consideration of the House.

In my judgment, the bill should be passed because, in general and on balance, it represents a needed extension of duty suspensions or initiations of duty suspensions that will benefit American manufacturers, American employees and American consumers.

However, Mr. Speaker, the gentleman from Ohio (Mr. KINDNESS), in my judgment, is correct in his complaints about the bill to which he objects. There is one other bill in there to which I would object, too. The gentleman from Texas (Mr. PICKLE) will talk about it later.

Nevertheless, I think it is our duty to analyze the bill as a whole. As a package it is a worthy bill, and it should be passed.

Mr. SCHULZE. Mr. Speaker, I reserve the balance of my time.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. PICKLE).

Mr. PICKLE. I thank the gentleman for yielding time to me.

Mr. Speaker, I want to state for the record my reservation about section 111 of H.R. 3398, the omnibus tariff

bill. This provisions reclassifies certain fabric and materials which are coated, filled, or laminated with rubber or plastics. In so doing, this section reverses the effects of a Customs Court decision which classified the materials and fabrics in question as plastics. The result of the court decision was to reduce the tariff on these goods, through the simple reclassifications of the materials from fabric to plastic.

My primary concern is for the manufacturers of my district, which though not large in number, are important to the pleasure boat industry, which is of course important to my central Texas district. These boat seat manufacturers use both domestic and imported coasted fabrics which are over 70 percent plastic or rubber by weight. They are not targeted by this legislation. This legislation seeks to restrict the importation of the lower plastic-weight materials, which have a higher fabric content. But in so doing—because, I understand that simple across-the-board reclassification eliminates the problems associated with revamping the TSUS according to weight, content, and value—we have taken away the lower tariff on the high plastic-weight goods, thus adversely impacting domestic manufacturers like those in my district.

At the same time, I have reservations about our actions in overturning the court decision. We have a two-track procedure for policymaking: The legislative and judicial branches. In this case, the court made a decision based on facts. For Congress to overturn this decision might be perceived as an unwise decision motivated by political factors. I am afraid that in approving this language we are casting doubt over the authority of the judicial branch to rule in such cases, and undercut the public's trust of judicial decisions. We should be careful in setting such precedent for Congress to question court decisions and for Congress to enact legislation designed to overturn decisions.

I hope the other body will take a close look at this reclassification bill to be certain that boat seat manufacturers, or automobile seat covering manufacturers will not be adversely affected.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. SHANNON).

Mr. SHANNON. I thank the gentleman for yielding this time to me.

Mr. Speaker, this is a very simple bill. Section 11 restores certain coated fabrics materials to schedule 3 of the Tariff Schedules of the United States. These materials have been erroneously classified in schedule 7 following a 1981 decision in the Customs Court (U.S. against Elbe Products). That decision was taken against the advice of the Customs Service, and ran counter to the interpretation of the tariff rates that have been applied by this body.

This is also a very careful bill. We worked out the language with the cooperation of the ITC so we could be certain that we were not effecting any material not previously classified in schedule 3. We believe that the language is tightly drawn, and that this is one reason the bill was received without objection by the administration in hearings before the Trade Subcommittee on April 27.

There is no substantial domestic opposition to the bill. It enjoys the support of every major industry association that is involved with coated or laminated fabrics. Users of these fabrics, who could be expected to benefit from the misclassification brought on by the Custom Court decision have not opposed the bill (furniture and footwear). The only domestic opposition to the bill, voiced by Brunswick industries at a hearing on May 5, was withdrawn when the company realized that they were not substantially effected. Their only concern is that they not be impacted by a change in GSP status by being classified in schedule 3. They realize that this bill does not raise the tariff on materials which they use by more than 0.3 percent, and have therefore withdrawn formally the substance of their testimony to the committee.

I can understand the interest of foreign manufacturers and some of their American distributors in preserving the windfall they received under the Customs Court decision. I submit however that their concerns are overwhelmingly outweighed by the interest of our domestic coated-fabric industry. These provisions are needed to preserve the tariff treatment on which the domestic industry has always relied, and to bring our tariff back into line with that which is imposed on our coated fabrics oversea. (Germany at 13 percent, Colombia at 75 percent.)

The only real opposition to these provisions has come from brokers representing foreign companies who would like to get into the American coated-fabrics market. I think our domestic interests far outweigh their concerns, particularly as the tariff in the very countries involved are prohibitively high against the same American product.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. PEASE).

Mr. PEASE. I thank the gentleman for yielding time to me.

Mr. Speaker, I would like to take a moment during this afternoon's debate on the miscellaneous tariff and trade bill package to alert my colleagues to two bills in this group which will have a positive effect on the ability of the United States to compete more successfully with imports.

By sheerest coincidence H.R. 2588 is a bill that I introduced. It would improve public access to information about imported goods coming into the United States. I have worked closely with the Joint Industry Group to fashion a legislative vehicle that will meet the needs of industry and the public. The import information provided in H.R. 2588 will assist U.S. shipping and related companies in identifying and contacting potential shipping customers and in marketing their services. U.S. manufacturers can use this information to identify importers who might be potential customers for domestically manufactured goods instead. In addition, almost every major U.S. port authority is dependent on the availability of import data for long-range planning, improving services, and competing for shipping business.

Unfortunately, current policies of the Customs Service serve to limit the import information publicly available and thus restrict the extent to which U.S. companies can benefit from the information. H.R. 2588 will correct this problem and at the same time will protect the legitimate needs for confidentiality of U.S. importers.

A second bill in this package, H.R. 1620, will extend the current suspension of duties on a particular kind of flat-knitting machine which is not manufactured in this country. This duty suspension has been beneficial to the domestic textile industry and, in my view, should be continued to help our domestic knitting industry in its efforts to withstand the very heavy import competition it is facing. H.R. 1620 serves to lower the cost of this certain kind of knitting machine which our industry must have if it is to retain a competitive position against the very heavy volumes of low-cost textile imports which enter the United States each year. As fixed expenses increase, modern equipment that is more versatile, efficient, and faster producing is the key to competing successfully in international trade and to holding on to vital jobs in this country.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Kentucky (Mr. PERKINS).

Mr. PERKINS. I thank the gentleman for yielding time to me.

Mr. Speaker, I rise in support of the bill. I take the position of the distinguished chairman of the subcommittee, the gentleman from Florida (Mr. GIBBONS).

H.R. 3398 contains a provision which will prevent the destruction of the bicycle component industry and prevent the loss of thousands of U.S. jobs to foreign competitors. This provision would amend the Foreign Trade Zones Act to exempt bicycle component

parts which are not reexported from the exemption from the customs laws otherwise available to merchandise in foreign trade zones until June 30, 1986.

The bicycle component parts industry in the United States has been fighting a long, hard battle against aggressive foreign competition in the domestic market. At the present time, virtually all bicycle component parts of types not currently manufactured in the United States can be imported duty free. That is, over 40 percent of the component parts of a finished bicycle enter the country with no duty at all. Only those parts which compete directly with domestically manufactured parts are dutiable. Over all, 67 percent of all bicycle parts sold in this country are imported. Domestic component manufacturers are struggling to maintain and to increase their 33 percent market share. Duty suspension legislation has been enacted several times in the past decade, carefully balancing the needs of the domestic bicycle industry, the component parts industry and the national interest of the United States in dealing with our international trading partners. Our concern here is that this careful balance, thoughtfully and painstakingly developed through legislation and international negotiation could soon be upset, and with disastrous results for the industry.

The present situation was brought to my attention in the fall of 1982 by officials of Wald Manufacturing Co., a maker of bicycle component parts in Maysville, Ky., in my congressional district. Huffy Manufacturing Corp., the leading manufacturer of completed bicycles in the United States, had made application to the Federal Trade Zones Board for grant of subzone status to facilitate importation and use of foreign bicycle parts, those parts which are not already imported duty free. Duty imposed on these parts would be levied upon departure from the subzone as parts of a completed bicycle and at the completed bicycle rate of 5.5 percent—a 60 percent reduction from the current 13.9 percent average duty on imported component parts.

The effects of this action on the component parts industry would be devastating. The protection offered by the existing tariff is desperately needed by domestic parts manufacturers who are already suffering severely from prevailing economic conditions. Tariff rates on these component parts are already scheduled for gradual reduction to 10 percent by the year 1987, and the time for adjustment is desperately needed. To drop the effective duty rate immediately to a rate far below that contemplated by the law would amount to putting domestic manufacturers of component parts out of business.

Without the protection offered by this measure, grant of foreign trade subzone status to Huffy Corp. or a major competitor would create a situation in which the two or three large manufacturers of completed bicycles, comprising nearly 70 percent of the domestic parts market, could obtain drastic reductions in tariff rates, at the expense of smaller manufacturers of completed bicycles and of the domestic component parts industry. It would only be necessary for foreign competitors to wait for the effects of decreased volume and demand to push the cost of doing business beyond the resources of American parts manufacturers. The wait would not be long. Despite creative streamlining of production methods, redesign, and modernization of facilities, the best efforts of domestic component parts manufacturers are keeping them just abreast of foreign competition. Grant of foreign trade subzone status within the bicycle industry at this time without the protection of this provision would deal a death blow to the domestic component parts industry.

The virtual destruction of a domestic industry is always a consequence of the gravest concern. At this moment in our history, with critical levels of unemployment and business failure, such a possibility is unconscionable. Most of these component parts manufacturers are small companies or small subsidiaries. They are located throughout the United States. Many are located in small communities where they are a major source of employment. Jobs lost through destruction of this industry will not be picked up elsewhere. The result will be more American workers in unemployment lines, more economic suffering and dislocation in American communities.

The ill effects do not stop with those companies and their employees. The bicycle component parts industry, unlike the completed bicycle industry, buys the vast majority of its parts and raw materials from U.S. suppliers. The decline of the component parts industry will have unmeasured ripple effects far beyond these companies and their employees. The demise of this industry will cost thousands of U.S. jobs.

Unemployment is certainly not a new issue to Members of the Congress. We are currently spending billions of dollars in an attempt to alleviate, at least temporarily, the staggering unemployment our citizens are facing at this time. To permit the irreparable and inevitable destruction of a domestic industry is an error we simply cannot afford.

The conditions that exist in the bicycle industry and the danger to the component parts industry threatened by the potential approval of Huffy Corp.'s application for subzone status led to development of this legislation. It is a temporary measure, drafted narrowly to cover only this industry and not to interfere with any actions taken or planned in other industries. There can be no doubt that each industry is unique, and is subject to a vast number of differing conditions domestically and abroad. This measure will prevent the destruction of the bicycle parts industry while the Congress takes a good look at the effects of foreign trade subzones generally on domestic industries and employment.

Mr. GIBBONS. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. Russo).

Mr. RUSSO. Mr. Speaker, I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of H.R. 3398, and I would like to take this opportunity to specifically address that portion of the bill which would amend the Foreign Trade Zones Act by exempting bicycle component parts, not exported from the exemption from the customs laws otherwise available to merchandise in foreign trade zones.

The domestic bicycle parts industry's existence is threatened by a pending application before the Foreign Trade Zones Board for a manufacturing trade subzone at the Huffy Corp.'s Celina, Ohio, facility. If the subzone application is granted to Huffy, the effect will be to reduce its tariff on bicycle parts by 60 percent. This will be accomplished through the manufacture and assembly of imported goods into the subzone into finished goods carrying a far lower duty rate 5½ percent—than the rate assigned to imported bicycle parts—averaging 13.3 percent. This tariff avoidance is clearly inappropriate where the Congress has already exempted virtually all bicycle components which are not produced domestically from any import duty—fully 42 percent of the dollar volume of imported parts. It would undermine the reasoned conclusions of the U.S. multilateral trade negotiations on bicycle parts and upset the balance between tariffs on bicycle parts and bicycles which this committee has enforced for many years. The relative import sensitivity of the two industries is clear: 67 percent of the bicycle parts sold in the United States are imports and 25 percent of the bicycles sold here are imports.

The current tariff schedules carefully balance the competing interests of the domestic bicycle parts industry and those of the domestic bicycle industry. If the pending subzone application is approved without the language in H.R. 3398, it will upset that balance and increase the importation of bicycle parts from Taiwan, Korea, Japan, India, and China. Present tariff schedules will be avoided as will the intent of Congress regarding those schedules as manifested in the duty

suspension bills. This language preserves congressional intent and yet will allow Huffy to benefit from the subzone if the end product is actually exported. If the Huffy subzone is granted without the approval of H.R. 3398, we will set the stage for the elimination of the U.S. bicycle parts industry and the crippling of small U.S. bicycle manufacturers, causing a significant job loss.

In recognition of these facts, 12 U.S. parts manufacturer's and 8 U.S. bicycle manufacturers have also filed in opposition to Huffy's application. Only one parts manufacturer and no bicycle manufacturer except Huffy has filed in support of this application. The Cycle Parts and Accessories Association has also filed in opposition to Huffy's application and is supporting H.R. 657. This is not a controversial bill when viewed from the perspective of Huffy being on one side of this issue while the rest of the bicycle and bicycle parts industry opposes this Huffy subzone.

Some may argue that this provision sets a precedent by amending the Foreign Trade Zones Act. But at the Trade Subcommittee markup, this proposal was amended to sunset on June 30, 1986, when the current duty suspension bill on bicycle parts terminates. Thus, this is only a temporary measure to preserve the bicycle parts industry while our committee studies the whole issue of foreign trade zones and subzones. Chairman ROSTENKOWSKI has asked the GAO to conduct an investigation of foreign trade zones and subzones, and it is anticipated that this body will hold hearings and possibly develop legislation dealing with the overall problem. Since the Foreign Trade Zones Board has never denied an application for a subzone, it is highly likely that Huffy's application will be granted unless we adopt the language contained in H.R. 3398. If a subzone is granted to Huffy, the rest of the bicycle industry will be compelled to apply for subzone status to preserve its competitive position. The result of these actions will be a sharp increase in imported bicycle parts and the demise of the domestic bicycle parts industry.

It has been suggested that Huffy has developed a compromise which the Foreign Trade Zones Board could incorporate as a restriction in the Huffy subzone. Huffy would reduce its tariff by 60 percent on the first $35 million of imported parts that it buys but would pay the regular bicycle parts tariff on purchases over that amount. This is no compromise. It would allow Huffy to more than double its imports while it pays substantially less tariff than it is now paying. The effect on the bicycle parts industry would still be devastating.

This is a narrowly drawn proposal and only temporary in effect. It is not likely to set any precedent because of its temporary nature and because of the unique position of the bicycle parts industry. I think it highly unlikely that any other industry would be in the same difficult position with respect to import penetration and the threat posed by Huffy's Foreign Trade Zones Board application. Again, I urge my colleagues to support this language by voting for the adopting of H.R. 3398.

Mr. KINDNESS. Mr. Speaker, will the gentleman yeild?

Mr. RUSSO. I yield to the gentleman from Ohio.

Mr. KINDNESS. I thank the gentleman for yielding.

Mr. Speaker, I would be glad to enlighten the gentleman as to the content of the legislative history about the Foreign Trade Zones Act which was specifically contemplated to provide for this sort of use.

Mr. RUSSO. I have to differ with my colleague, The Foreign Trade Zone was initially done to encourge exports. We could import foreign parts, put it together here and then ship them overseas, but what Huffy wants to do is bring in the foreign parts to our country, make them here, and then sell the product here.

If they would have to pay the tariff duty on the parts that they import, it would be about 13.3 percent, but if they assemble the parts in the subzone and create a bicycle out of it and sell it here in our country, they only pay 5½ percent. This was not the intention of the Foreign Trade Zone Act.

Mr. KINDNESS. Mr. Speaker, I just submit that that is the problem. People seem to have forgotten what the purpose of the Foreign Trade Zones Act was. It is very clear in the legislative history that this was contemplated as part of the system of increasing commerce and industry in the United States, because we are competing against those foreign bicycles coming in and they are taking the market.

Mr. RUSSO. May I indicate to the gentleman from Ohio that the big problem we have here is that if we allow Huffy to import parts from foreign countries, which are also made domestically and then allow them to assemble those parts in the United States, and then to be sold in our country, what we are doing is allowing Huffy to bring in foreign parts at a 60-percent reduction and put our domestic companies that also make those parts at a distinct disadvantage and eventually put them out of business.

Basically, as I indicated, if Huffy were to come before our committee and ask us for a 60-percent reduction in tariff on these bicycle parts, which would have a profound adverse effect on our domestic companies, we would not grant it to them, so why should we allow them to go to the Foreign Trade Zones Board to do the same thing.

Mr. GIBBONS. Mr. Speaker, may I inquire how much time we have remaining on this side?

The SPEAKER pro tempore. The Chair will state that the gentleman from Florida (Mr. GIBBONS) has 10 minutes remaining.

Mr. GIBBONS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is obvious that we are going, in the future, to have to pay greater attention to the foreign trade zone legislation. I must say to all my colleagues, it is not a matter that in the 20-plus years that I have been here that this Congress has ever discussed, that I can recall, but it will require greater attention. We think that we have made the appropriate response to the problem that was presented, and I assure the gentleman from Ohio (Mr. KINDNESS) that we will be happy to hear from him and listen to his arguments, and to those of Huffy, too.

□ 1440

They are a fine company and do a great job in manufacturing equipment, and we do not want to penalize them. But we are concerned about its impact on the rest of the United States.

Mr. KINDNESS. Mr. Speaker, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Ohio.

Mr. KINDNESS. Mr. Speaker, I thank the gentleman for yielding, and I want to express my particular respect to the gentleman from Florida (Mr. GIBBONS) for his interest in this matter and for the work that he does on the Committee on Ways and Means and this Subcommittee on Trade. It is most important work.

My arguments are not directed in any way toward anything that I consider to be a failing on the part of subcommittee or the full committee. What I do regret is that it did not occur to me to bring the legislative history of the Foreign Trade Zones Act more sharply into focus in the hearing.

Mr. GIBBONS. Mr. Speaker, we will give the gentleman plenty of opportunity to do that. We will listen very sympathetically to his request.

Mr. KINDNESS. Mr. Speaker, I thank the gentleman from Florida (Mr. GIBBONS).

Mr. SCHULZE. Mr. Speaker, I yield 4 minutes to the gentleman from Pennsylania (Mr. GOODLING).

Mr. GOODLING. Mr. Speaker, normally kindness and good are compatible words, and normally kindness and good stick together on most issues, but in this particular case, if I am correct, I believe Huffy already uses 40 percent of imported parts, paying a minimal tariff, and they have talked a lot

about a real compromise proposal, but I do not believe as yet there is anything concrete in writing that anyone could point out at this particular time.

Mr. Speaker, I would like to express my especial support for that provision of H.R. 3398 which exempts bicycle manufacturers from benefits under the Foreign Trade Zones Act until after June 1986. Without this provision, we would be contributing to the death of the bicycle industry in the United States. Should any one bicycle manufacturer begin to make use of a foreign trade zone in order to assemble bicycles with cheaper imported parts, that manufacturer would be able to undercut the price of all other American made bikes. As all the other companies collapsed, the one remaining company would be dependent on the foreign parts manufacturers in order to sell its product, but in that situation might not the foreign companies say why should we sell them parts when we could sell them the entire bicycle?

Of course, there are those who would oppose this measure as protectionist in nature and against the principles of free trade. But I do not think we are talking about free trade when the foreign companies concerned are either sweatshops in one country or another, or Government subsidized companies from other countries which are able to produce without regard to demand and thus undercut U.S. manufacturers in their own country. If it is all well and good to fend off a foreign military attack, why should we not also fend off foreign economic attacks? Is not the purpose of a government to protect its citizens?

My purpose here is to protect our constituencies, and without this provision, companies in many districts such as the Carlisle Tire & Rubber Co. will be hurt. Talk about free trade with foreign subsidized companies will do little to keep them from laying off employees if their market is undercut. Talk of free trade will not feed the families of men and women who have been laid off. And thus I voice my support for the bicycle parts provision of the omnibus tariff bill, and urge my colleagues to do the same.

Mr. Speaker, I would certainly think, since my chairman, the gentleman from Kentucky, Mr. PERKINS, the gentleman from Illinois, Mr. MARTY RUSSO, and I are all supporting this issue, it must be just and good and proper and, in fact, the way to do things.

Mr. SCHULZE. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. GREEN).

Mr. GREEN. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding me time, and I rise in support of H.R. 3398, legislation making miscellaneous changes in tariff laws.

This legislation includes a change in the law governing the importation and exportation of motor vehicles that is the text of legislation, H.R. 1744, introduced by the gentleman from California (Mr. STARK). The gentleman from California and I have worked closely on this issue, and I have introduced onmibus auto theft legislation, H.R. 2235, that also incorporates this provision.

In the course of hearings by a subcommittee of the Committee on Energy and Commerce on my bill, it became apparent that one major problem law enforement law officials face is the exportation of stolen vehicles. It is generally agreed that the best way to stem this illegal trade is to require shippers to record the vehicle identification number and to file an export declaration before exporting. This information will enable customs officials to compare the declared vehicle identification numbers with the actual numbers on the vehicles and with lists of stolen vehicles. Also the importation or exportation of stolen vehicles would be made a Federal offense.

The gentleman from California and I both included these provisions in our bills, and I am pleased that these provisions are present in the pending legislation. I sincerely hope that this is the beginning of responsible congressional action on the issue of auto theft, and that the House will approve this bill today. Furthermore, I hope that this positive action today will be the catalyst for action on my comprehensive auto theft legislation.

Mr. SCHULZE. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. GIBBONS. Mr. Speaker, I have no further requests for time, and I yield myself the balance of my time.

Mr. Speaker, I think I ought to inform the House, those who are present and those who may be monitoring this, that the Committee on Ways and Means has requested formal studies of the Foreign Trade Zones by the General Accounting Office and by the International Trade Commission. Those reports are expected to arrive back here by February of next year, and shortly after that, after we have had a chance to review those reports, we will begin an oversight hearing on this and see where the process leads us.

● Mr. SENSENBRENNER. Mr. Speaker, today we are being asked to consider a measure under suspension of the rules which should, more appropriately, be considered on the regular calendar to allow the offering of amendments.

H.R. 3398, the omnibus minor tariff amendments, includes a provision (section 211(a)) to amend the Foreign Trade Zones Act to deny subzone benefits for the domestic bicycle industry. This provision was added as a response to the application for a foreign trade subzone by Huffy Corp., the leading domestic bicycle manufacturer. While fear has been expressed that the granting of subzone status to Huffy would hurt domestic bicycle parts manufacturers, Huffy has offered to amend its application, which is now before the Commerce Department, to reduce the benefits available to it under the subzone.

I take no position on the pending application of Huffy, but I must oppose section 211(a) in H.R. 3398. This provision is unprecedented and inappropriate for several reasons. First, such action would interfere with the authority of the Foreign Trade Zones Board, and circumvent the procedures outlined in the current Foreign Trade Zones Act. Second, the bill would, for the first time, amend the Foreign Trade Zones Act to exclude a specific industry from participating in the procedures set forth in that act. Third, as this provision would exclude an entire industry, it would affect all domestic bicycle companies, not just the Huffy Corp. This in itself is unfair when the relative market share of these companies is looked at in comparison to Huffy, and contradicts our policy of making trade decisions on a case-to-case basis.

For all these reasons, I will oppose H.R. 3398 under suspension of the rules to allow consideration of this legislation on the regular calendar at a future date when an amendment could be offered to strike section 211(a).●

● Mr. STARK. Mr. Speaker, I support H.R. 3398, the miscellaneous tariff amendments. Included as section 204 of this omnibus bill is H.R. 1744, a bill to fight the exportation and importation of stolen vehicles.

This legislation is a free-standing and valuable section of H.R. 2235, a comprehensive auto theft bill, introduced by our colleague, Congressman BILL GREEN. The Committee on Energy and Commerce Subcommittee on Telecommunications, Consumer Protection and Finance is considering the Green bill. As a cosponsor of Mr. GREEN's bill and as author of H.R. 1744, I think Congress is finally taking a serious look at the problem of auto theft. And finally, I think we are doing something about it.

H.R. 1744 will require shippers to record vehicle identification numbers (VIN) and to file export declarations with Customs before exporting. The bill makes it a Federal offense to import or export stolen vehicles, aircraft, or their parts, with knowledge that the vehicle or part was stolen. It also prohibits the importation or exportation of vehicles or parts whose identification number the importer or exporter knows to have been removed, obliterated, tampered with or altered. These offenses would be punishable by

a fine of $10,000, up to 5 years imprisonment, or both.

In testimony before the Ways and Means Subcommittee on Trade, Mr. Paul Gilliland, president of the National Automobile Theft Bureau, pointed out some valuable characteristics of the auto theft problem.

The value of recovered stolen vehicles in recent years represents approximately 55 percent of the value of these vehicles at the time of theft. Recovery statistics for off-road vehicles and off-road equipment and boats and vessels are even worse. Part of the reason for this is theft of vehicles for their component parts, that is, chop-shop activity. However, this is only part of the reason for the low recovery rate. The low recovery rate can also be directly attributed to the practice of stealing vehicles in the United States and then exporting them elsewhere in the world. The exact volume of this illegal traffic is unknown. Estimates range from 25,000 upwards to 200,000 vehicles per year. These are only estimates; under existing practices, there is no way to determine the exact volume of this traffic. The reason is that no person or agency, at present, keeps records which identify exported property.

Under present conditions, vehicles exported from this country are listed in a shipper's export declaration or the ship's manifest, if they are listed at all. There is no requirement that identifying numbers be included or listed. Where vehicle identification numbers are listed, often only a partial or incomplete vehicle identification number is listed. In addition, transposition or other errors are common. Exporters are not familiar with vehicle identification number structure and composition; they have no legal obligation that would cause them to be concerned with full and accurate vehicle description techniques. In other words, under present conditions, vehicles are not identified or are not adequately identified in export documents.

Under present conditions, there is no requirement that the export declaration be filed with Customs prior to shipment. H.R. 1744 will correct this problem. To see that export information is available to appropriate groups, the legislation authorizes Customs to cooperate and exchange information with Federal, State, and local law enforcement agencies and other groups engaged in auto theft prevention, as designated by the Secretary. Thus, the bill with a bark, finally has some bite.

Under present law, a thief needs only to drive a car to the dock, announce a desire to ship the vehicle and pay the freight charge. It is that simple. There is no verification that the car belongs to the shipper, or that the shipper is authorized to send the vehicle. In the case of vehicles driven across the land-borders, it is even simpler; there are no verification requirements for vehicle ownership at our borders.

As a cosponsor of H.R. 2235, I am proud that H.R. 1744, the freestanding section of the gentleman from New York's (Mr. GREEN) bill, has been met with such positive response. The Subcommittee on Trade of the Committee on Ways and Means heard the bill on May 5 and the administration appeared in support of the bill. Chairman GIBBONS has taken a lead in moving the bill forward and it is also supported by the National Automobile Theft Bureau, the International Association of Chiefs of Police, the National Association of Independent Insurers, the Peace Officers Research Association of California, and the Automotive Dismantlers and Recyclers of America.

All of these groups have provided me with up to date, concise and valuable information on this issue. The National Automobile Theft Bureau has offered its expert assistance, stating that—

NATB is not only willing to commit its resources and data processing capabilities to the implementation of this type of program, but is also committed to the full and complete support of this procedure.

Together, such groups as NATB, and our U.S. customs officers can take a step against auto theft.

I continue my strong and full support for Mr. GREEN's antiauto theft bill, and I hope the Committee on Energy and Commerce will move swiftly in its consideration of the bill. Mr. GREEN's bill addresses the "chop-shop" problem completely, and I stand ready to support this, and all other sections of the legislation. Improved identification number systems for motor vehicles, and especially their major component parts, addressed in the Green bill, is an important step. I urge me colleagues to take a look at this and other efforts to battle auto theft.

I am also pleased to have the support of Senator PERCY, who has introduced companion legislation as S. 1399. Senator PERCY has also introduced the companion to Mr. GREEN's bill as S. 1400, along with Senators DIXON, LUGAR, DANFORTH, and LAXALT. Senator PERCY has, for many years, taken great interest in antiauto theft legislation, and I am honored to work with him and Members of the Senate on this issue.

I ask my colleagues to join in supporting the antiauto theft provision of the omnibus tariff bill, H.R. 3398. The measure puts car thieves on notice that the American public will no longer tolerate the tremendous financial drain that stolen cars represent. The days of easy exportation or importation of stolen vehicles end when this bill is signed into law.●

Mr. GIBBONS. Mr. Speaker, I yield back the balance of my time.

Mr. SCHULZE. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. GIBBONS) that the House suspend the rules and pass the bill, H.R. 3398, as amended.

The question was taken.

Mr. KINDNESS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of order of no quorum is considered withdrawn.

ANNUAL REPORT OF RAILROAD RETIREMENT BOARD, FISCAL YEAR 1982—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read, and together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce.

(For message, see proceedings of the Senate of today, Tuesday, June 28, 1983.)

AGREEMENT BETWEEN THE UNITED STATES AND BELGIUM ON SOCIAL SECURITY AND FINAL PROTOCOL TO AGREEMENT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 98-77)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Ways and Means and ordered to be printed.

(For message, see proceedings of the Senate of today, Tuesday, June 28, 1983.)

□ 1450

WAIVING CERTAIN POINTS OF ORDER AGAINST CONSIDERATION OF H.R. 3363, DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1984

Mr. BEILENSON. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 244 and ask for is immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 244

Resolved, That all points of order against the consideration of the bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes, for failure to comply with the provisions of section 303(a)(1) of the Congressional Budget Act of 1974 (Public Law 93-344), clause 2(1)(6) of rule XI, and clause 7 of rule XXI are hereby

waived. During the consideration of the bill, all points of order against the following provisions in said bill for failure to comply with the provisions of clause 2, rule XXI, are hereby waived: beginning on page 4, lines 4 through 20; beginning on page 9, line 1 through page 10, line 4; beginning on page 10, lines 13 through 17; beginning on page 12, line 5 through page 13, line 3; beginning on page 13, line 21 through page 14, line 15; beginning on page 15, lines 10 through 13; beginning on page 16, line 16 through page 17, line 16; beginning on page 18, lines 19 through 24; beginning on page 26, line 12 through page 28, line 9; beginning on page 37, lines 1 through 23; beginning on page 38, line 9 through page 40, line 15; beginning on page 41, lines 6 through 19; beginning on page 48, lines 17 through 25; beginning on page 54, line 1 through page 55, line 19; beginning on page 56, lines 4 through 9; beginning on page 56, line 11 through page 57, line 10; beginning on page 58, lines 9 through 25; beginning on page 60, line 12 through page 63, line 17; beginning on page 65, lines 9 through 12; beginning on page 65, line 21 through page 66, line 6; and beginning on page 67, line 10 through page 70, line 17; and all points of order against the following provisions in the bill for failure to comply with the provisions of clause 6, rule XXI, are hereby waived: beginning on page 19, lines 2 through 16; and beginning on page 46, line 8 through page 47, line 7.

The SPEAKER pro tempore. The gentleman from California (Mr. BEILENSON) is recognized for 1 hour.

Mr. BEILENSON. Mr. Speaker, for purposes of debate only, I yield 30 minutes to the gentleman from Missouri (Mr. TAYLOR) pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 244 waives certain points of order against H.R. 3363, the Department of the Interior and Related Agencies appropriation for fiscal year 1984, so that the House can proceed with the consideration of this important funding bill.

The rule waives points of order for failure to comply with section 303(a)(1) of the Congressional Budget Act, the provision requiring that the first concurrent budget resolution be adopted prior to floor consideration of general appropriations bills. At the time the Rules Committee considered the Interior appropriations bill, the budget resolution had not been given final approval by both Houses of Congress. Now that the budget resolution has been adopted, this waiver is, of course, no longer relevant.

House Resolution 244 also waives points of order against certain specific provisions of the bill for failure to comply with clause 2 of rule XXI, prohibiting in general appropriations bills the inclusion of measures not authorized and matter that would be deemed legislative in character. The authorizations for several programs funded by this bill are at various stages of the legislative process, and, in several cases, have passed either one or both Houses of Congress. Some of the provisions which might otherwise be subject to a point of order under clause 2 of rule XXI specify or limit certain actions by the Department of Interior.

The Appropriations Committee has recommended these provisions in order to guide the Interior Department's actions where such direction is clearly needed. For instance, the bill prohibits offering certain leases for sale in some environmentally sensitive tracts in the outer continental shelf and prohibits further coal leasing until an independent commission makes recommendations to insure fair market value is received. The matters at stake, which involve the protection of our Nation's precious and irreplaceable natural resources, are so vital that these provisions merit waivers of our rules. Mr. WHITTEN's letter to the Rules Committee explaining the need for each waiver is hereby submitted for the RECORD:

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., June 21, 1983.

Hon. CLAUDE PEPPER,
Chairman, Committee on Rules, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: As you are aware, at the request of the Speaker we are continuing to move ahead with appropriation bills, though the Budget Committees have reached no agreement on a budget resolution and in most cases the authorizing committees have not yet completed authorization bills. Because of this situation, we must ask the Rules Committee to waive certain points of order so that the appropriation bills can be considered in an orderly manner and the work of the House can progress.

The Committee on Appropriations today reported the Department of the Interior and Related Agencies Appropriations Bill for the fiscal year ending September 30, 1984.

The bill includes appropriations for a number of programs in excess of authorizations or for which legislation has not yet been enacted for which a waiver of Clause 2, Rule XXI is requested. There are also several transfers of unexpended balances from one account to another which are reappropriations for which a waiver of Clause 6 of Rule XXI is requested. In addition, since the budget resolution for fiscal year 1984 has not yet been adopted, it is necessary to request a rule waiving the provisions of Section 303(a) of the Congressional Budget Act of 1974 (Public Law 93-344).

1. *Bureau of Land Management, Range Improvements.* Section 6(b) of Public Law 95-514 provides that not less than $10,000,000 per annum shall be available for range improvements on public lands administered by the BLM. Grazing receipts estimated to be available in fiscal year 1984 are $8,604,000. The Committee has included language setting aside the $10,000,000 minimum requirement.

2. *United States Fish and Wildlife Service, Resource Management.* The Committee recommended language requiring the Fish and Wildlife Service to use not less than $3,400,000 for high priority projects within the scope of the approved budget by Youth Conservation Corps as if authorized by Public Law 93-408. "The Omnibus Budget Reconciliation Act of 1981" precludes making appropriations for this Act.

3. *United States Fish and Wildlife Service, Migratory Bird Conservation Account.* The Committee has recommended an appropriation of $7,000,000 as an advance payment to this account. Authorization for this advance expires on September 30, 1983. Legislation extending the authorization has been reported in both the House (H.R. 2395) and in the Senate (S. 1284).

4. *National Park Service, Operation of the National Park System.* The Committee has recommended an appropriation of $602,065,000, including $500,000 for the Volunteers in the Park program. Public Law 91-357 as amended authorizes $250,000 for that program. Volunteers provide a valuable service in the area of interpretative services. The volunteers receive no salaries. The funds will provide uniforms, training, and expenses. The Committee recommended language requiring the National Park Service to use not less than $3,300,000 for high priority projects within the scope of the approved budget by Youth Conservation Corps as if authorized by Public Law 93-408. "The Omnibus Budget Reconciliation Act of 1981" precludes making appropriations for this Act.

5. *National Park Service, Construction.* The Committee has recommended an appropriation of $42,637,000, including $1,076,000 for construction of the Paul H. Douglas Environmental Center at Indiana Dunes National Lakeshore. Only $500,000 is presently authorized. Legislation to increase the ceiling has been introduced and referred to the Interior and Insular Affairs Committee. In addition, $300,000 is provided to remove a sewage treatment plant in Cuyahoga Valley NRA from within the boundary of the NRA. This is not authorized since it is not a Park Service treatment facility.

6. *National Park Service, John F. Kennedy Center for the Performing Arts.* The Committee has recommended an appropriation of $4,542,000. Legislation authorizing this appropriation passed the Senate (S. 778) on May 25, 1983 and was reported to the House (H.R. 2605) on May 16, 1983.

7. *Geological Survey, Surveys, Investigations, and Research.* The Committee recommendation of $374,951,000 includes $35,524,000 for the Earthquake Hazards Reduction program. Legislation authorizing this program (H.R. 2465) was reported by the Science and Technology Committee on May 16. The Senate passed similar legislation (S. 820) on April 7.

8. *Minerals Management Service, Transfer to General Fund.* The Committee recommends that $126,550,000 of Federal onshore mineral leasing receipts be transferred to the General Fund of the Treasury before the distribution of those receipts specified in 30 U.S.C. 191 occurs. This is not authorized.

9. *Territorial and International Affairs, Administration of Territories.* The Committee recommends an appropriation of $75,262,000 which includes $7,312,000 which would be authorized by S. 589. That legislation passed the Senate on April 7, 1983 and was reported by the Interior and Insular Affairs Committee on May 16, 1983.

10. *Department of the Interior, General Provisions.* The Committee recommends language (Sec. 109) permitting the Department to proceed on certain tracts in the Eastern Gulf of Mexico planning area (OCS Lease Sale No. 79) up to the point of offering the leases for sale. The language also does not permit any sale in the "military impact zone" until a memorandum of agreement has been signed by the Secretary of Defense and the Secretary of the Interior.

The Committee recommends language (Sec. 112) that requires the Secretary of the

Interior to appoint an independent commission to review the Department's coal leasing procedures and to make recommendations that will ensure fair market value is received. Coal leasing would not be permitted to continue until the commission had made a report and the Secretary and appropriate committees of Congress were in agreement on implementing the recommendations.

The Committee also recommended language (Sec. 113) permitting the Department to proceed on certain OCS tracts in the Southern California planning area (OCS Lease Sale No. 80) up to the point of offering the leases for sale.

11. *Forest Service, National Forest System.* The Committee recommended language requiring the Forest Service to use not less than $3,300,000 for high priority projects within the scope of the approved budget by Youth Conservation Corps as if authorized by Public Law 93-408. "The Omnibus Budget Reconciliation Act of 1981" precludes making appropriations for this Act.

12. *Department of Energy, SPR Petroleum Account.* The Committee recommends $1,686,000,000 for acquisition and transportation of petroleum for storage in the National Reserve as an off-budget item as proposed by the Department. The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) provided that appropriations and outlays for this purpose should be off-budget for fiscal 1982 but was silent on subsequent years. The Budget Resolution and the President's budget assume its continuation off-budget.

13. *Indian Health Services, Administrative Provisions.* The Committee recommends language prohibiting the Service from initiating any action to bill Indians in order to collect for health services from third-party payers until Congress authorizes such billing practices. In addition, Intergovernmental Personnel Act assignments may be extended if agreeable to all involved parties. These provisions are not authorized.

14. *Navajo-Hopi Indian Relocation Commission.* The Committee recommends an appropriation of $13,783,000 which includes $10,800,000 for relocation operations not authorized by law. H.R. 1746 passed the House on June 1, 1983.

15. *Smithsonian Institution, Salaries and Expenses.* The Committee recommends an appropriation of $156,533,000 which includes $936,000 for the National Museum program. Legislation (S. 840) authorizing appropriations for fiscal year 1984 passed the Senate on May 25, 1983 and was referred to the House Committee on the Administration which has not yet acted on the measure.

16. *Smithsonian Institution, Restoration and Renovation of Buildings.* The Committee recommends an appropriation of $9,100,000 which includes $100,000 for a study to examine the suitability of a site in East Saint Louis, Illinois, for a museum of American culture and anthropology. That study is not specifically authorized by law.

17. *National Foundation on the Arts and Humanities.* The Committee has recommended appropriations of $165,000,000 for the National Endowment for the Arts, $150,000,000 for the National Endowment for the Humanities, and $21,500,000 for the Institute of Museum Services. The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) authorized the following amounts for those programs in fiscal year 1984:

National Endowment for the Arts (sec. 523)	$119,300,000
National Endowment for the Humanities (sec. 524)	113,700,000
Institute of Museum Services (sec. 521)	9,600,000.

The Committee on Education and Labor on May 16, 1983 ordered reported legislation (H.R. 2751) repealing the provisions of the Reconciliation Act and establishing new levels for these programs.

18. *United States Holocaust Memorial Council.* The Committee has recommended an appropriation of $1,953,000. Section 1405 of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) provides that no more than $1,000,000 for this program may be appropriated for fiscal year 1984.

19. *Title III—General Provisions.* The Committee recommends language that prohibits the processing or issuance of permits or leases pertaining to exploration for or development of coal, gas, oil shale, phosphate, potassium, sulphur, gilsonite or geothermal resources within Bureau of Land Management wilderness study areas.

For items 1 through 19, a waiver of Clause 2 of Rule XXI is requested.

The following accounts include amounts derived by transfer of unexpended balances from prior appropriations. This is held to be a reappropriation. Thus, a waiver of Clause 6 of Rule XXI is requested for these accounts.

20. *Bureau of Mines, Mines and Minerals.* Funds in the amount of $5,064,000 which were appropriated in fiscal year 1982 for construction of a facility are made available for operating expenses of the Bureau of Mines.

21. *Department of Energy, Fossil Energy Research and Development.* Transfers of $42,040,000 are recommended to fund research and development programs. The funds are transferred from Fossil Energy construction ($26,000,000), Alternative Fuels production ($13,000,000), and the Energy Security Reserve ($3,040,000).

The Committee appreciates your continued cooperation.

Sincerely,

JAMIE WHITTEN,
Chairman.

In addition, House Resolution 244 waives points of order against specific provisions of the bill for failure to comply with clause 6 of rule XXI. Clause 6 of rule XXI states that no general appropriation shall be considered if it contains a provision reappropriating unexpended balances or appropriated funds. The Appropriations Committee bill contains two reappropriations that would be covered by the waiver. The first would derive $5 million from an amount appropriated for the construction of a new facility at the Bruceton, Pa., mine equipment test facility and directs that such amount be spent in the general mines and minerals programs of the Bureau of Mines. The second reappropriation in the bill would derive $42 million from the fossil energy construction account, the alternative fuels production account, and from fees collected on loan guarantees, to be spent on fossil energy research and development.

Finally, House Resolution 244 waives points of order against consideration of H.R. 3363 for failure to comply with clause 2(1)(6) of rule XXI and clause 7 of rule XXI. Clause 2(1)(6) prohibits the consideration on the floor of any reported measure prior to the third day after that measure has been reported; clause 7 of rule XXI similarly prohibits the consideration on the floor of any appropriations bill prior to the third day after the report has been filed by the committee. The Rules Committee recommended that these requirements be waived in order to allow the bill to be considered last week. Because the 3-day layover requirement in both cases has now been met, this waiver is no longer necessary.

The Rules Committee recommends the waivers contained in the rule before us so that consideration of this appropriations bill can proceed in an orderly and timely manner. The sooner the House completes action on the fiscal year 1984 appropriations bills, the less likely we are to find ourselves forced to resort to a continuing resolution to fund Government activities when the new fiscal year begins.

Mr. Speaker, H.R. 3363 would appropriate $8 billion in new budget authority for the Department of the interior—except for the Bureau of Reclamantion—and for a number of related agencies including the Forest Service, some offices under the Department of Energy, the Smithsonian Institution, and the National Foundation on the Arts and Humanities. The programs funded by this bill are those which provide for the critically important management of our Nation's lands and natural resources and which preserve our natural and cultural heritage. I urge adoption of House Resolution 244 so that the House may proceed with the consideration of H.R. 3363.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, House Resolution 244 waives certain points of order against the consideration of the Interior and Related Agencies appropriations bill for 1984.

The purpose of this rule is to allow timely consideration of the bill, H.R. 3363, and it therefore waives points of order that would otherwise lie against specified provisions of the bill for failure to comply with clause 2 or clause 6 of rule XXI.

As the gentleman from California (Mr. BEILENSON) has already pointed out, the rule we reported from the Committee on Rules contains three waivers that are no longer necessary. Passage of time and intervening action by the Congress to adopt the first budget resolution have made these waivers moot.

Clause 2 of rule XXI prohibits appropriations for any expenditure not previously authorized by law and it also prohibits legislation on an appro-

priations bill. The waiver recommended by the Committee on Rules is necessary because some 19 provisions of H.R. 3363 have either not yet been authorized or do constitute legislation.

In addition, two items in the bill do constitute a reappropriation, and thus the Committee on Rules is recommending a waiver of clause 6 of rule XXI.

Mr. Speaker, the various provisions of the bill to which these waivers apply are specified in the resolution, and I ask unanimous consent to place in the RECORD at this point a copy of the letter from the distinguished chairman of the Appropriations Committee (Mr. WHITTEN) outlining and further explaining the need for these waivers.

There was no controversy about this rule in the Committee on Rules, and both the chairman and ranking Republican member of the Interior Appropriations Subcommittee appeared before the committee to make the request. In this regard, I do want to compliment both the gentleman from Illinois (Mr. YATES) and the gentleman from Pennsylvania (Mr. MCDADE) for their actions on this bill. As always, they have managed this bill with great fairness to those of us who have specific interests and they have once again brought us a bill that meets the stewardship requirements the Congress must set if we are to preserve our Nation's great resources.

Chairman YATES pointed out why each of these provisions needs the waiver provided by this rule, and Mr. MCDADE supported each and every one of the requests.

Mr. Speaker, I do want to point out that this rule does not preclude any Member from offering any germane limitation amendments and any Member from offering any amendments to reduce funding of specific accounts.

Mr. Speaker, I mention this last point so that it will be clear to all Members that if they have amendments, they should support this rule so that the House can proceed to consider the bill.

I urge adoption of the resolution recommended by the Committee on Rules.

Mr. Speaker, I include the following letter from the distinguished chairman of the Committee on Appropriations, the gentleman from Mississippi (Mr. WHITTEN):

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., June 21, 1983.

Hon. CLAUDE PEPPER,
Chairman, Committee on Rules, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: As you are aware, at the request of the Speaker we are continuing to move ahead with appropriation bills, though the Budget Committees have reached no agreement on a budget resolution and in most cases the authorizing committees have not yet completed authorization bills. Because of this situation, we must ask the Rules Committee to waive certain points of order so that the appropriation bills can be considered in an orderly manner and the work of the House can progress.

The Committee on Appropriations today reported the Department of the Interior and Related Agencies Appropriations Bill for the fiscal year ending September 30, 1984.

The bill includes appropriations for a number of programs in excess of authorizations or for which legislation has not yet been enacted for which a waiver of Clause 2, Rule XXI is requested. There are also several transfers of unexpended balances from one account to another which are reappropriations for which a waiver of Clause 6 of Rule XXI is requested. In addition, since the budget resolution for FY 1984 has not yet been adopted, it is necessary to request a rule waiving the provisions of Section 303(a) of the Congressional Budget Act of 1974 (Public Law 93-344).

1. *Bureau of Land Management, Range Improvements.* Section 6(b) of Public Law 95-514 provides that not less than $10,000,000 per annum shall be available for range improvements on public lands administered by the BLM. Grazing receipts estimated to be available in fiscal year 1984 are $8,604,000. The Committee has included language setting aside the $10,000,000 minimum requirement.

2. *United States Fish and Wildlife Service, Resource Management.* The Committee recommended language requiring the Fish and Wildlife Service to use not less than $3,400,000 for high priority projects within the scope of the approved budget by Youth Conservation Corps as if authorized by Public Law 93-408. "The Omnibus Budget Reconciliation Act of 1981" precludes making appropriations for this Act.

3. *United States Fish and Wildlife Service, Migratory Bird Conservation Account.* The Committee has recommended an appropriation of $7,000,000 as an advance payment to this account. Authorization for this advance expires on September 30, 1983. Legislation extending the authorization has been reported in both the House (HR 2395) and in the Senate (S. 1284).

4. *National Park Service, Operation of the National Park System.* The Committee has recommended an appropriation of $602,065,000, including $500,000 for the Volunteers in the Park program. Public Law 91-357 as amended authorizes $250,000 for that program. Volunteers provide a valuable service in the area of interpretative services. The volunteers receive no salaries. The funds will provide uniforms, training, and expenses. The Committee recommended language requiring the National Park Service to use not less than $3,300,000 for high priority projects within the scope of the approved budget by Youth Conservation Corps as if authorized by Public Law 93-408. "The Omnibus Budget Reconciliation Act of 1981" precludes making appropriations for this Act.

5. *National Park Service, Construction.* The Committee has recommended an appropriation of $42,637,000, including $1,076,000 for construction of the Paul H. Douglas Environmental Center at Indiana Dunes National Lakeshore. Only $500,000 is presently authorized. Legislation to increase the ceiling has been introduced and referred to the Interior and Insular Affairs Committee. In addition, $300,000 is provided to remove a sewage treatment plant in Cuyahoga Valley NRA from within the boundary of the NRA. This is not authorized since it is not a Park Service treatment facility.

6. *National Park Service, John F. Kennedy Center for the Performing Arts.* The Committee has recommended an appropriation of $4,542,000. Legislation authorizing this appropriation passed the Senate (S. 778) on May 25, 1983 and was reported to the House (H.R. 2605) on May 16, 1983.

7. *Geological Survey, Surveys, Investigations, and Research.* The Committee recommendation of $374,951,000 includes $35,524,000 for the Earthquake Hazards Reduction program. Legislation authorizing this program (H.R. 2465) was reported by the Science and Technology Committee on May 16, The Senate passed similar legislation (S. 820) on April 7.

8. *Minerals Management Service, Transfer to General Fund.* The Committee recommends that $126,550,000 of Federal onshore mineral leasing receipts be transferred to the General Fund of the Treasury before the distribution of those receipts specified in 30 U.S.C. 191 occurs. This is not authorized.

9. *Territorial and International Affairs, Administration of Territories.* The Committee recommends an appropriation of $75,262,000 which includes $7,312,000 which would be authorized by S. 589. That legislation passed the Senate on April 7, 1983 and was reported by the Interior and Insular Affairs Committee on May 16, 1983.

10. *Department of Interior, General Provisions.* The Committee recommends language (Sec. 109) permitting the Department to proceed on certain OCS tracts in the Eastern Gulf of Mexico planning area (OCS Lease Sale #79) up to the point of offering the leases for sale. The language also does not permit any sale in the "military impact zone" until a memorandum of agreement has been signed by the Secretary of Defense and the Secretary of Interior.

The Committee recommends language (Sec. 112) that requires the Secretary of Interior to appoint an independent commission to review the Department's coal leasing procedures and to make recommendations that will ensure fair market value is received. Coal leasing would not be permitted to continue until the commission had made a report and the Secretary and appropriate committees of Congress were in agreement on implementing the recommendations.

The Committee also recommended language (Sec. 113) permitting the Department to proceed on certain OSC tracts in the Southern California planning area (OCS Lease Sale #80) up to the point of offering the leases for sale.

11. *Forest Service, National Forest System.* The Committee recommended language requiring the Forest Service to use not less than $3,300,000 for high priority projects within the scope of the approval budget by Youth Conservation Corps as if authorized by Public Law 93-408. "The Omnibus Budget Reconciliation Act of 1981" precludes making appropriations for this Act.

12. *Department of Energy, SPR Petroleum Account.* The Committee recommends $1,686,000,000 for acquisition and transportation of petroleum for storage in the National Reserve as an off-budget item as proposed by the Department. The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) provided that appropriations and outlays for this purpose should be off-budget for fiscal year 1982 but was silent on subsequent years. The Budget Resolution and the President's budget assume its continuation off-budget.

13. *Indian Health Services, Administrative Provisions.* The Committee recommends language prohibiting the Service from initiating any action to bill Indians in order to collect for health services from third-party payers until Congress authorizes such billing practices. In addition, Intergovernmental Personnel Act assignments may be extended if agreeable to all involved parties. These provisions are not authorized.

14. *Navajo-Hopi Indian Relocation Commission.* The Committee recommends an appropriation of $13,783,000 which includes $10,800,000 for relocation operations not authorized by law. H.R. 1746 passed the House on June 1, 1983.

15. *Smithsonian Institution, Salaries and Expenses.* The Committee recommends an appropriation of $156,533,000 which includes $936,000 for the National Museum program. Legislation (S. 840) authorizing appropriations for fiscal year 1984 passed the Senate on May 25, 1983 and was referred to the House Committee on the Administration which has not yet acted on the measure.

16. *Smithsonian Institution, Restoration and Renovation of Buildings.* The Committee recommends an appropriation of $9,100,000 which includes $100,000 for a study to examine the suitability of a site in East Saint Louis, Illinois, for a museum of American culture and anthropology. That study is not specifically authorized by law.

17. *National Foundation on the Arts and Humanities.* The Committee has recommended appropriations of $165,000,000 for the National Endowment for the Arts, $150,000,000 for the National Endowment for the Humanities, and $21,000,000 for the Institute of Museum Services. The Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) authorized the following amounts for those programs in fiscal year 1984:

National Endowment for the Arts (Sec. 523), $119,300,000.

National Endowment for the Humanities (Sec. 524), $113,700,000.

Institute of Museum Services (Sec. 521), $9,600,000.

The Committee on Education and Labor on May 16, 1983 ordered reported legislation (H.R. 2751) repealing the provisions of the Reconciliation Act and establishing new levels for these programs.

18. *United States Holocaust Memorial Council.* The Committee has recommended an appropriation of $1,953,000. Section 1405 of the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) provides that no more than $1,000,000 for this program may be appropriated for fiscal year 1984.

19. *Title III—General Provisions.* The Committee recommends language that prohibits the processing or issuance of permits or leases pertaining to exploration for or development of coal, gas, oil shale, phosphate, potassium, sulphur, gilsonite or geothermal resources within Bureau of Land Management wilderness study areas.

For items 1 through 19, a waiver of Clause 2 of Rule XXI is requested.

The following accounts include amounts derived by transfer of unexpended balances from prior appropriations. This is held to be a reappropriation. Thus, a waiver of Clause 6 of Rule XXI is requested for these accounts.

20. *Bureau of Mines, Mines and Minerals.* Funds in the amount of $5,064,000 which were appropriated in fiscal year 1982 for construction of a facility are made available for operating expenses of the Bureau of Mines.

21. *Department of Energy, Fossil Energy Research and Development.* Transfers of $42,040,000 are recommended to fund research and development programs. The funds are transferred from Fossil Energy construction ($26,000,000), Alternative Fuels production ($13,000,000), and the Energy Security Reserve ($3,040,000).

The Committee appreciates your continued cooperation.

Sincerely,

JAMIE WHITTEN, *Chairman.*

□ 1500

Mr. Speaker, I yield 5 minutes to the distinguished gentleman from California (Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Speaker, in addition to my concern that this bill is over budget and off target in other areas, several of the prohibitions against funding of offshore oil and gas leases are, in my opinion, ill advised. I can certainly understand the concern of various coastal communities over the possibility of oilspills, but this measure will not reduce the chances that oilspills will occur. In fact, by delaying OCS leasing in four areas for another year, this body is voting to place increased reliance on the import of foreign oil by tanker even though the danger of a tanker sinking and fouling coastal beaches is greater than of an oil well running wild.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. DANNEMEYER. I am happy to yield to the gentleman.

Mr. YATES. That was the argument that was advanced in committee before the committee achieved a compromise on the leasing provisions. In committee it was agreed that all activities prior to sale could go forward under the leasing procedures of the Department of Interior. Only the sale itself was to be held up for the balance of the year.

Mr. DANNEMEYER. I thank the chairman for mentioning that, and that is precisely the point to which I object. That sale is scheduled to take effect in January of 1984, assuming there are bids or people that want to bid on it.

Let me say to the gentleman, very candidly, that if this Nation had energy independence today where we were not importing 35 percent of our oil every day, I think we could afford the luxury of preserving our coastal areas from the impact of Outer Continental Shelf leasing and drilling.

But the plain fact of the matter is, as the gentleman I am sure knows, we are not energy independent today. We are importing 35 percent of our oil, over 4.5 million barrels a day, which aggravates our balance of payment, much to our detriment, with the rest of the world. This is the whole thrust behind the administration's effort to open up the resources of this country through exploration and development.

Why? Not because we like to drill oil wells but because we think it is in America's interest to have energy independence. The way you get energy independence is explore and drill and produce from the territory under the American soil so that we do not have to buy and depend on the OPEC nations of the world.

Mr. YATES. Will the gentleman yield further?

Mr. DANNEMEYER. I am happy to yield.

Mr. YATES. I would agree with the gentleman in his statement. This is a minuscule portion of the leasing that is proposed to be held up and only temporarily.

The purpose is to permit States such as California to look at the question as to whether or not it wants to request that tracts be excluded based on environmental considerations. In California all we are doing is trying to marry the Federal portion of the lands to that portion within the State borders that the State itself has said it will not drill in.

In the Florida gulf we are waiting. There has not yet been achieved an agreement between three Air Force bases and the Secretary of the Interior for a portion of the gulf where U.S. Air Force activity occurs.

There was a similar difference of opinion on the east Florida/Atlantic coast. That was the subject of an agreement, and that is no longer being postponed. They are going forward with that.

We hope for the same kind of results, a cooperative agreement, in the Florida gulf as well, may I say.

Mr. DANNEMEYER. I would like to respond to my colleague, and let me say there is a split, frankly, within the California congressional delegation on this issue. Some of my colleagues from my home State of California do not want exploration and drilling on the Outer Continental Shelf. I respect that opinion. They are entitled to it and certainly to assert it here in the House of Representatives.

But let me also say to my colleague that opinion poll after opinion poll in my home State of California has indicated very clearly that the people of our State understand what is involved. By a large majority they support not only exploration but drilling right now, and that is the reason I am standing here. I am trying to give some visibility to this issue so that the people not only of California but of Texas and other States around the Union, where there are some in our society who say:

> Hey, we do not want to drill on our Outer Continental Shelf. We do not want to look at those oil wells out there because when we sit on the beach under an umbrella with our beach chair we do not want to have the obstruction of our view from an oil well interfering with the tranquility of our life.

I wish life were that simple. But the plain truth of the matter is if we do

not get on with the development of our resources and establish energy independence we are going to be in a lot more serious trouble than we are today.

I also cannot help but note two other ironies with respect to these offshore leasing provisions. One involves the rule under which they are being considered. To put it mildly, the rule waives points of order—not just one but five possible points of order, including the one against legislating on an appropriations bill. As a consequence, Members find themselves in the position of being able to do today what they could not do on the Department of Transportation bill last week; namely, tailor the language to suit their specific needs. Now, in this case, I happen to think that including language permitting the Secretary of the Interior to go ahead with all preleasing procedures is a good idea, but if we are going to permit it by waiving points of order, then the very least we can do is throw out the recently adopted rule that says a funding limitation amendment cannot be offered on the House floor unless the motion to rise is first defeated. Otherwise, we will have a situation—if we do not already—wherein the majority can edit as well as offer appropriations riders while the minority cannot even be sure of being able to do the latter. To be fair, the same rules should apply to everybody, in practice as well as theory; if they do not, sooner or later, all Members will suffer the consequences.

The other irony involves employment. Time and time again these past few months, this House has been asked to vote on measures to stimulate employment and to provide extra benefits for those who are unemployed. Indeed, we have on the calendar for this Thursday a bill to provide health benefits for the unemployed at a cost of over $2 billion the very first year. Yet here we have, in these moratoriums on offshore leasing, provisions that will cost thousands of Americans jobs. The environmental impact statements for lease sale No. 79 in the Gulf of Mexico and lease sale No. 80 off southern California estimate that these two lease sales will add 33,000 jobs to the economy, jobs that are badly needed. Yet we will forfeit them until such time as we get on with the task of making this Nation more energy self-sufficent.

The goal of energy independence brings up one final point with respect to these lease sales that needs to be made, unpleasant as it may seem to some. And that point is that we, as a nation, cannot have our cake and eat it too, much as we might like to do so. We can either remain dependent on foreign oil, in the name of environmental protection or whatever, and take our chances with the possibility that those supplies of overseas oil might be cut off.

Or we can do what is necessary to reduce our dependence on foreign oil. At stake, of course, is the future of those who are serving or will serve in our Armed Forces. If we take the first option, the odds improve that those young men will one day have to go overseas to fight a war designed to maintain our access to foreign supplies of oil. But, if we achieve energy independence, as prudent leasing of OCS lands for oil and gas production will help us do, then those odds decline. As they should. It is bad enough that we are rapidly mortgaging the economic future of our children and grandchildren; to put them in a position of perhaps having to fight for their mobility is simply too much.

Mr. Speaker, I realize that some will say the choices are not so stark or so limited. While sharing their concern for the beaches and the oceans, I cannot agree. Solar energy is far from ready to pick up the slack, synthetic fuels are still extremely expensive, and both our population and our economy keep growing. Thus, we cannot overlook potential sources of oil under our control and I hope that, as this legislative process continues, Members will think twice about these delays in offshore oil and gas leasing, especially since they do not reduce the threat of oil spills.

Mr. TAYLOR. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. BEILENSON. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. YATES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and that I may include tables, charts, and other material, on the bill, H.R. 3363, Department of the Interior and related agencies appropriations, 1984.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1984

Mr. YATES. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes, and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Pennsylvania (Mr. McDADE) and myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. YATES).

The motion was agreed to.

The SPEAKER pro tempore. The Chair designates the gentleman from Tennessee (Mr. GORE) as Chairman of the Committee of the Whole and requests the gentleman from California (Mr. BEILENSON) to assume the chair temporarily.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 3363, with Mr. BEILENSON (chairman pro tempore) in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN pro tempore. Under the unanimous consent agreement, the gentleman from Illinois (Mr. YATES) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. McDADE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased to bring the Interior and related agencies appropriation bill for fiscal year 1984 before the Committee. This is a good bill, Mr. Chairman. It represents views not only of our committee, but it represents the views of a great many Members of the House of Representatives.

Almost 200 Members of the House appeared before or wrote our committee with various viewpoints that they expressed, and the bill represents, in great measure, the viewpoints that they made available to our committee.

Let me say at the outset, Mr. Chairman, that the appropriations level for this bill is lower than the appropriations level for fiscal year 1983. I say that, Mr. Chairman, because David Stockman has sent a letter to various Members of the House in which he has said that this bill is $300 million above the appropriations level for the appropriations bill for the Department of the Interior and related agencies for the fiscal year 1983.

Mr. Chairman, that is just not true. I say this taking into consideration the

fact that only the first appropriations bill we brought to the House for fiscal year 1983, is being compared with the bill for fiscal year 1984.

□ 1510

And when one takes into consideration, Mr. Chairman, the supplemental bill for fiscal year 1983 and the jobs bill, I say to the House that the bill that we bring to the House today is approximately $600 million below the level of the total of those appropriations.

And, so, for those reasons I say that Mr. Stockman's computations are wrong.

This bill reflects our continuing investment in America, Mr. Chairman. It reflects our investment in the national heritage for all Americans; our public lands, our national parks, our national forests, the cultural well-being of our country, and the recognition of the historic preservation of the heritage we want to pass along to our children, our grandchildren, and the generations to come.

Insofar as its appropriations are concerned, it contains on-budget new budget authority of $8,081,573,000.

Although I must say, Mr. Chairman, the amount recommended within this bill is within the proposed 302 allocation under the new budget bill.

An indepth look at what constitutes this number will reassure the House, Mr. Chairman. The committee has prepared a bill that is in no way excessive but provides the funding which is necessary to support the American people's programs at levels which are most beneficial to the people.

It contains $3,929,165,000 for programs of the Department of the Interior; $1,328,404,000 for the Forest Service; $1,296,029,000 for the on budget programs for the Department of Energy; $1,527,975,000 for Indian health, Indian education, the Smithsonian Institution, National Endowment for the Arts and Humanities, and other related agencies in the bill.

Mr. Chairman, this bill more than pays for itself. It is anticipated that the returns to the Treasury from the activities in the bill will approximate $15 billion for fiscal year 1984.

This estimate does not include the revenue that will accrue to the Nation if and when it becomes necessary to dispose of the oil stored in the strategic petroleum reserve, which has an estimated value at today's prices of over $10 billion.

In the fossil energy area appropriations have been reduced from the fiscal year 1981 appropriation of $1,134,735,000 to a fiscal year 1984 program level of $327,000,000. The committee cannot agree that a further reduction to the administration's request of $138,000,000 is a responsible action if we are to insure a secure supply of energy. We have concurred in proposals to reduce the level of support below the 1983 levels for economic regulation and operation of the national forest system. In addition, the committe has continued the payments in lieu of taxes program at the 1983 level; $46,200,000 for fuel cell development and $30,000,000 for magnetohydrodynamics (MHD) have been included. Funds are also provided to insure that the Indian health services programs such as alcoholism, hospital and health clinics, and community health representatives address the critical problems facing the current population and that these programs in conjuction with the title IV, Indian education funding, will help insure that progress is made toward meeting the congressional mandate of self-determination.

The bill before the committee amends the wilderness protection language included in the 1983 Interior Appropriations Act, to extend its provision to BLM wilderness study areas (WSA's). This is done to insure that the unleased WSA acreage can be protected until Congress can consider it for wilderness designation.

I want to commend the subcommittee members for their unselfish efforts and contributions throughout the preparation of this bill.

The report in considerable detail explains the committee actions represented in the bill. The following table details the committee's recommendation:

Comparative Statement of New Budget (Obligational) Authority

	FY 1983 Enacted	FY 1984 Estimates	House	House Bill compared with Enacted	House Bill compared with Estimates
TITLE I - DEPARTMENT OF THE INTERIOR					
LAND AND WATER RESOURCES					
Bureau of Land Management					
Management of lands and resources	330,226,000	352,563,000	348,852,000	+18,626,000	-3,711,000
Construction and access	2,243,000	1,200,000	1,200,000	-1,043,000	---
Payments in lieu of taxes	96,320,000	96,320,000	96,320,000	---	---
Land acquisition	311,000	130,000	2,189,000	+1,878,000	+2,059,000
Oregon and California grant lands (indefinite, appropriation of receipts)	56,963,000	49,136,000	51,536,000	-5,427,000	+2,400,000
Range improvements (indefinite, appropriation of receipts)	11,199,000	10,000,000	8,604,000	-2,595,000	-1,396,000
Service charges, deposits, and forfeitures (indefinite, special fund)	10,000,000	13,000,000	13,000,000	+3,000,000	---
Miscellaneous trust funds (indefinite)	100,000	100,000	100,000	---	---
Total, Bureau of Land Management	507,362,000	522,449,000	521,801,000	+14,439,000	-648,000
FISH AND WILDLIFE AND PARKS					
United States Fish and Wildlife Service					
Resource management	261,987,000	246,340,000	269,530,000	+7,543,000	+23,190,000
Construction and anadromous fish	16,665,000	14,400,000	21,816,000	+5,151,000	+7,416,000
Migratory bird conservation account (definite, repayable advance)	2,000,000	---	7,000,000	+5,000,000	+7,000,000
Land acquisition	27,200,000	---	42,316,000	+15,116,000	+42,316,000
National Wildlife Refuge Fund	5,760,000	5,760,000	5,760,000	---	---
Total, United States Fish and Wildlife Service	313,612,000	266,500,000	346,422,000	+32,810,000	+79,922,000
National Park Service

Mr. Chairman, I recommend that the bill be approved.

I reserve the balance of my time.

Mr. DOWNEY of New York. Mr. Chairman, I rise in support of the fiscal year 1984 appropriations for the arts programs in the Interior appropriations bill. I applaud Subcommittee Chairman SIDNEY YATES for his stalwart support of the arts in America and his work in rejecting the serious cutbacks recommended by the administration. On behalf of the more than 170 members of the Congressional Arts Caucus, I would like to express our great appreciation for his efforts

GROWTH IN THE ARTS SINCE 1965

Since the 89th Congress when the legislation establishing NEA and NEH was passed, the arts in America have grown tremendously.

Figures documenting this growth have been presented at numerous hearings.

Orchestras, theaters, opera and dance companies, museums have multiplied.

Artists' spaces—almost nonexistent in 1965—now number in the hundreds.

In 1965 there were only 23 State arts agencies, now all States and jurisdictions have agencies—in 1965 no State had a council devoted solely to the humanities—by 1980 all States do.

Thousands of local arts agencies have also been established nationwide.

Strong network of public art and humanities because of NEA and NEH has created a cultural trickle-down effect providing economic and moral support for arts organizations across the country.

NEA seed money has helped thousands of arts groups increase their private support.

FISCAL YEAR 1982 BUDGET CUTS SLOW CULTURAL GROWTH

In 1981 the Reagan administration proposed the first drastic cuts to the Federal arts agencies which were a strong part of the growth in the arts in America.

Fortunately, Congress wisely kept these cuts to a minimum.

NEA appropriations dropped from $159 million to $143 million—sizes of grants decreased—numbers of grants decreased.

A distinguished small orchestra (Orchestra da Camera) serving my district found its regular NEA grant cut from $45,000 to $18,000—this grant was used for school concerts, many had to be cut—thousands of children will miss the opportunity to hear quality chamber music at this time.

At the same time arts-in-education funds from the Department of Education were absorbed into block grants and many States are reluctant to continuing funding arts programs.

Nonprofit postal rates also increased.

EFFECTS INCREASE IN FISCAL YEAR 1983

Once again the administration attempted to cut the arts, but Congress was able to hold funding level at $143 million for the arts and $130 million for the humanities.

But cultural organizations found the effect increasing.

Museum news: Museums have been forced to reduce or, in some cases, eliminate education programs and special exhibitions, thus curtailing their ability to serve a broad spectrum of the public. Fifty-two percent of museums lost Federal funds in 1982.

The Capitol Children's Museum in this city a few months ago could not meet its payroll because of decreases in all areas of support.

Orchestras, theaters, dance companies are not able to present new works.

Experimentation is being curtailed, dance touring is being cut back.

BUDGET PROPOSALS FOR FISCAL YEAR 1984

Yet the administration wanted to cut more from our Federal arts budget.

But with Chairman YATES' leadership, Congress will once again bring our Federal commitment to culture back on the right track.

The $165 million in the Interior bill for NEA, the $150 million for NEH, and the $21.5 million for the Institute of Museum Services represents a strong statement that the arts and humanities are an important aspect of our society.

A recent study by the Port Authority of New York indicated that the economic impact of the arts on New York City is $5.6 billion, 117,000 jobs, and 13 million visitors—this same effect is taking place in cities across our Nation.

The original NEA legislation stated: "World leadership must be solidly founded on respect and admiration for the Nation's high qualities as a leader in the realm of ideas"—the late Nanacy Hanks, form NEA Chairman, called this mandate: "Clear, direct, and timeless". I urge my colleagues to reaffirm that legislation and approve the funding contained in the Interior bill.

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. MCDADE).

Mr. McDADE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of this legislation making appropriations for the Department of Interior and related agencies and before I address myself to the bill, I want to express my gratitude to the distinguished chairman of our committee, Mr. YATES, for the skillful manner in which he conducted this bill and to all the members of the subcommittee, both sides of the aisle, who have, all of them, made a contribution to this bill. And I must also express my deep gratitude to the staff people who helped us bring you what is a very important and a good bill.

The bill provides about $8 billion in budget authority and that represents a figure about $1.3 above budget estimates if one chooses to use that as a mark that was submitted to the Congress. It is about $285 million above the fiscal year 1983 enacted levels. If we factor in the emergency jobs legislation totals into the bill, we are about $244 million below the enacted levels. But the administration has advised me that the bill is signable if we can reduce it to last year's enacted levels.

That represents about a $300 million reduction.

And despite the dispute about the numbers we bring you today a bill that is an excellent bill. As I say, it is the work product of a countless number of people. It gives us a balanced energy research program; it helps our national security by increasing funds for the strategic petroleum reserve; it meets our stewardship commitments to protect the land, the environment; it addresses the health, education, cultural and job-related needs of all Americans.

The bill, again, is self-liquidating bringing in $2 for every dollar we invest in the public lands and related assets. Receipts accruing to the Treasury as a result of actions in this bill total nearly $15.7 billion.

The major increases found in this bill are focused in the Department of Energy. Once again, we found ourselves in disagreement over the thrust and scope of the fossil and energy conservation programs.

The Members on both sides of the aisle believe we need a balanced energy program. Regrettably it has been left to us to provide the funds that would put our Nation on the cutting edge of new technologies to burn coal, and synthetic fuels in a clean, safe and acceptable way.

Yet the fossil energy budget we considered a shutdown budget, earmarking funds more to terminate research than to expand it. We did not find this acceptable.

So, we were forced to bring the funds back to what we considered an appropriate level for the national interests of this Nation. We took it from $138 million up to $305 million, that is a pretty good increase but in a very important area.

The Members will note that we made large increases in energy conservation, adding $243 million to weatherize 220,000 low-income elderly homes; we added $98 million to retrofit schools and hospitals and we made substantial expenditure in building, industrial, transportation and multisector research.

Our committee has taken testimony that our Nation has saved far more in real dollars from energy saved than we have spent on these programs. They

are tremendously beneficial from a cost-effectiveness point of view and regrettably we must carry the entire load to keep them alive but that is our job as Members of Congress and we accept the responsibility.

We have made different decisions with respect to the strategic petroleum reserve, too, because we have a bipartisan view about its importance. We have made additions to the Park Service, Fish and Wildlife Service. We did not close any of the fish hatcheries proposed for closure this year. We have kept 49 cooperative research programs alive that many of our colleagues supported. They are basic research institutions.

Mr. CONABLE. Will the gentleman yield?

Mr. McDADE. I yield to the gentleman.

Mr. CONABLE. I thank the gentleman.

I would like to express some thanks to the committee for the inclusion of the $500,000 acquisition fund for the Womens' Rights National Park in Seneca Falls, N.Y.

A very modest beginning has been made there in an area of some historic importance to women.

I think it is a fine thing this committee has put this $500,000 in the bill since it will permit the acquisition of the site of the first women's rights convention which is going to be on the market very shortly.

I am very pleased the committee has done this.

I want to thank my friend from Pennsylvania as a representative of the committee.

Thank you.

Mr. McDADE. I thank my colleague from New York and commend him for his intense interest in this important national event.

I again want to say that we added money for the National Park Service, Fish and Wildlife Service, we did not close any of the hatcheries. We also with the National Park Service have kept the State land and water conservation program funded at $75 million. We have added, as my friend from New York said, some $122,000,000 for Federal acquisitions which we thought were important and money for the urban parks program we felt so important to many of our areas around the Nation.

There is a $2 billion commitment in this bill to our Indian citizens and residents of the trust territories. Again, I want to pay tribute to my friend from Illinois, because he takes the time and the effort, and it is difficult, to try to understand these problems and try to deal with them. And it is a very, very hard problem. He deserves our congratulations and commendation for working so hard as he does in that area.

This year I am pleased to say that the administration began to lift the constraints that were on the abandoned mine land fund, funding it at $218,000,000.

We decided to add money for the RAMP program and for the Federal emergency projects.

I see my friend from Pennsylvania and friend from Ohio on the floor and both of them played a very important role in what we did with the RAMP program. So, we are going to try to repair the land from an earmarked source of Federal, a severance tax on coal, that produces a good deal of money to the Treasury and we are going to repair land that was orphaned and abandoned when we operated under a different ethic than we have now.

We also addressed Outer Continental Shelf oil and gas leasing and we tried to deal with those in an important way in respectful consideration of our national interest, balancing our energy needs with so many important provisions relating to the environment. I think we acted responsibly and we did so in a bipartisan and unanimous way.

Mr. HYDE. Mr. Chairman, will the gentleman yield?

Mr. McDADE. Mr. Chairman, I yield to my friend from Illinois.

Mr. HYDE. I thank my friend for yielding.

I am aware of and I share the appreciation that my friend from Pennsylvania has for the arts and the humanities and I say that as preface to my chagrin at the inability of the subcommittee and the committee to cut. Now, that is a harsh word, cut spending.

□ 1520

Let us abandon that for excessive harshness and use the word "hold" or "freeze" or "stay in place." And that, too, seems an unattainable goal.

In looking at the report I see artists in schools are going to get $1,600,000 more than last year; dance is up $2,450,000; design arts, $1,100,000, et cetera et cetera. Folk arts, they are very good, $1 million increase. There is nothing cut and there is nothing even the same as last year.

So we are increasing up and down the line. The same thing is true of humanities. And I know the Constitution requires us to provide for the common defense, but I do not know that the Constitution requires us to subsidize media arts, opera/musical theater, street theater and all of those good wonderful cultural things. I would hope in scanning, in getting eye-strain looking through the budget for some place to cut—I am sorry, I used the word "cut"—I mean hold the line, that I had hoped that in these arts and humanities that perhaps Stewart Mott, or the Ford Foundation, or the Rockefeller Foundation, so many of those foundations that have favorable tax treatment might pick up the slack so that we could at least hold the line.

I see that that is too visionary and for this Member I deeply regret that we were unable to hold the line.

I will not comment on whether the quality of theater has improved over the days of Shakespeare when there was no subsidies whatsoever, or even Edwin Booth, but I deplore our inability to hold the line at least in the arts and humanities. Poverty is supposed to be a great teacher to people of genius and help them suffer and I do not want that to happen. I think we can have geniuses who are adequately clothed, housed, and fed, but to increase by the millions—the total increase is 32 percent over what the President wanted and 14.7 percent over the last year on the National Endowment for the Arts, and 15.3 percent over last year for the National Endowment for the Humanities.

Well, I just want to share with my friend my disappointment and my chagrin and to say that maybe next year we will do better, but I shall not hold my breath.

Mr. McDADE. I thank my dear friend from Illinois. Of course, as always, when he addresses this body, there is wisdom in what he says. I cannot argue the fact that we did increase the budget, but I do think I need to share some thoughts with the gentleman.

The gentleman mentioned, for example, the Rockefeller Foundation and others that receive favorable tax treatment and they do. That is our style in this country. This amount of money that is in the bill is, relative to what they do, a pittance. Most of what happens in this Nation that supports the arts and the humanities comes through the private side and is individual giving.

If you took away individual giving, if we just change the Tax Code, that would be the end of it. And let me say through history, experience and history would teach us and if you go back through history you would be hard pressed to find any artist at any level of his career who did not receive some kind of a subsidy, be it the Medici Popes or some great king, or some great person.

Mr. HYDE. They found a sponsor.

Mr. McDADE. They found a sponsor. Most of the people who are involved here find sponsors. For example, the gentleman mentioned the Metropolitan Opera Co., which has brought to the American public by Texaco for some, I guess, maybe 40 years, I think it is some such figure like that.

Let me say to my friend that these are national assets too. Back in the Depression these people were totally

out of work and they were in poverty. For example, in the Public Works Administration then, they decided that people who were artists and poets and writers ought not to be excluded from a public works program and so they were put into it. The results are that we have a library of that period of time that is one of the greatest historic documents written. If we had not let them be members of the WPA like the CCC people or others, it would not have happened. We have public buildings that have paintings in them that are treasures because we said, "Here is a gentleman who could use a job and we will give him a commission to do a mural on a given building." And they did superb work.

Now, I agree that when we are talking about the fact that we increase the budget the gentleman is right on point. And it is a value judgment that we made. My friend from Illinois played a great role in this as he has in others in attempting to get this to an appropriate level. We will try to watch it. Have faith in us.

Mr. HYDE. If the gentleman will yield further, we have deprived the wealthy of the opportunity to be patrons of the arts. As Michelangelo had his sponsors, we are depriving them of this by taking over.

Second, I take it from my friend's remarks that he is unequivocally opposed to a flat rate income tax then that would remove these deductions. Certainly in the arts and humanities we will see a cultural deprivation of our society if we get a flat rate tax.

Mr. McDADE. Mr. Speaker, I reclaim my time. I say to my friend I do not know how we got into a flat rate tax, but I look at the Internal Revenue Code as an engine that makes this Nation work. For example, my friend believes in home mortgage taxes, does he not?

Mr. HYDE. Do I believe in home mortgage taxes? No.

Mr. McDADE. The deductibility of a home mortgage. Does the gentleman believe in that?

Mr. HYDE. A deduction for the payment on the interest.

Mr. McDADE. Does the gentleman believe in that?

Mr. HYDE. Yes, to a limited extent.

Mr. McDADE. Where would that fit under a flat rate tax, for example?

Mr. HYDE. It would be eliminated. It may be worth it though.

Mr. McDADE. Well, then, I am not for that and I know the gentleman is not either.

Let me just say one thing to my dear friend, because he is such an able Member of the body and contributes to the level of the debate always, let me say that a lot of this money that goes out is a matching—sometimes a 3-to-1 match—on the private side.

When we look at this $100 million plus or minus figure, when we compare that to what the private side does, let me say to my friend that that is a $1 billion plus figure.

So I want to stand by my statement to say to my friend that it is the private side that makes culture and arts and humanities in this Nation thrive as it has been long before this was advanced, but this is just another effort to try to say, well, there is an appropriate role for the Federal Government to play, a minor role. I could not agree with the gentleman more. The day we have an arts tsar in the country is the day that I am off this program. As long as it interfaces with the private side and works creatively—and it works sometimes and it misses sometimes, as so many things do—then I am for it.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. McDADE. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

The gentleman's criticism, I think, is appropriate, because there is not another Member of the House who has the gentleman's histrionic ability.

I want to say further to my friend that this budget was cut 2 years ago. It was cut drastically 2 years ago upon the theory that the loss in Federal funding would be made up by private contributions. Testimony before our committee and the statistics we have seen show that the private individual, whom the gentleman says should be given the opportunity to make up this difference, has not been able to step into the breach.

Large corporations, Exxon, Equitable Life Assurance Co., foundations have appeared before our committee and have told us they have been unable to make up the difference and that is the reason—and they all say that the Federal contribution is essential. And as my good friend from Pennsylvania says, this Federal contribution is a small portion of the total amount that goes to support the arts throughout the country, but it is a necessary portion, because it is the leader in the total prospect of giving to the arts.

□ 1530

Mr. LUJAN. Mr. Chairman, will the gentleman yield?

Mr. McDADE. I yield to the gentleman from New Mexico.

Mr. LUJAN. I thank the gentleman for yielding.

Mr. Chairman, I did want to take up with the gentleman a serious matter that is in the bill.

There is a reduction of $126,550,000 on Federal onshore mineral leasing, and that is really designed to take from the Federal mineral leasing moneys the amount that would go out in payment in lieu of taxes.

I will tell my friend that I was going to offer an amendment, but I did not. I was going to take some time to talk about this on the floor, but in the interest of time, let me just make a couple of short remarks on it.

These two programs are totally different. As the gentleman knows, one goes to State government, the mineral leasing moneys. The payment in lieu of taxes goes to the local government. There is no mechanism in State government to take that revenue loss and transfer it on over to local government. I will not offer the amendment and I will not take the time to go into it today. I can assure the gentleman that it is not practical, it is not fair, it is two different programs. But what I will ask the committee is that, when you get into conference, you look a little closer at this problem, because it is so vital to those Western counties.

Mr. McDADE. Mr. Chairman, let me say that I have the greatest respect for my friend. I know the tremendous job that he does on the authorizing committee on the Department of the Interior, and I am very grateful for his bringing this to our attention. I want to assure the gentleman that we will work it through conference, and I want to tell the gentleman how grateful I am that he has decided not to offer an amendment, in the interest of conveniencing the House. That means a lot to all of the Members. We owe the gentleman a debt of gratitude. I want to assure the gentleman that we are going to look very hard at the problem and try to work it out with the gentleman as the bill moves through conference.

Mr. LUJAN. I thank the gentleman.

Mr. Chairman, as I said previously, I was going to offer an amendment to H.R. 3363, the 1984 appropriations bill for the Department of Interior and related agencies, but have decided the best way to deal with the problem is in conference.

My amendment would have deleted the language which says that payments-in-lieu of taxes (PILT) payments be deducted from mineral leasing revenues prior to the distribution of these receipts to the States.

The whole idea behind this concept, Mr. Chairman, is faulty. The PILT Act was enacted to compensate local governments because of the loss of tax revenues due to Federal ownership of lands; whereas the Mineral Leasing Act amendments were designed to compensate State governments for mineral royalties collected in a given State.

I would like to give you a brief history on what led to the passage of the payments-in-lieu of taxes (Public Law 94-565) in 1976.

For years, counties and small municipal governments, in areas where there were large concentrations of Federal

lands, were called upon to provide services to these public lands even though these lands contributed nothing in local tax revenues.

These services, financed totally by local governments, included such things as roads—both construction and maintenance—along with police and fire protection.

This was an unfair burden for many of these local governments, so it was determined by the 94th Congress—following years of debate on the subject—that local units of government be compensated for the loss of tax revenue, which would have been generated had these lands been privately owned.

A formula was devised whereby these local units of government would be compensated in accordance with what similar privately owned lands would have provided in local tax revenues.

The PILT formula which was only fair and right, and long overdue at the time—represents a sizable part of the budgets of some of these local governments, especially in the West where there is large Federal ownership of lands.

In my own State of New Mexico, there is one county, Otero, which has 77 percent of its operating budget funded by PILT. In four New Mexico counties, PILT accounts for more than 50 percent of the budget, and one-half of all our counties get more than a one-third of their budgets from PILT.

Other Western States are similarly affected.

The important point to consider, Mr. Chairman, is that the PILT concept was a determination made by Congress, separate and apart from the Mineral Leasing Act.

At no time in the past was it ever determined that there is any relationship between payments-in-lieu of taxes and the Mineral Leasing Act. They are entirely two separate concepts—and they should remain that way.

I would like to point out, Mr. Chairman, that the combined effect of this language in H.R. 3363 on the State of New Mexico would be to reduce our revenues by approximately $9.5 million. Along with New Mexico, Wyoming is another State that would be hit extremely hard, as would several other Western States. And, there is also the matter of national honor.

During the first century of westward expansion, the U.S. Government entered into numerous treaties with various Indian tribes to induce them to give up their ancestral lands. Many tribes were shown large areas of the map encircled by blue pencil and were told that the land inside that circle would be their reservation, their home, their land, to use as they thought best for themselves and their prosperity.

Many tribes soon found that the Indian country and reservations shown on the maps belonged to them only if the white man found nothing of value on it. But let a few ounces of gold or silver be found inside the blue pencil lines and things started to change. The Indians found that the big white father in Washington had drawn new blue lines and they had to move to new lands which the Government considered worthless enough to give away.

The Appropriations Committee is now trying to do to the Western States exactly what was done to the Indians. As Western States were brought into the Union, the Federal Government drew lines around large areas of land and told the States, these are your boundaries. But then it drew more blue lines inside those boundaries and said, "We're going to keep these lands for the use of the other States." The idea, as we all know, was to sell or lease the Federal lands when they became valuable enough, and use the money to benefit the States which had joined the Union earlier. Later on, Congress acted to rectify this inequity by passing laws guaranteeing Western States 50 percent of the revenues from mineral production on these Federal enclaves within the State. And in another gesture, the Congress promised to make token payments to the States to partially make up what the States were losing in taxes from all these federally withheld lands. This gesture was called payment-in-lieu of taxes (PILT).

These two acts were sweeteners that were supposed to make it easier for the Western States to swallow the bitter pill of having the Federal Government as a permanent live-in guest, occupying up to 80 percent of the lands within our borders. If the Western States would have come into the union on an equal footing with the Eastern States, there would be no need for the sharing of mineral leasing proceeds or for payments-in-lieu of taxes. The minerals would be on State-owned land rather than Federal, and all of the proceeds would go to the States.

But half a loaf is better than none, and like the Indians, we accepted our 50-50 share, and the crumbs of in-lieu taxes tossed to us by the great white father.

Now what has happened to change the situation? The same thing has happened with our 50-50 share of mineral proceeds as happened to the Indian reservations in the last century. There have been more minerals found than had been expected, and our 50 percent share has risen to levels that make the Eastern States envious. They want to get their hands on some of that money * * * and so they want to cut our end of the deal. How do they do that? Very simply: all you do is combine the two lumps of sugar into one lump by deducting the payments-in-lieu of taxes from the State's share of the mineral proceeds.

It's the old pea under the shell game; now you see it, now you don't. It worked with the Indians, so why not try it with the States?

I suggest that such a reneging on a deal is beneath the dignity of the United States. I suggest that this transparent scheme should be recognized for what it is, and rejected out of hand.

We in the Congress must keep faith with the millions of Americans who live in those Western States, and who ask of their huge Federal guest only that he conduct himself as a gentleman and honor his commitments.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. McDADE. I yield to the gentleman from New York.

Mr. HORTON. Mr. Chairman, I rise in support of H.R. 3363, and I congratulate the committee for its outstanding work on putting this bill together. I want to point out to my colleagues a provision of this bill that is of major significance to my district—the 29th Congressional District of New York—and I believe, to the Nation as a whole.

Included in this bill is a $500,000 appropriation for land acquisition by the Women's Rights National Historic Park in Seneca Falls, N.Y. This money will be used to purchase and refurbish a building, the Wesleyan Chapel, which was the site of the first national women's rights convention held on July 19 and 20, 1848.

The principal organizer of the convention, Elizabeth Katy Stanton, was a resident of Seneca Falls; her house is also among the buildings being restored by the national park. As the birthplace of the women's movement in the United States, Seneca Falls, through the outstanding work of the Women's Rights National Historical Park, is a historical treasure that deserves enhancement for citizens of today and of generations to come.

I heartily support this legislation and the inclusion of this specific appropriation in the bill.

Mr. McDADE. Mr. Chairman, I just want to say to my friend that I am grateful for the lead role that the gentleman has played in helping us get established, and I am grateful for his taking the time to address the Committee.

Mr. MURTHA. Mr. Chairman, I yield 6 minutes to the gentleman from Connecticut (Mr. RATCHFORD).

Mr. RATCHFORD. Mr. Chairman, first of all, I would like to applaud both the chairman, the gentleman from Illinois, SID YATES, and the ranking minority member, the gentleman from Pennsylvania, JOE MCDADE, for the manner in which this committee has conducted its business. It has been

open, and it has been an attempt to pursue knowledge. We have had extensive hearings and, in most instances, the approach has been bipartisan. Indeed, the atmosphere has been refreshing. I wanted to comment on that publicly.

Mr. Chairman, I think this bill commends the support of all of us. It was referred to earlier that over 200 Members had interest in this bill. And I think that is the reality of it. Because this bill truly represents the width and breadth of America, this bill truly represents an attempt to preserve the quality of life in America and it says that public land shall be preserved for public purposes.

I have three specific areas that I would like to point to in marshaling my support for this very important legislation. One is the old question of alternative energy and conservation.

My fellow Members, it needs to be said that, were it not for this body—and I would applaud specifically this subcommittee—there would not be an energy policy in America. When we look at where we are, as far as the development of alternative energy, when we look at where we are going, as far as conservation, the major commitments do not come, sadly, from 1600 Pennsylvania Avenue; they come from the Subcommittee on Interior of the Appropriations Committee.

Let me be very specific. Earlier the gentleman from California (Mr. DANNEMEYER) was on the floor expressing concern about reservations in here about offshore drilling. I support those reservations, and one of the reasons I do is that in other parts of the bill we address ourselves very specifically, and I think we commit ourselves very substantially, to the development of alternative sources of energy.

When we look at the report, pages 82 and 83, we find in area after area a commitment to alternative sources of energy.

Coal liquification: I know the gentleman fr[illegible] Pennsylvania (Mr. MURTHA) has played a major role here. What is it? It is an attempt to develop alternative energy and to do so in order that coal can be burned in a clean fashion.

Fuel cells. That is very, very important as an alternative source of energy, again. And I would point out that in this particular area the funding recommended by this subcommittee is five times that called for by the administration.

Again, continuing in the report, heat engines, underground coal gasification, surface coal gasification. In all of these areas you will find a commitment that greatly excedes that called for by the administration. And this obviously is good news, because it says even though OPEC is in disarray, this country is not going to ignore its energy needs, it is going to respond to its energy needs both through legislation and through the commitment of this bill.

Second, and very importantly, the whole area of conservation. When the administration offered its budget in February of this year, there was zero funding for weatherization. Let me repeat that: Zero funding for weatherization in this country. Now, I do not have to tell you if we are going to conserve energy in America we need a strong commitment to weatherization. It is found in this bill.

In addition, the program for conservation in our public schools and hospitals, what did the February budget contain? A request for zero funding. In each of these instances there has been a response and a dollar commitment, and that is very, very important if this country is to develop an energy policy.

I would say to the Members that the development of that energy policy is critically contingent upon the passage of this legislation.

Then, to respond to the issue of offshore drilling, I would say that the committee, in looking at these areas—and I will talk specifically about Massachusetts—has been sensitive to both the energy needs and to the whole question of environmental needs.

In the case of the Georges Bank, there is no area on the Atlantic coast that is richer in fishing, there is no area off of Massachusetts that provides more as far as economic opportunity in fishing than the Georges Bank area. And what have we said here? We are restricting the area that will be open as far as lease sales in that part of our offshore area, not prohibiting it, but limiting it, and that is critical, I think, to preserving our environment and also seeing to it that there can at the same time be development of energy rights in that area.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. RATCHFORD. I yield to the gentleman from Massachusetts.

Mr. STUDDS. I thank the gentleman for yielding.

Mr. Chairman, very briefly I want to take this opportunity to thank the gentleman in the well and to thank the distinguished chairman of the subcommittee, the gentleman from Illinois (Mr. YATES), for the leadership they have shown. This is a matter of concern not only for those who have the privilege of living in the coastal States of New England, but I think anyone in this Nation with a concern about the natural resources of the ocean, about the sanctity of the marine environment and about an infinitely renewable supply of food for this Nation and for the world if it is properly and wisely managed. We all owe an enormous amount of gratitude to this subcommittee for the work it has done.

Mr. Chairman, I rise in strong support of this appropriations bill and would like to note especially those provisions that impose certain restrictions on the Outer Continental Shelf oil and gas leasing plans of Interior Secretary James Watt.

The bill would preclude the Department from engaging in any preleasing or leasing activities in specified portions of the North Atlantic planning area and would protect those areas in the region cited in legislation I introduced earlier this year with Congressman PANETTA of California.

The Committee's actions—in the North Atlantic and in other regions of the OCS—constitute a strong rebuke to the ill-advised and confrontational leasing policies that have been instituted by Secretary Watt. Since final approval of the Secretary's 5-year plan in July 1982, five of nine sales proposed under the schedule have ended up in court. In enjoining lease sale No. 52 in the North Atlantic a Federal judge ruled that Mr. Watt had violated provisions of the Outer Continental Shelf Lands Act Amendments of 1978, the Coastal Zone Management Act, the National Environmental Policy Act, and the Endangered Species Act.

In implementing his plans for OCS development, Mr. Watt has failed to give sufficient consideration to the coastal environments and economics that it affects. The mean resource estimates for sale No. 52 are only 55.7 million barrels of oil and 280 billion cubic feet of natural gas. These figures reflect a reduction of over 95 percent from previous estimates of the available resources in the area. I do not believe that it would be advisable or appropriate to jeopardize the vitally important fishing and tourist industries of the North Atlantic for such a limited expected return. At the present time, oil companies hold leases to 63 tracts in the Georges Bank area and I believe it would be more prudent to continue to monitor and study the ongoing exploratory activity in order that any new data may be available to help shape future lease sales. This bill wisely permits such scientific studies to continue.

Mr. Watt has forced the Congress to play a more active role in determining those areas in which oil and gas exploration is appropriate. By its actions today, the House has the opportunity to show that it fully intends to assume this responsibility.

Mr. RATCHFORD. I thank the gentleman.

Mr. Chairman, finally, the issue of coal leasing needs to be addressed briefly. We held extensive hearings this year, after receiving an Appropriations Committee report and a General Accounting Office report that said the public lands were being opened up indefinitely to coal leasing. What have we done? We have called for the naming of an independent

commission, we have called for an examination of coal leasing practices. Out of that, hopefully, will come new practices for coal leasing, but also practices that will provide a fair and reasonable yield to the taxpayer.

So, on balance, as far as quality of life, as far as energy development, as far as reasonable standards in the area of protection of public lands, it is a good bill, it is a balanced bill, and it deserves our across-the-board support.

Mr. YATES. Mr. Chairman, I yield such time as he may consume to the gentleman from South Dakota (Mr. DASCHLE).

Mr. DASCHLE. Mr. Chairman, I rise in support of the fiscal year 1984 Interior appropriations bill. I certainly commend Congressman YATES for his efforts on this legislation and for the sensitivity and understanding he has shown to the needs of many people, Indian people in particular.

This legislation rejects the callous recommendations of the administration on a number of items. One of the most effective Indian programs is the community health representative program (CHR)—this is an outreach health care program and is the only reason that many Indian people, without transportation or telephones and living in remote areas, receive health care. The administration has proposed to eliminate the CHR program in fiscal year 1984. I am very pleased that the bill we are considering today contains $27.5 million for CHR.

Likewise, the administration would have eliminated funding for urban Indian health care centers, but this legislation wisely and humanely provides $9 million for urban Indian health care centers.

The members of the Rosebud Tribe have been fighting for years for a hospital—indeed, the Indian Health Service ranks Rosebud as the No. 1 priority on its list for hospital construction. Money has been appropriated a number of times for a hospital at Rosebud, but for various, and very poor, reasons the Government has never actually released the money for this purpose. This bill contains $11,090,000 for construction of the Rosebud Hospital. I am pleased to note the strong committee report language regarding the unnecessary delay in the release of the design money for the hospital at the Rosebud Reservation and the urgency with which the committee views the construction of this hospital.

The fiscal year 1984 Interior appropriations bill also contains other planning and design money for Indian health facilities: $1,360,000 for a hospital at the Pine Ridge Reservation, $200,000 each for outpatient care facilities in Kyle and Fort Thompson, S. Dak. and $360,000 for an outpatient care facility at Wagner, S. Dak.

In the area of Indian education, this bill shows the good judgment of the Appropriations Committee members in rejecting the administration's proposal to eliminate funding for the Indian Education Act, commonly referred to as title IV. H.R. 3363 contains $71 million for title IV. I particularly thank Chairman YATES for his strong support for the Indian Education Act.

Having detailed some of the reasons why I support the bill before us today, I must also just as strongly detail my concerns regarding two particular shortfalls in this legislation.

First, the bill is at least $10 million short of funding to pay indirect costs for 638 contracts. Tribes are increasingly contracting their own programs—a development which is, I think, supported by nearly all Indian people, as being in the best interest of Indian tribes. I understand that the Bureau of Indian Affairs has recognized that the money they requested for indirect contract support—$35 million—is insufficient. The BIA belatedly filed a budget amendment requesting more money. While $10 million may not sound like a great deal of money, it would make a considerable difference in helping tribes administer programs themselves. It is ironic that there can sometimes be money available for a program but at the same time the tribes cannot afford to administer them. I would strongly urge that the House accept the higher figure in conference with regard to indirect contract costs. If the Senate does not come in with a higher figure, we should look at this as something to include in a fiscal year 1984 supplemental bill.

And finally, I voice strong concern over the figure in this bill for the tribally controlled community colleges. The figure in this legislation, $5.5 million, is $600,000 less than was available to these colleges in fiscal year 1983. This $600,000 shortfall, when combined with the projected enrollment increases, puts tribal colleges in peril. Tribal colleges live on a very thin financial margin, and any less money could cause some of them to close their doors. These schools have done much with little financial resources. They must, however, have a stable source of funding in order to do the things necessary to gain accreditation. This past year Sinte Gleska College at the Rosebud Reservation became the first Indian college in the Nation to receive a 4-year accreditation at both the associate and bachelor degree levels. And the Oglala Sioux Community College at the Pine Ridge Reservation received word just last week of receiving its 4-year degree accreditation. There is well deserved pride at Pine Ridge and Rosebud in reaching this plateau, but it is really just a beginning in terms of what Sinte Gleska and Oglala Sioux Community College have to offer and want to achieve. And the same is true of the other tribally controlled community colleges who are all working toward accreditation.

Just to keep even, on a per student basis, with last year's funding, there needs to be $3 million more for tribally controlled community colleges than this bill contains. Frankly, I would like to do more than just keep even in funding for these colleges. There is some reason to believe that the Senate will come in with a higher figure for the tribal colleges. I strongly urge that, if the Senate bill contains more money for the tribal colleges, we accept the Senate level.

I and a number of colleagues who are particularly familiar with the tribal colleges and know firsthand of the great good that they do and of their promising future, will continue to work for a higher level of funding for the tribally controlled community colleges.

Mr. YATES. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Ohio (Mr. REGULA).

□ 1540

Mr. REGULA. Mr. Chairman, perhaps we should call this bill the American dream bill. I say that because we deal with the resources that are essential to the future of America.

We hear a lot today about high tech, and I believe we have a caucus on futuristic ideas. However, in this bill we are truly dealing with the future of America. We are dealing with the timber resources. Wood products at a reasonable cost are essential for the American dream of owning a home. We are dealing with the preservation and wise use of the mineral resources of these United States; and we are dealing with the productivity of its land.

I like to tell school groups when I meet with them that as citizens of the United States, their share of America is about 3½ acres. If we take the total amount of land that is owned by the Federal Government and divide by the total number of people in the United States, it comes out to something like 3½ acres of land. That is part of each person's heritage.

What we attempt to do in this committee is manage these assets wisely. This is one of the few bills that actually produces revenues on a net basis to the Federal Treasury because of the sale of timber and minerals plus land leases.

The key issue before us is the question as to whether the bill before us today represents wise stewardship of our public lands.

I want to commend the chairman and the ranking member of the committee. They worked diligently along with the rest of the members to do a

good job of management. It is a very open committee. Each of us has an opportunity to present our ideas on this management procedure.

I regret that the bill is over the fiscal year 1983 levels. I think for the record, we ought to clarify exactly what the situation is, and that is that the bill is $287 million more than was signed by the President in the fiscal year 1983 bill excluding the off-budget SPR and the jobs bill, and that really should be our benchmark.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. REGULA. Yes, I yield to the chairman, the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

Mr. Chairman, may I say to my friend respectfully, that is not a correct statement. The bill that the President signed contained off-budget funding for the strategic petroleum reserve, and in doing so, just as we appropriate the money for the strategic petroleum reserve in this bill. On that basis this bill is more than $100 million below the level of that fiscal year 1983 bill. Those are the figures that are verified by our staff, and the gentleman knows the accuracy of their figures.

Mr. REGULA. Yes. I understand, Mr. Chairman, and actually, in comparing apples to apples, in taking comparative functions, what was signed for 1983 was $287 million less than we propose in this bill, and I see the gentleman is disagreeing with that point of view, therefore I yield again to the chairman for clarification.

Mr. YATES. I do not want to take more of the gentleman's time. I want only to say that I respectfully say his figures are wrong. We have the figures over here on our side and we will be glad to go over them with the gentleman after he completes his statement.

Mr. REGULA. As I say, Mr. Chairman, it depends on how you want to make the comparisons. But in any event, as was pointed out earlier by the gentleman from Illinois, we are over on both the President's estimates, as well as in many of the accounts for fiscal year 1983 levels.

Mr. Chairman, I do want to mention the arts, because that was a subject of an earlier colloquy. We in the United States are oftentimes said not to give adequate support to the arts. I would point out that if we take into account not only the Federal support for the arts and humanities, but what is supported by way of tax deductibility for the charitable contributions to these functions, that in all probability the total commitment of funding, Federal, State combined with the benefits of tax deductibility, would make our contribution to the arts and humanities in the United States on a per capita basis as much as any nation in the world.

I regret that in the disbursement of these funds that oftentimes they are not spread over as much of the area of the country as I would like to see. I think there is a tendency to concentrate the arts and humanities programs in some of the major population centers. I would like to see them reach out more.

On July Fourth, there will be a concert of the National Symphony on the Capitol steps that is receiving some financing through this subcommittee. This event will reach out to all Americans. I commend that part of the bill.

Mr. LOEFFLER. Mr. Chairman, I yield myself 5 minutes, and I yield to the gentleman from Louisiana (Mr. LIVINGSTON).

Mr. LIVINGSTON. I thank the gentleman for yielding to me.

Mr. Chairman, I rise to express my opposition to the provisions in this bill which place a moratorium on leasing off certain areas of the Outer Continental Shelf on the east coast, the Gulf of Mexico, and California.

First, I want to commend the chairman and the subcommittee members and staff for the fine work they have done on the rest of this bill. In addition, the ranking minority member, Mr. MCDADE, must be complimented on his efforts in full committee to add provisions to the bill allowing the Interior Department to proceed with their preleasing activities up to the point of the actual notice of sale.

However, I must still oppose the restrictions in the bill against moving forward with the OCS sale or leasing in critical areas of our offshore lands. This 1-year moratorium and the threat of future moratoriums will effectively kill the sale for the eastern gulf scheduled in November and the southern California sale scheduled in February 1984.

As an Appropriations Committee member, I do not wish to deny our committee any leigislative prerogatives; however, as a former member of the House Select Committee on the Outer Continental Shelf, I can assure the House that the 1978 OCS Act and the Coastal Zone Management Act provide for lengthy and elaborate consultation and coordination procedures between the States affected by OCS leasing and the Department of the Interior. These procedures are specifically provided in sections 19 through 24 of Public Law 95-372 and include legislative mandates for:

First, coordination and consultation with affected States and local governments;

Second, environmental studies;

Third, safety regulations;

Fourth, enforcement;

Fifth, citizen suits, court jurisdiction, and judicial review; and

Sixth, remedies and penalties.

Mr. Chairman, I believe these procedures, mandated by law, allow for the detailed and proper review we desire. This is a review process which I believe has been sustained by the June 9 Court of Appeals for the District of Columbia's dismissal of a coastal State's suit against Interior's 5-year plan. While a formal opinion has not been issued yet, I believe it is safe to say the court's action establishes that the OCS 5-year plan has been implemented in accordance with the intent of Congress as expressed in the Outer Continental Shelf Lands Act of 1978; notwithstanding the House Interior Subcommittee on Oversight and Investigations report issued in a timely fashion this past weekend.

Mr. Chairman, by declaring OCS leasing moratoria on annual appropriations bills before the 1978 act safeguards and review procedures run their course, we raise the specter of many problems:

First, section 18 of the 1978 act mandates that there must be "an equitable sharing of development benefits and environmental risks among the various regions." It would be impossible to strike such a balance in the 5-year OCS program if additional areas are prematurely deleted from the leasing program. Barring major portions of the 5-year OCS program would mean that nearly all OCS leasing and production would continue to occur off the coasts of only three States: Alaska, Louisiana, and Texas. Yet, the U.S. Geological Service estimates that offshore drilling along the entire U.S. coastline will provide at least 26 to 59 percent of our country's future oil discoveries and 25 to 36 percent of our future natural gas. Therefore, other States should and must share the responsibility of keeping the United States energy independent.

Second, arbitrarily curtailing oil leasing on U.S. coastal regions also threatens the second largest source of revenue to the U.S Treasury. Federal OCS bonus, royalty and rent revenues of $11.2 billion are projected in fiscal year 1983, $11.9 billion in fiscal year 1984, and $12.2 billion in fiscal year 1985. The revenue impact on our Federal deficit and balance of trade deficit caused by the loss of this revenue need not be explained to this Chamber.

Third, the most devastating impact these moratoria cause is continuous uncertainty in the entire 5-year OCS program. This does not allow industry time to properly respond and plan effectively to meet our country's oil and gas needs. In Louisiana this not only means big industry, but hundreds of related support facilities and small businesses who provide supplies and services to the entire offshore infrastructure and employ thousands of people. These support-related businesses include administrative and financial centers in New Orleans to refining, processing, tooling, and cater-

ing businesses in small communities throughout south Louisiana. Moratoria anywhere in the United States but especially in the eastern gulf, will result in the loss of thousands of jobs in an already depressed industry.

Mr. Chairman, the Department of Interior recently completed an OCS lease offering to the oil and gas industry in the gulf that brought in a record $3.5 billion in bonus bids alone to the Federal Government. This most recent lease offering, and the promise of sale 79 in the eastern gulf in November, has raised hopes in our stagnant offshore industry and job market in the gulf. I certainly hate to see these hopes dashed by a moratorium on the eastern gulf area. Not moving ahead with this sale in the eastern gulf will mean that 3,000 much needed jobs will not be created.

On the important question of environment, offshore Louisiana is and continues to be the most intensively developed OCS area in the country and the gulf. From 1954 to 1981 a total of 19,908 wells were drilled in the Federal OCS. Over 84 percent or 16,734 of these were located in the Louisiana offshore areas. Despite all of this activity—with an average daily oil production rate of over 700,000 barrels per day—Louisiana has only experienced two significant oil well blowouts. Both of these were in 1970 and neither one resulted in any oil reaching the Louisiana coastline. More astonishing, Mr. Chairman, is the fact that over 26,000 wells have been drilled in all State and Federal waters since offshore drilling began at the turn of the century. Only three other significant oil well blowouts besides the two in Louisiana have occurred. The most infamous was the Santa Barbara oilspill in 1969, and studies have documented that the environmental damage there was only temporary. In fact, Mr. Chairman, we have had more major oilspills off our U.S. coasts and around the world as a result of tanker accidents; tankers which in many cases are carrying imported foreign oil into our country.

In Louisiana and throughout the southwestern gulf we have also found that sport and commercial fishing have benefited enormously from the presence of offshore rigs which act as artificial reefs. Studies by Texas A&M University may soon confirm these environmental benefits. Amazingly, the commercial fishing industry has increased its annual harvest from the same waters in which the petroleum industry operates. Since 1954 intensive offshore oil and gas activity has been a way of life in Louisiana. Yet, today the Gulf of Mexico is the largest producer of domestic fishery landings in the United States. The gulf area now produces 36 percent of volume and 26 percent of the value of all seafood landed in the United States. In fact, 1982 was a record catch year in the gulf. These two industries can coexist.

Mr. Chairman, I believe the 1978 OCS Act can work, and can provide the type of consultation and review process between States and agencies Congress intended when it passed this law. This process should be allowed to run its course before action by this committee or body on moratoriums is considered.

On the eastern gulf, three previous sales have been conducted; sale 65 in 1978 and sales 67 and 69 last year. In each case the 1978 OCS Act provided the mechanisms to resolve any problems associated with environmental or defense related concerns.

As for sale 79, I understand the proposed notice of sale will be signed shortly. Historically over 90 percent of all the problems and consultations associated with a lease offering are resolved during the comment period after a proposed notice of sale has been made. This was the intent and purpose of Congress when it passed the OCS Act in 1978.

However, in the case of sale 79, as in most other OCS lease offerings, consultations between the Interior Department, States and various agencies have already been conducted. In addition, lease stipulations beyond those normally approved have already been agreed to in some areas. A draft environmental impact statement is being circulated and has just been finalized. The Department, through the Mineral Management Services, is attempting to resolve Air Force and Navy problems with the lease offering and additional lease stipulations, beyond those historically granted in previous lease sales in the gulf, have been agreed upon.

Certainly there are additional problems to be worked out, but I hope in the future this Chamber will allow the normal process to work its will first before considering appropriations moratoria which might only lead to the terrible consequences I have outlined.

Mr. LOEFFLER. Mr. Chairman, I join the gentleman from Ohio (Mr. REGULA) in commending the distinguished chairman of the subcommittee, as well as the ranking Republican member, for working with both sides during the subcommittee process, as well as the full committee process. Both gentleman have been very fair and forthright in their presentations to us and the other Members on both sides of the aisle, and indeed to each, the chairman, the gentleman from Illinois (Mr. YATES), and the ranking Republican, the gentleman from Pennsylvania (Mr. MCDADE), I am grateful.

Just as the gentleman from Ohio rose in opposition to this appropriation bill, I, too, rise. At best, the bill is $300 million over the fiscal year 1983 appropriations level.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. LOEFFLER. I will be happy to yield to my distinguished chairman, the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

Mr. Chairman, at the conclusion of the gentleman's statement, I would be glad to show the gentleman the figures. Mr. Stockman's letter is wrong. The bill that the President signed into law was higher than the bill that we have brought to the House.

Mr. LOEFFLER. I thank the distinguished chairman of our subcommittee for his comments, but I might point out, as he well remembers, 2 years ago we came out of a conference and both he and I were arguing very sturdily, based upon two different numbers which we believed in so very much, and in fact one had apples and one had oranges, and this time I suspect that we are dealing with that same process again.

I would, however, point out to my distinguished chairman that the Congressional Budget Office has just put out a document which says:

> Our Interior appropriations bill is $.3 billion or $300 million in discretionary budget authority; and $.4 billion, or $400 million in discretionary outlays over the assumptions of the 1984 budget resolution.

So earlier I believe my distinguished chairman said that we were within the budget resolution as passed on the floor of the House, a resolution which I did not support, and that leads to the credence of the fact that numbers are numbers, and now the gentleman from Illinois, our distinguished chairman, has problems.

Mr. YATES. If the gentleman will yield further, there are two things that must be kept in mind here, on-budget items and offbudget items.

SPRO, which we appropriate for every year because we are interested in filling the strategic petroleum reserve, is considered to be an offbudget item, and that is the basis for Mr. Stockman's assertion and the basis, too, for the Congressional Budget Office assertion. But including SPRO, which is part of the bill the President signed into law, and that was the basis of the statement by my friend from Pennsylvania, the bill that the President signed into law was still higher than the bill we bring to the House.

Mr. LOEFFLER. Reclaiming my time, Mr. Chairman, in an event, I wish to inform the Members of this body that if this bill were passed by the Congress and sent to the President with the current figures of what we deem to be $300 million over the fiscal year 1983 appropriation bill, it is a very strong veto candidate.

I urge my distinguished Chairman, as well as the Members of this body, to see that we reduce the appropriated

amount so that it can be a bill which the President would sign. In the event it is vetoed, I have every confidence that we will sustain that veto and we would have to go back to the subcommittee process to address the fiscal problems that this appropriation bill gives us today.

Mr. Chairman, in addition to this bill being a budget buster and a strong candidate for a Presidential veto in its current form, it actually severs potentially significant Federal revenues by placing prohibitions on Federal coal and offshore oil and gas leasing programs.

Mr. Chairman, our Nation is an energy-dependent nation. We are today moving forward to release the shackles which OPEC has been able to place upon us through the decade of the 1970's. I do not wish to see our country once again suffer the demeaning gasoline lines, the lack of home heating oil, the lack of natural gas for home use as well as industrial use—all which we experienced during the decade of the 1970's.

□ 1550

In my judgment, the prohibitions that we have placed in this appropriation bill on lease sale No. 80 and lease sale No. 79 which are prohibiting the ability of those sales to go forward are not in our Nation's best interests.

Mr. Chairman, as we address our energy needs, in my judgment we have now a Department of the Interior that is working very closely with officials from the State of California, as well as with officials from Florida. This review is proceeding pursuant to the congressional mandates of the OCS Lands Amendment Act. In my judgment it should not allow or should not provide for the prohibitions that we now have on this sale.

Mr. Chairman, I urge the Members of the body to vote to reduce by $300 million the outlays that are in this bill and, if such a reduction is not achieved during its consideration, to reject this appropriations bill.

Mr. YATES. Mr. Chairman, I yield 3 minutes to the gentleman from Oregon (Mr. AuCoin).

Mr. AuCOIN. Mr. Chairman, I rise in strong support of the Interior appropriation bill for fiscal year 1984, and I want to commend the chairman of the subcommittee, the gentleman from Illinois (Mr. Yates), for the leadership he continues to show on this bill each year. I extend that same compliment to the ranking Republican member of the subcommittee, the gentleman from Pennsylvania (Mr. McDade).

It is a pleasure to work with both of them and with my colleagues on this committee, even on those few times when we find ourselves in disagreement—and those times are relatively few.

Mr. Chairman, there is probably no more important bill affecting the State of Oregon than this bill. Over 50 percent of Oregon is managed by the Federal Government. That fact alone makes this bill critically important to my State.

The budget of the Forest Service is of particular importance to the economy of my State, like the other States of the Pacific Northwest and the Western region. The Forest Service budget is important because most of the timber companies in my State are not large private landholders. Instead, these firms must rely on timber offered for sale by the Forest Service from the lands that agency manages.

This bill provides funding for 5.1 billion board feet of new green timber sales in region VI. Because of the increase in housing permits and starts, it is important that adequate levels of timber sales be provided, and this bill does so.

This bill provides a sound timber sales program in order to meet anticipated demand. Funding is also provided for reforestation and for timber stand improvement, two accounts that are highly labor intensive and add to the stability and productivity of our national forests in the region I represent.

Mr. Chairman, I would say to my colleagues that this bill also restores many of the cuts requested by the administration for forest research programs and State and private forestry programs. In addition, nearly $1.5 million has been added back to the soils and water account of the Forest Service program designed to protect the land during and after timber harvest. This is one of many examples, Mr. Chairman, of a particular program, a vital program within the Interior appropriations bill that we bring before the Members today which is an investment in the productivity of this country. Funds that we invest through this bill in our lands and in our natural resources will more than replenish that amount to the Treasury.

The bill before the House today does not include the money requested by the Forest Service for development activities in those areas included in the Oregon and California wilderness bills, as passed by the House earlier this year. It is important to resolve the controversy surrounding the wilderness issue so that the timber industry can have some degree of predictability in planning for future supply. This is central to future jobs in Oregon's forest products industry.

Just as important is the need for certainty for those who wish to see some of this Nation's last few acres of pristine wild lands protected from further development.

The legitimate demand for wilderness from those who want to protect some of Oregon's best spawning streams and elk herds should not go unheeded. It is important that we leave something of our natural heritage to our children.

In short, Mr. Chairman, the budget for the Forest Service represents a sound, balanced approach to resource management. It recognizes the important economic impact of the wood products industry on the Pacific Northwest and the Nation while, at the same time, protecting and enhancing the land which is the basis for that industry.

The Interior appropriations bill also includes $3.5 million for anadromous fish conservation grants. Fishing is Oregon's third most important industry, but its fair to say that the industry has seen better days. For the towns up and down Oregon's coast, it remains an industry of paramount importance. Funding for this program is critical if the fishing industry if to recover and maintain its contribution to Oregon's, and the Nation's economy.

Important land acquisition across the country are also included in this bill, as well as funding for the State side of the land and water conservation fund. I am pleased that our commitments has included funding for acquisition at Bear Valley, Cascade Head, the Rogue River, and parcels in the Mount Hood and Gifford Pinchot National Forests.

Mr. Chairman, I have focused on some of the items in this bill that are of direct benefit to the Pacific Northwest, but the bill is truly a national bill. Land acquisitions in the Santa Monica Mountains and Valley Forge and Cuyahoga Valley serve a national interest. The Forest Service budget not only means a stable level of timber supply for the Northwest, but needed assistance to small woodlot owners in the South. There are very few items as important as the payment in lieu of taxes program to the West, particularly the Intermountain and Rocky Mountain States.

Energy conservation has long been a value in my State of Oregon and the funding for those programs associated with energy conservation are a top priority. But those efforts are just as important in the East and the rest of the country as they are in the Northwest.

There will be much discussion of the budgetary impact of this, and other, appropriation bills. Let us be clear about this bill. The Interior appropriations bill for fiscal year 1984 is $245 million less than the fiscal year 1983 bill which was passed by the 97th Congress and signed into law by the President last December. This bill will generate receipts of $15.7 billion—nearly twice the amount we propose to expend. Mr. Chairman, this bill makes money—it helps to reduce the Federal budget deficit. Indiscriminate cuts to this bill will mean lost revenue to the

Federal Treasury, States, and counties.

More important, it will mean lost opportunity for thousands of Americans who work and play on our national lands. This bill affects those who work on offshore oil rigs, those who work in the forests, and those who take their family on a vacation to Yellowstone.

Mr. Chairman, this is a balanced bill. It means jobs to thousands of Americans while protecting our precious natural resources from exploitation. This is a financially responsible bill. It spends less than the current fiscal year and it makes money to reduce the deficit. I urge my colleagues to support it.

Mr. DICKS. Mr. Chairman, will the gentleman yield?

Mr. AuCOIN. I yield to my colleague, the gentleman from Washington.

Mr. DICKS. Mr. Chairman, I thank my colleague for yielding.

Mr. Chairman, I want to compliment the gentleman from Oregon (Mr. AuCoin) for the work that he has done on this bill, particularly as it relate to the Forest Service aspects. I have enjoyed working with him over the last several years since he has become a member of the Interior Subcommittee.

I want to thank our colleagues, particularly our chairman and the ranking minority member, for the support they have given to a balanced forestry program.

In the Northwest we have had very difficult times recently because of high interest rates and what that has done to the housing industry, but I think the kind of budget we now have in place will help us deal with those very difficult economic problems that are still there.

I commend the gentleman from Oregon, who has spent a great deal of time mastering this subject matter. I commend him for the leadership that he has provided in making sure that we have a balanced program and making sure that our environmental concerns are protected as well.

Mr. YATES. Mr. Chairman, I yield such time as she may consume to the gentlewoman from Tennessee (Mrs. Lloyd).

Mrs. LLOYD. Mr. Chairman, I rise in support of H.R. 3363, and commend subcommittee Chairman Yates for his leadership in bringing to the floor responsible appropriations levels for fossil energy and conservation R&D programs. I also want to congratulate the subcommittee's ranking Republican, Mr. McDade, for his great efforts at arriving at funding levels which will provide stability to our Nation's R&D efforts. Furthermore, I would like to compliment my committee chairman, Mr. Fuqua, for his hard work in providing authorization levels for fossil energy and conservation R&D activities that are almost parallel to those contained in the legislation before us today.

The total program level for fossil energy of $327 million represents a positive increase over the administration's continued shortsighted requests for these R&D activities which are vital to our Nation's energy independence. This body has repeatedly denied these going-out-of-business budgets, and I am sure we will continue to provide adequate support for these critical energy programs.

I am grateful to Mr. Whitten, Mr. Yates, and the committee for providing $7 million for a comprehensive environmental monitoring program to be carried out by DOE in support of the Synthetic Fuels Corporation. My efforts to obtain support for this activity derive from a desire to see the concerns of Congress and the public addressed regarding the health, safety, water resources, and socioeconomic issues associated with the development of synfuels projects. By allowing DOE to operate in a technical consulting role supporting the SFC, we will insure that the Nation's best technical expertise is integrated and that the environmental monitoring programs will have technical program continuity regardless of the status of the Synthetic Fuels Corporation.

With regard to the funding provided for conservation programs, I am particularly pleased to note that the committee sustained DOE's request for $9 million to begin construction of a High Temperature Materials Laboratory at Oak Ridge. I believe that the research to be conducted at the HTML will provide valuable information and will lead to advancements in the use of materials critical to energy efficiency.

Mr. Chairman, I urge my colleagues to support this important legislation.

Mr. YATES. Mr. Chairman, I yield such time as he may consume to the gentleman from Georgia (Mr. Fowler).

Mr. FOWLER. Mr. Chairman, I want to take this opportunity to express my support for the 1984 Interior Department budget recommended by the Appropriations Committee.

In particular, I would like to thank Interior Appropriations Subcommittee Chairman Yates and his colleagues for approving $1.388 million in the U.S. Park Service budget for the M. L. King, Jr., National Historic Site and Preservation District.

The King Historic Site is an important asset to Atlanta and the Nation. Last year over 500,000 visitors came to the park, not only to pay homage to Dr. King but to learn more about the story of the civil rights movement.

The historic site covers a two-block area encompassing the birth home of Dr. King, his church, and his memorial gravesite. The preservation district is composed of the commercial and residential sections of the Sweet Auburn community in which Dr. King grew up.

The $1.388 million budget for next year will fund $500,000 for land acquisition to acquire historic structures in the area, $200,000 to restore the structures once acquired, $100,000 to develop visitors exhibits, and $588,000 to operate the park.

These funds are needed to continue adequate development of the park, which is a relatively new unit of the U.S. Park Service authorized in 1980 but first funded last year. For this reason, I strongly endorse the Appropriations Committee's recommended 1984 funding for the King site.

Mr. YATES. Mr. Chairman, I yield such time as he may consume to the gentleman from California (Mr. Panetta).

Mr. PANETTA. Mr. Chairman, I rise in support of the legislation, and I would like to take this opportunity to express my sincere gratitude to the chairman and ranking minority member of the Subcommittee on Interior—Mr. Yates and Mr. McDade, respectively—for their guidance in bringing this legislation to the floor today.

I know I speak for many in California—many members of the California delegation, county governments, costal businesses, and people who simply enjoy our State's attractive and productive coast—in offering my thanks to you for your efforts bringing this legislation to the floor. This legislation contains a provision which would exempt a small, but vital percentage of California offshore area from offshore oil and gas leasing during the coming fiscal years, while still enabling the Federal Government to continue to pursue energy leasing in most promising California offshore areas. In fact, this provision would exempt from OCS oil and gas leasing only 9.2 percent of the acreage currently under consideration for possible lease during the 1984 fiscal year, leaving over 12 million acres of Federal offshore land open for lease.

California has made in the past—and will continue to make—a significant contribution to OCS oil and gas production. During the third quarter of 1982, California produced on the average over 1.2 million barrels of crude oil per day from State and Federal onshore and offshore lands.

It is clear that some of our State's most promising oil-producing areas lie in Federal offshore waters. The one-half billion barrel Pt. Arguello field, Chevron's 100 million barrel Sockeye field strike, and the oil-rich Santa Barbara Channel are all certain to contribute to our Nation's energy security through the coming years. For this reason, none of these most productive areas would be affected by the OCS leasing provisions of this bill.

Instead, these provisions would affect those few economically and environmentally sensitive areas in which the considerable benefits of OCS oil and gas leasing are outweighed by the risks. I am pleased that the committee was able to reach a compromise which balanced the certain benefits of offshore development with the risks to the economies and marine environments of these particularly sensitive areas.

Again, I thank the committee for its foresight and efforts.

Mr. YATES. Mr. Chairman, I yield such time as he may consume to the delegate from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Chairman, I rise in strong support of H.R. 3363 which makes appropriations for fiscal year 1984 for the Department of the Interior. I want to commend the chairman of the Interior Appropriations Subcommittee, SID YATES, and the ranking member, JOE MCDADE, and their able staff for their work in drafting this bill.

I want to address my remarks in particular to two items of great interest and concern to my constituents in Puerto Rico.

First, the Appropriations Committee included funding for the continuation of the restoration of El Morro Castle in the San Juan National Historic Site. The budget for the National Park Service was increased by $4.5 million to allow for a resumption of the most critical work. The work on the restoration of the walls surrounding El Morro was begun in 1976 but was suspended last year because of lack of funding. El Morro Castle was constructed by the Spaniards between 1540 and 1591 as part of a fortress to protect the island from invaders. It has become a major tourist attraction with over 1½ million visitors annually.

Over the centuries, the ceaseless pounding by the ocean as well as exposure to the elements have contributed to the undermining of the fortress' foundations. Huge caverns have been formed that threaten the structural integrity of the fortress.

Over $13 million has already been spent in restoring this national treasure, and it is important that the work be completed in an expeditious manner to avoid further damage to the structure.

Second, I am pleased to note that the State and private forestry program is being funded at a reasonable level. In 1982, Puerto Rico received $291,000 under the cooperative payments to the States, which was very important in our efforts to expand a program of reforestation on public and private lands. According to the U.S. Soil Conservation Service, more than 1 million acres—half of Puerto Rico's total area—require permanent tree cover to prevent erosion and protect watersheds. In addition, Puerto Rico has the potential to establish a commercial timber industry which could help create an estimated 30,000 semiskilled jobs by the end of the 20-year period of the first crop rotation.

In conclusion, Mr. Chairman, I urge my colleagues to act quickly to enact this important appropriations bill.

Mr. YATES. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania (Mr. HARRISON).

Mr. HARRISON. Mr. Chairman, I have spoken before about the plight of the 1,200 men and women who live in Centralia, Pa., under which a mine fire has been burning for 21 years. I want to commend and thank the distinguished subcommittee chairman and the members of the subcommittee for the interest which they have taken in that mine fire and in efforts to contain and extinguish it.

Two years ago, thanks to the efforts of the committee, a bore hole study was implemented to locate the fire and to come up with options for extinguishing it. I had very much hoped that we would have some provision in this bill or some appropriation in this bill to implement the recommendations of that study. Unfortunately, the study will not be available until July 9. The committee was, therefore, faced with the difficulty of being unable to appropriate money for a project which has not been outlined, but I want to thank the members for the report language contained on page 43 in which the committee stresses its concern with this problem and indicates that as soon as the options are available and a plan has been outlined, every effort will be made to appropriate the necessary funds to finally put an end to this tragedy.

Mr. Chairman, if I may, I would like to pay particular tribute to my colleague, the gentleman from Pennsylvania, Mr. MURTHA, for having gone with me one Saturday morning and walked the streets of Centralia and smelled the smoke and seen the suffering in people's eyes. I would like to thank the distinguished gentleman from Pennsylvania, Mr. MCDADE, and the chairman of the subcommittee for what they have done.

Mr. Chairman, I would like to say, as they used to say in the movies, "Stay tuned for coming attractions," because we will be back. This is a problem that urgently cries out for solution.

Mr. YATES. Mr. Chairman, I yield 2 minutes to the gentleman from Minnesota (Mr. OBERSTAR).

Mr. OBERSTAR. Mr. Chairman, I thank the gentleman for yielding this time to me.

Mr. Chairman, I rise in strong support of H.R. 3363, and I urge an overwhelming vote of support by this body for this legislation.

The Interior appropriations bill is the single most important piece of conservation legislation for the management of America's natural resources that this body will consider during this session of Congress. The Subcommittee on Interior Appropriations and the full Committee on Appropriations have done an excellent job of correcting the glaring deficiencies of the Reagan administration's budget proposal.

In particular, I am pleased by the work that the subcommittee has done to increase funding significantly for energy conservation, for the Indian health program, for the National Park Service, for the Fish and Wildlife Service, for the National Forest Service, and especially I refer to the $39 million increase for cooperative State, Federal, and private forestry programs. Those are essential, as the gentleman from Oregon has already pointed out, for the future of the housing industry and for the future of America itself in that most essential part of our economy, the home building industry.

For each of the past 5 years I have had the pleasure of coming before this subcommittee to request additional funding for projects of importance in my district, in my State, and on a national level. On each occasion, I have been deeply impressed by the command that the chairman of the subcommittee, the gentleman from Illinois (Mr. YATES), and the ranking minority, the gentleman from Pennsylvania (Mr. MCDADE), have had of the subject matter under the jurisdiction of that subcommittee.

In my district alone, there are a number of nationally significant national resources:

Voyageurs National Park;

Superior National Forest;

Chippewa National Forest;

Boundary Waters Canoe Area Wilderness, the largest wilderness area east of the Rockies;

Grand Portage National Monument; and

St. Croix Wild and Scenic River.

In addition, as the chief House sponsor of the legislation which created the Minnesota River Valley Wildlife Refuge, I have long been keenly interested in the development of the refuge.

This appropriation bill directly affects all of these important national resources. Having SID YATES as chairman of the subcommittee is all the assurance I need that the request which I make on behalf of the people of Minnesota will receive a full and fair hearing.

This year, the subcommittee approved most of the requests which I made on behalf of the Minnesota congressional delegation and the people of Minnesota. In addition, the subcommittee and the full House has approved construction funds for Voya-

geurs National Park in the fiscal 1983 supplemental now awaiting conference with the Senate. Obviously, I wish that the subcommittee had approved my entire request. It was a barebones, no-frills request. Nevertheless, I am very pleased and grateful for the subcommittee response. The legislation before us today includes the following additions to the President's budget request:

Boundary Canoe Area Wilderness Act (Public Law 95-495)—land acquisition, section 5 resorts and wilderness purchases, $3 million; and grant to State of Minnesota, $3 million.

This grant will enable the State to continue the intensified forest management program which it began following enactment of the Boundary Waters Area Wilderness Act of 1978. The State provides $750,000 annually to match on an 80-20 basis the Federal grant. The President's budget proposed elimination of this important grant which is an integral part of our State's forestry effort.

Voyageurs National Park, $4 million for land acquisition; Minnesota Valley Wildlife Refuge land acquisition, $2.5 million.

I very much hope that the Senate will vote to sustain the tremendous improvements which the House has made to the fiscal 1984 budget. In addition, during the upcoming conference on the fiscal 1983 supplemental, I hope that the gentleman from Illinois, the chairman of the subcommittee (Mr. YATES), will prevail and that the Senate will finally agree to begin funding construction of the essential visitors' center at Voyageurs National Park.

H.R. 3363 is legislation of which this House can be proud to pass. I urge it to do so without any weakening of the important environmental protection it provides.

□ 1600

They know their subject matter down to the last detail and that makes for the effective kind of legislation they are able to bring to this floor. They are able to understand the fullness of the measure which is entrusted to them.

I am especially appreciative of the support that the subcommittee has given to Voyageurs National Park, the Superior National Forest, and other projects in the Eighth Congressional District of Minnesota—in my district alone, and so forth.

Mr. LOEFFLER. Mr. Chairman, I yield such time as he may consume to the distinguished ranking member of the committee, the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Chairman, the bill we have before us today, H.R. 3363, making appropriations for the Department of the Interior and Related Agencies for fiscal year 1984 is a good bill. Through the funding recommendations contained in this bill, the committee seeks to protect, enhance and properly manage the natural and cultural resources of this great Nation.

Included in this bill are funds for the preservation and restoration of millions of acres of forest and rangeland, funds for national parks and local recreation projects; for wildlife habitat preservation, for assistance to Indian tribes and the territories; for the continuation and extension of our cultural programs including the National Endowments for the Arts and Humanities, and the Smithsonian Institution, and funds for a variety of fossil energy development and conservation programs.

Unfortunately, the committee has done such a good job of trying to meet all of these varying needs that the bill we bring to the floor is considerably over the administration's budget request and our own fiscal year 1983 level if we exclude from that level those funds provided in the emergency jobs bill.

Mr. Chairman, as one who was privileged to participate in both the subcommitee and full committee deliberations on this bill, I know the careful consideration which went into each and every recommendation. In preparing its recommendations, the subcommittee heard from over 900 witnesses including agency officials, Members of Congress, State and local officials and private citizens. Indeed, so deliberate has the subcommittee been in making its recommendations only after reviewing all available facts that a special hearing was held after the initial subcommittee markup to gather additional information on the OCS lease program with respect to the planned eastern Gulf of Mexico and southern California sales so that a more informed decision could be made by the time of the full committee meeting.

Let me indicate to my colleagues just how difficult a task it is to reduce the number in this bill other than by an across-the-board reduction by mentioning just a few of the areas in which the committee bill exceeds the administration request.

For the Department of the Interior and the Forest Service, the committee has included $22 million for the continued operation of existing hatcheries throughout the country; $4.6 million to continue Federal participation in the cooperative fish and wildlife research program; $242 million for land acquisition for our national parks and wildlife refuges including some $9 million for the Appalachian Trail and $75 million for the land and water conservation fund State grant program; $7 million for the migratory bird advance loan fund to continue efforts to preserve our irreplaceable wetlands which are being lost to agriculture interests and other development purposes at an alarming rate and $26.5 million for the historic preservation program.

In the Department of Energy, the committee is recommending $243 million to continue the low income weatherization program at the 1983 level; $30 million to prevent closeout of Government support for continued development of the MHD technology and an increase of $36.7 million in the fuel cells program including $2.6 million for thermionics, a very promising advanced fuel concept with both terrestrial and space power applications.

And finally, the committee bill restores funding for the National Endowments for the Arts and Humanities to the fiscal year 1981 level providing $165 million for the National Endowment for the Arts and $150 million for the National Endowment for the Humanities.

Mr. YATES. Mr. Chairman, I yield 1 minute to the gentleman from Pennsylvania (Mr. KOSTMAYER).

Mr. KOSTMAYER. Mr. Chairman, there exists in southeastern Pennsylvania a serious situation regarding the preservation of a historic segment of the Delaware River. A water project is to be built there, despite a referendum in which 56 percent of the voters of Bucks County, Pa., rejected that proposal.

Further, I have introduced legislation designating a 21-mile portion of the Delaware River from Uhlerstown, Pa., to Washington Crossing, Pa. as a wild and scenic study river. Hearings will be held on the bill sometime in the next 3 months and this July 23, members of the Subcommittee on National Parks and Public Lands, will travel to the site at Point Pleasant, Pa.

Now, would the gentleman from Illinois (Mr. YATES) agree to work to make $200,000 available from the National Park Service for a study of the 21-mile stretch of the Delaware River between Uhlerstown and Washington Crossing, Pa., as wild and scenic, at the time at which the bill is enacted into law?

In the meantime the National Park Service would work with State and local governments to assess the options available to preserve this nationally significant stretch of river.

Finally, I would request that a study by the U.S. Fish and Wildlife Commission be conducted on the diversification and location of shad spawning grounds and the impact of water intake structures on shad eggs and juveniles in the 21-mile stretch of river.

Would the gentleman from Illinois agree that within the funds available in the bill to the Fish and Wildlife Service, up to $40,000 could be made available for such a study?

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. YATES. Mr. Chairman, I yield 1 additional minute to the gentleman.

Mr. KOSTMAYER. Mr. Chairman, I thank the gentleman.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. KOSTMAYER. I will.

Mr. YATES. Mr. Chairman, answering the gentleman's second question first, let me say that the request appears feasible to make the amount available within the funds.

With respect to the $200,000 item, we are not sure of the amount, let me say to the gentleman, but we think that the study seems to be a very constructive one and we will give it every consideration.

Mr. KOSTMAYER. I thank the gentleman and finally I would like to commend the gentleman from Illinois for his work and also commend my colleague, the gentleman from Pennsylvania (Mr. McDADE) for his work on this extraordinary and valuable piece of legislation.

With the passage of this bill in the House today, Mr. Chairman, the Point Pleasant pumping station and the efforts to terminate it have come to the attention of the Congress.

Here in the people's House, the will of the people as expressed in the referendum of May 17 in Bucks County has finally been heard.

Mr. McDADE. Mr. Chairman, I yield 1 minute to my distinguished colleague, the gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Chairman, there are many comments I would like to make about this very important appropriations bill, since it affects so many parts of our country as well as my own State; however, having visited the Pacific Trust Territories 2 years ago, as a matter of conscience I want to follow through on a few personal commitments to myself and to residents of those islands.

First, I want to specifically commend the committee for the report with respect to the international section, specifically as it relates to the Pacific Trust Territories.

On page 62 of that report, I note with interest and full support the recommendation of the committee concerning the increase of $264,000 for the supplemental food program and support costs for Kili and Ejit. I think earmarking of appropriations that is highly important.

The committee has also included $4,000,000 to be transferred to the Secretary of Energy to implement the health care program in the Marshall Islands as well.

I think this too is a very appropriate step on the committee's part. I would hope and fully expect that the committee would give this vital health care and nutrition program very close supervision, so that in fact the people who are supposed to receive the food and the health care assistance in the Marshall Islands do receive it. The level of corruption that one finds in the government of the Marshall Islands should not stand in the way of delivering these kinds of services to the people of Ejit and other parts of the Marshall Islands.

The CHAIRMAN. The time of the gentleman from Nebraska has expired.

Mr. McDADE. Mr. Speaker, I yield 1 additional minute to the gentleman.

Mr. BEREUTER. Mr. Chairman, I thank the gentleman for yielding.

So the people of the Marshall Islands should really receive the kind of assistance that the American taxpayer is providing through this appropriation.

I would be pleased to work with the chairman and members of the committee in any fashion that might be helpful in assuring that the delivery of such assistance is not impeded.

Finally, if the gentleman would be willing to respond, I would like to ask the chairman a question, with respect to the Federated States of Micronesia.

I noted with some interest the rather grandiose plans for a capitol complex for the FSM, and having seen the need for substantial economic infrastructure in the Federated States of Micronesia. It is my understanding that the committee specifically considered this proposed capitol complex expenditure and rejected it. Is my understanding correct?

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I am pleased to yield to the chairman.

Mr. YATES. The gentleman may be assured that his understanding is correct. The committee considered it and deleted the funding for the construction of the capitol.

Mr. BEREUTER. I thank the chairman for his comment. I think that was a very appropriate decision on the committee's part and for purposes of legislative history I wanted to make that decision a matter of the record.

I thank the gentleman for yielding.

Mr. YATES. Mr. Chairman, if the gentleman will yield further, the committee has made many appropriate decisions.

Mr. BEREUTER. Yes, I would say to the chairman that I did not intend to imply otherwise. Thank you.

● Mr. BROWN of California. Mr. Chairman, I rise in support of H.R. 3363, the Interior appropriations bill for fiscal year 1984. I want to congratulate the chairman of the full Committee on Appropriations, Mr. WHITTEN, and the chairman of the subcommittee, Mr. YATES, for their work in bringing this bill to the floor.

Mr. Chairman, I am especially pleased to support and congratulate my good friend, Mr. YATES, for his subcommittee's recommendations with regard to earthquake prediction work conducted by the U.S. Geological Survey. I recently acquired the title of chairman of the task force on earthquakes of the California Democratic delegation. I know I speak on behalf of my colleagues in the delegation in thanking Mr. YATES for his support of the Survey's work. I think I speak for some of our friends across the aisle as well. As we all know, earthquakes do not recognize party affiliation.

While the administration proposed to reduce the Survey's level of effort by $6 million, the subcommittee restored the budget to $35.524 million. This funding level will allow the USGS to continue earthquake monitoring projects along major active faults in California, Nevada, Utah, and Washington. It is noteworthy that the recent earthquake in Coalinga, Calif., on May 2 of this year was along an unknown fault. We cannot hope to predict or prepare for earthquakes if we do not set up a network of monitoring devices—this is what I am urging my colleagues to support today.

I would like to insert for the RECORD an article which recently appeared in the Wall Street Journal which indicates the degree to which the news media are prepared for the big one. I only hope we can be as prepared ourselves for this event.

The article follows:

[From the Wall Street Journal, June 24, 1983]

NEWS CREWS, EXPECTING THE WORST, PREPARE TO COVER A MAJOR EARTHQUAKE IN CALIFORNIA

(By Scot J. Paltrow)

LOS ANGELES.—During the past month, residents of cities all over Southern California were mystified as CBS network news crews suddenly showed up to tape scenes of downtown areas and landmarks and then disappeared after interviewing no one.

The seemingly strange interest in unremarkable cityscapes was actually part of a secret, slightly macabre CBS mission. The network wants to be ready for the long-anticipated granddaddy of California earthquakes. The roving camera crews were adding to a hoard of stock footage, stored in New York, that will enable the network to show before-and-after pictures of devastation.

CBS may have the most elaborate battle plan for covering a major California earthquake, but it is by no means alone among the nation's news organizations in making preparations. All three major television networks and the Cable News Network have arranged to lease large satellite antennas and transmission facilities in the event that their own become inoperable.

United Press International and at least two of the TV networks have lists at their New York headquarters of Southern California amateur radio operators to contact in the event that phone communications with their Los Angeles bureaus is cut. And, according to CBS Los Angeles correspondent Terry Drinkwater, some news staffers have been given home video systems with cameras to use in case the network's regular cameramen can't make it to a transmission point.

A BIG, BIG STORY

The news organizations have good reason for making plans. Seismologists say there is at least a 50 percent chance that an earthquake measuring more than 7.0 on the Richter scale will occur here within 30 years. A report issued by the Federal Emergency Management Agency in 1980 states that the resulting casualties and destruction "would surpass those of any natural disaster thus far experienced by the nation" and would be a catastrophe comparable to the Civil War. And that would certainly make the earthquake, as Mr. Drinkwater puts it, "a big, big story."

Steve Loper, the Associated Press' news editor in Los Angeles, is expecting the worst. He anticipates that phone service and the bureau's link to the main Associated Press computer network will be cut, and that bureau staff members may be unavailable or injured.

According to a printed plan distributed to the AP staff here, an able-bodied reporter in the Los Angeles bureau is supposed to take an ordinary transistor radio and attempt to make his way eight blocks north to the building that houses Pacific Telephone's microwave transmission facilities. If phones are working anywhere in the city, Mr. Loper says, it's expected to be in that building. The reporter is supposed to listen to his radio for civil defense broadcasts and then go to the top of the building to survey the damage and phone in an eyewitness account to New York.

The plan is about to be revised, though, Mr. Loper says, because personnel changes at Pacific Telephone may mean the reporter wouldn't be let in.

Reporters in nearby AP and UPI bureaus are expected to try to make their way to Los Angeles. UPI has even given its Los Angeles staff members specific assignments. According to a plan drawn up by a former UPI reporter, bureau manager Douglas R. Dowie is supposed to climb out of the rubble and head for the low-income, south-central section of Los Angeles to see if looting erupts. Mr. Dowie says he intends to revise that plan.

CBS, in addition to relying on some staff members' home video cameras, insists that its cameramen take their professional camera equipment home with them.

At rival ABC, crew members are required to leave the equipment behind when they stop work. In addition, Mr. Drinkwater says, all staff members carry special radios with them at all times, and correspondents have been paired with crew members who live near them and ordered to rendezvous in the event of a quake.

The Wall Street Journal doesn't have an elaborate plan for covering the earthquake, but its Los Angeles bureau did buy a battery-powered radio and television set recently and it plans to buy some short-wave equipment.

Nature strongly reinforced the call to the planning table on May 2, when an earthquake measuring 6.5 leveled much of downtown Coalinga, Calif. That quake, perhaps more than the warnings of seismologists and disaster officials, drove home to the news organizations the logistical problems of covering a major quake.

Crews were quickly dispatched by Lear Jet, helicopter and car. But most aircraft had to be diverted after the Federal Aviation Administration closed down the Coalinga airport and surrounding airspace in case emergency supplies had to be flown in. Coalinga had no phone service for much of the next two days. And video crews at times found themselves cut off from the heavily damaged central business district by intransigent sheriff's deputies.

Yardena Arar, an AP reporter, was among the first AP staff members on the scene. Anxious to send an eyewitness description, she quickly surveyed the damage and then searched for a phone—only to discover that burly NBC News crew members had commandeered the sole working phone booth in town and weren't about to give it up.

Robert W. Semple, Coalinga's public and industrial information officer, says that when the airspace above Coalinga was reopened, helicopters with camera crews began flying over the city to get aerial shots. As one helicopter hovered, he says, the downdraft from the chopper's blades threatened to topple a cracked and teetering building directly below.

Anita Garcia, a spokeswoman for the State Office of Emergency Services, which has responsibility for dispatching ambulances, medical aid and rescue equipment, says that during the first few hours after the quake her office was swamped with calls from newspapers and television stations. If the situation had been more grave, she says, the media calls could have seriously interfered with rescue efforts.

DEMAND FOR INFORMATION

"If an 8.3 (quake) hits down there, we can see between 500 and 2,000 reporters coming in from all over the world," says Alex R. Cunningham, who until recently headed the Emergency Services office. James L. Holton, the Federal Emergency Management Association's director of public affairs, notes that networks probably would suspend regular programs, switching to continuous live reports on the earthquake, thus creating a tremendous demand for information. In addition, he says, local television stations in other cities would probably dispatch their own crews.

"They'll suddenly appear on the scene with no istructions, no idea what they're doing," Mr. Holton says. "The local authorities will be absolutely swamped."

FEMA and the state emergency services office have met with representatives of all the major news organizations here recently to plan for media coverage. But some skeptics say the planning is overly bureaucratic.

"They wanted to sit down and plan for the coverage of the Big One like it was a political convention or the Olympics," says UPI's Mr. Dowie. "It got to the point of details like who would get press credentials and where would the reporters eat, who would handle hotel accommodations. In the midst of discussion you would have to stop and shake your head and remember you're talking about a disaster in which thousands and thousands of people would be killed."●

● Mr. RICHARDSON. Mr. Chairman, a couple of months ago I had the pleasure of appearing before the gentleman from Illinois' subcommittee to oppose the administration's planned 50-percent funding cut for the Southwest Indian Polytechnic Institute, which is located in New Mexico and is the only Indian technical school in the country. At stake was $1.3 million, not a lot of money in the grand scheme of the Federal Government, but terribly important for hundreds of native Americans from across the Southwest who are in search of educational training which will bring them a productive job in the future.

I, of course, received a sympathetic ear from the chairman. And he has seen to it that funds for SIPI would not fall below their current appropriated level.

At the end of my testimony, I told the gentleman from Illinois that he is often times our last best hope. By "our" I meant those of us that care about the plight of our native Americans; those of us who want to see our Nation's public lands and national forests managed wisely and developed prudently; those of us who feel it is important that our pristine wilderness areas be preserved; those of us who think that historic preservation, urban parks and the Youth Conservation Corps are important Federal programs; and those of us who believe in a strong Federal presence in energy conservation and fossil fuels research and development at DOE.

The proof that SIDNEY YATES is a champion of all these groups lies in this bill. As during each of the past 2 fiscal years, he has sheperded through the Appropriations Committee a bill which has put the brakes on this administration's attempts to sell off our public resources at less than fair market prices, to cut back our Nation's commitment toward improving the welfare of our native Americans, and to eliminate all funding for energy conservation at DOE.

There are so many elements of this bill that I could speak in favor of if I had an unlimited amount of time on the bill. There is a $4 million increase from $67 to $71 million for Indian education under title IV, even though the administration proposed only $1.2 million to close out the program. And there is $149 million for the Indian Health Service, at a time when the administration again proposed a severe cut. But the issue I would like to highlight is the committee's proposed ban on coal leasing.

Last month, the House Interior Subcommittees on Mines and Public Lands came to New Mexico for a field hearing I requested on the proposed San Juan coal sale. This sale, which is scheduled to be held in my northern New Mexico district in December, involves 900 million to 1.5 billion tons of coal on Federal lands in the San Juan basin, thereby making it a sale almost as large as Powder River.

More than 500 persons attended the hearing, chaired by my good friend and colleague from Oregon, JIM WEAVER. Testimony was received from Governor Anaya, State officials, several coal companies and public service of New Mexico, as well as from environmentalists, Navajo officials, archeologists, and prodevelopment groups.

After hearing more than 9 hours of testimony, I came to the conclusion

that Secretary Watt's coal leasing program is a disaster, and no more Federal coal lease sales should be held until there has been a cooling off period of at least a year and until the Secretary of the Interior implements regulations designed to carry out each of the General Accounting Office's recommendations found in its report on the Powder River basin coal sale.

Mr. Chairman, the GAO concluded that the Powder River basin coal leases were sold $100 million below fair market value. There is a serious danger that the State of New Mexico could lose between $40 and $80 million if Secretary Watt goes ahead with his proposed San Juan sale this December during a glutted coal market when demand is down. That must not be allowed to happen.

I am not anticoal development. I believe our Nation's vast coal resources are a blessing that will insure our Nation's economic viability for generations to come. I do, however, want to make certain that New Mexico does not become the next Powder River, and that most of the strippable coal on Federal lands in my State is not sold off cheaply and hastily, thereby depriving the people of my district and my State of a fair return on their resources.

The proposed ban in this bill is a bit longer than I would have preferred, but I want my colleagues to know that as a westerner from a coal producing district which is the site of one of the next coal sales, I will support the proposed ban as the only prudent approach to bringing our Federal coal leasing program back under control. Hopefully, we can reform the program and restore confidence in it so that Federal coal leasing can begin anew on a more moderate, balanced, and responsible level.

I commend the gentleman from Illinois for his leadership and his courage on these issues year after year. I strongly urge my colleagues to vote in favor of this bill.●

● Mr. YATRON. Mr. Chairman, I would like to express my appreciation to the chairman of the Interior Appropriations Subcommittee (Mr. YATES), my colleague from Pennsylvania, the ranking minority member on the subcommittee (Mr. MCDADE), and the chairman of the Committee on Appropriations (Mr. WHITTEN), for again authorizing appropriations to carry out the Convention on Nature Protection and Wildlife Preservation in the Western Hemisphere.

As the chairman of the Subcommittee on Human Rights and International Organizations, I am particularly concerned with the matter of international environmental cooperation. This convention, established in 1940, is one of the earliest efforts by our country to forge a concerted, global movement to protect the Earth's resources. Continued U.S. commitment to the convention is a vital demonstration of our leadership on world environmental issues.

Specific sites, like the Hawk Mountain Sanctuary which I am proud to have in my district, depend on the program's funding to protect migratory bird species. It is gratifying to see Members of this body resist the temptation to make short-term decisions which directly jeopardize one of our most important responsibilities, namely the health of this planet's environment.●

● Mr. PACKARD. Mr. Chairman, I want to stress my support for a provision within the fiscal year 1984 Interior appropriations bill that would place a temporary 1-year moratorium on new oil and gas leasing on certain nearshore areas off the coast of San Diego and Orange Counties.

I also want to commend the gentleman from Illinois (Mr. YATES), for his leadership role in holding hearings and in proposing the amendment which was adopted by the full committee. Chairman YATES' sensitivity to these problems, which not only affect our constituents in southern California, but everyone throughout the Nation who has enjoyed our beautiful beaches, as well as those concerned about our national defense, is a tribute to his insight.

These are areas of great environmental concern, which are also important to our strategic defense and the regional economy.

Briefly, let me illustrate the negative impact offshore development in this area would impose.

First, the U.S. Navy maintains a substantial training facility for the Marine Corps at Camp Pendleton, which is in the area I represent. It is not only the largest amphibious training operation in the country, but the only such operation on the west coast. The installation of oil drilling platforms and associated equipment within an area of intensive amphibious operations would seriously hamper, if not preclude, the conduct of the Marine Corps training activities.

Second, San Diego and many of the small communities which line the coast have heavily invested in recreation and tourism facilities, and an oilspill would dramatically and severely impact this industry.

Finally, the rapid changes in depth within this coastal area would preclude the oil and gas industry from using conventional techniques to drill in deepwater tracts. The geological problems on the ocean floor which played a role in prior decisions still exist, which include the ever-real threat of earthquakes.

A 1-year moratorium on leasing in these sensitive areas will give Congress time to give the California OCS issue the careful consideration needed to assure a policy that strikes the necessary balance between these numerous concerns.●

● Mr. OTTINGER. Mr. Chairman, I rise in support of H.R. 3363. I would like to commend the committee on its excellent work in the area of energy conservation, which has been the blind spot of this administration. As chairman of the Energy Conservation and Power Subcommittee in the House Energy and Commerce Committee, which authorizes the energy conservation programs in the Department of Energy, I am keenly aware of the need to maintain the Nation's effort in energy conservation. I am happy to say that, with this bill, the Appropriations Committee has demonstrated that it shares that concern. The amount proposed for energy conservation in this bill remains within the authorization for fiscal year 1984 contained in the Omnibus Reconciliation Act of 1981.

This bill will permit the continuation of the State and local energy conservation programs at the Department of Energy, which the Reagan administration has proposed to eliminate for the third year in a row. These programs include the low-income weatherization program, the schools and hospitals conservation grants program, the State energy conservation program and the Energy Extension Service. The bill would also fund the continuation of several regulatory programs: the appliance efficiency standards, voluntary building energy performance standards (VBEPS), and the Residential Conservation Service (RCS).

The Reagan administration's approach to energy conservation is in marked contrast to the bipartisan support enjoyed by these programs in the Congress. For fiscal year 1984, President Reagan proposed to cut energy conservation 86 percent from the current spending level.

Congress, on the other hand, has shown strong support for these programs. In fiscal year 1982, Congress restored the programs despite zero requests. In fiscal year 1983, Congress added $150 million for the weatherization and schools and hospitals programs in the emergency jobs supplemental. Ironically, even though President Reagan wants to end these programs, the National Republican Congressional Committee strongly supports increases of the type that were included in the jobs bill. In a March 9, 1983, press release issued shortly after passage of the jobs bill, Rich Galen, director of public affairs for the NRCC said, "How could any Member of Congress vote to deny money to keep hospital patients and school children warm in winter?"I can only add, "How indeed?"

In another show of congressional support this year, 150 Members of the House, from both parties, have joined me as cosponsors of a resolution (H. Res. 139) in support of a balanced energy program that continues programs in energy conservation and renewable energy. This resolution is an explicit criticism of the Reagan administration's national energy program, which increases funding for only one energy technology—nuclear energy—while cutting efforts in all other technologies—solar, fossil and energy conservation—by more than 50 percent. I think it is clear that Congress has no intention of putting all of its eggs in one basket—the nuclear basket.

For the low-income weatherization program, this bill contains the minimum acceptable level of appropriations, continuing the program at slightly lower than the fiscal year 1983 level of $245 million. I would note that I support increasing funding for this program even further. The Weatherization and Employment Act of 1983 (H.R. 2615), which I authored, and which was reported by the Energy and Commerce Committee on May 12, authorizes $500 million for the program in fiscal year 1984.

POSSIBLE AMENDMENT

I understand that an amendment may be offered to reduce programs in this appropriations bill across the board by 4 percent. I would like to point out that because of the small size of the energy conservation programs, such a cut could have a devastating effect—handing the administration the right to eliminate through the budget process the statutory programs which it continues to oppose.

A 4-percent cut in the conservation budget, amounting to $21 million, could for example, wipe out the entire Residential Conservation Service—which provides information about energy conservation to residential utility customers—the voluntary building energy performance standards, and the Energy Extension Service administered by the States.

A 4-percent cut in the low-income weatherization program would amount to almost $10 million, thus eliminating an estimated 10,000 low-income homes from the weatherization program.

The low-income weatherization program has an excellent track record. To date it has weatherized close of 1 million low-income homes, producing energy savings of 15 to 30 percent annually. In addition, hearings in the Subcommittee on Energy Conservation and Power show that the weatherization program has enormous employment potential. For every Federal dollar spent, this program generates about 65 percent more jobs than projected under last year's highway jobs bill financed by a 5-cent gasoline tax.

In closing, I would urge my colleague to vote against any amendment that would have the effect of reducing the conservation budget. The appropriation proposed for energy conservation in H.R. 3363 is about 33 percent less than the Congress originally approved for fiscal year 1981 during the Carter administration. This program has already sustained big cuts. Let us not make any more damaging reductions.●

● Mr. HEFTEL of Hawaii. Mr. Chairman, I would like to take this occasion to express my support for H.R. 3363, the 1984 Interior appropriations bill. Among its various energy provisions is a section I feel is particularly important. H.R. 3363 appropriates some $1.7 billion, $1.1 billion more than the administration requested to purchase oil for the strategic petroleum reserve (SPR). This level of funding would allow a fill rate of 220,000 barrels per day in 1984, the minimum required under the Energy Emergency Preparedness Act (Public Law 97-229). I hope that the Senate will sustain the House level during its deliberations. It is crucial that we maintain the momentum of the past few years in building our Nation's energy security through the SPR.

Mr. Chairman, there is one additional issue related to the SPR program which I would like to bring to the attention of our colleagues to this time. One of the inadequacies in our strategic energy planning involves our lack of a regional storage network which would service particularly vulnerable, oil dependent areas such as New England, Puerto Rico, and my own State of Hawaii.

The Government has studied the problem. Sections 154(d) and 157(a) of the Energy Policy and Conservation Act of 1975 require that the issue of regional petroleum reserves be addressed in the strategic petroleum reserve plan of the Department of Energy. The flaw in the various DOE plans is that they never specifically recommended sites for establishing regional reserves and successive administrations have failed to back funding for a regional reserve network.

Adding to the problems is the indifference of Congress in appropriating funds. The result is we still have no regional petroleum reserve in Hawaii, Puerto Rico, and New England.

The current administration contends that in an emergency Hawaii would be served by strategic petroleum reserves in Louisiana and Texas. Perhaps. The system has never been tested, and it assumes a smooth and unbroken supply line between the mainland and Hawaii.

The Hawaii State Energy Office has questioned how Hawaii could be protected under the current plans. Given the present scenario, the Federal Government would have to ship strategic petroleum oil some 6,000 miles from storage sites in the face of very uncertain tanker availabilities. Hawaii refineries would have to hope that an adequate number of U.S.-flag vessels would be available, and that the refineries would have access to the proper grade of crude oil.

Then there is the problem of getting the tankers priority passage through the Panama Canal. At the best of times, an estimated 57 days would pass before oil would reach here once the emergency had been identified. So even if the emergency plans work without a hitch, Hawaii's economy could be disrupted in the event of a significant national oil shortfall.

It is time Congress took action on this problem.

Along with several colleagues in the House of Representatives, I have introduced a resolution calling for a new round of congressional hearings on the question of regional reserves. Among other things, we need to know if the administration has met Federal requirements. It may be that legislation should be reintroduced later this session to authorize and appropriate funds for a regional reserve program.

Mr. Chairman, I hope that the Congress will reexamine the regional reserve program in the coming months. The question of national energy planning requires that we study particular regional as well as overall national concerns. I look forward to participating in this debate with our colleagues.●

● Mr. LOWERY of California. Mr. Chairman, I rise in support of the temporary moratorium on new oil and gas leasing on certain Federal lands off the southern California coast, as proposed by the Appropriations Committee in H.R. 3363, the Interior appropriations bill for fiscal year 1984.

Approximately 11.6 million acres between Point Conception and the Mexican border, extending seaward from the State's 3-mile limit to as far as 130 miles offshore, have been designated for study for inclusion in lease sale 80, scheduled for February 1984. The study area includes virtually all of the waters off the San Diego/Orange County coast, from Newport Beach south to the Mexican border.

I do not question the need to develop new domestic sources of oil and gas to reduce our dependence on foreign energy sources, and am pleased that the administration has placed such a high priority on achieving this goal. However, the economic necessity of developing our domestic energy resources must be balanced by our responsibility to protect the economies and environments of our coastal communities. Therefore, I am joining with the San Diego County Board of Supervisors, the San Diego City Council, the San Diego congressional delegation, and virtually every local government in the area in supporting a temporary

ban on leasing in the nearshore areas off the San Diego coast.

The proposed moratorium on leasing off San Diego and Orange Counties would affect approximately 846,720 acres—7.3 percent of the total acreage designated for study for inclusion in lease sale 80, and 0.3 percent of the total OCS acreage under consideration for lease in fiscal year 1984. The ban would, in effect, create a "buffer zone," running parallel to the California coast from Newport Beach south to the Mexican border, and roughly 17 miles from the seaward boundary of the 3-mile State tidelands boundary. The proposed moratorium would only apply to the actual lease sale of nearshore tracts. All preleasing activities—preparation of environmental impact statements, public hearings, and so forth—would continue as scheduled.

While I generally support the OCS lease program as a means of increasing our domestic energy resources, I believe that priority should be given to the leasing of areas which have the highest yield potential balanced by a minimal risk to the environment and local economies. The potential disadvantages of leasing in the nearshore tracts off San Diego outweigh the national need for oil and gas potentially developable from the area. The nearshore San Diego tracts were, in fact, deleted from lease sale 48 by then Secretary of the Interior Andrus, and were also excluded from "calls for nomination" for lease sales 68 and 73 in 1979 and 1980 respectively.

The 26 nearshore San Diego tracts—from 3 to 25 miles offshore—excluded from previous lease sales were extensively studied in 1979. Resource estimates from the 26 tracts were 30 million barrels of oil and 45 billion cubic feet of gas. When computed against the 1980 national consumption figures, these resource estimates represented only 42 hours of oil and 17 hours of gas. The draft environmental impact statement for lease sale 80 recently released by the Department of the Interior projects an even lower resource yield. According to the latest report, the most likely resource estimate for the 138 tracts off San Diego is 20 million barrels of oil and 20 billion cubic feet of gas.

Drilling in these nearshore areas could potentially pose a severe threat to San Diego's greatest natural resource—its coastline and beaches. The tourist industry attracted by the natural beauty and recreational potential of San Diego beach areas makes a tremendous contribution to the local economy: Tourism is San Diego's third largest industry, bringing an estimated $1.3 billion into the local economy annually. Furthermore, the tourist industry will play an increasingly important economic role if San Diego proceeds with a proposed $100 million convention center and attendant $200 million of new hotel facilities. From an economic as well as environmental standpoint, it is important that we protect our nearshore areas from the risks that offshore drilling would impose.

The introduction of offshore drilling in nearshore areas would also interfere with military activities off the San Diego coast. San Diego is the Navy's principal west coast home port. It supports more than half the Pacific Fleet, serving as the training center for the 120 ships and approximately 500 planes homeported in San Diego and Long Beach. Comdr. Bill Salisbury, the Navy's representative of the San Diego Association of Government's OCS Task Force, stated in a June 4, 1983, San Diego Union interview that oil drilling platforms off the San Diego coast would cause a "very significant impact on the Pacific Fleet" because they would snarl "one of the most heavily used training centers in the world."

While the Navy is most concerned about hazards to navigation, Commander Salisbury says that they are also concerned about loss of training time. The ocean areas just seaward of the 3-mile limit—where oil companies have shown the greatest interest—receive the heaviest military use. Drilling platforms in these nearshore areas would force the fleet to move elsewhere. The time it would take these ships and aircraft to move to more distant practice ranges would then have to be subtracted from training time, which is already at a premium.

While the Navy has not yet taken an "official" position on the areas included in lease sale 80, it did voice official objection to the sale of nearshore tracts in the same area in 1979, prior to lease sale 48. It is important to note that military usage of these nearshore areas has increased since that time. The Navy currently has seven major training areas off the San Diego coast. The introduction of offshore structures to these areas would compromise the Navy's ability to carry out its mission, and would not be in the best interests of the Nation.

Finally, there is serious concern about the negative impact of offshore oil development and potentially significant hydrocarbon emissions on San Diego's efforts to comply with the ambient air quality standards required by the Clean Air Act. While we are making excellent progress, San Diego County is one of 218 nonattainment areas in the country. The introduction of petroleum development and its associated hydrocarbon emissions would potentially exacerbate San Diego's problems in meeting Federal air quality standards. In effect, offshore development and its adverse emissions would only add to the existing emission transport problem from the Los Angeles air basin.

Mr. Chairman, it is my belief that sensitive offshore areas, such as the nearshore areas off the San Diego coast, should be among the last, not the first, offshore areas to be developed. These areas are unique in their economic and environmental sensitivity to offshore development and should be protected. A 1-year moratorium on leasing in these sensitive areas will give Congress time to give the California OCS issue the careful consideration needed to insure a policy that strikes the necessary balance between economic and environmental concerns.●

● Mr. BEDELL. Mr. Chairman, I want to express my strong support for H.R. 3363, the appropriations bill for the Department of the Interior and related agencies.

I want to commend the chairman of the subcommittee and the members of the committee for their efforts to report a balanced and responsible bill. I am particularly pleased with the committee's strong endorsement of our energy conservation and research activities, as well as Federal wildlife and natural resource preservation efforts.

I also want to express my strong support for the language in the bill which establishes an independent commission to make recommendations for the formulation of a responsible coal leasing program. In my opinion, Secretary Watt's action to dump federally owned coal on a soft market should not have gone unchallenged, and thus I am very pleased with the action taken by the committee.

Mr. Chairman, I found it interesting to note that, in his after the fact defense of the Interior Department's action to solicit bids on vast coal deposits during a period of depressed coal prices, Secretary Watt offered as an explanation his interest in seeing that adequate coal supplies are available for consumption when needed 10 to 15 years into the future.

If Secretary Watt's explanation of his Department's coal leasing policy signifies a change in this administration's position on the need for a long-term energy policy, then I welcome it.

However, I must say that I remain unconvinced that Secretary Watt's explanation reflects a sudden interest on the part of this administration in guaranteeing our energy security. I remain unconvinced, Mr. Chairman, because of what I perceive to be the administration's shortsighted energy policy in a number of other areas.

For example, the very bill before us today requires that the Department of Energy spend the funds necessary to fill the strategic petroleum reserve at the minimum rate required by law. As we all know, this action was made necessary because the administration—in an attempt to hold down budget out-

lays today—has proposed a sharp reduction in the fill rate for the SPR—despite the fact that today's soft oil prices offer a prime opportunity to fill the reserve in a cost-effective manner. How can Secretary Watt justify selling Federal coal at fire sale prices at the same time this administration—for budgetary reasons—wants to drastically reduce the filling of the SPR with relatively cheap oil? If the administration is truly concerned about holding down deficits by maintaining Government revenues, it would not have dumped the coal; and if the administration is concerned about our energy future, it would be filling the SPR at the required minimum level.

And why, Mr. Chairman, does Secretary Watt want to dump Federal coal at less than its true value during a period when the administration is so adamantly opposed to efforts to preserve our energy conservation and research efforts; to extend available tax incentives for renewable energy development; or to maintain our energy development loan programs?

If Secretary Watt and others in the administration are sincere in expressing a new-found commitment to securing our energy future, then I challenge the administration to convince those of us who remain skeptics of this policy reversal.●

● Mr. LEVINE of California. Mr. Chairman, I would like to take this opportunity to commend Chairmen JAMIE WHITTEN and SID YATES for crafting an excellent Interior appropriations bill. I am particularly pleased with the inclusion of two provisions which directly affect my district—a 1-year moratorium on oil and gas leasing in the Santa Monica Bay and a $25 million appropriation for land acquisition in the Santa Monica Mountains National Recreation Area.

I represent 50 miles of our Nation's most beautiful and precious coastline which extends from Malibu to Redondo Beach and is silhouetted against the Santa Monica Mountains. Each year tens of millions of people flock to this area to enjoy the scenic beauty and partake in the scores of recreational activities.

For many years, we who live and work in the area have demonstrated to the Federal Government that oil and gas leasing in the Santa Monica Bay would be economically, environmentally, and aesthetically damaging and that it is not in the public interest. Four former Secretaries of the Interior, both Democrats and Republicans, have seen the wisdom of protecting the Santa Monica Bay from oil drilling and have chosen not to include tracts in the Santa Monica Bay in three prior lease sales. I appreciate Chairman YATES' interest in this important issue and his inviting me to testify before the Interior Subcommittee to express my strong support of protecting the Santa Monica Bay from oil drilling.

We must do all we can to lessen our dependence on foreign sources of energy and support actions to achieve that goal, including the expanded development of domestic energy resources. This important goal must transcend parocial local concerns. This may require some expanded drilling for oil off of our coast. However, it must be done in a safe and environmentally balanced manner.

Secretary James Watt's plan would increase by 30 times the area offered for lease despite comments from the oil industry and coastal States that such an increase is likely to prevent focused development of those areas of the Outer Continental Shelf with the greatest potential for finding oil and gas. The moratorium includes only 10 percent of the area that Secretary Watt is offering for lease in California. Considerable additional acreage will be available for development. We should first develop the areas which have been leased but not yet developed before opening new areas.

The economic and environmental risks we may incur as a result of drilling in the Santa Monica Bay far outweigh the benefits of the oil we might retrieve. Southern California beaches are among the most heavily used beaches in the country. In 1980 over 76 million people visited Los Angeles County beaches. Over half of the State of California's annual coast-related tourism revenues of $15 billion is generated in southern California. The city of Santa Monica alone generates approximately $100 million annually from tourism and recreation.

Economic losses amounting to hundreds of millions of dollars are likely to occur as a result of drilling in the bay and would be further compounded if an oil spill occurs. These costs include reduced beach use, tourism, tourist taxes, revenue from commercial fishing, revenue from pleasure boats, property taxes, and property values.

There is a great deal of seismic activity in the Santa Monica Bay. In the past 10 years alone 171 earthquakes have occurred in the Santa Monica Bay with magnitudes as great as 5.6 on the Richter scale. I am very concerned that an oilspill as a result of an earthquake during exploration or development would jeopardize the beaches, parks, and biological areas of the Santa Monica Bay. Complicating the issue of seismicity is the controversy over whether drilling operations, through the withdrawal of fluids, increases seismic risks.

An oilspill would seriously endanger the two remaining wetlands in Los Angeles County. The 10 acres of wetlands in Malibu Lagoon and the 70 acres of wetlands in the Ballona Creek Estuary are all that remain of Los Angeles County's 6,800 acres of wetlands. These wetlands serve as habitats for many animals including several endangered species. The Ballona Creek Estuary alone is estimated to include 20 percent of the State's nesting ground for the endangered least tern.

The Santa Monica Bay has become a popular place for animal viewing. Many people find pleasure in watching the many sea birds and marine mammals. A favorite pastime is whale watching during migration season. An oil spill could not only eliminate this recreational activity but force these magnificent mammals to alter their migratory patterns.

I am also concerned about the increased amount of air pollution which would result if oil drilling occurs. Los Angeles suffers from a legendary air pollution problem. Not only would the health impacts be dangerous, but onshore industries would be forced to bear a greater cost of control to achieve the increment of reduction needed to offset offshore emissions. Offshore drilling would retard our efforts to clean up our air.

Those of us who have been fighting oil drilling in the Santa Monica Bay for years have grown weary of Secretary Watt's efforts to endanger our coastal resources in an effort to prospect for oil in an area where studies indicate a low probability that any significant resources exist. It is time that we take action to recognize that these areas are not the places to be drilling for oil. A 1-year moratorium will give us time to study this issue more fully. I hope my colleagues will realize the importance of protecting this precious natural resource and join me in supporting legislation introduced by our colleague, Congressman LEON PANETTA, H.R. 2059, which would impose a moratorium on oil and gas leasing in environmentally sensitive areas including the Santa Monica Bay until the year 2000.

Since I represent most of the Santa Monica Mountains National Recreation Area funding for parkland acquisition is of particular concern to me. Therefore, I testified before the Interior Subcommittee to explain the importance of preserving this beautiful area to my colleagues who serve on that committee.

Each year more than 10 million residents of the Los Angeles urban area use the Santa Monica Mountains as a place to enjoy such recreational activities as biking, horseback riding, and swimming. It combines large undeveloped areas of mountains, woodlands, grasslands, and beaches—something increasingly rare in southern California.

In 1978 a bipartisan majority in Congress recognized the exceptional value of the area and the need to preserve it and designated the Santa Monica

Mountains a national recreation area. Although the legislation included a $155 million for a 5 year land acquisition program, unfortunately, to date, only $41 million has been appropriated for land purchases—an amount far below Congress' original mandate.

This is a crucial time for the Santa Monica Mountains. Funding is needed now more than ever. The value of these lands is appreciating rapidly. Developers have expressed interest in construction projects in the area, and it is imperative that parkland purchases be made as quickly as possible.

We must continue to purchase parklands before any further price increase in land costs or new development makes it impossible.

The Interior appropriations bill is a reasonable approach to protecting and preserving our valuable natural resources. I urge my colleagues to support it.●

● Mr. JONES of North Carolina. Mr. Chairman, I rise in support of H.R. 3363, legislation to make appropriations for the Department of the Interior and its related agencies for fiscal year 1984. As chairman of the Merchant Marine and Fisheries Committee, which is the authorizing Committee for the U.S. Fish and Wildlife Service, I have a particular interest in seeing that the Service has enough operating money and adequate personnel ceilings.

H.R. 3363 addresses my committee's concerns about the future of the Fish and Wildlife Service. For instance, the Service is responsible for the cooperative research units program, which was zero funded by the administration. However, in H.R. 3363 this program is fully funded and the secretary is directed to provide enough Federal employees to run this valuable program.

Another program that was proposed for a cut in its budget was the fish hatchery program. The House Appropriations Committee rejected any further cuts in the hatchery budget and, therefore, rejected any more hatchery closures this year. The Merchant Marine and Fisheries Committee is now looking into Federal fish hatchery policy; however, until this policy can be fully examined and intelligent recommendations made, I feel that no hatchery should be closed for lack of funding.

Another concern addressed in H.R. 3363 is the need for additional land acquisition to assure the future of our rich fish and wildlife resources. Despite the administration's request for zero funds, the House Appropriations Committee has very wisely recommended $42 million for acquisition of critical habitat as well as $7 million for the migratory bird conservation account to acquire wetland areas. I feel it is imperative that we continue to acquire land for these purposes in fee title as well as through conservation easements or land exchanges. It is important to continue to preserve part of our dwindling habitat resource in its pristine state to protect our priceless fish and wildlife heritage.

Mr. Chairman, I strongly support H.R. 3363 and commend my distinguished colleague from Illinois and his subcommittee for their hard work on this appropriations bill. I thank them, as well as the chairman and members of the full Appropriations Committee, for listening to and addressing my concerns, which are shared not only by my committee, but also the American public, which recognizes the need for these valuable programs. I urge my colleagues to vote favorably on passage of H.R. 3363.●

● Mrs. KENNELLY. Mr. Chairman, I rise to express my support for H.R. 3363, the Department of the Interior and related agencies appropriation bill of 1984. I also would like to thank the chairman of the subcommittee, Representative SIDNEY R. YATES, for the assistance and consideration he has given my concerns during the development of this legislation.

I strongly support the 6-month moratorium on Federal coal leasing, included in H.R. 3363, until a Commission has studied the appropriate direction for this program. The current policy of Secretary Watt for wholesale leasing of Federal coal reserves, at a time when the coal market is severely depressed, is simply a massive giveaway to the major energy corporations. A few months delay devoted to a reassessment of the coal leasing program will not jeopardize our efforts to achieve energy independence—not at a time when a 180-year supply of Federal coal is already available to the utility market at current rates. Instead, this study Commission can help make possible a program that is more fiscally and environmentally responsible than what is now the case under Secretary Watt.

For many of the same reasons, I am pleased that H.R. 3633 also contains language barring all Outer Continental Shelf oil and gas leasing and preleasing activity in the Georges Bank fishing grounds. New England is an energy-importing region of the country, yet we do not see the economic sense in disrupting our richly productive fishing areas when the value of energy reserves likely to be recovered there are relatively small. A wise development of our Nation's resources would hold these valuable tracts back until absolutely necessary.

The Interior appropriations bill also makes a major commitment to assure the orderly development of fuel cell powerplants, in order to bring this technology into private-sector commercialization. A major part of the research into fuel cell technology takes place in South Windsor, Conn. I was gratified the funding level was set at $46 million, $37 million over the level requested by the administration.

Although fuel cells can currently be produced with a given performance at a specified cost, further research is necessary to make them available at a competitive price with the necessary durability and reliability. The Appropriations Committee's action should insure that progress toward this goal continues.

On a final note, the Appropriations Committee has included $26.5 million for the historic preservation fund and $10 for the urban parks program. These two programs are designed to breathe new life into existing facilities and are very important for many community development projects across the country. While I am one who would like higher funding levels for these programs, the committee is to be congratulated for rejecting the administration's request that the programs be terminated.

● Mr. RAHALL. Mr. Chairman, I rise in support of H.R. 3363, the Department of the Interior and related agencies appropriation bill for fiscal year 1984.

Under this appropriation, $193.9 million will be available for State reclamation program grants, $18 million for the rural abandoned mine program and $25.5 million for the Federal reclamation effort.

While I believe the States could use considerably higher levels of funding per the recommendation of the Committee on Interior and Insular Affairs—$320 million—the Appropriations Committee has recognized that a large unappropriated balance in the abandoned mine reclamation fund does little environmental good sitting idle in the U.S. Treasury and has provided for the greatest amount of funding to the States since the fund was authorized by the Surface Mining Control and Reclamation Act of 1977.

A vast inventory of abandoned coal mine lands still exists. I am talking about burning slag piles, dangerous mine openings, acid mine drainage and old tipples causing hazards to the health and safety of the people living in Appalachia and other coal-producing regions of our Nation.

The money being appropriated from the abandoned mine reclamation fund—which is supported by a fee assessed on every ton of mined coal—will not only make a dent in the extensive inventory of abandoned mine lands but will also help to battle unemployment through the jobs reclamation projects create. The Committee on Interior and Insular Affairs has received testimony which indicates that for every $1 million in reclamation money spent 50 full-time jobs are created.

For fiscal year 1984, the committee has wisely chosen to return the RAMP

program to its pre-fiscal year 1983 status. In fiscal year 1983, the committee accepted an administration proposal to change the RAMP money distribution system. Instead of flowing through the Soil Conservation Service to local soil conservation committees and districts—as authorized by the 1977 SMCRA—RAMP money in fiscal year 1983 went directly to State departments of natural resources (or similar agencies) which in turn dealt with the Soil Conservation districts. However, some States had problems with this delivery mechanism either because the State agencies were not prepared to deal with the RAMP program or because of the lack of contracting authority on the part of the conservation districts. Of major concern was the fact that the districts do not have the resources to plan future RAMP-type projects. The Soil Conservation Service has the resources and technical expertise to undertake the RAMP program and I quote from the report accompanying H.R. 3363:

The Committee believes the program can more effectively and efficiently be managed by the Soil Conservation Service in cooperation with state RAMP committees and local conservation districts. The amount provided will also allow the Soil Conservation Service to resume design, planning and implementation of new projects.

Mr. Chairman, West Virginia has an estimated 181,000 acres needing reclamation; among them are 1,200 acres of burning coal refuse piles and 53,000 acres of nonburning but severely eroding gob piles. In addition, more than 3,100 miles of streams are affected by abandoned coal mines in the State. The bill we are considering today will lend great assistance toward efforts to reclaim these areas.●

● Mr. VENTO. Mr. Chairman, I rise in strong support of H.R. 3363, the Department of Interior Appropriations. This legislation is more than appropriation legislation. It is a reaffirmation of this House for the Federal commitment to a rational balance of natural resources. This legislation recognizes the value of our national resources in terms of their developmental and recreational values.

The policies enunciated in this bill, unlike this administration's proposal, balance preservation and development. It is a rejection of the Reagan-Watt policy of development—full speed ahead at any cost.

Mr. Chairman, I want to commend the committee and, in particular, the subcommittee Chairman, Mr. Yates, for their efforts. I particularly want to express my support and gratitude for the committee's action on behalf of several crucial projects in Minnesota. The subcommittee has recommended adequate funding for several key programs in Minnesota, programs which the administration sought to delete. Earlier this year, I appeared before the subcommittee to testify in support of these programs and presented a supportive letter signed by the entire Minnesota house delegation.

Located in northern Minnesota, the Voyageurs National Park and the Boundary Waters Canoe Wilderness Area are unique national resources, enjoyed by all Americans. By providing adequate funding for land acquisition in both areas, the Voyageurs Visitors Center and the cooperative forestry program, the committee has progressed toward several goals. The land acquisition funds are essential to the protection of these resources. They insure that the areas will be available for the enjoyment of future generations and help to promote tourism, an important economic component of the region. In addition, the cooperative timber program helps a region, drastically hit by the recession. These programs have a successful track record and are worthy of our continued support.

The committee has also approved $2.5 million for land acquisition in the Minnesota Wildlife Refuge. This area, near the metropolitan area, is an essential nesting area for a wide variety of waterfowl and offers the potential of a major recreation resource for the millions of Twin Citians who live near this resource.

Mr. Chairman, the Reagan administration, through its policies, has demonstrated its lack of commitment to a sound natural resource policy. This bill is an appropriate response. I urge my colleagues to support H.R. 3363.●

● Mr. FRENZEL. Mr. Chairman, the Interior appropriation bill, H.R. 3363, is over the budget targets approved in the fiscal year 1984 budget resolution. Moreover, it lacks any evidence of commitment to fiscal responsibility.

For discretionary programs, spending exceeds the 302 allocations of the budget resolution by $275 million in budget authority and $411 million in outlays. For mandatory programs it is slightly under the budget resolution in budget authority and outlays. However, funding for some programs not yet authorized by the Senate is not provided, and will require a spring supplemental.

Further, the bill exceeds the President's request by $1.38 billion. It exceeds the fiscal year 1983 appropriation level, as well, when the $500 million approved by Congress for fiscal year 1983 as part of this spring's jobs bill is discounted. In its current form, this bill exemplifies the congressional disregard for the economic health of the Nation.

To sustain the recovery we must improve our spending discipline. Where funding and program management would best be managed at the State or local level, the shift to State of local should be made.

This bill fails to make those shifts. Instead it increases the Federal funding levels for programs such as conservation and renewable energy research which would be more efficiently and effectively handled apart from the Federal Government.

The enormous deficits which threaten the economy in the long term are caused by Congress profligate spending in bills like this one. The Federal Government does not have infinite financial resources.

Unfortunately, H.R. 3363 fails the test of fiscal responsibility. Along with the other excessive appropriations bills already passed, it threatens the economic security of our country. It regards budget ceilings as floors. It relies on supplementals. It is a budget buster even when the budget it is busting is excessive.

H.R. 3363 should be resoundingly defeated. If passed, it should be vetoed.●

Mr. YATES. Mr. Chairman, I wanted to yield to the gentleman from Indiana (Mr. SHARP), but I do not see him on the floor.

I also have been requested to yield some time to the gentleman from New Mexico (Mr. RICHARDSON), but I do not see him on the floor.

If they are not on the floor, I have no further requests for time, and I yield back the balance of my time.

Mr. McDADE. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The Clerk will read.

The Clerk proceeded to read the bill.

Mr. YATES (during the reading). Mr. Chairman, I ask unanimous consent that the bill be read by titles, and that title I be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Are there any points of order against title I?

Are there any amendments to title I?

Mr. YATES. Mr. Chairman, I move to strike the last word.

The portion of the bill to which the pro forma amendment relates is as follows:

TITLE I—DEPARTMENT OF THE INTERIOR LAND AND WATER RESOURCES

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

For expenses necessary for protection, use, improvement, development, disposal, cadastral surveying, classification, and performance of other functions, including maintenance of facilities, as authorized by law, in the management of lands and their resources under the jurisdiction of the Bureau of Land Management, including the general administration of the Bureau of Land Management, $348,852,000.

Mr. YATES. Mr. Chairman, the Park Service land acquisition and State assistance appropriation does not reflect funds for the Point Reyes

National Seashore, the Monocacy National Battlefield, or the Chattahoochee River National Recreation Area to be allocated as follows:

Point Reyes National Seashore: $1 million.

Monocacy National Battlefield: $3 million.

Chattahoochee River National Recreation Area: $1 million.

I would like to state that it is the committee's intention to provide the amounts for those units and to change the amount shown in the report for "slippage" from $0 to minus $5 million. The budget proposed by the Department assumed that $6,700,000 of the $61,371,000 requested in the budget would have slippage. The committee initially did not concur with that assessment, but it appears likely, in view of the general reluctance of the Secretary to follow congressional direction on Federal land acquisition, that at least $5 million in slippage will occur in fiscal year 1984. It is for that reason that this reallocation is made in order to permit funds to be provided to these three additional areas.

Mr. DANNEMEYER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would like to call attention to section 113 of the general provisions of the Department of the Interior appropriations bill appearing on pages 38-40. Basically, these provisions would prohibit the Department of the Interior from going ahead with the scheduled January 1984 sale of Outer Continental Shelf Lease No. 80 located off the coast of southern California. I would like to voice my ardent opposition to these provisions of the bill and can effectively demonstrate that legislation of this nature is hazardous to the national and economic security of this great Nation.

The decision to accelerate development of oil and gas on the Outer Continental Shelf was made primarily to increase America's energy self-sufficiency, and thus to boost the economy and the national security of the Nation. In 1982, America imported 4.9 million barrels of crude oil per day which was equivalent to 36 percent of the country's oil supply last year. In addition, natural gas imports in 1982 were equivalent to 4,932 barrels of oil per day, and made up 4.8 percent of domestic consumption. So far in 1983, America's average imports have amounted to 3.8 million barrels of oil per day and the natural gas equivalent of 5,050 additional barrels per day.

Together, crude oil and natural gas imports created a merchandise trade deficit of $62.2 billion in 1982 and was the principal cause of America's $31.8 billion trade deficit last year. Because the trade balance is the most important factor in calculating the balance of payments, America's enormous energy imports were also the primary cause of the $47.7 billion balance-of-payments deficiency in 1982.

The consequences of these colossal deficits are devastating. According to C. Fred Bergsten, former Assistant Treasury Secretary, the $13 billion real deterioration in the U.S. trade balance from January 1, 1981, to January 1, 1982, accounted for 40 percent of the decline in real GNP in that period. Moreover, applying a common economic rule that equates $1 billion in U.S. exports with 40,000 jobs, the 1982 trade deficit cost the Nation 1.27 million jobs. In the southern California region, the Environmental Impact Statement for Lease Sale No. 80 estimated that the sale would create 13,000 new jobs.

Moreover, it should be emphasized that declaring any type of moratorium on OCS leasing will substantially enlarge the Federal budget deficit since revenues from OCS leasing represent the second largest source of Treasury revenue behind taxes. The Department of the Interior has predicted that between 1982 and 1987 the OCS leasing process would generate $48 to $80 billion in Federal revenues. Imposing a moratorium on Lease Sale No. 80 alone will deny the Federal Government $12 billion in revenues according to the Environmental Impact Statement. Furthermore, it is estimated that every $1 million spent on drilling expenditures in the southern California region results in economic gains to the region in excess of $2.5 million. The beneficial economic prospects for the region are thus virtually unlimited if we proceed with the OCS drilling process. Both the Orange County and San Diego County Chamber of Commerce recognize these facts and have endorsed proposals supporting Lease Sale No. 80.

Our extensive dependence on oil imports also causes an extreme vulnerability to oil supply disruptions, and hence is a potentially lethal threat to America's national security. Further, the prospect of continuing dependence on foreign crude oil significantly increases the possibility that some day in the future, American soldiers might have to fight and perhaps die on foreign soil in order to maintain access to energy resources. One cannot simply ignore these fundamental foreign policy considerations.

The Department of the Interior's decisions to accelerate energy development on the Outer Continental Shelf recognize the economic and defense needs of the Nation as well as America's vast energy resources. Nearly 85 percent of America's untapped oil wealth is on publicly owned lands, two-thirds of which is offshore. In the waters off our Nation's coasts, a 1980 geological survey estimated recoverable resources of crude oil at 32.6 billion barrels, while natural gas resources were estimated at 46.5 billion barrels of oil equivalency. Recoverable resources of petroleum for Lease Sale No. 80 alone is estimated at over 2.3 billion barrels. In 1981, only 280 million barrels of oil and the natural gas equivalent of 922 million petroleum barrels were extracted from Federal waters off our Nation's coasts. Off the coast of southern California, only 19.6 million barrels of oil and the natural gas equivalent of 2.4 million barrels were extracted from Federal waters in 1981. The people of California recognize this only too well. In a recent poll of California citizens by the Field Institute, a majority agreed that "oil companies should be allowed to drill more oil and gas wells" in lands along "the California sea coast." The views of the California citizen must be taken into consideration.

Furthermore, the Outer Continental Shelf's environmental record is outstanding. Offshore exploration and drilling operations in the last 10 years have contributed only 3 percent of the oil which has entered America's ocean waters compared to 86 percent from ships and tanker operations and 11 percent from natural seepage. Virtually none of this 3 percent was actually carried to shore. From those statistics, it can be concluded that the danger to the ocean and beach environment from oil spills from foreign tankers carrying foreign crude oil and manned by foreign crews is much greater than the threat of potential spills and OCS production. Since the Offshore oil pollution compensation fund was created in 1978, no Federal cleanup costs have been incurred and no damage claims have been made relating to offshore drilling operations. More than $280 million has been spent on environmental safeguards since 1950, and consequently America's oil safeguards are the best in the world. The people of California recognize this only too well. In a recent poll of California citizens by the Field Institute, 59 percent agreed that offshore drilling and concern for the environment were compatible considerations.

Given the economic, energy, and national security considerations, as well as the current environmental safeguards and public opinion on the issue, the Department of the Interior's OCS leasing process is both justified and necessary for the advancement of America's interests. Any legislation which attempts to repeal or delay the OCS leasing process goes contrary to America's long-term interests. Those who drafted the moratorium provisions of the bill cannot offer any substantial evidence that OCS leasing off the coast of California will have any significant detrimental economic or environmental effects. Their views are based on major misconceptions and factual fallacies hidden amidst an aura of political rhetoric. Considering the

fact that the California coast is a well tested drilling region, do we really want to take what may be a first step toward banning all OCS production?

□ 1610

AMENDMENT OFFERED BY MR. YATES

Mr. YATES. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

NATIONAL RECREATION AND PRESERVATION

For expenses necessary to carry out recreation programs, natural programs, cultural programs, environmental compliance and review, and grant administration, not otherwise provided for, $10,924,000.

The Clerk read as follows:

Amendment offered by Mr. YATES: On page 13, line 8, strike "$10,924,000" and insert "$11,325,000".

Mr. YATES. Mr. Chairman, the purpose of this amendment is to correct an error. It conforms the bill to the actions taken by the subcommittee and the committee for the national recreation and preservation programs. It restores $151,000 for the natural landmarks program as requested by the administration and includes an additional $251,000 for national register programs. For national register programs the administration has requested $6,676,000, and with this action the amount now provided will be $5,476,000, a net reduction of $1,200,000.

I ask for approval of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. YATES).

The amendment was agreed to.

Mr. CRAIG. Mr. Chairman, I move to strike the last word.

Mr. Chairman. I would like to draw the attention of the chairman of the subcommittee and the ranking member to, starting on page 4, line 4, of the bill and page 15 of the committee report. As I was reading down these pieces this morning I began to recognize that this appropriation legislation has substantial legislative change proposed in it outside just appropriation responsibility.

I say that because this particular section of this appropriation bill, in fact, changes law. It changes the 1978 Grazing Act that mandated program for establishing and monitoring grazing fees in the Western States and, in effect, by its presence creates a new fee structure.

When I began to question why the Appropriations Committee might in fact be legislating new law I found out that in the markup of this legislation under the BLM section, on the chairman's item 14, there was only a sentence saying something to the effect of range improvements. It was bill language providing that range improvements will be provided at 50 percent of receipts of $8,640,000 and establishing a grazing fee schedule.

What does this do? It changes the direction of Congress and the mandate the Congress established in the FLMPA Act of 1976 when it in fact mandated that Congress would proceed to create a flexible schedule for the grazing of livestock on the public lands of primarily our Western States.

Then, as a result of that study, we created the Rangeland Grazing Survey and the Public Rangelands Improvement Act of 1978.

In that act, Members of Congress, we were able to create a mechanism and use that mechanism in establishing grazing fees on an annual basis that in some way would correspond with the market price of cattle, to be allowed to get the maximum use from our grazing lands from the standpoint of revenue return to the Treasury.

In the passage of that improvement act in 1978 we used a base figure of $1.23 which was established by the 1966 western livestock grazing survey and is changed annually by multiplying the result of the forage value index added to the combined index of beef cattle index minus the price index, and so on, to establish a fee that the Department of the Interior vis-a-vis the BLM is allowed to charge.

Now, that new formula approach is under study. We are not, I am not committed to that yet, and we do not know for sure whether it is working. But Congress said let us examine this through 1985, and while we examine it let us ask the Bureau of Land Management, the Department of the Interior, the U.S. Forest Service, the U.S. Department of Agriculture, to conduct a study monitoring the formulas process throughout the Western States, in fact, to determine whether the fee represents a fair market value for the forage consumed by western livestock grazing on those public lands.

This report is due in Congress by January 1, 1985. In checking with Director Bob Burford, of the BLM, I am told that this report is in progress, the study by all of the Departments I have named are in fact underway.

But what we have now is an end run by this subcommittee to emplant upon BLM and the Department of the Interior a fixed schedule which in no way reflects the market trends or the values and the problems that we experience on our public grazing lands.

□ 1620

I likened this to the problem that we get involved in with the Department of Agriculture and the U.S. Forest Service when we are talking about stumpage costs. If we would begin to look at the Canadian Government and how they handle the pricing of their timber, we might not have gotten ourselves in the problem we had in the western forest lands of this Nation and the southern forest lands, if not the whole country; in that we had companies locked into a very rigid schedule which in no way reflected the market trends at the time in the timber industry. What this committee is attempting to do by legislating in an appropriation bill is to return us to that kind of rigid structuring that we have had problems with in forest management that we will once again have.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. CRAIG was allowed to proceed for 2 additional minutes.)

Mr. CRAIG. What we risk doing in this kind of legislating in an appropriation bill is creating that rigid structure. What States am I talking of? Arizona, California, New Mexico, Utah, Colorado, Idaho, Montana, Nebraska, Oklahoma, Oregon, and Washington.

And I would have to think that the authorizing committee, the Interior Committee, would in fact be quite upset by this process and willing to look at this in light of what all of the agencies that I have mentioned are at this time doing in the survey and in the study that was mandated by the 1978 law. As a member of that Interior Committee I resent this kind of an end run and I have to think that my colleagues on that committee do too. Certainly I wanted to place in the RECORD this statement so that when we get to conference we can be reflective of the fact that we are in fact legislating through an appropriation measure and that we are disregarding the extensive report that will be coming forth from all of these agencies that are charged with the management of these public lands and establishing fees for grazing of livestock on our western public lands.

It was the intent of Congress that the legislative fee in effect at the present time be given a trial period of 7 years during which time a study would be made and, upon receipt of the results of this study, Congress intended to act and adjust the grazing fee either by formula or as they saw fit for the year 1986 and subsequently. Action on this fee at the present time would be premature and should be postponed until the results of the study are in the hands of Congress.

BLM GRAZING FEES

1973	$0.78
1974	1.00
1975	1.00
1976	1.51
1977	1.51
1978	1.51
1979	1.89
1980	2.36
1981	2.31
1982	1.86
1983	1.40

1982 GRAZING FEE OF CERTAIN STATES

Arizona	$1.43
California	1.70

1982 GRAZING FEE OF CERTAIN STATES—Con.	
New Mexico	1.60
Utah	2.36
Colorado	3.00
Idaho	4.25
Montana	3.47
Nebraska	14.00
Oklahoma	5.70
Oregon	2.50
Washington	3.37

Mr. WHITTEN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in strong support of this appropriations bill and wish to acknowledge the fine work of the gentleman from Illinois (Mr. YATES). The bill which he brings before us today is both a difficult one and a very important one for our country. SID YATES and his subcommittee know the importance of maintaining and preserving the real wealth of our Nation. This bill takes care of our forests, many of our natural resources, and our environment. Without anything backing our money, all that we have to pass on to our children and our grandchildren is the vast beauty, and wealth of our natural resources.

I commend the work he has done, and the ranking minority member of this subcommittee, the gentleman from Pennsylvania (Mr. MCDADE). These two gentlemen and the other members of this subcommittee have worked hard to bring this House a good bill; some have called it the all-America bill and I agree with that. All the Members of this House should support this bill.

Mr. CHAIRMAN. Are there additional amendments to title I? If not, the Clerk will read title II.

The Clerk proceeded to read title II.

Mr. YATES (during the reading). Mr. Chairman, I ask unanimous consent that title II be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Are there any points of order against title II?

Are there amendments to title II?

AMENDMENTS OFFERED BY MR. HILER

Mr. HILER. Mr. Chairman, I offer amendments.

The portions of the bill to which the amendments relate are as follows:

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

NATIONAL ENDOWMENT FOR THE ARTS

SALARIES AND EXPENSES

For necessary expenses to carry out the National Foundation on the Arts and Humanities Act of 1965, as amended, $134,400,000 of which $121,300,000 shall be available to the National Endowment for the Arts for the support of projects and productions in the arts through assistance to groups and individuals pursuant to section 5(c) of the Act, of which not less than 20 per centum of the funds provided for section 5(c) shall be available for assistance pursuant to section 5(g) of the Act, and $13,100,000 shall be available for administering the functions of the Act.

MATCHING GRANTS

To carry out the provisions of section 10(a)(2) of the National Foundation on the Arts and the Humanities Act of 1965, as amended, $30,600,000, to remain available until September 30, 1985, to the National Endowment for the Arts, of which $21,500,000 shall be available for purposes of section 5(1): *Provided*, That this appropriation shall be available for obligation only in such amounts as may be equal to the total amounts of gifts, bequests, and devises of money, and other property accepted by the Chairman or by grantees of the Endowment under the provisions of section 10(a)(2), subsections 11(a)(2)(A) and 11(a)(3)(A) during the current and preceding fiscal years for which equal amounts have not previously been appropriated.

NATIONAL ENDOWMENT FOR THE HUMANITIES

SALARIES AND EXPENSES

For necessary expenses to carry out the National Foundation on the Arts and the Humanities Act of 1965, as amended, $120,500,000 of which $107,750,000 shall be available to the National Endowment for the Humanities for support of activities in the humanities, pursuant to section 7(c) of the Act, of which not less than 20 per centum shall be available for assistance pursuant to section 7(f) of the Act, and $12,750,000 shall be available for administering the functions of the Act.

MATCHING GRANTS

To carry out the provisions of section 10(a)(2) of the National Foundation on the Arts and Humanities Act of 1965, as amended, $29,500,000, to remain available until September 30, 1985, of which $18,000,000 shall be available to the National Endowment for the Humanities for the purposes of section 7(h): *Provided*, That this appropriation shall be available for obligation only in such amounts as may be equal to the total amounts of gifts, bequests, and devises of money, and other property accepted by the Chairman or by grantees of the Endowment under the provisions of subsections 11(a)(2)(B) and 11(a)(3)(B) during the current and preceding fiscal years, for which equal amounts have not previously been appropriated.

The CHAIRMAN. Is it the Chair's understanding that the gentleman has two amendments?

Mr. HILER. Mr. Chairman, I have four amendments at the desk, and I ask unanimous consent to have them considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

Mr. YATES. Reserving the right to object, Mr. Chairman, I would like to know what the amendments are.

The CHAIRMAN. The Clerk will read all four amendments.

The Clerk read as follows:

Amendments offered by Mr. HILER:

On page 60, line 18, strike out "$134,400,000" and insert in lieu thereof "$114,275,000". On page 60, line 18, strike out "$121,300,000" and insert in lieu thereof "$101,675,000". On page 60, line 24, strike out $13,100,000" and insert in lieu thereof "$12,600,000".

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana that the amendments be considered en bloc?

Mr. YATES. Further reserving the right to object, Mr. Chairman, I understand the gentleman had four amendments. I thought that the Clerk read only three amendments.

The CHAIRMAN. The Clerk will report the additional amendments. It is the chair's understanding that was simply the first amendment that was read.

The Clerk read as follows:

Amendment offered by Mr. HILER: On page 61, line 4, strike out "$30,600,000" and insert in lieu thereof "$29,600,000".

Mr. YATES. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The CHAIRMAN. Without objection, the additional amendments will be considered as read.

There was no objection.

The additional amendments are as follows:

Amendments offered by Mr. HILER: On page 61, line 19, strike out "$120,500,000" and insert in lieu thereof "$102,132,000". On page 61, line 19, strike out "$107,750,000" and insert in lieu thereof "$90,432,000." On page 61, line 24, strike out "$12,750,000" and insert in lieu thereof "$11,700,000".

ON page 62, line 4, strike out "$29,500,000" and insert in lieu thereof "$27,928,000".

The CHAIRMAN. The gentleman from Indiana is recognized for 5 minutes in support of his amendments.

Mr. HILER. Mr. Chairman, I offer these four amendments because I would like to take issue with a portion of the Interior appropriations bill which I find to be unconscionable in view of the many critical funding priorities facing the Federal Government. This legislation attempts to increase Federal spending for the arts and humanities by 15 percent in fiscal year 1984, an increase of absurd proportion when viewed in relation to funding requirements for Federal programs which meet more basic human needs.

I certainly do not attempt to minimize or belittle the important cultural role which the arts and humanities play in our daily lives, and I would not propose to advance the notion that the Federal Government should have no involvement in this area. However, it is important that we place the Federal role in perspective. During the past decade, appropriations for both the National Endowment for the Arts and the National Endowment for the Humanities have more than tripled. At the same time, legislation has been approved in Congress which provides tax deductions for contributions to many artistic and humanistic endeavors, and allows the owners of certain historic property to claim tax credits or depre-

ciation for work done on that property. The loss in tax revenues to the Federal Government as the result of these laws is substantial, and should not be ignored when considering the amount of support which the Federal Government provides to the arts and humanities.

Perhaps what I find to be equally concerning about an increase of this nature is the trend which it would perpetuate. A trend which encourages reliance on the Federal Government as an ever-expanding and ever-available source of funding for artistic endeavor. We are all aware of the negative effects of government intrusion in our lives. If we want to encourage participation by our citizens in the arts we can do so without creating a nation dependent upon its government for providing its cultural needs. The private sector must remain at the center of this effort. Indeed, if we are to maintain the integrity and individuality of the artist, the Federal role must necessarily be of a limited scope.

The administration had requested a 13-percent spending reduction for NEA and NEH in fiscal year 1984. Instead, this legislation ignores that request and goes one step further. It adds more than $40 million in new spending at a time in which budget deficits loom larger and larger. My amendment provides an opportunity to reestablish the proper intent of Congress with respect to the arts and humanities, and at the same time preserve important funding for ongoing programs. Maintaining spending levels for these programs at their current levels will not jeopardize the future of the arts and humanities in our Nation. There is little that could be said to convince me that our Nation and its citizens will not continue to pursue quality experiences in the arts and humanities if not $1 of Federal funding was provided. However, that is not the case. The Federal Government is involved, and will likely continue to be involved in this area in the future. But let that involvement provide encouragement to our artists, not subsidization.

The four amendments I have offered would freeze spending at 1984 levels. What we would be saying is at a time of $200 billion deficits, at a time when we as a Congress must try to assess our priorities that we do not have in the budget, we do not have the Federal resources to allow a 15-percent increase in spending for the arts and humanities. This is a very simple series of amendments, it will freeze spending at last year's levels. Many people on that side of the aisle signed a letter several days ago asking the Speaker to consider when he proposed capping the tax cut, that he consider supporting an effort to freeze spending. Well, certainly if there is any area that spending could be frozen with little impact on the overall good of our country, this is one area that could be done. A $40 million increase at this particular juncture is not called for, it is not justified and I believe that we as a Congress should establish our priorities and should be willing to say this is one area where we will freeze spending; not cut spending, but freeze it. We will spend the same amount next year as we did this year. Last week, when the House passed the cap on the third year of the tax cut, many Members on the majority side voted for an amendment that would say that the Congress should try to find $6 billion in some type of spending reductions. What better place to start than this $40 million reduction from what would be budgeted under this Interior appropriations bill, what better place to start than in the National Endowment for the Arts and the National Endowment for the Humanities. A relatively simple $40 million reduction from the appropriations bill that would have the effect of freezing expenditures at last year's level. I think this amendment deserves your consideration.

□ 1630

Mr. YATES. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendments.

Mr. Chairman, for some time I have had a feeling that it was just a question of time when some Member of the House would take the floor to attack the arts and humanities appropriations. I never conceived that such a motion would come from a Member from the State which has such a remarkable and outstanding School of the Arts as Indiana University.

In 1981, the administration proposed cutting the arts budget.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Pennsylvania.

Mr. McDADE. I thank the gentleman for yielding.

The gentleman mentioned Indiana University, but the gentleman should have mentioned my alma mater, the University of Notre Dame.

Mr. YATES. All right, I will mention that as well. I was not aware that Notre Dame had the reputation for arts that Indiana University has. I know it has for humanities.

Mr. McDADE. We cannot get toward Hogie Carmichel, but our football team is an art form.

Mr. YATES. So is Indiana's basketball team.

Mr. McDADE. Agreed.

Mr. YATES. Mr. Chairman, in 1981 the administration proposed to cut the arts budget. And it proposed cutting on the theory that any reduction in the Federal appropriation would be more than made up from private contributions. That just has not happened.

The large individual donors, the businesses, the foundations who make contributions to the arts have appeared before our committee and have told our committee that they just cannot make up the difference. They have such demands as a result of cuts in social programs that they cannot make up the difference between the cuts in the appropriations that were proposed and the amounts that would be available to the arts.

Whenever contributions from the State legislatures also have been cut, they, too, cannot make the difference.

The fact is that if the arts are to be encouraged and are to stay alive, Federal contributions must be strengthened.

The fact is that our Federal contribution is less per capita than that of any other Western country.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Ohio.

Mr. REGULA. I thank the gentleman for yielding.

As the gentleman knows, I pointed out earlier that that is not quite accurate in the sense of giving the whole story, because the tax deductability of charitable contributions is in effect an underwriting by the Government, but with decision resting in the taxpayer and the local community for the support of arts.

Mr. YATES. The gentleman is correct. We do have the additional subsidies to the arts, to education, to charities, as a result of deductions from income tax that donors do make, but as far as direct appropriations for the arts is concerned, the fact remains that the Government of the United States appropriations are much less than the contributions.

Mr. REGULA. If the gentleman will yield further, I think though—and I do not have my statistics here——

Mr. YATES. I have them here.

Mr. REGULA. Well, I understand that the gentleman is accurate in what he said, but totally allowing for State, local, Federal, plus the underwriting as a result of the Tax Code, the total per capita expenditure in the United States is greater than any other country. And it allows the individuals to make the choice, rather than the Central Government, under our system.

Mr. YATES. I think that is a good statement, except that I have tried for years to find out from IRS what the total deductions that had been granted for contributions to the arts has been. They have not been able to tell me. That such contributions are made, there is no doubt. That such deductions are permitted, there is no doubt, but as far as I have been able to find

out from IRS, there are no valid statistics that would show that.

Mr. REGULA. I would just say that we have a classic example right down the street in the National Gallery, which was funded by the Mellon Foundation, if I am not mistaken, the construction of it. It is about a $100 million project that was not Federal money, but certainly was a contribution to the arts.

Mr. YATES. The gentleman is talking about the construction of the East Building.

Mr. REGULA. Yes.

Mr. YATES. The Mellon Foundation not only made those funds available, the Mellon Foundation has made funds available ever since the construction of the original building. There is no doubt that such contributions are made and such deductions are permitted.

The point I was making is that IRS has found no way of segregating that so that we have a valid set of statistics to indicate what that figure is.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. YATES) has expired.

(By unanimous consent, Mr. YATES was allowed to proceed for 5 additional minutes.)

Mr. RATCHFORD. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Connecticut.

Mr. RATCHFORD. I thank the gentleman for yielding.

The gentleman and I sat through several days of hearings where this whole issue came up and we had group after group. I recall a group that came in from Connecticut. We had the executive director of our State commission on the arts; we had the New Haven Arts Council; we had the Long Wharf Theater there; and in each and every instance they said it was getting more and more difficult to go out into the private sector to draw the funds that were necessary. Their concern was that if there was not leadership at the Federal level, if there was not commitment at the Federal level, if there was not a feeling that arts were important at the Federal level, that the private giving would not follow.

We heard also from State directors saying that because of what they had faced for economic reasons over the past several years, that the State commitments in these areas were dwindling.

Now if we have a diminishing private contribution, a dwindling State and local contribution, I think it is all the more critical for Federal involvement at this point.

We hear about the Smithsonian and we hear about Mellon, we need to talk about Main Street, America. And many of the activities involving dance and theater and the arts come to Main Street, America because of the endowments, because of the arts, because of the humanities. That simply is not going to happen without a Federal role.

So the Chairman is absolutely correct. Leadership is essential. There are many ways of measuring it. One of the clearest ways is through dollar commitment.

Mr. YATES. I thank the gentleman.

Mr. DOWNEY of New York. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from New York.

Mr. DOWNEY of New York. I thank the gentleman for yielding.

While the gentleman is correct that the Internal Revenue Service has never undertaken a study of where charitable contributions go, there are a number of charitable foundations that are very much interested in the disposition of charitable contributions. And the conclusion that they have reached, after careful study over a long period of time, is that the lion's share of the charitable contributions do not go to the arts, they go to religious organizations to the tune of 60 or 70 percent and that the next largest amount goes to educational institutions.

So to somehow suggest that because the charitable deduction is there that this is somehow going to infuse the arts where the Federal Government could not, is very much mistaken. Only a very small portion of the total of charitable contributions go to artistic pursuits.

Mr. YATES. I thank the gentleman.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding.

I concur completely with the gentleman's resistance to this amendment, which in fact is an attack on the quality of life in our country.

When I was in the Army, I was stationed in a town of 40,000 people, Coburg, Germany, where they have a professional opera company and professional orchestra. They assume that a town of 40,000 has these things.

We assume precisely the opposite. And I would add one other factor. Corporations today are multinational corporations and they are going to go where they see a healthy cultural life among other things. And for us, where we are already way at the bottom, to go even further down, is not even good economic sense, much less cultural good sense.

Mr. YATES. I thank the gentleman.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Mr. Chairman, I think the main question here is not whether we are always going to be able to find an orchestra in New York or Chicago or Detroit or Los Angeles. They will always have an orchestra. The wealthy in those communities will always be willing to support those orchestras and the arts in those cities.

What we are talking about are the smaller towns, the smaller communities in this country, that for the first time had a chance to build an arts base because of the National Foundation. That has eroded over the last few years. And it is in those communities where I think it is most essential to have Federal leadership on the issue.

Mr. YATES. The gentleman is right.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from New York.

□ 1640

Mr. WEISS. Mr. Chairman, I rise in opposition to the amendment and in support of the fiscal year 1984 appropriations for the arts and humanities contained in the Interior appropriations bill (H.R. 3363). I commend the Interior Appropriations Subcommittee and Chairman SIDNEY YATES for their efforts to respond to the demonstrated need to increase funding levels for the national endowments and other arts programs.

H.R. 3363 contains $165 million for the National Endowment for the Arts, an increase of about $21 million over the fiscal year 1983 level; $150 million for the National Endowment for the Humanities, an increase of about $20 million. These levels are less than 4 percent above the 1981 levels. The bill also includes $21.5 million for the Institute of Museum Services, a $10 million increase; and $26.5 million for the historic preservation fund.

This is the third consecutive year that we have had to repeal the administration's attacks on Federal funding for the arts and humanities. Among the administration's recommended reductions were $19 million less for the NEA and $18 million less for NEH. In testifying for these reductions, the Endowment chairman stressed their intentions of stretching public funding as far as it could possibly go.

The sad truth, however, is that public resources are already stretched to the breaking point in the arts world. The arts community has never recovered from the Reagan administration's drastic reductions of 1981 and has been further damaged by the recession and other budget pressures.

New York City's smaller nonprofit theaters, for example, are burdened by problems that jeopardize their very survival and the health and vitality of American nonprofit theater. In my district, which has perhaps the largest

concentration of such theaters in the country, rising operating costs, skyrocketing real estate values, and reduced revenues have created a crisis of serious dimensions. A number of theaters ended last year with substantial deficits. Their total expenses increased by 8.5 percent, while their grants and contributions grew by only 4 percent, according to a recent survey by the Theatre Communications Group.

The Nation's orchestras, museums, and other cultural institutions are struggling with similar difficulties. Their efforts to become more financially independent often prove to be counterproductive. Strenuous fundraising campaigns divert resources from creative efforts. Increases in admissions prices limit audiences to the wealthy, undermining one of the NEA's original purposes—to open the arts of a wider audience.

The administration, with its recommendations for continued cuts, refuses to acknowledge that the arts are a major industry in America. A recent study revealed that the arts generate $5.6 billion a year for the New York-New Jersey metropolitan area economy alone and a total of 117,000 jobs.

The fundamental reason for increasing public support for the arts, however, is that Americans place a very high value on cultural activity. Their increased participation in the arts has far outstripped the rise in leisure time during the past two decades. Opinion polls show strong public support for increasing funding to the arts.

The Interior appropriations bill is an important step in restoring the Federal commitment to the arts and helping the arts community recover from the recession. I urge my colleagues to support the funding levels in H.R. 3363 and to reject any attempts to reduce funding for the arts.

Mr. YATES. I thank the gentleman.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Ohio.

Mr. REGULA. Mr. Chairman, I just want to respond to the gentleman from California. He made the point that the Endownment money is helping the small towns. That may be true. But as I said earlier, I think that is one of the weaknesses in the program. The gentleman in the well and I have discussed this at length, and I want to make that point. It ought to be spread around over more of the country and not go so much to the large population centers.

Mr. YATES. I agree with the gentleman, and that is being done.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to my distinguished friend, the gentleman from Vermont.

Mr. JEFFORDS. I thank the gentleman for yielding.

Mr. Chairman, I just want to certainly echo the comments that have been made here, that we are dealing with a very, very small amount of money when you consider the importance of the money that is spent here.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. YATES) has expired.

(By unanimous consent, Mr. YATES was allowed to proceed for 5 additional minutes.)

Mr. JEFFORDS. If the gentleman will yield further, I also want to echo the comments of the gentleman from California with respect to rural areas, also brought out by the gentleman from Ohio. We all visualize these gifts to things which everyone would give to anyway. But in my experience, what the Endowment has done so much to help is in the rural areas, the small towns and the schools and the ghettos of this country, where people see that there is something other than a food stamp line to stand in, that there is some hope at the end and some real feeling that this country has a heart and a soul. I think it is so critically important that we continue and that we bring these levels up to where the program can do what it should be doing.

Mr. YATES. I thank the gentleman.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Oregon.

Mr. AuCOIN. Mr. Chairman, I rise in strong opposition to this attempt to reduce funding for the National Endowment for the Arts. I urge my colleagues to reject it.

The Endowment has played an enormously important role in our country's cultural life. It has enabled many Americans, especially those with limited access to art programs, to enjoy them. And the value of these programs is unmeasurable—not only culturally but also in terms of economic stability and growth.

Two cities in my State of Oregon are perfect examples.

Ashland, Oreg., a small community near the California border, has developed one of the finest Shakespearean theater programs in the country. Beyond the obvious cultural dividends for the community, this has also created a very positive economic dynamic for the town.

Granted, not every town can be an Ashland, Oreg. But almost any city can follow the example of Eugene, Oreg. Eugene had the vision to launch a performing arts center in the downtown of the city. The result: economic rebirth of a deteriorating urban core. New private business investment has already been triggered within the area by this immaginative project.

These projects are examples of the dividends we earn with Federal aid to the arts. Financial support from the Government stimulates contributions from State and local governments and the private sector.

Members of the arts community bear testimony to this. During Interior Appropriations Subcommittee hearings earlier this year, witnesses described how important Federal support is.

I would like to quote from the testimony of Peter Hero, executive director of the Oregon Arts Commission, who pointed out that Oregon, as well as other States, look to modest public funds to leverage matching funds from the private sector. In Oregon, the match is running better than 5 to 1. The arts depend upon this leverge effect of public funds for their very survival.

Mr. Hero further commented that the incentive effect of public funds has become even more critical. Without it, arts organizations are finding it almost impossible to raise private funds for operating costs and other income statement budget items.

The National Endowment for the Arts is critical to the future of the arts in our country. I sincerely hope my colleagues understand the worth of the Endowment and reject this utterly reckless amendment.

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Indiana.

Mr. HILER. I thank the gentleman for yielding.

Mr. Chairman, I think we ought to characterize this amendment correctly. We are not gutting the National Endowment for the Arts nor the National Endowment for the Humanities. We are not turning the Federal Government's back on the funding of arts and humanities, we are not saying we are going to go back to whatever it was 100 years ago, we are not saying that we are going to ignore the small communities or ignore the big communities. All we are saying is that, at a time of a $200 billion deficit, when people day after day after day take this floor and rail about deficits, this is one area that we can freeze spending at last year's level, not cut a dime out from what was spent last year, just keep it at the same amount, that the National Endowment for the Arts and Humanities does not need a 15-percent increase at this particular time.

The gentleman from Vermont commented that we were talking about a small amount of money; $40 million is not a small amount of money. It is not a small amount of money in Indiana, I can guarantee the chairman of that.

Mr. YATES. If I may reclaim my time, the gentleman is making the same point he made in his direct argument; namely, that he proposes to freeze it at what the level was last year.

What the action of the committee is just returning the budget to what it was 2 years ago when it was about $159 million, and adding less than one-half of 1 percent for inflation, to $165 million.

But I do not think the gentleman was listening to my words. Let me use some words of a gentleman that the gentleman from Indiana might be willing to listen to. Let me quote from a former President of the United States, Richard Nixon, who said this in 1969. This is Richard Nixon speaking:

The attention and support we give the arts and humanities, especially as they affect our young people, represent a vital part of our commitment to enhancing the quality of life for all Americans. The full richness of this nation's cultural life need not be the province of relatively few citizens centered in a few cities; on the contrary, the trend toward a wide appreciation of the arts and a greater interest in the humanities should be strongly encouraged, and the diverse culture of every region and community should be explored.

Now, let me just continue with what President Nixon said on the Federal role, if I may speak. He said:

At a time of severe budget stringency—

This is his phrase—

At a time of severe budget stringency, a doubling of the appropriation for the arts and humanities might seem extravagant. However, I believe that the need for a new impetus to the understanding and expression of the American idea has a compelling claim on our resources. The dollar amounts involved are comparatively small.

And that is true today, when you think of the whole budget that we are dealing with.

The Federal role would remain supportive, rather than primary.

And that is true today, as well.

The arts have attained a prominence in our life as a nation and in our consciousness as individuals, that renders their health and growth vital to our national well being * * *

Our creative and performing artists give free and full expression to the American spirit as they illuminate, criticize and celebrate our civilization. Like our teachers, they are an invaluable national resource.

Too many Americans have been too long denied the inspiration and the uplift of our cultural heritage. Now is the time to enrich the life of the mind and to evoke the splendid qualities of the American spirit.

Therefore, I urge the Congress to extend the authorization and increase substantially the funds available to the National Foundation for the Arts and Humanities. Few investments we could make would give us so great a return in terms of human understanding, human satisfaction and the intangible but essential qualities of grace, beauty and spiritual fulfillment.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. YATES) has again expired.

(By unanimous consent, Mr. YATES was allowed to proceed for 2 additional minutes.)

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Indiana.

Mr. HILER. Mr. Chairman, I certainly would not want to question the remarks that President Nixon made in 1969.

Mr. YATES. And I am sure he would make them today.

Mr. HILER. Well, I am not sure about that.

Mr. YATES. I am sure he would.

Mr. HILER. Lest anyone think that we have not done anything for the arts and humanities, since 1973 we have tripled the amount of money we have spent on the arts and humanities.

Mr. YATES. Sure, you start from $2 million and you get $6 million.

Mr. HILER. We not only doubled it, as the President wanted to do in 1969, we tripled it in the last 10 years, and it is substantial, nearly $300 million.

Somehow, we talk about a relatively small amount of money; $40 million is not a small amount of money; $40 million is a substantial sum of money.

Mr. YATES. This is for enhancing the spirit of the people of America, and it compensates in a small measure for the amount of money that is going to make weaponry, may I say. The humanities give us the basis for making peace. The humanities give us the basis for making peace, and civilizations are known by the respect that they have for humanities and for the arts.

For those reasons, I think the amounts we are putting into this budget are well worth it.

Mr. McDADE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendments.

Mr. Chairman, if I might have the attention of my friend, the gentleman from Illinois (Mr. YATES), I just want to indicate to my friend from Illinois that I am grateful, and I think we all should be, for the leadership that he has shown in addressing the problems of the National Foundation for the Arts and Humanities, and so many others, but this one in particular. It has been dear to his heart as long as I have known him.

Mr. YATES. Very dear.

Mr. McDADE. And the gentleman deserves great credit for all of the leadership that he has shown. I want him to know that. I think he has done a superb job.

Let me say to my friend from Indiana, who raises a good question, it is a value judgment, and we are all here with different values. That is what makes this body great. Dissent oftentimes shows us the way to truth. I happen to believe that the amendment, though it is eminently right from a judgmental point of view from my friend, is wrong from a value point of view. That is my subjectivity speaking. I believe the arts and humanities in this country should be nourished. I think the Federal Government has a role to play, and I think that we as a Congress do.

I agree with my friend, $40 million is not an insignificant amount of money in any account, and I want to commend him for bringing it to the attention of the House. It is important that we think about that $40 million. It is important to recognize what my friend from Illinois said, which was essentially that we have raised this budget back to where it used to be. We hope there is going to be a turn in the economy. We see it coming. We hope the budget deficits will close. But more importantly, we want to express ourselves, I think, as a nation that we believe in the Federal role for the arts and humanities, the tremendous importance to what it means to our national self-culture, to our national interest.

I recall being in Berlin not long after the war. I was a student. And Berlin was 98 percent rubble when I got there. We went, in the evening, to try to find a place where we might be able to talk to some people who had lived in Berlin during that horrible period, and we found them. It was a rathskeller, it was a cellar, because Berlin was nothing but cellars in those days. But as I opened the door to walk in, all you could hear them playing was American music.

If there is anything we have contributed to the world, it is American music, it is American film, it is American culture so many things. And we have transferred that back and forth among the nations of the world in a beautiful array that uplifts all of us.

□ 1650

Mr. Chairman, I reluctantly disagree with my friend. I respect his judgment. I appreciate his bringing this to our attention. I hope it is defeated.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. McDADE. I yield to the gentleman from Georgia.

Mr. LEVITAS. I thank my friend for yielding.

Mr. Chairman, I would like to rise in opposition to the amendment. We are talking about a very small, yet very important allocation of funds for the arts and humanities. The entire funding in this bill for the arts and humanities amounts to approximately $1 for every person in this country, $1 for supporting the very quality of life and civilization that is so important to us. The arts and humanities are what make this country and this country's quality of life what it is.

There is a private role; indeed it will always be the predominant role. But there has never been a civilization, a great civilization, in the history of the world wherein the Government did

not play a leadership role in promoting the arts and culture of the Nation. Although small, the funding for the arts and humanities that is contributed by the Federal Government is essential because it is what drives the rest of the economy, the private sector, into making its contributions. Without this role, then we will fail in other areas.

Mr. Chairman, there is a statement by President John F. Kennedy emblazoned on the walls of the Kennedy Center, on the outside terrace, which says:

I am certain that after the dust of centuries has passed over our cities, we, too, will be remembered not for our victories or defeat in battle or in politics, but for our contribution to the human spirit.

That is what we are talking about here. We are talking about a commitment to the human spirit, those ideals and those principles and those activities which uplift mankind and distinguish us from the beasts. It is for this reason that this investment in partnership with the private sector is so vital to this Nation, to its present, and even more important, to its future.

I rise in opposition to the amendment.

Mr. HYDE. Mr. Chairman, I move to strike the requisite number of words.

I notice, Mr. Chairman, that there is money in here for the John F. Kennedy Center for the Performing Arts. I am a great admirer of that structure and have visited there several times, and almost could afford to purchase a ticket to some of the performances there for the ordinary people of America.

A commitment to the human spirit. I am all for commitments to the human spirit. The real question is, Does that commitment require a multimillion-dollar expenditure from money we do not have at this time? The question as to whether or not the Federal Government should even be in the business of subsidizing the arts and the humanities is an interesting question. That every poet does not get a subsidy, that every playwright, that every dancer, that every choreographer is not among the selected few is a problem. There is a problem of exclusivity here that is a subject for another discussion at some time.

But that there should be a Federal subsidy to the arts and humanities I suppose is a given, and let us accept that. The question is, at a time when we are lectured about deficits daily, hourly, by the minute, by the gentlemen from the other side, where we have the greatest deficits in history, where we are $200 billion in the red and the deficits are going to explode in the outyears, ought we not look for some place to cut?

The gentleman from Illinois, for whom I have the highest admiration and respect, and with whom I almost always agree—almost always—has said that bombs are too expensive and we ought to support music and folk arts perhaps in lieu of bombs. I suggest we need both. I suggest that reciting a poem to the arms-control people from the Soviet Union is not really going to get them to give up their SS-20's nor move them out of Afghanistan. It might, but I would not want to bet on it.

Is there no place in the budget where we can hold the line? Is there no place where we can say let us stay here until the deficits go down, and then let us indulge ourselves in feeling good by subsidizing the arts and the humanities. I do not think that they would dry up or wither on the vine. I think there are enough public-spirited people who will encourage embryonic poets, and choreographers, and street theater, and tabourine bands.

Mr. YATES. That just is not true.

Mr. HYDE. Well, the gentleman has not turned his persuasive abilities in that direction. He has been asking Congress all the time, instead of the private sector.

Mr. YATES. I will tell the gentleman that the National Endowment for the Arts has hired people specifically to try to encourage private giving. The President has a committee. He has a commission to encourage private giving for the arts and the humanities. They have not been able to make up the difference. The Federal role is still an important one, even though it is still the most minor one in the process.

Mr. HYDE. I yield to my friend, nunc pro tunc.

Mr. YATES. As of what time, may I say?

Mr. HYDE. Let me simply ask my friend whether the arts and the humanities have suffered a terrible loss in the last 2 years.

Mr. YATES. Yes.

Mr. HYDE. Have they declined?

Mr. YATES. Yes.

Mr. HYDE. The quality of theater is down?

Mr. YATES. Yes.

Mr. HYDE. The poems are not quite as moving and stirring as they might be?

Mr. YATES. There are not as many. There are not as many applicants. Fewer applications are being funded. The participants are not being recognized, may I say to the gentleman. That is the reason for the increase, may I say. We are returning to the level of appropriations the endowments had in 1981.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to my friend, the gentleman from Georgia, who coined the phrase "a commitment to the human spirit," which I must say is very stirring.

Mr. LEVITAS. I thank my friend, the gentleman from Illinois, for yielding.

Mr. Chairman, the gentleman from Illinois knows that I share his same commitment to a strong national defense, and I have demonstrated that by voting for it, because I think one of the things I think we are defending is the type of lifestyle, civilization, and quality of life in the human spirit sector that we have here.

Mr. HYDE. But must the Federal Government be the font of all the quality of life and the arts and the humanities?

Mr. LEVITAS. Absolutely not, and if the gentleman will yield further, it is the smallest portion. It is the private sector. It is State and local government.

Mr. HYDE. Let us keep it small, then.

The CHAIRMAN. The time of the gentleman from Illinois (Mr. HYDE) has expired.

(On request of Mr. LEVITAS and by unanimous consent, Mr. HYDE was allowed to proceed for 3 additional minutes.)

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to my friend, the gentleman from Georgia.

Mr. LEVITAS. I thank the gentleman for yielding.

Mr. Chairman, I want to take one other exception to what the gentleman said because I know in the interest of accuracy he would want this called to his attention.

The funding in this bill for the John F. Kennedy Center is not to support plays or concerts or performances in any way. The John F. Kennedy Center has two functions. One is its performing arts function, which is solely paid for and operated by gifts and ticket sales, and nothing from the Federal Government is provided in that regard.

But the Kennedy Center is also a memorial to a deceased President, just as the Lincoln Memorial or the Washington Monument. It is the nonperforming functions that are funded in here. It is operated by the National Park Service. They have to maintain the place; they have to police the place.

Mr. HYDE. If I may, I would say that we do not fund Mount Vernon, I believe, the memorial to the first President of this country.

Mr. LEVITAS. If the gentleman will yield further, the memorial to the first President of this country is the Washington Monument, and we do fund that, and we do have National Park Service police, and we do pay maintenance on that, just as we do at the Jefferson Memorial and at the Lincoln Memorial. Indeed, the performing arts function at the Kennedy Center con-

tributes 24 percent of the cost of that upkeep to the Park Service.

Mr. HILER. Mr. Chairman, will the gentleman yield?

Mr. HYDE. I yield to my friend, the gentleman from Indiana.

Mr. HILER. I thank the gentleman for yielding.

Mr. Chairman, the discussion here is not whether we are going to have a National Endowment for the Arts or a National Endowment for the Humanities; the question is should it have a 15-percent increase this year.

I shudder to think that all these bad things that mankind and his cultural experience is going to go down the tube because we freeze spending at 1983 levels. Somehow it just flies in the face of reality to think that the arts are going to fall apart if we freeze spending at 1983 levels.

□ 1700

Mr. HYDE. Mr. Chairman, I will just suggest that if we cannot hold the line here, there is nowhere in the budget we can hold the line.

Mr. Chairman, I yield back the balance of my time.

Mr. GILMAN. Mr. Chairman, as a member of the Congressional Arts Caucus, I rise in strong opposition to the amendment now before us which proposes to freeze funding for both the National Endowment for the Arts and the Humanities at their fiscal year 1983 levels, thereby saving approximately $40 million.

In fiscal year 1983, the National Endowment for the Arts was funded at $143.9 million. The Appropriations Committee has requested an increase of some $20 million, for a fiscal year 1984 funding level of $165 million. Similarly, the National Endowment for the Humanities has a fiscal year 1983 appropriation of $130.1 million, and was allocated by the committee an additional $20 million for fiscal year 1984.

Our society is measured by its compassion for the people around us. Those who would have us believe that these two fine institutions carry on work that only serves a small portion of our Nation's population are wrong. These two endowments enrich the lives of all of us, uplifting our culture heritage. Furthermore, they provide employment opportunities so very important to our economy.

Nations are judged by the amount of attention, respect, and support that they give to their artists and their scientists. While we profess to support their works, we must endorse those works with financial backing. The private sector does what it can, but it is Government sanction that initiates private support. Accordingly, I urge my colleagues to reject this amendment, thereby reiterating their commitment to the arts and humanities of our Nation.

● Mr. SCHEUER. Mr. Chairman, I rise in opposition to this amendment. As a member of the executive board of the Congressional Arts Caucus, I would like to take this opportunity to express my appreciation to the members of the Appropriations Committee for their fine work in support of the arts and humanities.

Under the farsighted leadership of Chairman JAMIE L. WHITTEN and Subcommittee Chairman SIDNEY R. YATES, the committee has set and approved funding at substantially higher levels than those recommended by the administration. By approving $572 million for the arts and humanities, the committee has displayed a prudent commitment to our Nation's arts and cultural programs.

The arts in the United States not only provide a tremendous cultural and educational value, but also provide significant economic benefits as well. In 1982, the arts had a $5.6 billion impact on the New York metropolitan area and generated over 117,000 jobs.

In addition, the arts generated $1.3 billion in revenues for New York City last year. An estimated 64 million people attended museums, galleries and other cultural events in the New York metropolitan area in 1982. One fifth of this audience came from outside the region. While millions take advantage of New York's cultural offerings while visiting the city for business or other purposes, last year over 5 million people came to New York specifically for the arts.

Increasing funding for the arts and humanities would, undoubtedly, provide a tremendous boost to the country's cultural organizations, particularly the small- and medium-sized institutions which depend heavily on assistance from the Federal Government.

In the New York metropolitan area there are 1,580 nonprofit cultural organizations, including theater, museums, music, opera, and dance. Fifty percent of these are small institutions which operate on budgets of less than $50,000 annually. These institutions depend on the National Endowment for the Arts, the National Endowment for the Humanities, and the Institute of Museum Services for 14 percent of their income. Medium-sized institutions receive over 19 percent of their funding from these sources.

The funding levels approved by the Appropriations Committee would dramatically enhance the arts community's ability to provide cultural programs and exhibits to the public. Moreover, they would increase the substantial economic benefits our cities derive from the arts.

I urge my colleagues to support the committee's recommendations for arts and humanities funding, so that we may insure the continuation of these invaluable programs.●

The CHAIRMAN. The question is on the amendments offered en bloc by the gentleman from Indiana (Mr. HILER).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. HILER. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1710

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Indiana (Mr. HILER) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 150, noes 271, not voting 12, as follows:

[Roll No. 221]

□ 1720

Messrs. WILLIAMS of Montana, WILLIAMS of Ohio, WAXMAN, and McKINNEY changed their votes from "aye" to "no."

Mr. LEATH of Texas and Mr. SAWYER changed their votes from "no" to "aye."

So the amendments were rejected.

The result of the vote was announced as above recorded.

Mr. LEVITAS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I seek the attention of the chairman of the subcommittee, the gentleman from Illinois, to inquire about a matter.

As I read the bill and the committee report that came to the House today there were no funds provided for the Chattahoochee River National Recreation Area. And as the gentleman from Illinois knows this is a very important national park which is being threatened by development and could very well result in loss of vital land.

But it is my understanding that the chairman, earlier today, made some reference to possible funding for the Chattahoochee River National Recreation Area. I would like to express my appreciation for that and ask if he could confirm the situation.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman.

Mr. YATES. The gentleman is exactly right. At an earlier point in the debate I stated to the House that out of the slippage that we feel will occur in connection with the acquisitions program, $1 million will be made available for acquisition for the Chattahoochee River National Recreational Area.

Mr. LEVITAS. I thank the gentleman from Illinois for his response and consideration. And millions of Americans today and in years to come will also be grateful for that action.

Mr. McDADE. Mr. Chairman, I move to strike the last word.

I wish to engage my chairman in a colloquy. He will recall our colleague, the gentlewoman from Rhode Island, CLAUDINE SCHNEIDER, spoke to us about the potential for an energy project which has merit.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. McDADE. I yield to the gentleman.

Mr. YATES. I remember the conversation very well and certainly with respect to the establishment of energy analysis and diagnostic centers of the kind the gentlewoman is interested in, new centers of high priority, I do favor the establishment of such centers. I think they are essential.

Mr. McDADE. As the distinguished Chairman knows, the Department of Energy currently operates five energy analysis and diagnostics centers in the Midsouth and Midwest at a total cost of about $700,000 per year. These are operating out of mechanical engineering schools, perform very intensive energy audits for small manufacturers, and have identified potential energy savings worth nearly $4 million a year to the 165 industrial plants that have already been surveyed.

As the Chairman knows, the Science and Technology Subcommittee on Energy Development recommended that this program be expanded to provide for five additional high priority EADC's. I understand that the Chairman has recommended fiscal year 1983 funding levels for the EADC program, which will provide funds to continue the existing centers. I appreciate the need for fiscal restraint that the Chairman has recognized in his recommendation.

The Chairman has, however, provided a healthy level of funding for the industrial conservation program. I would like to ask the Chairman if it would be consistent with his recommendation to support a redirection of $200,000 from the industrial process efficiency portion of the conservation program to support two new EADC's, with one to be established in the Middle-Atlantic States and one in the New England region. I believe there are three good reasons for supporting this redirection. First, it would involve less than 1 percent of the industrial conservation program to strengthen energy audit services for small manufacturers. Second, it would establish two new EADC's to serve the New England and Mid-Atlantic States. Finally, this is the region of the country that is most dependent on oil imports, and where energy costs are the highest. For example, New England is 80 percent oil dependent, most of which is imported, and our natural gas costs are 35 to 40 percent higher than those in the Midwest.

Mr. YATES. I thank the gentleman for raising this important issue. The energy diagnostics centers have proven extremely successful. As the gentleman knows, I have recommended continued funding to maintain this vital activity. I would support the establishment of two new centers in high-priority areas in the Northeast and New England, within the budget

limits provided for the industrial process efficiency portion of the conservation program. I would, of course, expect the new centers to be thoroughly evaluated before they are established. Certainly, the Mid-Atlantic and New England regions warrant serious consideration, given their high energy costs and significant dependence on oil imports.

Mr. McDADE. I thank my colleague and yield back the balance of my time.

Mr. EDWARDS of Oklahoma. Mr. Chairman, I move to strike the requisite number of words.

I rise to engage the distinguished chairman of the subcommittee in a colloquy.

On page 84 of the report language the committee says the Department should not continue operations at Grand Forks, Laramie, and Bartlesville at the expense of other ongoing activities.

I am afraid that that language might lead to the erroneous impression that the committee does not support the continuation of the research activities at the energy center in Bartlesville which is in my district. The gentleman from Illinois has been very helpful to me on this matter. I wonder if he would join me in clarifying what was intended by that language.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman.

Mr. YATES. The gentleman is exactly correct. The committee has no intention of discontinuing funding at the Bartlesville, Grand Forks, or Laramie facilities. Rather, these activities are to be continued just as the important activities at the national laboratories are to be continued.

We are looking for a balance between the energy technology centers and the national laboratories.

Mr. EDWARDS of Oklahoma. I thank the chairman.

Mr. McDADE. Mr. Chairman, will the gentleman yield?

Mr. EDWARDS of Oklahoma. I yield to the gentleman, the ranking Republican member.

Mr. McDADE. I thank my colleague for yielding.

I concur wholeheartedly in the remarks of the chairman. I want to add my congratulations to my friend from Oklahoma. He has led this fight for 2 years, he brought it to our attention, has been diligent in protecting the rights of the workers. I agree with what was said by my friend, in no way, shape, manner or form do we wish to undo what you have been doing for 2 years. We do want an orderly procedure. We do not want that facility closed.

I congratulate my friend for bringing that to our attention.

Mr. SHARP. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I wish to commend the committee for its actions in appropriating sufficient funds to meet the minimum required fill rate for the strategic petroleum reserve at 220,000 barrels a day.

I wish to commend the committee and particularly the distinguished chairman of the subcommittee, the gentleman from Illinois, for a difficult job well done. There are a number of vital energy programs funded in this bill, and while not all have received the level of appropriations that I would have preferred the balance between fiscal restraint and adequate funding for critical programs is evident throughout this bill.

In particular I want to address the need for adequate funding for the strategic petroleum reserve. In light of the major reductions in oil purchases proposed by the administration, I commend the committee for recommending a reduction which, although substantial, still fulfills the mandate expressed by Congress in previous legislation.

Since the reserve's inception, the Congress has strongly advocated filling it rapidly. Last year, as part of the Energy Emergency Preparedness Act of 1982, Congress and the President agreed to a minimum fill rate of 220,000 barrels per day until the reserve reached the level of 500 million barrels.

This bipartisan compromise was not easily made. Some Members wanted a much higher fill rate, and authorizing legislation had provided for it. The compromise recognized the need for balance between projected budget deficits and The absolute requirement to have a credible Reserve, as quickly as feasible, to respond to energy security needs.

The bill before us today contains $1.6 billion, which is sufficient to achieve the 220,000 barrel-per-day rate for all of fiscal year 1984. This level of fill will not require the acquisition of interim steel tanks or floating storage; all oil can be stored at existing SPR sites. The cost of interim storage has previously been used as an argument against a rapid fill rate.

We can debate how large the ultimate Reserve should be, whether a regional reserve is needed, or how to draw down the Reserve in an emergency, but there should be no question about the immediate and absolute need for a larger Reserve. Almost everyone argues that the minumum size should be 500 million barrels or larger. But concern for the current deficit has caused the administration to argue for a delay in achieving this minimum. A 220,000 barrel-per-day fill rate should meet this level in late fiscal year 1985; the administration's proposed fill schedule would not bring us to 500 million barrels until the middle of fiscal year 1987.

Delay would be penny wise and pound foolish. The GAO has calculated that, even taking into account the cost of borrowing, filling the SPR earlier is cheaper than filling it later if oil prices remain level or increase. Cutting SPR oil purchases this year just puts off the day of reckoning while reducing our insurance against a shortage in the interim.

In vetoing the Standby Petroleum Allocation Authority Act, President Reagan referred to the SPR as our first line of defense against an oil shortage like those which plagued this Nation in the 1970's. SPR oil is an insurance policy. At today's prices, oil costs under $30 per barrel, but the Congressional Budget Office estimates that each barrel in the reserve protects against over $200 of possible lost GNP during a time of energy shortage. Estimates vary, but one economic model suggest that 21 months after the 1973 oil shortage GNP was 14 percent lower, unemployment was 4 percent higher, and prices were increasing 4 percent faster than if there had not been an embargo.

Despite the current oil glut and improvements in conservation, we have not achieved energy security. Our oil imports are currently lower than in the late 1970's, in large part because of the recession; but imports will increase with economic recovery. From March 1982 to March of this year, stocks in the private sector fell approximately 100 million barrels, mostly due to reduced demand and high inventory carrying cost. Yet during the same period only 50 million barrels of oil were added to the reserve. This leaves the Nation more, not less, vulnerable to an oil shortage than it was a year earlier.

The current glut in the world oil market could evaporate just as quickly as it did in 1979 when oil production in Iran shut down. The Middle East is a fragile balance of diverse religious, ethnic, and political interests. To suggest that we base the energy security of this Nation only on optimistic assumptions about maintaining this balance is foolish. The recent additional productive capacity of non-OPEC nations does not eliminate the danger of a shortage resulting from political or military events in the Middle East.

Recently, the GAO has declared a deferral of $800 million for oil purchases, saying that the administration has refused to spend the funds provided by Congress. Despite being called to task for ignoring the will of Congress in its fiscal year 1983 fill rate, the administration persists in recommending a dangerously low fill rate of 145,000 barrels per day in fiscal year 1984 and 100,000 barrels per day in fiscal year 1985 and subsequent years. There have even been threats of a veto of

this bill in part because it contains funding for the minimum fill rate in the law signed by the President just last year.

In considering the level of increased energy security obtained by the fill rate recommended by the administration, it is useful to consider also the sale of oil from the Government's naval petroleum reserve. Although the two reserves are not strictly comparable, they both bear on the deficit and on our energy security. Production and sale of oil from the naval reserve at the current rate of 100,000 barrels per day will offset two-thirds of the proposed strategic petroleum reserve purchases in fiscal year 1984 and all SPR purchases in fiscal year 1985 and subsequent years. Have we learned nothing from the shortages of the past? Do we really want to adopt a national policy of adding little or nothing to our national stockpile of oil?

The result of a recent simulation of an international oil crisis run by the Department of Energy and the International Energy Agency gives a further gloomy picture of our energy vulnerability. In a test designed to show the success of the administration's reliance on the free market and voluntary oil sharing, oil prices rose over 200 percent, to $98 per barrel, while the market adjusted to the simulated shortage.

Clearly, timely purchases for the SPR are a good way to protect against such rapid oil price rises and resulting increases in inflation and unemployment.

Mr. Chairman, the $1.6 billion for oil purchases in this bill recognizes both the requirement for improved energy security and the severe constraints on the budget. Again I commend the committee, and I urge my colleagues to support the bill and the 220,000 barrel-per-day fill rate it provides.

Mr. SIMON. Mr. Chairman, I move to strike the requisite number of words.

I ask that my distinguished colleague from Illinois engage in a brief colloquy with me, and I yield to him.

Mr. YATES. I will be glad to engage in the colloquy.

□ 1740

Mr. SIMON. The committee recommends that a sum of $3 million be appropriated for the Carbondale Mining Technological Center and another national laboratory. The current appropriation is $1½ million for Carbondale. It is not the intent of the committee that the $1½ milllion—since it is not specifically designated for Carbondale—should be reduced in any way. Is that correct?

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. SIMON. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

The gentleman's impression is correct. It is not the committee's intention that such a reduction take place.

Mr. SIMON. I thank the gentleman from Illinois.

Mr. SEIBERLING. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to engage the distinguished chairman of the subcommittee and the gentleman from Ohio, Mr. REGULA, a member of the subcommittee in a colloquy.

As the gentlemen know, some questions have arisen about the status of the Forest Service assessment work in the Wayne National Forest in Ohio.

In the Athens unit of that Forest, there are lands now held by the Sunday Creek Coal Co. The coal company has been discussing with the trust for public lands the possibility that the trust might acquire some of these lands, for future possible addition to the national forest.

Of course, such an addition, if it were to occur sometime in the future, would depend on whether the benefits of the addition were sufficiently great as compared to any costs that might be involved. But before such a comparison can be made, it is necessary that the professionals of the Forest Service make an assessment of the values of the lands and the resources involved.

Would the gentleman from Ohio and the chairman agree that the Forest Service should go ahead and carry out an appraisal of the Sunday Creek lands now under discussion so that all the parties, including the Government, will have the information needed to evaluate the merits of the possible addition of some or all of those lands to the Wayne National Forest?

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Ohio.

Mr. REGULA. I thank the gentleman for yielding.

Yes, I agree. I think that this is an essential prerequisite to establishing a value for this particular tract of land.

Mr. SEIBERLING. I thank the gentleman.

I wonder if the Chairman would agree.

Mr. YATES. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I yield to the gentleman from Illinois.

Mr. YATES. I thank the gentleman for yielding.

I find myself in agreement as well.

Mr. SEIBERLING. I thank the Chairman.

The CHAIRMAN. Are there additional amendments to title II? If not, the Clerk will read.

The Clerk proceeded to read title III.

Mr. YATES (during the reading). Mr. Chairman, I ask unanimous consent that title III be considered as read and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The CHAIRMAN. Are there any points of order against title III?

Are there any amendments to title III?

AMENDMENT OFFERED BY MR. YATES

Mr. YATES. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

SEC. 308. Except for lands described by sections 105 and 106 of Public Law 96-560, section 103 of Public Law 96-550, section 5(d)(1) of Public Law 96-312 and section 603 of Public Law 94-579, and except for land in the State of Alaska, and lands in the national forest system released to management for any use the Secretary of Agriculture deems appropriate through the land management planning process by any statement or other Act of Congress designating components of the National Wilderness Preservation System now in effect or hereinafter enacted, none of the funds provided in this Act shall be obligated for any aspect of the processing or issuance of permits or leases pertaining to exploration for or development of coal, gas, oil shale, phosphate, potassium, sulphur, gilsonite, or geothermal resources on Federal lands within any component of the National Wilderness Preservation System or within any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning in Executive Communication 1504, Ninety-Sixth Congress (House Document 96-119); or within any lands designated by Congress as wilderness study areas or within Bureau of Land Management wilderness study areas: *Provided*, That nothing in this section shall prohibit the expenditure of funds for any aspect of the processing or issuance of permits pertaining to exploration for or development of the mineral resources described in this section, within any component of the National Wilderness Preservation System now in effect or hereinafter enacted, any Forest Service RARE II areas recommended for wilderness designation or allocated to further planning, within any lands designated by Congress as wilderness study areas, or Bureau of Land Management wilderness study areas, under valid existing rights, or leases validly issued in accordance with all applicable Federal, State, and local laws or valid mineral rights in existence prior to October 1, 1982: *Provided further*, That funds provided in this Act may be used by the Secretary of Agriculture in any area of National Forest lands or the Secretary of the Interior to issue under their existing authority in any area of National Forest or public lands withdrawn pursuant to this Act such permits as may be necessary to conduct prospecting, seismic surveys, and core sampling conducted by helicopter or other means not requiring construction of roads or improvement of existing roads or ways, for the purpose of gathering information about and inventorying energy, mineral, and other resource values of such area, if such activity is carried out in a manner compatible with the preservation

of the wilderness environment: *Provided further,* That seismic activities involving the use of explosives shall not be permitted in designated wilderness areas: *Provided further,* That funds provided in this Act may be used by the Secretary of the Interior to augment recurring surveys of the mineral values of wilderness areas pursuant to section 4(d)(2) of the Wilderness Act and acquire information on other national forest and public land areas withdrawn pursuant to this Act, by conducting, in conjunction with the Secretary of Energy, the national laboratories, or other Federal agencies, as appropriate, such mineral inventories of areas withdrawn pursuant to this Act as he deems appropriate. These inventories shall be conducted in a manner compatible with the preservation of the wilderness environment through the use of methods including core sampling conducted by helicopter; geophysical techniques such as induced polarization, synthetic aperture radar, magnetic and gravity surveys; geochemcial techniques including stream sediment reconnaissance and X-ray diffraction analysis; land satellites; or any other methods he deems appropriate. The Secretary of the Interior is hereby authorized to conduct inventories or segments of inventories, such as data analysis activities, by contract with private entities deemed by him to be qualified to engage in such activities whenever he has determined that such contracts would decrease Federal expenditures and would produce comparable or superior results: *Provided further,* That in carrying out any such inventory or surveys, where National Forest System lands are involved, the Secretary of the Interior shall consult with the Secretary of Agriculture concerning any activities affecting surface resources: *Provided further,* That funds provided in this act may be used by the Secretary of the Interior to issue oil and gas leases for the subsurface of national forest or public land wilderness areas that are immediately adjacent to producing oil and gas fields or areas that are prospectively valuable. Such leases shall allow no surface occupancy and may be entered only by directional drilling from outside the wilderness or other nonsurface disturbing methods.

The Clerk read as follows:

Amendment offered by Mr. YATES: On page 67, line 12, after "96-312", strike "and section 603 of Public Law 94-579".

Mr. YATES. Mr. Chairman, this is merely a technical amendment that is inserted to correct the language that appears in section 308. That is the only purpose.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. YATES).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to title III?

AMENDMENT OFFERED BY MR. YATES

Mr. YATES. Mr. Chairman, I offer an amendment.

The portion of the bill to which the amendment relates is as follows:

SEC. 313. Notwithstanding any other provisions of law, the Secretary of the Interior and Secretary of Agriculture are authorized to enter into contracts with State and local governmental entities, including local fire districts, for procurement of services in the presuppression, detection, and suppression of fires on any units within their jurisdiction. In addition, any contracts or agreements with the jurisdiction for fire management services listed above which are previously executed shall remain valid.

The Clerk read as follows:

Amendment offered by Mr. YATES: On page 71, line 18, after "law," insert "the Secretary of the Smithsonian Institution,".

Mr. YATES. Mr. Chairman, the purpose of this amendment is to extend to the Smithsonian Institution the authority to enter into contracts with local government entities for fire support. They cannot do it at the present time without legislative authority. The same authority is now available to the Secretary of Agriculture and the Secretary of the Interior.

This will permit the Smithsonian to enter into an agreement with Prince Georges County, Md., for fire assistance at the Smithsonian's Silver Hill, Md., support center.

The alternative would be to provide their own fire services.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. YATES).

The CHAIRMAN. Are there any further amendments to title III?

AMENDMENT OFFERED BY MR. M'DADE

Mr. McDADE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MCDADE: On page 73, after line 4, add the following new section:

SEC. . Except as otherwise provided in this section, each dollar amount contained in this Act is hereby reduced by 4 per centum. This section shall not apply to amounts on page 24 line 1, page 26 line 15, page 27 line 1, page 27 line 4, page 11 line 21, page 15 line 25, page 18 line 21.

Mr. McDADE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. McDADE. Mr. Chairman, I offer this motion for one reason.

I want this bill signed into law.

I deeply regret this disagreement with my good friend from Illinois.

But I do not want a veto.

In its present form this bill will be vetoed. That veto will be sustained by this House. And everyone will be the loser, including so many vital activities.

I have served on this subcommittee for 18 years. I have a strong personal conviction that these programs are essential for the development and the protection of our natural resources.

There is not a single program in this bill that would be seriously hurt by a 4-percent cut.

There are many programs that would be hurt if this bill is vetoed, and we have to operate under a continuing resolution.

So I say to my friend from Illinois, and my colleagues on that side of the aisle, this bill is too important to use as veto bait.

Vote for this amendment, and we will have a bill that would be signed by the President.

Vote for this amendment, and we will send a signable bill to the other body. It will be their responsibility to keep it that way.

Let us not play politics with our natural resources.

Let us get a bill, not an issue.

Mr. REGULA. Mr. Chairman, will the gentleman yield?

Mr. McDADE. I yield to the gentleman from Ohio.

Mr. REGULA. I thank the gentleman for yielding.

Mr. Chairman, I just want to support the gentleman. As a member of the subcommittee I think the gentleman said it very clearly and that is that there is not any one account in there that would be seriously injured by a 4-percent reduction.

I think this is a responsible way to get the total amount expended reduced to a level that is acceptable.

Mr. YATES. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, this is not a question of 4 percent or 5 percent or 3 percent. It is a question of the work of the Appropriations Committee. Our committee sat for approximately 3 months hearing more than 900 witnesses. We heard from 200 Members of Congress, who wrote the committee or testified. And in great measure, the bill as finally drafted, reflects the wishes of the Members of Congress who testified before us.

It is very easy to come in here and offer a percentage amendment of this cut, but I want to say that it just does away with the work of the Appropriations Committee. I feel our committee performed a very serious function. It considered the testimony seriously. It considered the markup seriously and came to the results seriously.

I do not think that at this late stage a 4-percent cut can be taken, even though the gentleman says that any appropriation can take a 4-percent cut, that is not true.

□ 1750

I know there are many programs that cannot take a 4-percent cut. I do not think that the Indian hospitals, for example, funding for which is in this bill, can take a 4-percent cut. I do not think that Indian education can take a 4-percent cut. I would not like the land and water conservation fund to have to take a 4-percent cut after having been stripped of its funding for so many years.

Mr. AuCOIN. Mr. Chairman, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Oregon.

Mr. AuCOIN. I appreciate very much the gentleman yielding to me, and I, too, rise in opposition to the amendment. Most of the accounts in this bill that represent big dollars are moneymaking programs. The dollars we invest in those programs come back in additional revenues to the Treasury. So it makes very little sense to this gentleman to have a 4-percent across-the-board cut on the Forest Service, on the BLM, on offshore oil drilling, and on accounts of that kind that will return to the Treasury $2 for every $1 that we invest.

So I hope very much that this amendment is defeated. I stand with the chairman. I think he is absolutely on target.

Mr. YATES. Mr. Chairman, I urge defeat of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. McDADE).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. LOEFFLER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 211, noes 209, not voting 13, as follows:

Alexander	Harrison	Smith, Robert
Brooks	Heftel	Tauzin
Conyers	Martinez	
Erlenborn	Morrison (CT)	

Messrs. MOLLOHAN, GLICKMAN, FLIPPO, VOLKMER, BEVILL, and McNULTY changed their votes from "aye" to "no."

Messrs. SPRATT, DICKINSON, MOLINARI, GILMAN, and DAVIS, and Ms. FIEDLER changed their votes from "no" to "aye."

□ 1800

So the amendment was agreed to.

The result of the vote was announced as above recorded.

□ 1810

The CHAIRMAN. Are there additional amendments to title III? The Chair hears none.

Mr. YATES. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker having resumed the chair, Mr. GORE, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3363) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1984, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. YATES. Mr. Speaker, I demand a separate vote on the so-called McDade amendment.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

Amendment: On page 73, after line 4, add the following new section:

SEC. . Except as otherwise provided in this section, each dollar amount contained in this Act is hereby reduced by 4 per centum. This section shall not apply to

amounts on page 24 line 1, page 26 line 15, page 27 line 1, page 27 line 4, page 11 line 21, page 15 line 25, page 18 line 21.

The SPEAKER. The question is on the amendment.

Mr. YATES. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 206, nays 213, not voting 14, as follows:

□ 1820

Mr. KOLTER and Mr. SCHEUER changed their votes from "yea" to "nay."

Mr. DAVIS changed his vote from "nay" to "yea."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. LOEFFLER

Mr. LOEFFLER. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. LOEFFLER. In its present form I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. LOEFFLER moves to recommit the bill, H.R. 3363, to the Committee on Appropriations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. DANNEMEYER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 272, nays 144, not voting 17, as follows:

□ 1840

Mr. HUGHES changed his vote from "nay" to "yea."

So the bill was passed.

The results of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. GILMAN. Mr. Speaker, on June 23, 1983, I was unable to cast my vote on rollcall No. 219, the Conte motion instructing the conferees to insist on the House position regarding the Garrison diversion project contained in the Energy and Water Appropriations for fiscal year 1984. Had I been present, I would have voted "aye."

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. BROWN of California). Pursuant to the provisions of clause 5, rule I, the Chair will now put the question on the motion to suspend the rules on which further proceedings were postponed earlier today.

OMNIBUS MINOR TARIFF AMENDMENTS

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 3398, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. GIBBONS) that the House suspend the rules and pass the bill, H.R. 3398, as amended.

The question was taken.

RECORDED VOTE

Mr. KINDNESS. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 368, noes 43, not voting 22, as follows:

[Roll No. 225]

□ 1900

Mr. BOSCO changed his vote from "no" to "aye."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PECOS RODEO, OLDEST RODEO IN THE ENTIRE WORLD

(Mr. COLEMAN of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN of Texas. Mr. Speaker, I rise to salute an annual event in the 16th District of Texas, an event, that, like the Fourth of July, symbolizes the true pioneer spirit of west Texas. The Pecos Rodeo is not only the Nation's oldest rodeo but the oldest rodeo in the entire world. This Fourth of July will be its 100th anniversary, a landmark in the history of rodeo and of west Texas.

For those of you who are not from the West, rodeo has its roots in the original skills needed for survival on the frontier—horseback riding, lassoing, and steer roping. So it is no coincidence that "rodeo" is a Spanish word that denotes a gathering of cattle—literally a roundup.

The rodeo, then, had its origins in the development of the cattle industry. Once or twice a year, the cattle were rounded up on the ranges and driven to various market towns. After the hard work of the roundup, the cowboys were paid off, and they usually celebrated the occasion. Informal competitions were held in which the cowboys bet their wages on their individual skills, and from this beginning, standards of competition were developed.

Then, as now, the rodeo consisted of five standard events: bareback bronc-riding, saddle bronc-riding, bull riding, calf-roping, and steer wrestling, sometimes called bulldogging. In bareback bronc-riding, an untamed horse, called a bronco, tries to buck the rider off its back. Using only one hand, the rider tries to hold on to a special rigging for a specified period of time, usually 8 to 10 seconds. If the rider falls, or if his or her free hand touches any part of his or her body or that of the horse, the rider is disqualified.

Saddle bronc-riding is similar to bareback riding, except that a special lightweight saddle is used and the rider holds on to a single piece of rope. Again, the free hand cannot be used. Bull riding, because of the ferocity of the Brahma bull, is the most dangerous event in the rodeo. The rider holds on to a bull-rope that circles the trunk of the bull and, using just one hand, must stay on for a 10-second period.

In all three events, the spirit and strength of the animals are factors in the judging. In calf roping and steer wrestling, the contestants try to accomplish a set of maneuvers in the shortest possible time. In calf roping, a calf is released into the arena through a chute and the cowhand, mounted on horseback, pursues. The rider must throw the lariat, or rope, over the calf's neck, dismount, throw the calf to the ground, and tie its feet while the horse keeps the rope taut. In steer wrestling, a steer is released from the chute, and the mounted cowhand rides alongside it and then leaps from the saddle, grabbing the steer by the horns in midflight. By digging in with the heels, the cowhand must first halt the steer, then flip it over onto its back as quickly as possible.

Mr. Speaker, the sport of rodeo has its traditions in the courage of the men and women who only a few generations ago risked their lives to tame a wild land. Pecos, Tex., is in the middle of this historic area and its people have kept rodeo going and growing in this same pioneer spirit. Rodeo today is a multimillion-dollar sport, but back when the people of Pecos dedicated themselves to keeping this uniquely American tradition alive, they had nothing to lean on except their own frontier traditions and love of competition. As a result, their dedication has helped enshrine rodeo in our history and national symbols. I salute the people of Pecos who have kept rodeo going and growing, and ask that my colleagues join me in recognition of their contribution to our country.

SECONDARY MORTGAGE MARKET EQUITY ACT

(Mr. PATTERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PATTERSON. Mr. Speaker, yesterday I introduced the Secondary Mortgage Market Equity Act, H.R. 3420. In brief, the bill provides a modest adjustment in the mortgage ceilings of the Federal National Mortgage Association (FNMA/Fannie Mae) and the Federal Home Loan Mortgage Corporation (FHLMC/Freddie Mac) to accommodate moderate-income home buyers in high-cost areas

In recent years, the secondary mortgage market institutions of Fannie Mae and Freddie Mac have become increasingly important in the delivery of affordable mortgage credit for our Nation's home buyers. Through their various mortgage purchase programs, Fannie Mae and Freddie Mac provide primary mortgage lenders—including banks, thrifts, and mortgages bankers—the liquidity they need to continue originating mortgages for low- to moderate-income people.

Today, unfortunately, we find that the capability of Fannie Mae and Freddie Mac to serve the national mortgage market on an equitable basis is distorted by the impediment of an artificially low maximum mortgage. Under current law, Fannie Mae and Freddie Mac may only buy or otherwise deal with mortgages no larger than $108,300.

As a national aggregate, this ceiling may be a reasonable cut-off point for what qualifies as a low to moderate priced home. However, when examined on an area-by-area basis, this ceiling is a very inaccurate standard because it fails to accommodate the wide variations across the country of moderate home prices.

According to the Nationwide Relocation Service—an independent company that provides home price comparisons for people contemplating moves to new areas—these home price variations are quite significant. If one examines their January 1983 brochure the following price variations on the same type home located in different cities can be made:

CITY AND PRICE

Albany, N.Y., $66,000.
Spokane, Wash., $78,500.
Nashville, Tenn., $89,000.
Atlanta, Ga., $93,500.
Wichita, Kans., $102,500.
Seattle, Wash., $110,000.
Billings, Mont., $115,000.
Miami, Fla., $126,000.
New York, suburban, $134,000.
Dallas, Tex., $140,000.
Anchorage, Alaska, $156,000.
Orange County, Calif., $160,000.
Fairfield, Conn., $190,000.

Honolulu, Hawaii, $199,000.

San Francisco/Oakland, Calif., $210,000.

The inequity of service to our Nation's homebuyers due to this single national standard is borne out by statistics generated by the Office of Management and Budget (OMB). In testimony presented to the House Banking Committee last month, OMB stated that the current ceiling serves 80 percent of the market nationwide, but in high cost areas it serves only 58 percent—thereby denying 42 percent of the home buyers in these high cost areas access to the national secondary mortgage market.

Clearly, a single national standard makes no sense. A reasonable adjustment in the ceiling is warranted to assure that homebuyers in all areas of the country are provided equitable access to Fannie Mae and Freddie Mac.

The proposal I am putting forward today allows a modest increase in the ceiling but only in targeted areas. It would tie mortgate limit increases to only high housing cost areas designated by HUD under the FHA section 203(b) program. The Fannie Mae and Freddie Mac ceiling increases would be the same percent increase provided under 203(b) and just as in the 203(b) program, in no case would the increase be higher than 33⅓ above the established Fannie Mae and Freddie Mac limit.

Let me walk through a couple of examples.

First. Cook County, Ill. Under the FHA program, Cook County is given a 24 percent increase above the basic FHA mortgage ceiling. Under my bill, this same 24 percent increase would be applied to the Fannie Mae/Freddie Mac ceiling of $108,300 resulting in a ceiling for this area of $134,300.

Second. Tulsa, Okla. Under FHA, Tulsa is given a 22 percent increase. So, applying this same 22 percent increase to the secondary market ceilings results in a $132,100 ceiling for Tulsa.

Third. Kings County, N.Y. FHA recognizes Kings County as eligible for the maximum increases of 33⅓. Thus, applying 33⅓ to the Fannie Mae/Freddie Mac basic ceiling results in a $144,400 ceiling for Kings County.

Fourth. Dade County, Fla. This county is given a 21-percent increase under the FHA program. When applied to the secondary market ceiling, this same 21-percent increase provides a $131,000 limit.

Fifth. Los Angles, Calif. Los Angeles, County is given the maximum increase of 33⅓ under FHA. Thus, under the formula provided in this bill, the Fannie Mae/Freddie Mac ceiling would be $144,400.

I believe this proposal is a reasonable mechanism for providing equitable access to the national secondary mortgage market. It would assure that the Fannie Mae and Freddie Mac ceilings are flexible enough to accommodate all homebuyers across the country regardless of whether they reside in high cost areas.

Mr. Speaker, the FHA section 203(b) high-cost accommodation system was approved by Congress in 1980 in recognition of the need for Government-insured housing programs to be made available for low and moderate income home buyers in high cost areas. For the same reasons that this public policy decision was made for primary market lenders to serve home buyers using FHA programs in high cost areas, the conventional secondary mortgage market also should be allowed to provide needed support to these markets.

Concerns have been raised that even a modest increase in the Fannie Mae and Freddie Mac loan limits will impede the entry and growth of private firms within the secondary mortgage market. It is not my intention to limit the growth of private sector secondary market corporations. In fact, I would like to encourage their entry. At the same time, however, I would like to assure that moderate income home buyers in all areas of the country are given equitable access to the national secondary market institutions.

This bill, nevertheless, is narrowly drawn so as to leave more than adequate room for growth and participation by both private sector firms as well as the federally chartered Fannie Mae and Freddie Mac. The size of the mortgage market above the current ceiling of $108,300 is estimated to be about 20 to 25 percent of all mortgage loans made. This amounts to $35 billion in 1983 and is projected to increase to more than $58.2 billion in 1985. It is estimated that even with my legislation, 17 percent of the mortgage market would continue to be out of the reach of Fannie Mae and Freddie Mac and available exclusively to the private secondary market corporations.

Another concern that has been raised is that if Fannie Mae and Freddie Mac begin dealing with mortgages higher than the current limit, they will tend to reduce their activity in lower cost mortgages. The concern is unwarranted. The vast majority of the mortgages bought by Fannie Mae and Freddie Mac are well below the limits. In 1982, for example, the average mortgage of Fannie Mae and Freddie Mac was $47,500 and $56,000, respectively—no where near the then-ceiling of $107,000.

It should be added that the Charter Acts of Fannie Mae and Freddie Mac commit them to serve the entire market up to their legal limits, and they have shown every willingness to do so. There is no reason to believe that this commitment to the entire range of mortgage sizes will change when the mortgage limit is adjusted as called for in my legislation.

Mr. Speaker, I urge my colleagues to look closely at this modest amendment to the Charter Acts of Fannie Mae and Freddie Mac. I would ask that each consider joining me and my 14 original cosponsors by supporting H.R. 3420 to restore fairness and equity to this most important source of housing finance.

The proposal is supported by the National Association of Home Builders, U.S. League of Savings Institutions, Mortgage Bankers Association of America, National Association of Realtors, National Savings and Loan League, American Bankers Association, and the National Association of Mutual Savings Banks.

Mr. Speaker, I submit the bill for printing in its entirety, as follows:

H.R. 3420

A bill to provide home buyers equitable access to the national secondary mortgage market

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Secondary Mortgage Market Equity Act".

SEC. 2. Section 305(a)(2) of the Federal Home Loan Mortgage Corporation Act is amended by adding at the end thereof the following new sentence: "Each maximum limitation set forth in this paragraph with respect to a one- to four-family residence (as adjusted in accordance with the annual adjustment required in this paragraph) shall be increased for any area, other than an area located in a jurisdiction referred to in the preceding sentence, by a percentage equal to the percentage by which the Secretary of Housing and Urban Development has increased the corresponding maximum limitation set forth in section 203(b)(2) of the National Housing Act for such area on account of limited housing opportunities due to high prevailing housing sales prices.".

SEC. 3. Section 302(b)(2) of the Federal National Mortgage Association Charter Act is amended by adding at the end thereof the following new sentence: "Each maximum limitation set forth in this paragraph with respect to a one- to four-family residence (as adjusted in accordance with the annual adjustment required in this paragraph) shall be increased for any area, other than an area located in a jurisdiction referred to in the preceding sentence, by a percentage equal to the percentage by which the Secretary of Housing and Urban Development has increased the corresponding maximum limitation set forth in section 203(b)(2) of the National Housing Act for such area on account of limited housing opportunities due to high prevailing housing sales prices.".

INTRODUCTION OF HOUSE CONCURRENT RESOLUTION 136 EXPRESSING THE SENSE OF CONGRESS IN OPPOSITION TO FURTHER EXPANSION OF CARGO PREFERENCE REQUIREMENTS

(Mrs. SMITH of Nebraska asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. SMITH of Nebraska. Mr. Speaker, I rise and join with 59 of my colleagues to introduce House Concurrent Resolution 136, expressing the sense of Congress in opposition to further expansion of cargo preference requirements.

This legislation is needed to alert the House that a sizable portion of its Members who have constituencies involved in export of U.S. products oppose further expansion of cargo preference.

Statutes mandating guaranteed business for U.S.-flag ship lines without regard for efficiency or competition are damaging to the agricultural, coal, fertilizer, chemical, forest, ore, metal, pulp and paper industries.

Present cargo preference laws as they apply to such programs as Public Law 480—food for peace—provide ample evidence of the uncompetitive state of our merchant marine. Currently, the difference between shipping grain on U.S.-flag ships versus foreign-flag ships is running at $52.88 per ton for Public Law 480, title I concessional sales programs. It is not uncommon to find U.S.-flag rates 300 percent higher than foreign-flag rates.

I hasten to add that most of these foreign-flag bulk vessels are controlled by U.S. companies and subject to requisition by the U.S. Government. Freed from antiquated U.S. maritime policy, these American shipping interests operate cometitively and profitably in world commerce.

Mr. Speaker, the years of direct and indirect subsidies to the maritime industry have not enabled it to recapture its prominence on the world's shipping scene. Instead, its steady decline has continued.

With the phaseout of direct cash subsidies due to their ineffectiveness and budget considerations, legislative initiatives to prop up the industry through guaranteed business are receiving more attention.

I submit that these cargo preference schemes are the worst remedy as they will hurt exports through increased costs and lost sales, increase consumer costs, eliminate jobs, and prolong recession in the nonmaritime sectors.

I urge Members to join us in our efforts to voice opposition to further expansion of Cargo preference by cosponsoring House Concurrent Resolution 136.

H. CON. RES. 136

Concurrent resolution expressing the sense of Congress in opposition to further expansion of cargo preference requirements

Whereas the United States balance of merchandise trade was a negative $31.8 billion dollars in 1982;

Whereas the United States share of world exports has declined from 15.4 percent in 1970 to 13 percent in 1982;

Whereas one out of every eight United States manufacturing jobs is for export production and 20 percent of our industrial production is exported;

Whereas agriculture is the nation's largest employer with approximately 1,300,000 export related jobs;

Whereas the value of agricultural exports has dropped 18.9 percent since 1981 and United States agricultural market share has dropped precipitously for such commodities as course grains, wheat, cotton, soybean meal and oil, rice, and poultry;

Whereas increased ocean shipping costs will negate numerous United States efforts to promote exports;

Whereas current world market conditions translate increased export prices into reduced income for domestic producers and lost United States sales abroad for such goods as agricultural products, coal, forest products, fertilizers, chemicals, ores and metals, and pulp and paper products;

Whereas increased import costs for such goods as petroleum and other bulk materials will increase energy costs and production costs for the agricultural, fertilizer, iron and steel, rubber, textile, chemical, non-ferrous refining, and paper industries;

Whereas trade barriers have proven harmful to United States industry, labor and consumers in the past;

Whereas world bulk shipping capacity is currently in excess and is expected to remain so for at least the next decade;

Whereas national defense interests will not be served by increased U.S.-flag bulk capacity;

Whereas the Effective United States Controlled Fleet, which is controlled by United States companies and subject to requisition by the United States Government, remains a strong and competitive force in the world's ocean shipping industry;

Whereas the U.S. Merchant Marine is uncompetitive in the world market with U.S.-flag bulk shipping costs as much as 300 percent higher than the world average;

Whereas ocean shipping costs comprise a significant portion of import and export costs and these costs will be increased by expansion of cargo preference requirements: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that further expansion of cargo preference, whether for commercial or other trade, is not in the interest of the United States and should not be imposed.

SUPPORT REAUTHORIZATION OF TITLE IX

(Mrs. JOHNSON asked and was given permission to address the House for 1 minute and to revise and extend her remarks and include extraneous matter.)

Mrs. JOHNSON. Mr. Speaker, last week millions of Americans witnessed with pride a truly remarkable achievement—the successful flight of the first American woman in space. Accomplishments of this magnitude do not come without hard work, commitment, and dedication. Most importantly, however, accomplishments such as this do not come without opportunity—the opportunity to strive to excel personally and professionally.

Thanks to landmark legislation passed some 10 years ago, women were guaranteed by title IX access to equal educational opportunities and we now have a generation of young women and girls for whom the achievements of an individual like astronaut Sally Ride are truly possible. Thanks to this law, which has singlehandedly provided women with solid legal protection from discrimination in education, women are now making tremendous gains in obtaining vocational, graduate and professional degrees to prepare them for meaningful lives.

I would like to draw to my colleagues' attention another remarkable accomplishment of a young woman from my district who, thanks to a lot of encouragement and support, has worked her way to the quarterfinals at Wimbledon. An outstanding athlete, she played on a men's team during her high school years, but now finds herself one of the best kept secrets in women's tennis. I will include at the end of my statement today's article in the Hartford Courant commending the achievements of Barbara Potter.

Mr. Speaker, we cannot allow the years of progress which have brought us the potential of a generation of Sally Rides and Barbara Potters to be compromised by indifference. Education, which for so many is the key not only for dramatic accomplishments like Dr. Ride's, is also the key to economic opportunity.

I can think of nothing more exciting than the events at Cape Canaveral last week, and nothing more exciting than Barbara Potter at Wimbledon today. I can think of nothing more tragic than turning back the clock on over half the population to an era of pernicious discrimination and stereotyping. I urge my colleagues to join me in supporting legislation to reauthorize title IX.

[From the Hartford Courant, June 28, 1983]

IT'S FRONT AND CENTRE FOR POTTER

(By Bob Sudyk)

WIMBLEDON, ENGLAND.—Barbara Potter has been the best kept secret of the tournament for the good part of The Fortnight.

Despite her reputation for having one of the best serves on the island, she couldn't get a job as a butler.

No references.

She is as recognizable as one of the chastised girls in the colorful, naughty knickers, driving the tennis players to the grounds for the matches in the sports cars.

Her autographs are restricted to her traveler's checks.

None of this, of course, is any of her fault. This isn't Miss Humpty Dumpty.

She began the tournament seeded 11th.

She has defeated Britain's Pat Medrado, America's Michele Torres, Camille Benjamin and Lisa Bonder in straight sets.

Today, Potter returns to the quarterfinals after losing to Chris Evert Lloyd last year in straight sets, 6-2, 6-1. She will face third-seed Andrea Jaeger in the third match on Centre Court.

Not once, after any of her victories here, has Potter qualified for an interview in the pressroom, which protocol requires that at least nine journalists must show interest enough to request her.

Otherwise, players, perhaps fearing loss of oxygen or brain death, are unavailable.

Meanwhile, the glamorous Carling Bassett, 15, who was eliminated Monday by Jaeger, has been in the showcase courts. She has been summoned to the news room and for radio and television appearances. Potter has been agate type in the program.

Her matches have been scheduled in the ghettos of Wimbledon, the scruffy courts in the low-rent district. The ones with the bad hops, the worst officials and spectators milling about just a few feet away from play.

Monday's victory over Lisa Bonder was on Court 6, Potter's poshest terrain.

Centre Court and Court 1, the showcase courts nestled inside the historic grandstand, are reserved, supposedly, for the headliners.

Potter has been as visible as the field of players who drift in and out of the grounds like a fog.

Except for her command appearances by tennis's All England Club, Scotland Yard, Interpol, FBI and KGB together couldn't find Potter secreted away in her London flat with her mother.

While Bassett lived in the luxury of the Savoy at $300 a day, Potter opted for seclusion with her mother and her thoughts.

"Dad doesn't even have my phone number here," said Potter, a resident of Woodbury, Conn., who consented to a private audience.

"Oh, wait, not talking to dad doesn't sound right. Says my brother. Actually, he doesn't have the number, either. It's just that someone might call and interrupt my schedule."

"My mom knows me better than anyone else," she explained, adjusting the precautionary ice pack on her left service shoulder and elbow.

"Mom cooks the right food for me (mostly fish and salads) and knows me well enough to say the right things to keep me right mentally.

"Wimbledon has an emotionally draining effect. The excitement and attention takes a toll. I do everything I can to lessen the hassle, save every ounce of energy for the court," Potter said.

"I've banked plenty of reserve for this tournament. I don't want to expend it carelessly."

This part of the players' Wimbledon Fortnight is hardly glamorous. It is a combination of important ingredients—practice, eating, icing the arm, taping, rest and sleep—all in just the right amounts.

Winning Wimbledon, or winning tennis, requires a delicate balance.

In Monday's 7-5, 6-4 victory, Potter's delicate balance was almost upset by several bad line calls. She correctly complained on three of them, supported by her opponent, Bonder. They were the kind of ghetto mistakes that can keep talented players from Centre Court.

Her driving service was no match for Bonder, however. This is Potter's main weapon, one that is dangerous to rely on entirely.

Potter, 21 is nearing maturity in the sport. She is taking the ladder one skillful step at a time, now ready physically and mentally to leap into the big time.

A Wimbledon victory over third-seed Jaeger would be a giant leap forward. Jaeger has won four of their six previous matches.

Getting mentally just right, choosing the exact moment to focus all energies on the moment of the match is the trick.

"When I have to wait for the court, it is important to be flexible. This takes experience," she said. "I learned a lot getting blown away in the quarters to Chris last year."

Very little separates the superstars from those on the fringe. So much of it is mental. Potter claims that, at this stage of the tournament, it is "10 percent skill and 90 percent will."

She talks of desire and will to win, not on the shots it will take. She has paid her dues and now she believes it is time to collect.

"I'm going to concentrate on my strengths. You will see me at the net a lot. Big thing is to hold my serve, the breaks (point) will take care of themselves.

Potter never has played in Centre Court or Court 1 before.

"It's my first time in the big hole," she said. "No need to be over-reverent about it, but I am excited."

She visited Centre Court early one morning the other day. She was alone in the empty theater. She tried to imagine what it would be like playing there before a crowd of 14,000.

Imagination becomes reality. She has paid her dues, and now it is time to collect.

"I see it as the beginning for me . . . a turning point . . ."

A TRIBUTE TO MAXIE ANDERSON

(Mr. LUJAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUJAN. Mr. Speaker, it is with sadness in my heart that I report the tragic death of my friend and constituent, Maxie Anderson. Maxie and his co-balloonist Don Ida were killed in West Germany yesterday doing what they loved best—flying a balloon.

Maxie Anderson has been my friend for many years. He achieved international acclaim 5 years ago when along with Ben Abruzzo and Larry Newman of Albuquerque, N. Mex., they became the first men to fly a balloon across the Atlantic Ocean.

When Maxie landed in France it was a reenactment of the hero worship accorded to Charles Lindbergh 50 years before. Maxie helped to lift the spirits and feelings of Americans as high and as beautiful as the balloons that he flew.

Maxie and his son, Kris again entered the ballooning record books 3 years ago when they became the first to fly across the North American continent from California to the east coast of Canada. Since that time, Maxie has made several attempts to fly around the world in a balloon.

The city of Albuquerque has become known as the balloon capital of the world in large part due to the efforts of Maxie Anderson. When you look into the sky over Albuquerque and see these spectacular splashes of beauty, Maxie Anderson comes to mind.

He was a devoted husband and father. His wife, Patti, children Kris, Tim, Stephanie, and Michael were all constantly involved with him, and he with them.

He was an astute and successful businessman. As president of ranchers exploration, he established a reputation as a knowledgeable leader and an expert in mineral exploration and development. There were those who frequently tried to convince Maxie to become a candidate for high political office. But, while involved as a public-spirited citizen, he preferred the serenity and peace when he was soaring high in his balloons.

His achievements, his competitive spirit, his search for challenge made Maxie Anderson a true American hero. Any visitor to the air and space museum here in Washington is struck by the imposing display of the Double Eagle II, the balloon in which he flew across the Atlantic. It proudly takes its place between Lindbergh's Spirit of St. Louis and the Apollo Moon Lander.

Maxie Anderson was a true hero. The courage and inspiration which he gave will live beyond us all. I have several times talked with Maxie about the risk and danger involved in the challenge which he took. Maxie would shrug it off and tell of the amazing and quiet perspective of watching the Earth turn under him as he floated among the clouds.

Maxie Anderson will be deeply and sadly missed. But, Maxie Anderson will be long and fondly remembered. I cannot help but feel that although he lived every minute of this life, he died loving what he was doing. Maxie, our hearts are up, up and away with you today.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 2065. An act to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes.

□ 1910

GENERAL LEAVE

Mr. WISE. Mr. Speaker, I ask unanimous consent that all Members be permitted to extend their remarks, and to include therein extraneous material, on the subject of the special order speech today by the gentleman from Washington (Mr. SWIFT).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia?

There was no objection.

UNEMPLOYMENT—MY DISTRICT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. WISE) is recognized for 60 minutes.

Mr. WISE. Mr. Speaker, I am most proud to be the sponsor of this evening's special order "Unemployment—My District." It is my hope that this late night session will focus the attention of this body, the other body, the President and the citizens of this country on the unemployment situation in our country—a situation that has gotten progressively worse over the last 2 years. This marathon special order will be a discussion of the unemployment situation in districts across our country—from California to New York, Minnesota to Arkansas.

The first reason for this special order is for us to talk directly to each other about unemployment in our districts, to discuss what the particular needs are that each of us faces. This way we learn from each other.

The second purpose is to reaffirm our commitment to the battle against unemployment. As economic indicators improve in some sections of the country, some members question the need for additional jobs legislation. Yet my State is not alone in still suffering high unemployment. Even in States with a relatively low rate of joblessness, there are large pockets of unemployment and despair. This Nation is undergoing massive technological and industrial readjustment. We must assist our Nation and our people to weather and adapt to these shock waves of change.

Mr. Speaker, we did not request this special order lightly. Nor is it our intention to inconvenience this House. But this is the best forum to have a frank and open discussion about the pressing tragedy of unemployment. And to those more than 11 million unemployed, many of whom no longer receive unemployment benefits, we must reconfirm our resolve to address their plight.

It is fitting that West Virginia's Representatives participate in cosponsoring this function. Our State's average unemployment last month was almost 20 percent. I represent 14 counties, 7 of them have unemployment exceeding 30 percent.

Let us get one thing straight. No one in West Virginia is asking for handouts. Nor is anyone here seeking pity for West Virginia. We are a proud, hardworking people who have repeatedly battled adversity. What we do seek is cooperation. We also seek some appreciation of our special problems.

In the third congressional district, many people make their living mining coal, supplying energy to this country. Unemployment in the coal mining industry is 40 percent; 27,000 members of the United Mine Workers of America are laid off. Several manufacturers have either closed or curtailed their operations.

We are not talking about some seasonal unemployment that will lift in the next few months. We are talking about frightening joblessness that threatens people's basic way of life.

When I was growing up, I cut brush in rural areas of West Virginia. A common sight then were commodity trucks—trucks bringing surplus food to welfare recipients. Then food stamps came. Our economy began to prosper. The commodity trucks became a distant memory.

Mr. Speaker, those trucks are running again. Two months ago, I rode a commodity Army Reserve truck on its weekly run to a hard hit area. Once again, hardworking people are not seeking handouts. Rather we seek work—and opportunity. Make no mistake—the recently passed jobs bill was not make-work. It meant that vital work on our Nation's infrastructure would be undertaken. Likewise a second phase jobs bill, H.R. 2544, would target money to high unemployment areas for short-term construction projects to be completed within a year. People go back to work while expanding the infrastructure necessary for economic development.

There are many other areas to explore. During the last week I have twice met with knowledgeable persons concerning small business programs for our State. Flexibility and ingenuity are essential elements to rebuilding our threatened economies. We must learn from each other.

This requires that this Congress not ignore the problems in each area. My State mines coal, and essential energy source. Coal research and development funds have been slashed 80 percent in 3 years. Yet funding adequate coal research programs will guarantee alternate and clean burning fuels.

Let me say that Federal dollars alone spent or loaned for water and sewer systems in West Virginia, in Boone County, for example, will be repaid many fold in economic development. Appalachian Regional Commission funds have brought the beginnings of an industrial park to Jackson County, a hard hit county determined to recover from the massive layoffs of a major manufacturer 2 years ago.

Mr. Speaker, on jobs, it cannot be business as usual, since business is not usual any more. We must resolve that 10 percent unemployment, double that in my State, does not become the usual.

At this point, I yield to the distinguished Speaker of the House.

Mr. O'NEILL. I want to thank the gentleman from West Virginia (Mr. WISE) and all his colleagues who have put this special order together tonight to talk about the unemployment of this country. Things are really bad.

President Reagan is a master of public relations. Whenever we get bad economic news, he passes the buck and blames it on someone else.

When his policies bring on the worst recession in 50 years, he blames his predecessor.

When his deficits rise higher than all other Presidents put together, he blames the Congresses of the past.

If more and more people think his administration is unfair, then he blames the media.

Tonight I would like to ask the President a question he cannot squirm out of.

Mr. President, you are having a conference tonight, a news conference. When we passed your program in 1981, you promised us it would create 13 million new jobs.

What about that promise? What about those 13 million jobs? We scheduled your program. It passed the Congress and became law; but today we have an unemployment rate of 10.1 percent—compared to a 7.2-percent jobless rate in July 1981, the month your program was adopted. Instead of having the 13 million new jobs as you promised; we now need to create 3 million new jobs just to get us back where we were when you came here a little over 2 years ago.

Tonight, Mr. Reagan, at your press conference, you will speak on prime time national television, on all three networks. Well, Mr. President, at the present time there are 13 million unemployed. There are another couple million out of the work market and there are 5 or 6 million working part time.

Mr. President, is the recession over when we still have 13 million out of work?

I want to thank the gentleman and I congratulate him for taking this time.

Mr. WISE. Mr. Speaker, at this point I yield to the distinguished gentleman from Tennessee (Mr. FORD).

Mr. FORD of Tennessee. Mr. Speaker, I appreciate the opportunity to join in this special order to discuss the plight of our Nation's unemployed. I want to especially thank our distinguished colleague from West Virginia for requesting this special order. As

chairman of the Subcommittee on Public Assistance and Unemployment Compensation, I have become acutely aware of the human suffering behind the unemployment statistics that we hear about.

We have been able to alleviate some of the hardships faced by the unemployed by providing additional weeks of unemployment compensation through the Federal supplemental compensation program. We were able to enact phase 1 of the jobs bill. We will be acting soon on providing some minimal health care benefits for those individuals who have lost health care coverage. While we have been able to respond to the tragedy of unemployment in some respects, we have been able to do so only after overcoming the objections of the Reagan administration and watering down the help that these bills were designed to provide.

If there is a single roadblock to attacking the unemployment problem in this country, it is the policies of this administration. I do not make this statement lightly. I make it only after months of watching administration witnesses march up to Capitol Hill demanding a $1.6 trillion defense budget and then coming to my subcommittee and opposing $2 billion in unemployment benefits. I have watched the unemployment rate rise from 7.4 percent, when this administration took office to 10.8 percent. I have watched this rise in unemployment and I have seen the President of the United States point to the want ads in a Sunday newspaper as evidence that unemployment is really not a serious problem.

I have listened to unemployed steel workers from Pennsylvania describe the year long search for a job that simply is not there, and then heard the administration imply that an extension of 6 more weeks of unemployment compensation for those workers will act as a disincentive for them to seek work.

Over 11 million Americans are out of work. Another 2 million are so discouraged they have dropped out of the labor market. And what is the administration's answer to this crisis? Inflation is down. What is the administration's answer to an unemployment rate among black teenagers of nearly 50 percent? Inflation is down. What about the 19 million Americans who have lost health insurance coverage because of unemployment? Inflation is down.

What about the loss of extended unemployment benefits in Michigan, Ohio, Illinois, and other high unemployment States because of the changes in the President's 1981 budget cuts? Inflation is down. What about the increase in broken homes and child abuse that are a direct result of the desperation of men and women who can no longer provide for their families? Inflation is down.

This administration's absolute lack of sensitivity to the needs of the unemployed is surpassed only by its lack of shame in claiming credit for reducing inflation.

Inflation is down because we are in a recession. A recession that has resulted in the loss of jobs, health care, and security for millions of Americans. To read administration's press releases you would think that Ronald Reagan, David Stockman, and Paul Volcker have singlehandily wiped out the terrible scourge of inflation. I would like to issue a press release myself to commend those Americans who have helped reduce inflation. There are a couple of problems in doing that however. One is that the list would have over 11 million names on it, the names of those Americans who cannot find a job. The second problem is even more difficult and that is to tell them that the reward for their faithful service in whipping inflation is something called economic recovery, and I am not sure when it will arrive.

America's jobless cannot wait for the recovery to trickle down. They need help now. And it is my hope that tonight's examination of the true scope of the unemployment situation in this country will reaffirm this Government's commitment to provide that help.

□ 1920

Mr. WISE. I appreciate very much the remarks of the gentleman. He might have been talking to Ed Cook, a county commissioner from Boone County, a coal mining county in my district, who wrote recently and said:

> The county is suffering because of unemployment. When people exhaust their unemployment they will hit the street and the crime rate will soar.

Then he went on to say:

> Sure, inflation is coming down. When you don't have money to spend it has to.

Mr. PEASE. Mr. Speaker, will the gentleman yield?

Mr. WISE. I yield to the gentleman from Ohio.

Mr. PEASE. Mr. Speaker, I appreciate my colleagues gathering today to make a special point of discussing the tragic national unemployment situation that grips our country. While policymakers have grown accustomed to throwing around statistics of unemployment, the human dimensions of the problem are too often considered only secondarily.

Men and women in my northern Ohio district are not the deadbeats or freeloaders to which President Reagan often makes implicit reference. They are not trying to put something over on the system or avoid hard work—they grew up used to generations of hard work in the American auto and steel and other basic industries. They are hard-working Americans who have lost employment through no fault of their own.

After layoffs from jobs they have held for 10 to 20 years, many have looked for new employment for up to a full year, to no avail. Some have looked unsuccessfully for more than a year. They have begrudgingly depended on unemployment compensation or food stamps to try to maintain their families and the homes they can neither afford to leave or to keep. The dignity of people who have proudly and dependably worked as part of America's basic industries is close to or beyond the breaking point.

Workers have left Ohio, where unemployment was last 13.6 percent, to travel to Southwestern States to try to find work and income. Those efforts have too often meant divided families and frustrated job seekers with little success. But Ohio's declining heavy industry shows no signs of recovering to the vibrant and productive state it was formerly enjoyed.

Mr. Speaker, like reformed smokers critical of others who cannot quit, I think it may be easy for those who are employed, from the President and his cabinet on down, to find fault with unemployed workers. While the President seems to believe that a large number of unemployed workers can find work through a simple application of discipline, ambition and "willpower," I think the Congressmen participating in today's special order realize that drive is not what is lacking. It is employment opportunity that is missing.

There are currently millions of men and women who want jobs, Mr. Speaker, and there are millions more who are underemployed and capable of far more than they currently produce. The false notion that these people need only look at the classifieds to solve their problems is a plain insult to working Americans.

Mr. Speaker, I hope that the administration gets a clear message from this series of speeches. We regard unemployment as a critical and yet unresolved part of improving the economy—trading high inflation for high unemployment is no improvement. Lower prices are of no help to America's unemployed men and women.

Mr. ECKART. Mr. Speaker, will the gentleman yield?

Mr. WISE. I yield to the gentleman from Ohio.

Mr. ECKART. I thank my colleague for taking time to assemble this opportunity for us to share with the country the consequences of national policies that are of such great concern and importance to us.

Unemployment in the 11th Congressional District of Ohio is stil in double digits in each county. Ashtabula County has a jobless rate of 18.9 per-

cent, according to the latest figures available; Lake County, 15.5 percent; Portage County of over 14 percent; and Trumbull County, of which I represent a portion, 16 percent; and Geauga County, over 11 percent.

Clearly what is going on in northeastern Ohio is not reflective of the rest of the country. It is worse.

My office has been deluged with letters from constituents who write me of the personal hardships they have had to endure and suffer as a direct consequence of the Reagan recession.

One woman was grateful in her thoughtful letter to me for at least having unemployment compensation. For her that long line was some form of a blessing to be thankful for, for in these difficult times at least she knew she had something to look forward to.

But now as a direct result of the Gramm-Latta budget forced down the throat of this Congress in 1981 in a blind-sided 1-hour no-debate, no-amendment process the State of Ohio finds itself losing this mere form of minor subsistence that this woman wrote of so gratefully.

A 59-year-old man wrote about losing his job as a machinist. He had been gainfully employed in that position since he was 19 years old; 40 years of work down the drain. "What am I to do?" he wrote. "I am too young to retire and too old to find another job."

Too many people write that sentiment. For them the Reagan recession and the prosperity deemed for us to be just around the corner is one corner too far.

Since acting on President Reagan's economic program just 2 short years ago we have discovered the folly of his supply side economic theory is that it really does not work. In reality, true prosperity does not trickle from the top down; it grows from the bottom up among the working men and women of this Nation. It is an economic program that is flawed, that fails to exercise any degree of foresight.

Look at the gargantuan deficits it has created.

Let us look at some of the consequences, but also let us look at how the Congress will deal with them.

Our auto industry is in a shambles. In northeastern Ohio unemployment among auto-related industries exceeds that of the national average; yet, the solution offered to those of us on the Energy and Commerce Committee in recent hearings in testimony on domestic content legislation was, in the words of the administration spokesman, "Give it time."

Mr. President, let me tell you that time is one thing the unemployed auto worker already has too much of in northeastern Ohio. I say to you that if these companies through their unrestrained export policies that have put Americans out of work continue to do so, while you stand idly by giving our industry more time, it can only result in a policy that will end in the result of us having no domestic auto industry.

I say if they want to sell here they ought to build here. We cannot fiddle while the auto industry burns. We need those jobs and America needs a vital auto industry.

As my good friend from West Virginia pointed out, why is it here in a country that can develop the economic resources and the ability to land a man on the Moon that we cannot develop the ability to burn our Appalachian coal cleanly, safely, and efficiently. Perhaps it has to do with, as the gentleman so properly pointed out, the gargantuan budget cuts that have been visited on alternative energy resource development and utilization of a natural resource of which we in these United States have more than the Saudi Arabian Government has in oil.

Let us focus for just a short moment on the educational crisis confronting this country today. Japan, called an ally by some and an economic adversary by others, graduated more engineers last year than our Nation did. We are being outcompeted and outeducated. Yet this administration hopes to solve the problem by asking children to pray in schools. To pray for what? To pray for a job? To pray for a degree? To pray for an opportunity that they, too, may be able to own a home someday.

At the same time, while the President travels around this Nation speaking so piously of education, he fails to remind the Nation of his deep budget cuts.

□ 1930

And while he stands in Kansas City tomorrow at the site of the largest food warehouse filled to the rafters with commodities purchased by American taxpayers' dollars, let him ask the hungry children why it is they cannot learn in the schools today. Does the President not realize that you cannot create a full mind on an empty stomach?

We in northeastern Ohio and indeed throughout the entire Great Lakes States are the victims of an economic civil war, perpetuated by the monetary, fiscal and budgetary policies of an administration that seeks to render apart the very fabric that binds this Nation together.

All we ask for is not for the Federal Government to do it for us, but to stop doing it to us.

We ask for targeted defense spending so that the Nation's taxpayers' dollars that came from our region return to our region to create jobs, for in Ohio for every dollar we send here to Washington we get less than 75 cents. We in the Great Lakes States ask for an opportunity to preserve and protect our freshwater for it is only in that context that we can offer some hope to the people of the future, for without freshwater we will fail to survive. Let us take a look at Congressman BILL RATCHFORD's legislation pending before the Education and Labor Committee, to create a truly community-based vocatonal education program, a GI bill of rights if you will, for the unemployed, so they can stay in their communities, relearn their skills, and remain as productive parts in our workplace.

The unemployed in this Nation, they do not want a dole, they want dignity and they want a job. Let us put them to work rebuilding our infrastructure, infrastructure that has been sadly neglected in the northeastern part of these United States. Let us talk about health care for the unemployed. The distinguished gentleman from Indiana who will be following us momentarily has worked hard in the areas of medicare and medicaid and knows full well the consequences of people taken to hospitals and asked, not, "What is your ailment?", but "How are you going to pay for it?"

This in a land of plenty. Yes, the Midwest and the Northeastern part of these United States are in the middle of an economic civil war, the consequences of which threaten to wreak havoc on our communities as we know them. Abraham Lincoln said just a few feet from where we stand this evening, "If we could first know where we are and wither we are tending, we could do a better job in what is to do and to know how to do it."

This administration has forgotten where we have come from and this administration does not know where we are going.

These wise words from a man filled with wisdom are sorely needed in the consequences of the economic debate before us today.

Our approach to solving economic problems has been upside down, dominated by squinty-eyed bureaucrats who do not care and cannot cry has resulted in economic policies the failure of which have brought untold horror and hardship to Americans of every color, of every economic background. Let us use this opportunity that the gentleman from West Virginia gives us to speak positively as we all will of programs designed to help our Nation. But let us not fail as Abraham Lincoln reminded us and as Harry Truman so eloquently spoke when he was our President in the White House just what seems like 25 or 30 short years ago; to fail to remember the history that we have lived through is to condemn us to live that history again.

The failed economic policies of trickle down economics condemns us and 11 million others of our American colleagues to the same kind of fate of the

Great Depression. We in the Congress have the ability to make a difference. I hope that through the use of this special order and the programs we will be voting on in the weeks and months ahead we can hold out a greater hope for a better America and for a brighter future for ourselves and for our children. I thank the gentleman.

Mr. WISE. Mr. Speaker, I thank the gentleman.

The gentleman has given us much food for thought, not only explaining the problem in his district but also what we need to be looking at to bring about the long-term change which is so necessary.

I yield to the gentleman from Michigan (Mr. WOLPE).

Mr. WOLPE. Mr. Speaker, I thank the gentleman for yielding.

And I want to commend the gentleman from West Virginia for taking the special order this evening. It provides all of us with an opportunity to focus attention on the continued economic stagnation in our districts and in the persistently high levels of unemployment that plague our respective constituencies.

In my home State of Michigan, the unemployment rate remains close to 15 percent; and in some cities in my district it exceeds 20 percent and in my minority communities it is twice that figure. It is not suprising then that my constituents are cynical about claims that economic recovery is already underway. Talk of recovery is only talk to 9,300 unemployed men and women in Lansing, 4,500 in Kalamazoo, 2,600 in Battle Creek.

It is only talk to the spouses and children of those who are still unemployed. It is only talk to the discouraged workers who have given up any hope of employment and it is only talk to the thousands who have uprooted their families, sold all their possessions in the desperate hope of finding work elsewhere.

Mr. Speaker, the national indicator may well be showing a mild upturn in the Nation's economy, but the faint image of that recovery is still only barely perceptible in my district. The Michigan economy, with its reliance on older heavy industries has been among the slowest to recover from the recession. Real recovery and increased employment will only come from efforts to renew, retool, and revitalize these industries. Recovery will also depend on efforts to train and retrain workers. Many people in my district have already been displaced by changes in industrial technology and consumer demand and many more have skills that will soon be outmoded.

I believe we all must commit ourselves now to insuring a well-trained work force in the future. But in the meantime, in the here and now, unemployment remains a problem of critical dimensions. The scope of the problem in my district and State is reflected in the statistics, but no statistic can fully explain the human impact of joblessness. The sense of failure, disillusionment of doubt in everything we have taught to believe about ourselves and about our country.

In Michigan the unemployment problem has manifested itself in dramatic increases in alcoholism, in spouse and child abuse, in mental disorders. But, again, these numbers only order and categorize the tragedy that cannot be quantified. How then do we really understand the impact of unemployment? Perhaps the best evocation of the problem I have ever seen came in a letter from one of my constituents, the handwriting and the wording make it clear the writer is a child, perhaps 10 years old, but the letter makes its point well. It reads:

DEAR MR. WOLPE: We care about hungry people. We would like to know what you have done for the starving people in the world.

P.S. Can you help get jobs in Kalamazoo, Michigan? Many people in Kalamazoo, Michigan do not have jobs.

P.S.S. My dad needs a job. Can you please help get jobs in Kalamazoo?

Mr. Speaker, I cannot make a more eloquent plea. I implore the President of the United States, my colleagues in the House, in the other body, business leaders, and policymakers throughout the Nation to listen and take heed.

Again my thanks to the gentleman from West Virginia for providing this opportunity to allow this examination of the continuing unemployment crisis that faces our respective constituencies and the Nation.

Mr. WISE. Mr. Speaker, I thank the gentleman from Michigan very much. I now yield briefly to the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Speaker, I represent a district with some of the worst pockets of unemployment in the Nation, and I do not mean a few areas within some of my south Texas cities. I am speaking of the entire city of Eagle Pass, Tex., where the May unemployment figure was an even 37 percent—up 10 percent from the same month last year. I am speaking of Laredo, Tex., where the May unemployment figure was 28.4 percent—more than double the figure of the same month in 1982.

Much of this is attributable to the 1982 peso devaluations which had a severe effect on international trade and retail trade, forcing these industries to lay off hundreds of individuals. Spinoff effects resulted in public and private enterprises letting more employees go. The peso devaluation problems are compounded by all the other adverse economic conditions being inflicted upon our Nation, and I simply do not know how long our remaining small businesses can hold out, much less the children and senior citizens.

A total of 417 businesses failed and closed down in 1982 in Laredo. An additional 237 failed through May of this year. Before this disaster, the 1-percent sales tax was a major source of revenue for the city, which reduced the number of city employees by 200 this year in an attempt to absorb a 37-percent drop in sales tax income. At the same time, as you might suspect, crime is increasing at alarming rates.

So what else can happen? The city of Laredo contracts to provide child development services and family care services and works with Federal and State agencies to assist the elderly. Using various matching funds, Laredo has provided medical and dental exams, therapy, and feeding services for children and helped the elderly remain in their homes and maintain their dignity. There is a serious question of finding that local match next year, and the problem is directly attributable to what we are talking about here today.

The cruel irony is that unemployment is increasing the need for these services at the very time when there are less financial resources to invest in human needs.

Is it possible that American citizens in distress cannot look to the same Federal Government that speeds assistance to other people in need around the world? This month, the people of Laredo opened their newspapers to learn that the county nutrition education program will be phased out, apparently another victim of selected cutbacks by the Federal Government. To rub salt in the wound, they were told that the decision on which units to keep was made "primarily on the basis of where the majority of those living in poverty reside."

I would point out that in Laredo, where 11,400 of a total work force of 42,000 are unemployed and have little chance of finding employment, that going without paychecks is about as close as you can get to poverty.

There is unemployment compensation, of course, but a total of 3,800 people have already exhausted their unemployment benefits, and it is estimated that 1,800 or 1,900 more will lose their benefits each month. These are people, not statistics, and we cannot simply mark them off.

The people of south Texas are an independent lot, and they are used to hardship and taking care of themselves, but they simply cannot stand much more, and the children and elderly cannot stand much more.

I appreciate the members and the committee staffs who have studied these problems and the various task forces which have taken the time to examine them in person, but with all due respect, I think the time for looking and talking is over. The administration as well as Congress know what

the problems are, but no one has been able to find a solution. The situation has been studied to death and it has not gone away.

The people of south Texas—and people across the country—are growing bitter. I am sure you have heard many people say that if they lived in another country, they could at least apply for foreign aid. Congress and the administration must respond to that call, and I suggest we should turn our attention to jobs, jobs, and more jobs.

□ 1940

Mr. WISE. I thank the gentleman for his participation.

Mr. Speaker, I yield to the gentleman from Pennsylvania (Mr. COYNE).

Mr. COYNE. Mr. Speaker, I rise in strong support of the goals of this special order and I thank the gentleman for taking this special order.

Mr. Speaker, often of late we have heard favorable comments on the condition of the economy, comments based on a comparison of an economic statistic of today to that of a year ago.

Let us consider the case of Pittsburgh's unemployment. A year ago, unemployment in the four-county Pittsburgh area was 10.6 percent. Today it is 16 percent.

A 50-percent rise in unemployment over a 12-month period in an already hard-hit area is a signal that something is dangerously wrong with our economy. If there are signs of hope for the economy in other regions of the country, such figures as in western Pennsylvania are all the more cruel.

Unemployment affects the economic livelihood of those without jobs and the stability of the communities in which they live. Perhaps the most devastating of its byproducts is the personal toll it takes on the physical and mental health of the jobless.

What does unemployment do in western Pennsylvania?

First, there is the immediate financial strain on those without work. Unemployment benefits help many for a period of up to 65 weeks. For thousands of western Pennsylvanians, this aid is now destined to expire with no job in sight. Fifty-five thousand people in Pennsylvania will exhaust all unemployment benefits next month. This is almost triple the monthly average of 15,000 to 17,000.

Receiving unemployment benefits often means the difference between keeping a home and losing one; 6.3 percent of outstanding mortgages in Pennsylvania are delinquent, the highest recorded number since the Mortgage Bankers Association of America began compiling statistics in 1953. According to Pittsburgh's Action Housing, between January and June 15 of this year more than 1,000 unemployed homeowners have received mortgage delinquency counseling through several local agencies. These agencies report that the number of calls for help is increasing and that the individual problems appear to be more serious. Requests for mortgage assignment have more than doubled in the past year at the Pittsburgh area office of the Department of Housing and Urban Development.

The House of Representatives has moved to address this problem by approving the Emergency Housing Assistance Act. It is now up to the Senate to act.

For some families, unemployment means having to face a new problem. I speak of the lack of food. Pittsburgh's Health and Welfare Planning Association reports in "Hunger in South-Western Pennsylvania:"

> The dramatic increase in unemployment in South-Western Pennsylvania and the projection of long-term unemployment for many due to non-transferrable skills has created a new group of people in need. Many people who have worked all their lives paying taxes, giving to charity and supporting the economic base of our community are now facing the immediate problem of how to obtain food for their families.

Second, long-term unemployment has a debilitating impact on the communities in the Pittsburgh area. In one Allegheny County town, more than 60 city employees have worked without pay to help the cash-strapped municipality meet its bills as tax revenues decline.

Neville Island, an Allegheny County township in the 14th Congressional District, was once called a floating factory. When unemployment was good, workers crossed the bridges to quintuple the township's population during work hours.

Township revenues last year were down some $20,000 in occupation taxes, and $25,000 in wage taxes. The per capita debt in the 1,200 person township is $666.37.

A Pittsburgh Press article included this observation from a restaurant operator on daily life in Neville Island these days:

> Our trade is way down and the people that come in aren't spending as much * * * I think the guys are only allocating themselves so much for lunch, and when that's gone, they just don't come in.

Third, unemployment directly affects mental and physical health, as well as family relations. While not easily documented, these are among the uglier aspects of joblessness.

As unemployment rises, so does suicide, homicide, infant mortality, cirrhosis, circulatory disease, and hospitalization for mental problems. National Institutes of Health research indicates that an individual's ability to cope with unemployment depends on whether he or she has adequate finances, is able to find another job at similar wages, and whether family and friends are there for support.

Thousands of people in the Pittsburgh area now face loss of unemployment benefits with little likelihood of becoming employed. Their ability to cope with that circumstance will be severely tested.

What does being without work do to a person's self-esteem? A Pittsburgh Press article included these comments from a 27-year-old, out-of-work engineer:

> When you're working, you feel that what you're doing is important. If you're not working, it's a blow to your ego. To do is to be . . . if you're not working as an engineer . . . are you an engineer?

Unemployment affects our communities and people who live in them in ways we can measure and in ways we cannot. I hope that those in the administration who now contend we are on an economic comeback trail will pause for a moment to reflect on the recorded and unrecorded measurements of unemployment in the Pittsburgh area.

Mr. WISE. Mr. Speaker, I yield to the gentleman from Indiana (Mr. JACOBS).

Mr. JACOBS. Mr. Speaker, I would like to say for the record, too, that I am grateful to the gentleman from West Virginia and his colleagues for calling this special order. I especially want to note that I believe the gentleman from West Virginia is one of the hardest working Members I have had the privilege to know during my service in the Congress. You might even say Congress is doing very well, ROBERT WISE.

We are here on a very serious subject, unemployment. At the beginning of World War I, with most of the nations plunged into war, historians tells us that the German Chancellor Bethmann Hollweg turned to the former German Chancellor Prince Bulow and asked. "How did it all happen?" and Prince Bulow replied, "Ah, if only one knew."

Allusion has been made to the cause of the difficulty. The assertion is being made nationally that a great recovery is under way. In Indianapolis, Ind., that is not entirely detectable by experience. In the year 1982 there were 746 foreclosures of mortgages. This year, to date, already there are 514. Unemployment has risen in Indianapolis by six-tenths of 1 percent. If there is a recovery, it is for someone besides those who have been thrown out of work, but how did it all happen?

The gentleman from West Virginia has quoted a leader from his State as giving a hint as to how it happened. Traditionally it is said that the way to fight inflation is to throw people out of work. Well, how does that fight inflation?

It means really that if enough people at the bottom of the ladder are thrown out of work, do not have

enough money for the movies, do not have enough money for automobiles, do not have enough money for clothing, good clothing for their children, it simply means that many fewer people are competing for the goods and services in the country. And when fewer people are competing for those goods and services, obviously the goods and services that are available can go around better, meaning at a lower price.

The suicide rate in Anderson, Ind., has gone up dramatically in the last 20 months. That is a big auto worker town in my State.

It is a funny thing about suicide. You do not hear very much about it, maybe on the back pages of the newspaper, or some hint that the deceased went in that tragic way. But it happens because of proud people who are caught up in a machinery that is far more powerful than themselves as individuals, when they are caught up in this tragedy of unemployment and cannot make house payments. Well, that was just a statistic a moment ago about the foreclosures, but foreclosures mean that the sheriff comes to the door and puts you out. And only in a movie is there somebody to put you in some place. And when proud men and proud women can no longer support their children, sometimes it is too much. Who here can say, those of us who can say, "But for the grace of God there go I." But for the policies of this administration these people would not so extensively be in that situation. The consequence in some cases is deep depression and suicide. It is a deadly serious subject. These people are the casualties of the Laffer curve and they are pawns in an economic game plan.

There is only one thing that works as far as I have been able to figure in the years that I have been in the Congress, something that has never been tried. If you print the money to pay the bills that Congress has run up and does not have taxes for, it is inflation. If you do what the present outfit does, if you borrow the money, that drives up interest rates and drives people out of work.

In the first instance, it is like taking chloroform. It is a slow death to the economy. In this instance, it is like cyanide. It kills the economy immediately by throwing people out of work and throwing businesses out of business.

It seems to me that somewhere along the line we might all agree that the best way to pay the bills of this Congress is through the progressive net income tax, the ability to pay, and forget the laughable curve.

Mr. WISE. I thank the gentleman very much. During my brief time here in the Congress, the gentleman certainly always has been a voice for those who do not have a voice. And certainly in my mind, the conscience of the Congress.

Mr. Speaker, I yield to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, first of all, I would like to join in commending our colleagues, BOB WISE and MARCY KAPTUR, for taking this time to discuss the most serious social problem facing this country.

I think it is particularly encouraging, however, that we have so many outstanding new Members of the House, of which you two are good examples. It makes me feel a lot better about the future of the country to know that people who come fresh from the electorate are taking the kind of initiatives and showing the kind of drive that you are showing.

Mr. Speaker, unemployment is no respecter of the careful way in which millions of men and women have ordered their lives. Unemployment is a tragedy for the world, for our Nation, for regions and localities, for individual men and women, and for their families. But those of us from the industrial Midwest know better than most how devastating unemployment can be. In my hometown of Akron, Ohio, unemployment went from 9.7 percent in October 1979 to 17.8 percent in January of this year, a phenomenal 84-percent increase. For Summit County, the unemployment rate jumped during that time from 8 percent to 14.5 percent, an 81-percent increase.

But these are only dry statistics. We need to have greater awareness of the misery of unemployed workers and their families. Consider the effect on health, for example. Dr. M. Harvey Brenner of Johns Hopkins University has pioneered in assessing the impact of unemployment on mental and physical health. He has shown that a great many physical illnesses, particularly cardiovascular disease, are psychologically related, and therefore are affected by economic status and changes in economic situations. His research reveals that a 1-percent rise in joblessness is accompanied by an increase of 650 murders, 920 additional suicides, 4,000 more admissions to State mental hospitals, and 3,300 criminal convictions and incarcerations in State or Federal prisons.

Dr. Brenner's studies link an increase of 37,000 deaths, including 20,000 from cardiovascular problems, with every 1-percent jump in joblessness. He says that with all the techniques available for projecting economic trends and providing career counseling, we ought to be able to develop programs which would not only do better at getting people trained and placed where they are needed, but also be far more sensitive to the implications of various economic policies on health and human development. Yet under the Reagan administration, our efforts in these areas have gone backward, not forward.

It is not difficult to trace the impact of these social problems on our national economy. The impact on our Federal budget, for example, is staggering. If the jobless rate were cut in half, the Federal deficit would be cut by more than $150 billion—far more than politically acceptable tax increases and spending cuts could be expected to produce. And the billions of dollars of wealth lost due to high unemployment can of course never be recovered.

Mr. Speaker, the Akron Beacon Journal recently ran a story on a constituent of mine which forcefully brings home the problems in our Nation's heartland of industrial decline, structural unemployment, and our unemployment safety net. Richard Forward worked 31 years at Firestone as a tire builder—a skilled occupation—before he was laid off in May 1981. Mr. Forward's skills fell victim to a combination of circumstances. Every imported auto purchased in the United States means five fewer tires from American rubber workers. In addition, cars these days are generally smaller than their predecessors and are increasingly likely to have front-wheel drive, factors which minimize wear on the rear tires and decrease the demand for replacement tires. Finally, consumers today prefer longer lived radial tires, again decreasing the need for replacement tires.

As the Akron Beacon Journal put it:

> Mr. Forward's layoff began an encounter with a jerry-built system of supplements and extensions further complicated by a dark maze of arbitrary cutoff dates and obscure terminology such as reachback provisions and trigger formulas.

His faith in the basic justice of our society has been shaken by the lack of work opportunities and by the capricious and wholly inadequate unemployment safety net through which he has fallen. That safety net was designed to take care of short-term economic disruptions, not the long-term structural problems which Mr. Forward is a victim of. But that explanation is of small comfort to him, to the 40 percent of all unemployed workers who have no unemployment insurance, or to the nearly 200,000 other Ohioans who, under the current system, will be without any jobless benefits by this October.

Mr. Speaker, the unemployment situation in Summit County, Ohio, is bad enough even without a reduced Federal commitment to provide reasonable levels of assistance to our jobless. But President Reagan has added insult to injury by actively seeking to cut many of the programs on which the jobless must rely for basic sustenance. Summit County workers have suffered the consequences of heavy import competition for a number of years. Until the Reagan Presidency, the United States provided some addition-

al compensation to workers who lost their jobs because of import competition through the trade adjustment assistance program. In fiscal year 1982, the Reagan budget slashed the TAA program 91 percent. This year, the President proposed to terminate the program altogether. Two years ago, Summit County workers received more than $7 million in TAA benefits. Today, virtually no one receives benefits under the program in Summit County.

Despite its support for self-help measures to combat joblessness, the Reagan administration has done little to provide unemployed workers with the skills they need to get back into the job market. The administration has consistently sought cutbacks in job training funds, limiting the ability of programs to retrain workers to reenter the job market. And despite his professed support for effective job training, the President actually opposed the Job Training Partnership Act, which replaced the CETA program, until it became clear that Congress would pass the legislation with or without his support.

The grim employment prospects for older industrial States like Ohio is made worse by the reluctance of the administration to commit itself to a strategy to work with labor and business to develop a comprehensive industrial strategy. In my judgment, such a working partnership is vital if we are to regain our manufacturing lead in the global market. Ohio in particular has suffered a sharp decline in the number of existing manufacturing jobs. Factory employment dropped from an all-time peak in 1969 of 1.471 million to 1.234 million in 1981, a loss of 237,000 jobs in 12 years. Another 100,000 jobs were lost last year. That decline was most heavily concentrated in Ohio's largest counties, including Summit County.

The Reagan recession has been particularly hard on Ohioans. Ohio's unemployment rate has consistently risen above that of the Nation as a whole during years of recession. This is due to the fact that Ohio's share of employment in heavy industry is considerably greater than the Nation as a whole. Seven out of ten jobs in Ohio entail the production of durable goods, and when the economy slows down, as it has in the Reagan recession, purchases of durable goods are often deferred or canceled, with resulting increases in unemployment. The 1982 unemployment rates, both for Ohio and for the Nation, reached the highest peaks in more than four decades. For Ohio, that meant that one out of every eight workers was without a job. Even worse, the long-range employment picture for Ohio strongly suggests that employment in the manufacturing sector will not improve, even if the economy improves as a whole.

Given the decline in manufacturing jobs in older States like Ohio, it is crucial for the Federal Government to maintain its commitment to effective job training. The Government must also work to develop a consensus on the most effective means of reindustrialization. I do not agree that we can let our basic industries die and replace them with high-tech or service industries. Without auto, steel, tire, machine tool, appliance, and other basic industries, who is going to buy the high-tech products, the computers, the robots? And who are the service industries going to serve?

We must move ahead to develop a national industrial and full employment policy, with or without help from President Reagan.

□ 1950

Mr. Speaker, sometimes people ask me how I came to be a Democrat, since my parents and all of my relatives, when I was a young man and first able to vote, were Republicans. Well, I grew up in the 1930's, and I saw the answer of the Hoover administration to unemployment. On every street corner there was a man trying to sell apples, and the slogan was, "Help the unemployed. Buy apples."

And along came President Roosevelt and put Americans back to work. He proved that unemployment was not necessary, that it was possible to give people a good, decent standard of living.

And I say to the same kind of thinking that we were coping with 50 years ago in this country that we can do it again, but we are not going to be able to do it unless we change the policies that are being followed by this administration.

I again want to commend the gentleman for taking up this cause, and we shall prevail.

Mr. WISE. Mr. Speaker, I thank the gentleman from Ohio for his words and his encouragement.

Mr. Speaker, at this time I yield to the gentleman from Michigan (Mr. LEVIN), who has been very active among new Members in seeking to deal with the causes of unemployment.

Mr. LEVIN of Michigan. I thank the gentleman for yielding.

Mr. Speaker, I rise today to discuss the grim grip of unemployment, and how it has been exacerbated by the 1981 Omnibus Reconciliation Act.

Throughout the relatively prosperous mid-seventies, from 1976 to 1979, Michigan's average unemployment rate was over 8 percent, 21 percent higher than the national average of 6.6 percent. Since the current recession began in 1980, Michigan's average unemployment rate has climbed to 13.6 percent, 64 percent higher than the national average of 8.3 percent. When the U.S. unemployment rate first hit double digits in September 1982, Michigan had already suffered 32 straight months of double figures. Today this disastrous count stands at 40 consecutive months; Michigan has had the highest unemployment rate in all but 10 of those months, when it was the second highest rate. The most recent statistics for May are 14.9 percent or 653,000 workers without jobs.

After 3 consecutive years of severe recession, the State has lost 400,000 jobs. Virtually every family and business have been affected. Manufacturing employment has declined by one-fourth and construction by about 40 percent between 1979 and 1982.

In November more than half of the unemployed workers were age 25 to 44, and more than two-thirds were male. The employment situation of females and minorities is catastrophic. For 1982, the female unemployment rate was 15.1 percent, the black unemployment rate was 32.8 percent, and the unemployment rate of black youth was a staggering 61.8 percent.

These statistics do not even begin to tell the human story—confronting debts without a paycheck, looking for work with no jobs available, and losing the dignity that comes from a steady job. The hardest job in Michigan today is looking for work.

Recent research provides indications of the impact of unemployment in Michigan.

In one of the greatest year-to-year increases since World War II, Michigan's infant mortality rate increased from 12.8 deaths per 1,000 live births in 1980 to 13.2 deaths in 1981. Some areas of the State have actually seen a 100-percent increase in 1 year;

Since October 1979, the AFDC unemployed parent caseload in Michigan has tripled. The general assistance caseload has doubled;

The number of persons receiving some form of cash public assistance has increased by 35 percent since 1979, or 350,000 persons. In January 1983 nearly 15 percent of the total Michigan population received some form of public assistance;

The loss of income and insurance benefits has decreased preventive medical care by physicians and clinics, while increasing hospital care, as people delay treatment until they are seriously ill;

Blue Cross and Blue Shield of Michigan report a drop of 557,000 participants since 1979. Medicaid rolls have increased by 106,000 since then;

Approximately 20,000 workers exhausted their regular unemployment benefits during every month of 1982. Well over 100,000 exhausted their extended benefit period;

Michigan hospitals report $142 million of unreimbursed care was given in 1982, up 29 percent from 1981. Some

community hospitals are threatened with insolvency;

A survey by the statewide nutrition commission indicates that reliance on emergency food providers is increasing and that most programs have experienced a doubling of their caseloads over the last year. The city of Detroit has experienced a fivefold increase in emergency food aid since 1980.

Since the late 1930's, the first line of protection for people who lose their jobs in this country has been unemployment insurance. Because of the highly cyclical nature of Michigan's economy, it has played a critical role in maintaining some stability in the State's work force. The magnitude and length of the current national recession have had a tremendous impact on Michigan's unemployment insurance program.

As of June 24, 1983, Michigan has been forced to borrow $2.4 billion from the Federal Government to pay jobless benefits. The basic reason for Michigan's debt is long-term high unemployment. Michigan had its last good year of unemployment in 1978 when the rate was a comparatively low 6.9 percent. I make this point because 6.9 percent is the rate that is now causing some States to borrow for the first time.

In 1981, the Omnibus Reconciliation Act first established the practice of penalizing those States with the highest unemployment rates. The Reconciliation Act first assessed interest charges on State loans originating after April 1, 1982, at a rate equal to the average interest rate paid on Federal securities—but not to exceed 10 percent. Currently this interest rate stands at the 10-percent maximum. In 1983 Michigan will pay $73 million interest charges. This is after the State repaid $348 million in May, reducing the interest payments by $100,000 a day.

The Reconciliation Act also began the unique practice of automatically raising the Federal unemployment insurance tax on a State's employers if the State has outstanding debt. In Michigan, employers, those with jobs to give, pay a payroll tax of 1.4 percent; 0.6 percent of this is effectively a penalty for employing workers in a high-unemployment State. This penalty tax will cost Michigan business $80 million this year. It will rise another 0.1 percent in 1984.

Against a backdrop of severe unemployment, the State has made extraordinary reforms in its unemployment compensation system. At the end of 1982, legislation was enacted which demonstrates the State's response to the tremendous burdens of the Reconciliation Act. Effective January 1 of this year, Michigan employers will have a maximum tax rate of 10.5 percent of payroll which will rise over 3 years to 12 percent. The State taxable wage base was increased from $6,000 to $8,000 and will continue to rise by $500 each year until 1986. Labor also made benefit concessions which will result in $1.1 billion in savings over 4 years. These include freezing maximum benefit levels, benefit reductions for most claimants, and eligibility modifications which will make it significantly more difficult to establish minimum qualifying requirements.

The net effect of Michigan's reforms was to raise an additional $530 million in 1983 alone, through benefit reductions and tax increases. This is an increase of over 80 percent in available revenues in a single year. It should again be noted that this action took place in the midst of the most severe recession since the 1930's.

In the recently passed social security law, Congress recognized the great lengths to which Michigan and other States have gone in order to maintain trust fund solvency. Two provisions in H.R. 1900 addressed the two concerns I have outlined above: States with very high unemployment rates may defer most of their interest payments; and the scheduled 0.3-percent increase in the penalty tax was reduced to 0.1 percent. Both of these actions were dependent on reforms similar to Michigan's. I applaud this small step toward a reasonable Federal policy for financing unemployment compensation. But I strongly believe that this Congress must recognize the extreme nature of the economic downturn in Michigan and other States such as Ohio, Pennsylvania, and Illinois by forgiving all or part of this accumulated interest. Only in this way will those areas hit hardest by the recession be able to move on to recovery.

The damage that the 1981 Reconciliation Act inflicted on Michigan's unemployment compensation system does not end here. It was with shocked disbelief that I watched the 13-week extended benefit program trigger off in Michigan the week of May 21. Because of a 3-week grace-period, the final benefit week was June 11. The last checks to 56,600 jobless workers were delivered 1 week ago today; 3,100 people were effected in my district alone. How does a State with the second highest unemployment rate in the Nation lose its extended benefit program? To understand this we must look at the extended benefit program itself. Prior to 1981, the combined number of individuals receiving both regular—insured unemployment rate—and extended benefits had to meet one of two criteria: The insured unemployment and extended benefit rate was greater than 5 percent or the insured unemployment and extended benefit rate was at least 4 percent and at least 20 percent higher than the average rate for the previous 2 years.

The Reconciliation Act slipped two changes into the law which brought about the May triggering off. First, the act eliminated workers receiving extended benefits from the trigger number calculations, as if their being unable to find work for 26 weeks meant that they were no longer unemployed. Second, it raised the unemployment rates which trigger on or off the extended benefit program to 6 and 5 percent, from 5 and 4 respectively. On May 21, Michigan's insured unemployment rate, not including those receiving extended benefits, fell below 6 percent. Because the State's unemployment rate has been high for so long, 20 percent above the 2-year average requires an insured unemployment rate of 7.6 percent. While overall unemployment now stands at 14.6 percent, this quirk in the law has deprived the citizens of Michigan of benefits specifically designed for the long-term unemployed.

You might ask why the insured unemployment rate is falling, with so many unemployed workers in the State. The insured rate is falling because people are exhausting the 26 weeks of the regular State program. Precisely because they need the extended benefit program they are falling outside of the statistics that make this program possible. If either of the two provisions in the Reconciliation Act were repealed, Michigan would now qualify for extended benefits. Some of the workers no longer receiving extended benefits will qualify for the third and final form of assistance, Federal supplemental compensation. In May, 135,000 people were receiving these benefits. Yet even before the termination of the extended benefit program, 40 percent of Michigan's unemployed did not qualify for any unemployment compensation. If one looks only 3 months down the road to the end of September, even the remaining supplemental program is scheduled to expire. Clearly there is a large and unmet need exacerbated by the inequities of the reconciliation.

Mr. Speaker, I have attempted to draw my colleagues' attention to the fragile condition of Michigan's economy and to pernicious provisions of the 1981 Reconciliation Act that have aggravated these problems in Michigan and many other States. I sincerely hope that once the facts are known, the Members of this body will quickly act to correct these failings.

□ 2000

Mr. WISE. Mr. Speaker, at this time I yield to my colleague from the State next door whose district is so much like mine that we share many of the same problems, the gentleman from Virginia (Mr. BOUCHER).

Mr. BOUCHER. Mr. Speaker, I thank the gentleman for yielding, and I join with the others here in commending my colleague, the gentleman

from West Virginia and my colleague, the gentleman from Ohio for asking for this special order to enable us to highlight some of the very serious problems which the unemployed are experiencing.

Mr. Speaker, in recent weeks, President Reagan has been eager to proclaim the arrival of economic recovery and to announce the end of the deepest recession this Nation has experienced since the 1930's.

It is perhaps no surprise that the President is so vociferous in his premature proclamations of general prosperity. After all, Mr. Reagan's personal political fortunes are inseperately tied to the course of the American economy.

Unfortunately for Mr. Reagan, however, and unfortunately indeed for the 12 million Americans who remain out of work, not even a President can wish away unemployment. For 35,000 individuals in my congressional district alone, the pain and discouragement of joblessness remains very real; the financial chaos and the personal trauma of unemployment continues to haunt their lives.

According to the latest data available from the Virginia Employment Commission, the unemployment rate in Virginia's Ninth Congressional District is fully 50 percent above the national jobless rate. Four counties in my district have rates of unemployment that exceed 20 percent; one county has unemployment in excess of 30 percent.

From silent coal mines in Tazewell and Buchanan Counties to hollow factories in Bristol, from boarded up businesses in Blacksburg and Pulaski to depressed farm incomes in Floyd and Wythe Counties, my congressional district continues to suffer the effects of high unemployment, high interest rates, and a sustained recession.

Adding to the financial problems of those out of work is the fact that under the current structure of unemployment benefits imposed by the Reagan administration in 1981, no unemployed person in Virginia qualifies for the 13 weeks of extended unemployment benefits available to jobless people in other States.

The use of a statewide trigger for extended benefits, mandated by the administration's budget of 1981, discriminates against regions of high unemployment in States where the statewide unemployment rate has not activated the extended benefits program. Because of this inequity, the unemployed mine worker in Tazewell County is eligible for only 34 weeks of unemployment benefits while his counterpart across the border in West Virginia is eligible for up to 53 weeks of benefits.

To correct this inequity and to provide additional relief to those persons in southwest Virginia hardest hit by the recession, I have introduced legislation to alter the trigger mechanism for extended benefits and to provide for the payment of such benefits on a substate basis. This approach would target the benefits to those whose need is greatest.

The most severe unemployemnt in southwest Virginia is found in the coal-producing counties along the West Virginia and Kentucky borders. Beneath these mountains lie the richest coalfields in the world, and the health of the regional economy is tied directly to the health of the coal industry.

A worldwide recession, reduced steel demand, declining oil prices, a relatively mild winter, and increased competition in the export market have devastated the domestic coal industry. U.S. exports have fallen sharply, compounding the problems caused by our national economic difficulties. In 1982 alone, coal production in Virginia fell a full 1.5 million tons.

The recession in southwest Virginia is wide and it is deep. Only a broad based national economic recovery coupled with intensive economic development activities will afford substantial relief to the economy of my district. One key to sustained economic health is industrial development, but at precisely the time when localities need the most assistance with economic development, the Reagan administration is seeking to abolish the most effective Federal program assisting depressed regions in providing needed public facilities for commercial expansion. Since taking office, President Reagan has three times proposed termination of the Appalachian Regional Commission. Fortunately for southwest Virginia, the President has not been successful in this effort.

Since its creation in 1965, the ARC has served as a catalyst for improvements in public facilities and health and education services that have benefited the entire Appalachian region. Among the many southwest Virginia projects funded by the ARC are health clinics, vocational education centers, water and sewer projects, industrial parks, and vital transportation facilities. Without the support of the ARC, it would have been virtually impossible for our localities to undertake these job creation projects, and it will be extremely difficult for the region to enjoy any measurable recovery from the current recession without the continued assistance of the Appalachian Regional Commission.

It is indeed ironic that on the one hand President Reagan extolls the virtues of federalism and of decentralization, and on the other hand, he seeks to destroy the Appalachian Regional Commission, an agency that has been uniquely successful in working with States and localities in creating jobs for our citizens.

On the one hand, the President proclaims his patronage of American business while on the other hand he proposes the abolition of the Nation's premier industrial development agency. The President's program is wrong for southwest Virginia; ARC is still vitally needed.

For the 35,000 residents of southwest Virginia who are unemployed, the recession has not abated.

For their families, the trauma of unemployment and the uncertainty about the future remains very real.

For small businessmen and women, who depend on local patronage and who have contributed so much to the community by extending credit and by helping families in need, the crisis continues.

Perhaps America has grown tired of bad news about the economy.

Perhaps the President hopes we will forget the devastating impact of his economic program.

No, Mr. President, we cannot forget. Unemployment remains the No. 1 economic problem in southwest Virginia and throughout the country.

No, Mr. President, we can not close our eyes and wish the problem away.

This Congress has a responsibility to provide relief to the jobless, to assist with health care and mortgage payments, to enhance job training and to stimulate job creation.

□ 2010

Mr. WISE. I thank the gentleman from Virginia.

I yield to the gentleman from Texas (Mr. ORTIZ).

Mr. ORTIZ. Mr. Speaker, I would like to congratulate the outstanding leadership that the gentleman from West Virginia (Mr. WISE) and the gentlewoman from Ohio (Ms. KAPTUR) have been able to exhibit.

Many reports indicate that the economy has taken a turn for the better. While this might be true at the national level, there are many pockets of unemployment where the economy has not improved. In fact, in some of these cases the economic situation is deteriorating, which, in turn, effects a chain reaction diminishing the quality of life for large numbers of people.

I represent the 27th District in Texas. This extends from Corpus Christi south along the gulf coast to Brownsville. In general, our economy revolves around fishing, farming, petrochemicals, and port-related activities with the Brownsville area more dependent on tourism and retail sales. The difference between these two major cities in my district—the two cities are 150 miles apart—is dramatic. While the unemployment rate in Corpus Christi is at near-record levels at 10 percent, the unemployment rate in Brownsville is a crippling 17 percent.

The border town of Brownsville has suffered incredibly with the peso devaluation. Before the devaluation in December 1981. At the height of the Christmas shopping season, over 800,000 Mexican nationals crossed the bridge to spend their pesos in Brownsville and surrounding communities. At Christmas last year, the figure had declined by over 200,000.

Let me give you an example of what has happened to a particular store. Revenues from a major department store have declined from $24 million in 1981 to $5 million in 1982. Just imagine the number of people laid off, the stores that have had to close.

In March 1982, in the Brownsville-Harlingen-San Benito area, the Texas Employment Commission reported that there were about 9,100 people unemployed and still looking for work. One year later the number of unemployed went from 9,100 to 15,100; this is a phenomenal increase of 66 percent.

These problems create others. For example, the revenue from sales taxes are down 43 percent. Specifically, in Brownsville, the city budget had to be cut from $27 to $25 million due to this decline. We all realize that city services, which are essential to meet basic human needs, have to be cut. Adding fuel to the fire is the fear that the situation will continue to deteriorate.

For just a moment, travel with me outside my district up the Rio Grande to Laredo. There the unemployment rate is a staggering 27 percent, and some 600 businesses have closed since last August. The city manager of Laredo has indicated to me that there is nothing on the horizon to improve the situation. He is begging for Federal help.

In every case, we must recognize that the quality of life has suffered. People simply do not have the money to buy the food they need, and to pay their medical bills.

How long will we continue to ignore these problems? How long will we continue to ignore the human misery created by these problems?

Mr. WISE. Mr. Speaker, I yield to the gentlewoman from Indiana (Mrs. HALL).

Mrs. HALL of Indiana. Mr. Speaker, I do want to thank my colleagues from West Virginia and Ohio for this opportunity. I am one who comes from Indiana's First Congressional District, which extends around the southern shores of Lake Michigan and it includes the heartland of America's steel industry, where 25 percent of our people do not work.

I should point out that the people do not work through no fault of their own. These are people who constitute what is known today as the new class of poor people in America, people who would like to work, people who want to work, and people who constantly seek the opportunity to work. They are the ones who are suffering. They are the ones who would like to continue to contribute and be in the mainstream of American society.

When people do not work, they suffer. Today in America suffering has taken on many forms. Many of these people are suffering as a result of unemployment. We know that when people do not work, social problems develop and they exist in far greater numbers than when people are working.

The most popular question I am confronted with in Indiana's First Congressional District is, "Mrs. HALL, can you help me get a job?"

I feel that in the most affluent country the world has ever known, where we enjoy the highest standard of living, if we are working and making a decent wage, there is no reason to have so many who want to work, who can work, and who are able to work, to suffer.

In my district, I am constantly confronted with mortgage foreclosures. Good people who would like to have a home, people who have worked extremely hard to provide a home for their families, find that they can no longer afford it.

Recently here in the House of Representatives, we adopted legislation to provide foreclosure assistance to those who were confronted with such a crisis, only to find it has not moved through the U.S. Senate.

In a district with high unemployment, we have a lot of potential students who have the skills and ability to seek higher education, who cannot do so because their families cannot afford for them to do so.

We have a high divorce rate.

We have a lot of mental illnesses.

We have many other crises which normally would not result in middle-class people.

I say tonight in the United States of America it is time for this Congress and the President to team up as partners and seek a solution. Unemployment is not in the best interests of anybody. If we want to have a prosperous society, if we want to continue to reign as the most advanced country in the world, we have to think about those millions of people who are suffering in the First District of Indiana and throughout these United States.

I rise tonight to join my colleagues in bringing an important message to Congress: that unemployment is still the most serious problem facing America today. I also commend my colleagues, particularly the members of the West Virginia delegation, for their efforts in focusing attention on this critical problem. I want to tell you how unemployment has affected the citizens of Indiana and of the deteriorating conditions in the First District of Indiana, which brings me to question whether a strong economic recovery is really beginning.

Indiana has in excess of 285,000 unemployed, or an overall seasonally adjusted percentage of 11.4. About 26,000 of these unemployed were the direct result of plant closings in the steel and automobile industries and are costing the State more than $100 million per year in unemployment benefits and lost State income taxes.

In the First District of Indiana, which is a highly urbanized, heavily populated, and industrial area in the northwestern corner of the State, unemployment in Lake and Porter Counties in April 1983 was 44,300. Unemployment in the Gary-Hammond-East Chicago area ranged from 15.2 to over 21 percent over the past 12 months, with a current level of about 21 percent.

The steel industry accounts for much of the industrial base and many of the jobs in northwest Indiana, and in recent years has experienced its worst economic conditions since the postwar period. In northwest Indiana:

First, Inland Steel laid off 2,000 of its 22,500 employees at its East Chicago mill, with another 3,000 to 4,000 employees working short weeks;

Second, American Steel Foundries East Chicago plant experienced a 30-percent decrease in unemployment at the end of 1982;

Third, Midwest Steel Division of National Steel Corp. reported that its plant operated at 75-percent capacity with 20 percent of its employees on layoff; and

Fourth, Bethlehem Steel announced its closure of tin mill operations at Burns Harbor in June 1983.

The Budd automotive plant at Gary and Pullman Standard of Hammond also closed their facilities.

Northwest Indiana saw its reliance on the metal industries result in the loss of one of every six jobs by the end of last year. Many of these layoffs in turn affected service industries dependent on steelworkers' and automobile workers' paychecks. Overall, approximately 30,000 steelworkers in northwest Indiana and south Chicago lost their jobs. Although the State of Indiana was recently ranked as the Nation's top steel-producer, its steel mills produce a third less than they did 5 years ago. Steel industry analysts predict that even with economic recovery, the industry will never return to its former strength. In any case, it is commonly acknowledged that the industrial sector will share much less in an economic recovery than has previously been the case.

Unemployment has many other devastating effects on the citizens of northwest Indiana. Many individuals have been unable to sell their homes for cash and have eventually sacrificed mortgages and self-esteem. Many ex-

hausted their life savings, investments, and unemployment benefits. For others, unemployment meant crime, divorce, alcoholism, child and spouse abuse, and many other social problems.

Most people in the First District desperately want to work. Many of them represent "dislocated" workers—those on the unemployment rolls because their jobs have disappeared. Unlike welfare recipients and other long-term unemployed, these citizens have settled in northwest Indiana, are registered voters, pay taxes, and are active participants in their communities. They constantly approach me—not asking for handouts but for assistance in locating work. Unfortunately for some of these citizens, they may never be rehired, even after retraining, because of health and pension considerations.

The Job Training Partnership Act, effective in October of this year, may provide some relief for retraining needs and for some dislocated workers. It is questionable, however, what the success rate of the business community will be as it assumes the prime responsibility of placing the unemployed into a shifting and somewhat unstable labor market. The funds provided for dislocated workers are not enough to extend to all the unemployed in this category who are in need.

It is my belief that Congress has taken only tiny steps toward attacking the overall problem of unemployment. There are many legislative initiatives and suggestions to aid unemployment and the economy: One, directing moneys toward labor-intensive infrastructure needs; two, proposals protecting industry from imports; three, encouraging domestic exports; four, providing health insurance; five, emergency mortgage foreclosure assistance; six, proposals aiding education and immigration problems—but there is an imminent danger that these policies may not be implemented if Congress loses sight of the fact that curing unemployment must remain our primary goal.

And 44,300 unemployed citizens in the First District of Indiana is reprehensible. Our role as Members of Congress is to remedy that situation.

Again, I would like to thank my colleagues for this opportunity and I am hoping that all of us will join together to seek a solution to that great suffering circumstance that we are confronted with today, unemployment for Americans.

UNEMPLOYMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio (Ms. KAPTUR) is recognized for 60 minutes.

Ms. KAPTUR. Mr. Speaker, I will defer my own remarks and, as a courtesy, allow other colleagues to speak first.

I would like to call upon our most distinguished and enlightened colleague, the gentleman from Illinois (Mr. SIMON), and I yield to him.

Mr. SIMON. Mr. Speaker, I thank my colleague, the gentlewoman from Ohio, and I thank my colleague, the gentleman from Tennessee, both of them, for their leadership on this whole discussion.

I slipped into the cloakroom back here for just a few minutes and I heard the President of the Unites States say in the press conference that the economy is beginning to sparkle.

I welcome any improvement in the economy and I speak not as a partisan when I say to the President, I wish you could come with me to any one of my 21 counties:

Alexander County, 23.1 percent unemployment.

Franklin County, 22.6 percent.

Gallatin County, 23.5 percent.

Hardin County, 23.9 percent.

Pope County, 20.6 percent.

Union County, 20.5 percent, and I could go on. I have only one county that is below the national average on unemployment.

Mr. Speaker, at this point I will insert some other tables here in the RECORD, as follows:

It is not just simply statistics. Let me tell you about a little town that my colleagues from Ohio, New Mexico, Georgia, and Indiana have not heard of, Elizabethtown, Ill. I was down there for my open office hours and one of the men that came in, maybe 40

years old, was Ervin Price. He and his wife, Linda, came in. He has been out of work for a year. He is on welfare. Illinois welfare is among the more generous welfare systems, but he figures it averages $1.75 an hour for him. He said he is desperate for a job. He has three children, 15, 13, and 10.

I said, "If I could get a part time job for you in Harrisburg, Ill., which is about 30 miles away, could you get there?"

He said, "I would get there somehow. I might have to hitchhike. The tires on my car are so bad, I don't know if I could make it home."

It happened to be a cold day when I was there and I asked him, "How do you heat your house?"

And he said, "We bought a secondhand wood stove and my wife and my kids and I go along the highway and pick up wood."

That is real life for real people in the United States of America today. It is not simply statistics that we see.

Somehow, we have to respond. We have to respond and I have a long list of statistics of people who have run out of benefits in my district. We have 3,732 coal miners out of work in my district.

My staff—I would like to take credit myself, but my staff did the work on this—they took the manhours, the person hours, I should say, to my distinguished colleague, the gentlewoman from Ohio, the person hours in each county and said, "What could you do if you simply applied all this to building sidewalks and highways?"

You end up with 129 blocks of sidewalk and 138 blocks of street or highway in Alexander County.

You go all the way through St. Clair County, you could do in 1 month—these are monthly figures—2,063 blocks of sidewalk; 2,201 blocks of streets, if we started using people constructively.

In closing, what we have to do, I say to my distinguished colleague, what we have to do is to somehow turn the liability of unemployment into an asset.

About 50 years ago, this country made a decision that we are not going to let people starve anymore. Now we have to make another decision. Are we going to pay people for doing nothing or are we going to pay people for doing something?

I think it makes infinitely more sense to pay people for doing something.

I think one reality has not hit this Congress yet, and one of these days I think it will hit us, and that is that unemployment is going to be a permanent phenomenon in our country. I wish that were not so. I think it is the reality.

The reality is the demand for unskilled labor is going down. The pool of unskilled labor is going up and that means we have a permanent problem. We can live in the land of make believe that just around the corner the private sector is going to provide enough jobs and there will be no more unemployment. As one who used to be in business myself, I wish that could happen. It is not going to happen.

□ 2020

So what we have to do as a nation I think is to find much more constructive answers than we have. We have to find better answers than just telling people you go home and sit at home and do nothing. That is no answer for them. It is no answer for the taxpayers.

I think the answer is doing some exciting things, letting people become part of our society, letting them teach people who do not know how to read and write, how to read and write, having day care centers, planting trees, doing the things that can make yours and ours a better country.

I hope one of these days we move in that direction, and I commend my colleague from Ohio and my colleague from West Virginia for their leadership in putting this together.

Ms. KAPTUR. I would like to thank my distinguished colleague from Illinois who has spent so many hard years working on these tough issues and now, after all of those years, facing a situation in this country where conditions are probably as bad as they have been since the Great Depression. To see you still fighting is truly an inspiration to all of us, including the new Members.

Mr. SIMON. I thank the gentlewoman.

Mr. RICHARDSON. Mr. Speaker, will the gentlewoman yield?

Ms. KAPTUR. I yield to the distinguished gentleman from New Mexico.

Mr. RICHARDSON. Mr. Speaker, first of all I would like to commend the gentlewoman from Ohio and the gentleman from West Virginia for putting together this special order on so very timely a subject.

Mr. Speaker, we continuously hear reports the economy is recovering. Many key economic indicators are pointing up. But the unemployment rate, the indicator that measures human suffering, remains far too high. Too many Americans are without work, and until they are employed, we should stop the celebrations about recovery.

The unemployment rate has fallen slightly over the past few months. But what goes unnoticed is the employment rate, those who have a job, has not risen as fast as unemployment has decreased. What can account for the shruken labor force—discouragement. Millions of Americans have lost their most precious resource—hope. They have quit looking for jobs because there are simply none to be found. They look to their Government and find little reason to be encouraged.

Mr. Speaker, we did enact an emergency jobs bill a few months ago and I strongly supported this legislation which will provide roughly $8.5 billion for the creation of new jobs. But we can't stop now and just wait for the economy to improve. We must take affirmative action to restore hope and confidence in those who have been left behind by this cruel rescession.

The recovery may be underway on Wall Street, but it hasn't touched main street in the small towns and villages in my district in New Mexico. We are still suffering from an unemployment rate of 10 percent. More than 8,000 miners have lost their jobs in New Mexico over the last year. Manufacturers now operate their factories with 800 fewer employees than a year ago. And native Americans and Hispanics in my district have been especially hard hit by the recession. Unemployment on some Indian reservations is roughly 80 percent. The unemployment rate among Hispanic Americans was 13.8 percent in May—much higher than the national average.

These unemployed workers yearn for a job. They want to work and provide for their families. They resent, as I do, hearing their President proclaim economic recovery when they are struggling to survive. The unemployed in my district are tired of waiting for prosperity to trickle down to them. They want action. But the President has created the dangerous perception that the economy is better and the unemployment problem will take care of itself.

Mr. Speaker, I see things differently than our President who seems unconcerned with the plight of those who are suffering as a direct result of his policies. I will continue to advocate and support programs to put New Mexicans and all Americans back to work so that we can realize true economic recovery.

Again, I wish to thank the gentlewoman from Ohio for her leadership, not just on this issue but on the issue of the budget and taxes, on foreign policy and many other things on which this country desperately needs leadership.

Ms. KAPTUR. Mr. Speaker, I thank my colleague the gentleman from the great State of New Mexico, for pointing out to all of us how deep and how widespread the unemployment situation is in our Nation, affecting all ethnic groups in every corner of the Nation.

Mr. McCLOSKEY. Mr. Speaker, will the gentlewoman yield?

Ms. KAPTUR. I yield to our distinguished colleague the gentleman from Indiana.

Mr. McCLOSKEY. First I would like to commend the distinguished Repre-

sentative from West Virginia (Mr. WISE) and also the distinguished Representative from Ohio (Ms. KAPTUR) for their tremendous contribution in putting together this special order tonight.

I think it is very significant that this is going on while the President of the United States has recently spoken. I would hope that perhaps in our continuity or continuous efforts and energy tonight we can receive a small bit of the attention for this issue that he will receive tomorrow with the American people.

I would like to say that it is obvious that the two Members that put this presentation on tonight, the gentleman from West Virginia, Mr. WISE, and the gentlewoman from Ohio, Ms. KAPTUR, are two of the more talented people in the Congress, and particularly the freshman class.

I might say, as to Ms. KAPTUR, I was recently talking to a Republican Chamber executive from her district who commended her wholeheartedly on her attention to the economy and the concerns of all of the people of her district. She could not speak highly enough of Ms. KAPTUR.

The recession has not ended in the Eighth District of Indiana. New unemployment claims increased last week. Counties in my district still have unemployment rates of over 15 percent. This is not prosperity.

Last Thursday, a major department store chain opened two branches in Evansville; 360 new jobs were advertised; 3,200 people applied. This is not prosperity.

In my district, coal miners still bear the brunt of the recession; 38 percent of coal miners in Indiana are unemployed. Last year that jobless number was 21 percent. Today, many miners are working only 2 or 3 days each week, in 7-hour shifts. This is not economic recovery.

One miner told me that when his friends first find out that they have been laid off, some worry first about their children's college education. But soon they must think about the financial obligations of the here and now. They may sell the car to meet house payments. But that may not be enough. They become threatened with mortgage foreclosures. Unpaid light bills mean darkened homes. Mr. Chairman, this is not economic recovery.

And the miners do not want to go to work in Hills Department Store. They want to dig coal.

In Evansville, directors of the miners relief fund, the Salvation Army, Catholic Charities, Hope, Inc., and Community Action programs all report that this year their clients are people who have always worked before. They are people who find it embarrassing to rely on charity. Often they do not know how to find or use charities they have contributed to in the past.

For the unemployed, the basic problems of food, shelter, and utilities are especially severe. From Bloomington to Evansville, sources of assistance are becoming scarce.

Utility costs in Indiana increased 40 percent this winter. Unpaid electric bills of $800 or $900 are not uncommon. Pigeon Township in Evansville has had to limit its utility relief to $250 per family. Even in the warm weather, jobless Hoosiers cannot afford their utility bills this year.

Those who can pay their light bill may not be able to keep up with their mortgage payments. Banks in the district are increasingly reluctant to defer foreclosure. Yet the need for mortgage relief has never been so great. Last year Hope, Inc., of Evansville, helped 45 families a month save their homes. This year 75 families a month come to the agency for the same sort of assistance.

Perhaps even more disturbing is the reappearance of hunger, the indecent consequence of recession in a land of plenty. A school nurse told me that her most common complaint from children this year was stomach aches; hunger. How can we stress education and expect a hungry child to be alert, bright, and creative? A minister in my district told me of babies suffering from malnutrition because their parents are watering down the formula to save money. Mr. Chairman, this is certainly not prosperity.

This is June 28, and we are in what the charities call the "Fourth Week Syndrome." This means that at the end of the month in the eighth district of Indiana:

The Salvation Army in Evansville used up its United Way allotment for June over 1 week ago.

Food stamps have run out for many families.

Facing a 500-percent increase in demands over last year, Catholic Charities, for the first time in its history, has run out of money for some programs. It has canceled its important transportation program, which gave people enough money to get to another town to look for work.

Construction workers in Evansville do not have enough money to pay for gas to drive to Vincennes, where a few road work jobs just opened up. Vincennes is only an hour away from Evansville.

Our problems will not disappear simply because interest rates briefly dip or because Congress passes a series of jobs bills. The Indiana labor force is competing in an international marketplace, without adequate support—in trade policy, monetary policy, tax policy, transportation policy, or education policy. Today, unemployment is over 10 percent nationally. I do not find this figure comforting. I do not believe that about 12 million people are expendable, or should be called surplus labor.

Mr. Chairman, this is not prosperity. I invite the President to come to the Eighth Congressional District and tell us that this recession is over.

□ 2030

Ms. KAPTUR. Mr. Speaker, I would like to thank our distinguished colleague, the gentleman from the State of Indiana, for his insightful remarks and leadership on so many issues on behalf of the people of his State.

I now yield to our distinguished colleague, the gentleman from Oklahoma (Mr. WATKINS).

Mr. WATKINS. First, I thank my colleagues for holding this special order on unemployment, the need for jobs in America.

You know, I serve as chairman of the congressional rural caucus and many of the people from rural America across this great Nation. I do because of a strong personal feeling I have from what happened a number of years ago. Some people have not taken time to read, reflect, and feel the fact and meaning of the book "The Grapes of Wrath," by John Steinbeck. As a youngster I was one of the young people not once, not twice, but three times with my family who had to leave Oklahoma and worked our way to California, picking cotton, cutting grapes, picking up potatoes, in search for a job. My family worked as welders in the shipyards and saved money to return to Oklahoma.

We actually did not know we were poor because we left rural America and went to Oakland, Calif., to live in a third floor apartment where we had running water. We did not have running water in rural Oklahoma and in rural Arkansas. I would like to point out to my colleagues: During that period John Steinbeck wrote about throughout the thirties, forties, fifties, was the largest migration and movement of human beings ever recorded in the history of our country. The people moving to the large urban centers of this country in search for a job. They were not moving because they wanted to, but because they had to, in the search of some type of a job to support their families. That is what bothered me last year when President Reagan said during a time of great unemployment: "if the people do not like this situation, they could vote with their feet." He said basically said they could move with their feet. You know, it is quite disturbing to me when I realize that people have not understood that disastrous feeling, the turmoil, the great friction created in the hearts and the lives of a lot of people when they lose a job.

You know, for a President who talks about the value of the family, I do not

think he understands and realizes during a time of unemployment, there is not a greater loss of esteem that the father has, than when he looks at his children in their eyes and says: "You have to do without because your daddy does not have a job," or "We cannot have adequate food or shelter because daddy is out of work." If he does realize, and does nothing, it is even worse. Every minister will tell you that the No. 1 reason for divorce in this country happens to be finances, unemployment, the lack of the means to provide adequate finances. And because of the lack of a job we also have a greater record number of families that are breaking up and going their separate ways. I think that is a tragic situation that is occurring because they need the job to be able to support their families.

Let me add, after this great movement of the people leaving their roots and going to areas to find jobs, our country, in the time after World War II, saw fit to write the Marshall plan to rebuild Europe; 20 years later they wrote a massive urban renewal program to try to help the urban cities. Our President is talking about the economic problem in South America and Central America and is proposing the Caribbean Basin program to help these people. I wonder if he does not understand that in my district, and many other districts, unemployment is creating undesirable attitudes toward the countries leaders. I know in my State we have unemployment at the highest rate it has been in years.

Even though Oklahoma as a State has done fairly well, in the chronic area of the rural depressed southeast Oklahoma, the tip of the Ozark region, I have had double-digit unemployment not just this year, not just last year, but for several decades.

In fact, since 1920 in every single county of the former district I represented at least 50 percent of the people left during the time of 1920 to 1970. Some of them retired and have come home between 1970-80.

That is why I am even for the Enterprise Employment and Development Act that the President proposes. I think we as Democrats should do everything we can to try to build jobs, whether it is proposed by the President of the United States or some congressional leader from the other party. I am cosponsor of the Enterprise Employment and Development Act, and I ask all my colleagues to become cosponsor of this bill and do everything that is necessary to build those needed jobs.

In my district today, 14 out of my 20 counties have unemployment above the national average. Coal County, a county that saw 68 percent of its people migrate out in the last 50 years, has 19.3 percent unemployed; Latimer County, 18 percent, Pushmataha County, Choctaw County, 17 and 14 percent, respectively, Hughes County, which lost one of its last major industries, has 17 percent unemployment now, Atoka County, 11.5 percent, Le Flore County, 11.5 percent and McCurtain County, over 11 percent. You know, just as bad as unemployment or nearly as bad is low-income economic conditions of our families.

In my area of the State of Oklahoma in a number of the counties I just named happens to be between $4,500 and $5,000 per capita. Family median income is somewhere in the neighborhood of $10,000 or so. I do not know how they can survive and make it on that. The gentleman from Ohio told the reason why he was a Democrat. You know, over the years things have been good in my lifetime. I think Ronald Reagan's policies has probably made me understand more why I am a Democrat than ever before in my life. I probably have a greater understanding why I am a Democrat. Under this administration, budget and tax program, there has been over $20 billion in budget cuts taken from the low-income citizens with less than $10,000 income.

In other words, those people who have $10,000 or below in median family income, received $20 billion in budget cuts. What happened to the tax cut? The families with $80,000 or more in income have received $59 billion from that tax cut benefit. So, what I am saying is the more wealthy families have received great benefits from the tax cuts, at the same time the families in the lower income level have also received the budget cuts which puts a greater strain on them. I would like to ask: "Who has Ronald Reagan taxed?" Remember, he has had a tax program. Do you know Ronald Reagan has taxed many of the lower income citizens? Ronald Reagan has taxed the little waitresses who have to pay withholding for their tips and most of them in my district do not receive 8 percent in tips that they have to pay on the gross amount of the food or meal that a customer purchases. Many of those waitresses are just trying to make minimum wage, but they are taxed today under his program. The small, independent truckers in my State of Oklahoma, who haul grain, cattle, and so forth, did pay approximately $250 a year in taxes on the trucks last year. Today, after the tax program, pushed through by Ronald Reagan, they are going to be paying, approximately $2,500 per truck whether they move that truck to haul grain or leave it unloaded.

□ 2040

A 1,000-percent increase in their taxes. Many of them are shutting down that vehicle because they cannot pay those taxes. They are going somewhere else to try to find a job.

Now let us not forget the withholding on savings. It is well known throughout this Nation today, that withholding on savings program is basically hitting those people who have the least opportunity to pay. This withholding tax is Ronald Reagan's program at trying to get to a few. Furthermore, let us not forget the 5 percent tax on gasoline. Every man, women, and child that drives a car or truck to work have to pay that 5 cents more. Those are the low-income working people or many of them unemployed, driving in search for a job. They have been taxed more and have to pay more. They are not wealthy but some of the lowest income families in America.

Let me say, there is one thing that this administration has created. Let there be no mistake about it, there is deep emotional concern for fairness and equity for the people of this country. Yes, there is one thing that this administration has created, without a shadow of a doubt that is not debatable, and that is the fact there has been created a greater division, and wider gap between the rich and the poor, the affluent and the less affluent. I think this is something that we must solve. We must address that fact with jobs because jobs are the key for holding our families and our country together. A deeper and wider division could result in a revolution in this country. In search for fairness and equity in the basic necessity of a job.

Ms. KAPTUR. Mr. Speaker, I would like to thank our colleague, the gentleman from the great State of Oklahoma, especially for his remarks regarding the impact of unemployment in the rural areas of our country. No other speaker has highlighted it to the same extent, and I think he has made a tremendous contribution to the record which the American people will be listening to tonight and reading in the newspapers.

I yield now to the gentleman from California (Mr. TORRES).

Mr. TORRES. Mr. Speaker, I wish to thank my colleagues who have requested this special order on unemployment. The President in his press conference commented on an economy that is starting to sparkle. Indeed we trust this is a large measure of hope. Mr. Speaker, today is a time of hope, but also fear and desperation. Hope is the product of improving economic indicators—inflation remains low and housing starts are going up. Fear is the result of the economist's reminder that even if the auto and steel industries rebound to prerecession levels, many thousands of laid-off men and women from those industries will never be called back to work. And desperation is what is left for those who

today remain unemployed after so many months.

The Nation's industrial base is shrinking, and as it contracts the 11 million unemployed stay unemployed; the 6.1 million people underemployed continue to seek full-time work, and the 1.8 million discouraged jobless continue to sit idle.

Mr. Speaker, the 34th Congressional District in California, which I represent, is located in the southeast area of Los Angeles County. The people who live in cities such as Norwalk, Pico Rivera, West Covina, Baldwin Park, and the district's other communities are hard workers who leave their homes before sunrise to travel to the auto and steel plants in the area. These are the people whose hands work the machines at the aerospace corporations and drive the nails to construct new buildings. And these are the people who own the small businesses that sell the products that their neighbors help make.

Mr. Speaker, many of the people living in California's 34th District today rise in the morning only to stand in an unemployment line. The unemployment rate is 14.6 percent in Baldwin Park, 13.1 percent in Pico Rivera and South El Monte, 10.2 percent in La Puente and 11.7 percent in Norwalk. The unemployment rate continues to increase—not decrease—in these communities.

These many thousands in my district are unemployed because this Nation failed to define an industrial policy that offered a careful, coordinated program to rebuild industry and put people back to work. The rise in unemployment in this Nation is not a story of undocumented people taking the jobs away from citizens. Rather, unemployment is the result of two decades of imports rising faster than exports, corporations taking their profits to low-wage nations abroad, and long-term planning taking a back seat to short-range gains.

In the last two decades, imports of electrical components rose from 1 to 20 percent, imports of apparel items rose from 2 to 41 percent, imports of metal cutting machine tools rose from 3 to 31 percent, imports of cars rose from 4 to 28 percent, and imports of consumer electronic products rose from 6 to 95 percent. I repeat, in the last two decades.

Mr. Speaker, the people in the 34th district demand change. We, in Congress, must listen to our constituents to get America working again. Consider the words of Wayne Allen, unemployed, of Norwalk in my district.

Mr. Allen remarked that "even in elementary school, you are always taught to plan ahead. I wonder why the Government has never planned for the economy." Mr. Allen tells us that governmental job-retraining programs should be in place to train Americans for technological innovations. I agree with Mr. Allen.

And let us listen to our Governors who deal daily with their States' unemployed. At a hearing before the Subcommittee on Economic Stabilization on which I serve as a member, Gov. James Blanchard of Michigan argued in favor of a national strategic planning board so that the private sector, the labor unions, and the Federal, State, and local governments could coordinate economic policy, and determine how best to target economic development resources. This is a policy that makes sense to me.

And let us listen to the Nation's scholars such as Robert Reich at Harvard University. Mr. Reich recommends that the Federal Government establish regional banks to provide low-interest, long-term loans to promising industries within a region. He also recommends that 15 percent of employee pension funds be invested, either in the form of equity or long-term debt, in regional development banks where employees reside. These are suggestions that deserve serious examination.

Mr. Speaker, once again we hear the calls of the frightened, the talented, the poor, the working, and the small business people of this society. Once again, we search for a policy that can bind our Nation together on principles of economic justice, individual dignity, and security. I hope that we in Congress and the President can strengthen the Nation's industrial base and modify its trade policies to create an economy of abundance and employment for all Americans. I hope that in my district, unemployment rates will fall and workers will begin feeling hopeful rather than desperate.

□ 2050

Ms. KAPTUR. Mr. Speaker, I thank the distinguished gentleman from California for his remarks. I know that the gentleman has extensive experience in one of America's most basic industries, the automobile industry, and has travelled extensively. The gentleman's comments will make a tremendous contribution to our record here this evening.

Mr. Speaker, I yield to the gentlewoman from California (Mrs. BOXER).

Mrs. BOXER. Mr. Speaker, I would like to thank those who organized this special order.

Mr. Speaker, I come before you today at a time when unemployment is said to be at 10 percent. The Reagan administration is proud to say that unemployment is down from 10.8 percent to its current levels and they take credit for the drop. They do not take the blame for the 3 to 4 percent increase in unemployment which took place since they took over.

And the 10-percent figure is not telling the whole truth. It does not tell you about the 1.5 million Americans who want jobs but have given up looking for work and are excluded from the "official" count. It does not tell you about the 5.5 million workers seeking full-time employment but who are forced to accept part-time jobs. It does not tell you of the shattered hopes and dreams, the loss of confidence, the permanent scars.

What is the result of this situation? Every cause has an effect. The effect is that for the first time people do not believe that they can improve their lives. For the first time, Americans do not believe that their children will be better off than their parents. For the first time, malaise has settled over the land, and it is causing people to despair that things will ever be better.

We, in this body, have passed legislation to try to alleviate the situation. However, today I want to call your attention to a byproduct of this crisis that certain Members of this body and the entire administration have exploited and used to their advantage.

The administration has met this crisis not with optimism but rather has tried to undermine the American dream—the belief that things can get better. In place of the optimism that full employment is a goal to go after, the administration has introduced the politics of retrenchment and selfishness, preying upon public pessimism and successfully blaming economic decline directly on those unemployed victims and the programs which are needed to assist them. Rather than reaching out to aid the jobless, Americans are being encouraged by this administration to pull back, to protect their past gains, to turn a deaf ear to their unemployed neighbors.

The most lasting legacy of the Reagan administration may not be its mismanagement of the economy, but its pernicious efforts to destroy public faith in the compatability of prosperity and a compassionate society.

Instead of a policy of government for people, the Reagan administration has used a crisis it created to convince the employed to be concerned only for themselves. (It was only after prodding, cajoling, and picketing that our President, agreed to phase I of a jobs program.) A 40-year belief that their Government should be an agency of relief in tough times has been trampled by an administration that used high unemployment to fight inflation then used unemployment to bludgeon social programs and social attitudes.

And the irony of all of this is that unemployment is the biggest cause of the deficit—$30 million for each 1 percent. The Reagan administration's policies of high unemployment have brought us a $90 billion addition to the Federal deficit.

I believe in the American spirit. I believe that an injury to one in our society is an injury to all.

I thank my colleagues for arranging this special order so that we can speak out to those who need our help and tell them they are not forgotten and that we will strive to assist them for the good of all of us.

Ms. KAPTUR. I thank the gentlewoman from California, whose district is very far away from my own and from many of the rest of the Members who have spoken this evening, but who has been a leader with new Members on behalf of all issues of conscience for the country. I thank her for waiting this evening to participate in this special order with us.

Mr. Speaker, I want to reiterate some of the remarks of other Members here—is it not coincidental that, at the time the Reagan administration is holding another one of its press conferences on television, we keep this body in session in order to deal with a major social problem facing our Nation? I am overwhelmed by the response of our colleagues who have taken time out of an extremely busy week to remain here long after most everyone has gone home, to be a part of the voice for the American people who desperately need it, to be a voice in this body, in our beloved House, for the social conscience of the Nation, at a time when that conscience seems to have disappeared at the other end of Pennsylvania Avenue.

I also applaud the leadership of the House for permitting and encouraging this special order to discuss the most urgent problem confronting our Nation—the historically unprecedented number of Americans out of work, and out of work for prolonged periods of time.

I have taken to the floor on numerous occasions on behalf of the unemployed because I believe their idleness is a tragic waste of both the human spirit and economic resources of this nation. It is a waste that an enlightened Nation such as ours should not tolerate. The resultant strain on our Nation's social fabric is something worthy of our deepest concern.

To those in this administration who have been spewing forth economic jargon attesting to the robustness and breadth of the economic recovery flourishing across this Nation, I say, let them tell it to the more than 50,000 people out of work in the greater Toledo area in northwest Ohio. Tell it to 1,500 glassworkers, nearly 5,000 teamsters, more than 7,000 autoworkers, hundreds of railroad workers, shipping and dock workers, and the thousands of building and other trades people in my district who have been laid off over the last 2½ years. Many have little hope of ever getting their jobs back. Tell it to the thousands of small business people who have watched their dreams destroyed because of bankruptcy. Mr. Speaker, our unemployment rate lingers at 13 percent, for the more than 50,000 unemployed people in the greater Toledo area, economic recovery is still a dream—one seemingly never to be realized without concerted and decisive action on the part of their elected officials.

It is especially distressing to me, as a representative of a district suffering from severe economic dislocation, to hear this administration crow about its economic record. It pats itself on the back each time new forecasts indicate that the economy is showing some signs of life. But I ask, should this administration really be pleased that, after grinding the economy to a halt and throwing nearly 5 million people out of work, a fortunate few are going back to work? Should anyone take pride in an economic program that has cost the permanent loss of tens of thousands of manufacturing jobs across this Nation? Should small business be made the victims of a movie studio economic program that sounds good but has no happy ending? Should the craftsmen of the Reagan economic program be proud of their product—more personal suffering, hardship, and misery than at any time since the Great Depression? And what do they propose for the millions of unemployed since no economist predicts unemployment will abate—not this year, not next year? Financial balance sheets may look better. Inflation may look better, the purchasing power of the wealthy may look better. But at what cost? And for how long must there people bear this cost? I know the victims. You know the victims. The Reagan program ignores the reality of human suffering. But this script can not be edited for convenience as some would wish. The facts speak loudly and clearly.

Mr. Speaker, the true economic indicators in this country are the words of the victims of this misguided economic program. Let me pass on to this administration the opinions of their economic program that come from America's heartland:

Dear Congresswoman Kaptur, I have a real problem. I'm unemployed and have been for over a year and a half. I've applied for over 300 jobs. Usually for every opening there are hundreds of able bodied applicants. For one job, I stood in line for 5 hours. I am mad. I am tired, I am scared. How will I keep the car we have, and make the payments on our mobile home. I am a skilled craftsman. And have gone door to door to find odd jobs, and even that has slowed down to almost nothing. If President Reagan thinks this depression is over, he's only fooling himself. We know that it's still here, and it still hurts.

One glassworker with 18 years on the job, who has been out of work for nearly a year wrote:

The recession is over and we are now in a depression. The trickle down theory (hasn't) worked too well, it has just trickled back down into the rich people's pockets.

One couple in my district wrote:

There are so many in our area without jobs who really need work. Our son is a tool and die journeyman. He has been out of work for over a year. He did go for a retraining test and he did pass the test but got a call that he was not eligible because his wife works part time. My neighbor has been laid off from his apprentice job for about 6 months now. There is no future for these young people without jobs. I could go on and on and there is just no end.

After reading of Ohio's triggering off of the Federal extended unemployment benefits program because of calculation changes included in the 1981 Reagan and Gramm-Latta budget, one of my constituents wrote:

How ridiculous and unfeeling can our own Government become? When I first read this article pertaining to the loss of unemployment benefits for the thousands of struggling Ohioans, I just could not believe it! Who can the 13 percent turn to?

A homemaker from Toledo recently wrote:

My husband has a job, but with nine members in our family we barely manage to get through each month. I can only imagine how difficult it must be for the unemployed. Please support any efforts to increase Federal assistance. People can't be allowed to go hungry—no matter how much it costs.

To those in this administration who have been blinded to reality by their own press releases, I can only echo Franklin Roosevelt's words in his first inaugural address, "Only a foolish optimist can deny the dark realities of the moment."

Mr. Speaker, I reject completely and unequivocally the Reagan social doctrine which calls for the unemployed to vote with their feet, leave their homes and their families behind in search of work. My constituents are hardworking people who love the part of the country they live in, as do I. They and those who came before them helped build the industrial might and health of this Nation and in turn helped secure the freedom and blessings of liberty we all enjoy. I will not turn my back on them in their time of need and will challenge, at every step, those who would.

This body has taken small steps to reaffirm our commitment to the unemployed. There is a great, great deal more to be done. Legislation is before us—now let us take every necessary step to see it through for those who depend on us as their last hope.

EFFECT OF UNEMPLOYMENT ON WELFARE ROLLS IN OHIO'S NINTH DISTRICT

More and more of the unemployed in Ohio's Ninth Congressional District are exhausting their unemployment compensation benefits and are faced with finding other sources of income besides employment or employment insurance programs. Some of these

long-term unemployed are turning to Government funding sources for assistance.

Fulton County in Ohio has had the largest increases in cases in the general relief assistance program and the ADC-U program. In the third quarter of 1982, the number of cases averaged around 120. From October to December of 1982, the number of cases increased by 145 percent—119 to 173 cases, respectively. The number of cases increased further in February to 208 cases, a 175-percent increase—almost doubled from October. By April of 1983, the number of cases had dropped somewhat—down to 185 cases. The ADC-U program increased roughly 128 percent from the October-December quarter to the January-April quarter. Food stamps, a nonwelfare assistance program, increased by 110 percent. Even some farmers are turning to welfare for assistance beyond the normal loan program available to them.

Lucas County has also shown increases in the use of social assistance programs. These increases are not as dramatic as those for Fulton County, but the outlook for the fall is gloomy if economic conditions do not improve. The welfare agency expects a large increase in the number of needy if conditions remain the same. For the ADC program there was a 110-percent increase in cases from February to April 1983 and no increase from April to May 1983. The increase in general relief assistance was approximately 102 percent from March to May 1983. The number of food stamp cases has remained stable over this time period.

The assistance rolls in the portion of Wood County in the Ninth District has remained fairly stable over the past few months. The lack of increase in the assistance rolls in this county could be due either to the lower unemployment rate in the area—about 10 percent, or to the increasingly tight restrictions on welfare eligibility which has eliminated the eligibility of many individuals' access to public assistance.

FULTON COUNTY

[Number of cases]

	1982			1983		
	October	November	December	February	March	April
ADC-U	75	69	71	96	88	92
Food stamps	629	657	668	726	720	703
General relief	119	124	173	208	188	185

LUCAS COUNTY

[Number of recipients]

	1983			
	February	March	April	May
ADC & ADC-U	11,371	12,218	12,467	(1)
Food stamps	8,696	(?)	8,405	(1)
General relief		8,808	8,896	8,970

[1] No change.

Mr. Speaker, I include the following Bureau of Labor Statistics data in the RECORD as reported in the National Journal regarding the duration of unemployment:

OUT OF WORK: GOOD NEWS AND BAD

Unemployment in America is declining, but that may not be much consolation for those who are still out of work.

Although the civilian unemployment rate dropped from 10.4 percent of the work force in January to 10.1 per cent last month the duration of joblessness rose from a median of 11.5 weeks to 12.3 weeks in May. That is one of the lingering consequences of the recession. A year ago, when the jobless rate was 9.4 per cent, the median duration was only 8.6 weeks.

The Bureau of Labor Statistics reports that two-thirds of the 11.2 million jobless have been out of work for at least five weeks, and 41 per cent 15 weeks or longer.

The table shows the total number of unemployed (seasonally adjusted) for the first five months of this year and for may 1982 and the percentage unemployed for various periods of time and the median duration of unemployment.

U.S. TOTAL JOBLESS

[In millions]

	May 1982	January 1983	February 1983	March 1983	April 1983	May 1983
Duration of unemployment:						
Less than 15 weeks	7.145	6.806	6.866	6.703	6.848	6.597
15 to 26 weeks	1.633	1.915	1.932	1.904	1.695	1.758
Over 26 weeks	1.633	2.679	2.703	2.793	2.757	2.834
Total	10.411	11.400	11.501	11.400	11.300	11.189
Median duration (weeks)	8.6	11.5	9.6	10.3	11.3	12.3

Mr. Speaker, I would like to have included in the RECORD an excellent report by the National Council for Employment Policy on "The Displaced Worker in American Society":

THE DISPLACED WORKER IN AMERICAN SOCIETY: AN OVERDUE POLICY ISSUE

A time bomb ticking away in the mind of every policy-maker should be the unknown number of laid-off workers in basic industries who will never be recalled, even when the recession at last loosens its chokehold on the economy. That those displaced workers are "out there" is now generally recognized. Although their precise number is unknown, the causes of their displacement are at least partly understood. The consequences have not been adequately probed. Solutions are immersed in dilemma. This policy paper seeks to provide both enlightenment and some modest proposals.

WHO AND HOW MANY?

These two questions are inseparable because the definition provides boundaries for the count. By the "displaced worker" term we mean those who (1) were previously employed in stable jobs with satisfactory pay and every reason to expect continued employment to retirement, (2) have been laid off with little chance of recall and (3) are unlikely to find new employment using their familiar skills at near their customary rates of pay. Stated that way, the burdened group is primarily operatives in capital intensive basic manufacturing industries. Well-paid operatives, when displaced, have nowhere to go except lower paid, more labor intensive (and less unionized) operative jobs, or into unskilled service work. Some craft workers as well as technicians and professionals whose skills are too closely restricted to declining industries may also prove to be part of the permanently displaced. Craft workers, even those in basic manufacturing industries, however, are more likely to possess transferable skills. With deep recession pervading the entire economy, displaced craft workers have few current alternatives, although some may be able to move to other industries when recovery occurs. White collar workers probably have skills sufficiently transferable to achieve inter-industry transition when recovery arrives.

If one used as surrogate for the number of displaced workers the number of operatives, craft workers and technicians from manufacturing industries unemployed 15 weeks or more, the resulting number would be over 3 million. Another approach is to look at the reasons for job loss to identify displaced workers.

According to the December 1982 BLS release, of the 12.0 million unemployed, 7.3 million had lost their last job. Only 2.5 million of these considered themselves to be on layoff with expectations of recall by their former employers and even for many of these the hope will prove illusory. In the broadest sense, if all those who have lost jobs to which they do not expect to be recalled are considered displaced, this would make the number of displaced workers close to 5 million. However, many of these 5 million would have held the jobs they lost for only a short time and many of the jobs would have been in the secondary labor market without lasting worth or hope of tenure. Whether or not the latter outnumber those futilely expecting recall is anyone's guess. Some estimates have limited

displaced worker status to those long-term unemployed previously employed in industries experiencing an overall long-term decline in the total numbers employed, an approach which reduces the number to about 1 million. Whatever the number one chooses, the problem is obviously of substantial magnitude.

THE CAUSES OF DISPLACEMENT

What is so different to make displacement a special concern in the 1970s and 1980s? Displacement is a continuous process in any dynamic setting. At any time, consumers are in the midst of changing tastes, populations are shifting locations, new technologies are replacing outdated ones, resource supplies are being exhausted, some businesses are dying from poor management and others are being born. But periodically that process intensifies. What is different now is the intensity of technological change and international competition. With the microchip, technology is cheap and getting cheaper. A reversion to capital intensity is a logical direction of movement. Only the combination of high interest rates and recession presently impedes that trend.

The nation's economy has also yet to fully absorb the oil shocks of the 1970s. A tenfold increase in the cost of the basic energy resource could not but cause major industry displacements which could only work their way slowly through the system. The "oil glut" has relieved the pressure but not returned the original energy cost relationships.

Even more unprecedented is the intensity of international competition. Industrialization has been a worldwide ambition since the second world war. Each nation yearns to pass beyond the dependency and subsistence incomes which are the lot of an uncartelized raw materials supplier. They begin with labor intensive industries such as textiles, clothing and shoes because people is their most abundant resource. But soon they tire of the low wages and seek to move up the capital intensive ladder to assembly operations and processing of their own raw materials. Advanced countries must keep running to stay ahead, the current sought after prize being described as high technology industries.

This, too, is an old pattern through which the U.S. has passed in its internal economic development. But now industrial capacity has outstripped the demand for industrial products. In 50 years the U.S. went from a potential domestic market wherein there were 20 people for every automobile to a supply of approximately one motor vehicle for every adult in the nation. The U.S. automobile industry could not expand its domestic sales appreciably even if it did not have to share its domestic market with its international competitors who supply one-third of the U.S. demand. The same can be said for steel, rubber, chemicals, refined petroleum products and other basic industries. Attempts to keep out foreign competition can restrict U.S. access to international markets and it is in the less-developed, low income third world that the potential exists for market expansion.

The volatility of that combination of expanding markets and overcapacity may create a situation in which the United States is at a relative disadvantage. The genius of American industrial expansion has been mass production. With a continental domestic market and a growing supremacy in international markets, U.S. industries could tool up to produce millions of identical items. Expensive capital equipment could be amortized into low unit cost for massive output. But mass production, to be efficient, requires not only large but expanding markets to absorb the results of technological change and increasing productivity.

The industrial operative has been a cog in that mass production machine. Trained and retrained rapidly on the job, the worker, too, could repeat a simple operation millions of times for high productivity and, often, high pay.

But a shared market with overcapacity cannot assure those long production runs. A diverse world population and the shifting fortunes of competition require more flexible production processes to meet changing demands. Computer-assisted design and manufacturing may be the leading edge of a shift from mass to batch production processes. Where once teams of craft workers were required to completely retool for model change, an engineer at a computer console with a stylus might sketch in a reprogramming which could occur almost automatically. Neither operatives or craft workers may be needed in the same supply.

THE DISPLACED WORKER IN SOCIETAL CONTEXT

The social implications are as profound as the economic ones. The United States has generally enjoyed reasonable social and political stability in a chaotic world largely because the average citizen perceived economic opportunity and social acceptance. In the years since the second world war, the unionized mass production industries have offered to many with limited education and no inherited wealth or status the opportunity to earn incomes and enjoy lifestyles through which they could consider themselves a part of the stable middle class. Central to that phenomenon has been the factory operative, surrounded by satellites of skilled trades and white collar workers who supported the production function.

For example, the worker accustomed to earning $12 to $25 an hour, buttressed by a favorable fringe benefit package, protected by seniority and a union contract, steadily employed for years and expecting to stay that way until a comfortable retirement. Laid off from the automobile, steel, rubber or other basic industries, what other comparable employment opportunities are likely to appear? The alternatives in the growing service sector for those with limited formal education and skill training pay nearer to the legally mandated minimum wage than to the accustomed negotiated scale. Multiple family workers may eke out something approaching the accustomed lifestyle but there may be social, psychological and familial consequences to frustrated expectations.

POLICY RECOMMENDATIONS

The displaced worker problem is a byproduct of a deep-seated and long-term restructuring of the world economy. There is much yet to be learned about problems, implications and solutions. Knowledge and experiences to date, however, are sufficient to support a few modest steps which can be usefully divided into short- and long-run approaches.

In the short run:

1. Incentives must be provided for employers to give to local labor market authorities advance notice of mass layoff or plant closing and to participate in a company/community planning process. Employers can be expected to cooperate to avoid unfavorable publicity and public relations and to sidetrack more punitive and obstructive legislative approaches. The State Job Training Coordinating Councils and Private Industry Councils of JTPA may prove to be persuasive recipients of such advance notice as well as useful loci for the planning. Amendment to the displaced worker title of that act, giving these entities the responsibility for seeking advance notice, augmenting the funding, eliminating the matching requirements for hard hit states and fully underwriting the costs of adjustment services the employer would not have provided and a portion of those which were an employer obligation may prove to be sufficient.

2. Federal legislation governing the funding and administration of unemployment insurance should be amended to:

(a) Shore up the funds of the states most heavily impacted by long-term unemployment and worker displacement, more equally sharing inequitably distributed burdens stemming from national and international causes.

(b) Require early assessment of the reemployment prospects of unemployment insurance recipients and formulation of a readjustment plan for those unlikely to be recalled or rehired in their customary occupation.

(c) Authorize continuance of unemployment insurance benefits while carrying out such an individualized readjustment plan, including retraining.

(d) Provide a federally funded limited extension of benefits for those successfully pursuing a promising readjustment plan requiring completion time beyond existing benefit eligibility.

3. The training needs of a displaced worker program may extend beyond the 26 week duration which became customary under MDTA and CETA in order to inculcate sufficient skill to come near to maintaining the earnings of a displaced industrial worker. Longer term training should be encouraged under JTPA's Title III. Also, for purposes of that title, JTPA's "window" of 10 percent nondisadvantaged will need to be widened because few displaced workers can meet those restrictive income requirements. However, meeting the challenge of global industrial competition will require more than retraining a few of the current work force. Something more like the magnitude of effort involved in the National Defense Education Act of 1958 may be needed to prepare the oncoming labor force for the growing international product market and labor market competition.

4. Relocation assistance should be explicitly authorized by displaced worker legislation to offset the long-term reluctance of political forces to endorse it.

5. The interstate clearance and job search training capabilities of the public employment service should be enhanced. In light of the budget restrictions of the past few years, added authority and upgraded and increased staff will be necessary to carry out the Job Service potential for individualized plans, for teaching job search skills, for referral to training and for facilitating relocation.

6. Over the long run, thought and study should be given to addition of a readjustment allowance to the package of payroll tax supported provisions of the Old Age Survivors Health and Disability program. Temporary joint employer-employee payroll tax contributions to accumulate an interest-bearing readjustment fund of a few thousand dollars for each employee has been suggested. Upon displacement without expectation of recall, the employee could draw

upon that individualized account for readjustment assistance. If never drawn upon, each individual's fund would become an individual retirement account. The concept is attractive but the current problems of the social security system, the regressive burden of rising payroll taxes and the administrative complexities require careful study before full endorsement.

7. Important as they are, displaced worker provisions are not enough. Retraining is of little help unless there are jobs to be trained for; relocation assistance requires a reasonably prosperous destination; short-term income maintenance assumes an imminent recovery. This is no place to explore the subject except to flag the need to design displaced worker policies within the broader context of economic recovery and long-term growth and economic development.

□ 2100

UNEMPLOYMENT

The SPEAKER pro tempore (Mr. TORRES). Under a previous order of the House, the gentleman from West Virginia (Mr. RAHALL) is recognized for 60 minutes.

Mr. RAHALL. Mr. Speaker, I yield to the gentleman from Illinois (Mr. DURBIN).

Mr. DURBIN. I thank the gentleman from West Virginia for yielding.

Mr. Speaker, tonight we are discussing a problem that has reached proportions unknown since the bleakest days of the Great Depression.

Though its economy is a mixture of agriculture and manufacturing, the 20th District of Illinois has not escaped this crisis. On the contrary, the numbers coming from central and western Illinois tell an all-too-familar story.

Along the Mississippi River in Adams County, 15.2 percent of the work force is unemployed, idled by plant closings and an economy that is immune to the smooth promises of recovery delivered by this administration.

To the south in Calhoun County, a place of breathtaking natural beauty, more than 23 percent of the work force is out of work. At the eastern end of the district, historic Shelby County suffers from an unemployment rate of 18.1 percent.

Decatur, the major city in Macon County and a community that builds tires and air-conditioners for the auto industry and earth-moving equipment for construction, has contributed heavily to the county's 16-percent-plus unemployment rate. The layoffs and plant closings here contribute as well to the joblessness in Shelby County, in Moultrie County where 13.1 percent are out of work, and in Christian County with a 15-percent unemployment rate.

More than 17 percent of workers are idle in Montgomery County, with its farms, coal mines, and small industry. In Pike County, the rate stands at 13.9 percent. Macoupin County workers are unemployed at a 12.6 percent rate. Jersey County suffers from 16.9 percent unemployment and adjacent Greene County has 12 percent of its work force without a job.

Only Sangamon of all the counties in the 20th District, has an unemployment rate of less than two digits. Dominated by the city of Springfield, where State government is the largest employer, Sangamon County unemployment stands at 9.2 percent. Yet it is surely a sad day for this country when a 9 percent unemployment rate is the object of envy.

All of these numbers, stark and starling as they are, do not tell the real story of unemployment. It is not a statistical problem confined to graphs and reports.

The problem of unemployment is a human one, a tragedy that reaches into homes, and families. Its effects should be measured not in rising or declining lines on a chart but in the pain of lost dreams, the bitterness of disappointed hopes and frustration born of futility.

Like my colleagues, I receive a large amount of mail on this problem—not form letters but the handwritten pleas of people desperate for a chance to work.

Returning to the 20th District every week, I meet the people behind these numbers face to face. We in Congress need no media specialists or communication directors to create opportunities to show concern about unemployment.

Listen with me to the voices of the 20th District. Writes a 58-year-old man from Pike County:

> I have been unemployed for going on three years. I want to work and not be on public aid. I've worked and paid taxes all my life, and all I'm asking for is an equal chance to provide for myself.
>
> It seems like when you get a few wrinkles in your face that no one wants to hire you.

Or hear a young man from Macon County, recently graduated from college with an advanced scientific degree. He writes:

> I have sought employment without success, sending out over 400 resumes. My feelings border hope and despair on a daily basis.
>
> I feel America has let me down. I have a highly technical skill, yet no one can use me.

From Macoupin County comes the concern of a mother and grandmother:

> My son and son-in-law both have been laid off 1½ years. Every time they hear of a job opening, however small and however little pay, they are there. Still no jobs for either of them. Their benefits are running out soon and what are they to tell their children?

Mr. Speaker, we are talking about a group of unemployed composed of people who followed the rules, who did everything that was asked of them, who paid their taxes, made sure their children received an education and were, to use the cliche, model citizens.

What was never supposed to happen to them did happen.

Unemployment is more than a problem, it is even more than a tragedy.

Unemployment is a national disgrace. It is inexcusable, it is intolerable, and it must be dealt with if our people are to retain their faith in this Government and our institutions.

Congress has responded to this need.

I joined with a majority of my colleagues in passing the jobs bill. We joined together to pass a realistic budget.

We have acted to put a realistic cap on taxbreaks for the wealthy.

But more remains to be done. There is an economy to be rebuilt, long-range policies to be determined, a multitude of steps to be taken if we are to put America back to work.

Our problems cannot be solved with a wry grin and weekends at Camp David. The unemployed of this country have little to smile about and are more concerned with keeping a roof over their heads than they are with vacation schedules.

To those who have given America their best, we owe our best. We owe it to them and, perhaps more importantly, to future generations. We must dedicate ourselves to this task, to restoring the opportunity, the dreams that we knew as children.

If we do not, if we fail to put this generation and future generations to work, we will face the terrible question posed by the woman from Macoupin County.

What will we tell our children?

□ 2110

Mr. RAHALL. Mr. Speaker, I thank my distinguished colleague the gentleman from Illinois, for his contribution to this discussion this evening. I also appreciate his efforts in regard to bringing coal back to the forefront of this Nation's national energy policy. The gentleman, like I, represents a district with many coal miners. We, of course, share many mutual concerns and the gentleman's work in this Congress on behalf of the coal miner and on behalf of the coal industry is much appreciated. Many of us are trying to turn the rhetoric of this administration into concrete action in regard to developing this Nation's coal resources, and I appreciate that.

Mr. Speaker, I yield to the gentleman from Tennessee (Mr. COOPER).

Mr. COOPER. Mr. Speaker, I appreciate the gentleman's role in helping to organize this special order tonight. It is through the gentleman's help and the help of the gentlewoman from Ohio and others that we are able to have this opportunity.

My district, the Fourth District of Tennessee, is also a district that has

been ravaged by unemployment. It is also a district that has suffered needlessly from the hardship that the unemployment situation creates.

Some may ask where my district is. It is not really important. It is somewhere in Tennessee. I characterize it as some of the best areas of the Sun Belt and some of the poorest counties of Appalachia. It is an area almost twice the size of the State of Connecticut. It is an area populated, as all our districts are, by some 500,000 people; but it is an area that has been among the hardest hit of any area in the Nation in terms of unemployment.

My feeling is that rural unemployment is the worst. Rural unemployment is the unemployment that goes unnoticed, uncharacterized, unchronicled. My district is typical in this regard; no television stations, few radio stations, weekly newspapers primarily. In fact, there are only two dailies in my entire area.

We have an unemployment rate that is worse than in Detroit, Mich. It is worse than in the cities that get on the national news in the evening. It has been 18 percent average for months. Recently it has just dipped to a 2- or 3-year low of 15 percent, and yet no matter what the rate is, it gets no attention, no treatment, no notice from the powers that be. Only two of my counties are fortunate enough to have a rate of unemployment that is even below the outrageous national average now of 9.8 percent. One of my counties, in fact, one of the largest, has the outrageously high rate of unemployment of 23 percent.

The statistics, of course, do not tell the story. The story is told in the hardships of the people. Now with the lowest rate of unemployment we have had in 2 or 3 years, there are still 33,280 unemployed people in my district and that is a conservative count. That means there are 33,280 broken individuals, most likely broken homes, deprived children, extreme hardship.

The misery and suffering that this unemployment has caused, as I said earlier, is going unnoticed and will go unnoticed, but the important thing is that whether we in the Congress now in the 98th Congress begin to devise programs to address their needs.

I hope that we can. I hope that we will be able to realize that this is a recession that did not need to happen. This is a recession that was caused by the Republican Party's own characterization, or at least some leading figures therein. In 1980, Vice President BUSH, candidate Bush then, called it voodoo economics. The current Senate majority leader, HOWARD BAKER, called it a riverboat gamble. Yet it was a gamble that this President took with our lives, took with the future of our current work force, and with the future of our children.

The President likes to claim victory for his program. He likes to claim that it has worked. It has not.

The cost, even if it had worked, would have been untold, unchronicled, as I say, in my area, because you can never replace the man-hours lost, the human dignity lost, the human self respect that has been forever lost.

Mr. RAHALL. Mr. Speaker, I thank the gentleman from Tennessee for his remarks this evening.

Mr. Speaker, I yield to the gentleman from California (Mr. DYMALLY).

Mr. DYMALLY. Mr. Speaker, I thank my very good friend, the gentleman from West Virginia, the chairman of the delegation.

Mr. Speaker, when I was informed that there would be a special order this evening and that we would have the opportunity to discuss unemployment in our various districts, I was eager to participate both because I wanted my colleagues to know about the employment outlook in the 31st District in southern California and because I wanted the chance to get an in-depth picture of unemployment across the Nation. National statistics have a way of blurring important regional differences in unemployment patterns. Unfortunately, as I began to probe for labor information about the 31st District, I discovered something that I think should be brought to the attention of my colleagues. I learned simply that good current information about unemployment at the local level is not available. We do not have a reliable way of finding out how many are unemployed in each of the major cities in most districts, certainly in the 31st District which I represent in Los Angeles County.

County level information is somewhat more accurate than local information, but gross figures of this sort are not sufficiently informative in large metropolitan areas. For example, statistics are collected for Los Angeles County, but Los Angeles County is made up of dozens of cities varying in population from a few thousand to millions. Some of the cities in the county are supported by strong industries, others have no industrial base to speak of. Some cities have a majority of blacks, others are mainly hispanic, some are white, some mixed. Does unemployment hit some groups more heavily than others? At the local level the statistics are silent on that matter.

There was a time when statistical information was collected by industry so that we could tell from the statistics what industries were most affected by the recession. That sort of statistic is not collected anymore. When I asked why, I found that the California office that collects such statistics has experienced a staff reduction of close to 60 percent in the past 4 years. When I went the next step up and called the western regional office of the Bureau of Labor Statistics I got a recording which said in essence that they are so short staffed that they have to use the recording because there are too few people around to man the phones. If we are to act responsibly to solve the unemployment problems, we must at least have sufficiently good data on which to base our decisions. I would like my colleagues to know that our ability to collect relevant data is eroding. We may soon reach a point where, far from being able to solve the problem, we will have too little information even to recognize its scope.

In fact, that day is upon us already. I was finally able to collect some statistics about local unemployment in my district. The officials my staff talked to told them over and over that the data were far from precise. One thing I was initially startled to find was that the labor force in my district had apparently shrunk by thousands since 1982. I asked the experts if this meant that the population of the district was shrinking. The answer is no. It is the statistic that shrank. It shrank because those who are out of work and are too discouraged to look for work disappear altogether from the statistical ranks of the labor force. This means that in some degree, our statistics underestimate the level of unemployment. Those unemployed the longest just get left out of the count.

Even though it must be granted that the statistics are flawed, the magnitude of differences in unemployment among the seven major cities in my district is striking. I represent a district with a high concentration of industry, especially aerospace and high technology industry. As you might expect, the overall rate of unemployment in my district is a bit below the national average. But that gross statistic hides some extremely important details. The second largest city in my district, a city where the vast majority of citizens are black had an estimated April 1983 unemployment rate of nearly 20 percent. If you add the discouraged worker which is 5 percent you get a total of 25 percent. At the same time, the city with the lowest unemployment rate in my district had only 6.9 percent unemployed. So, the picture in my district is of a relatively low overall unemployment rate, with a number of striking exceptions, exceptions that are more than twice the national unemployment rate in the district.

We often hear these days that power should be returned to the States and localities. The 31st District of California is, perhaps, in a better position than most to take control of its own destiny. While we have areas of extremely high unemployment, we also have a substantial industrial base. Ours is one district where it appears

possible to forge an alliance between Government and industry. One manifestation of that alliance is a job training program we have created in the district. Its acronym is COTTI, Compton-OIC Technological Training Institute. This program which trains people at actual worksites has made use of small amounts of State and Federal funds, but most of the funding has come from the industries that would make use of the workers trained by the program. The program is a strong one because its structure comes as close as possible to guaranteeing that trainees will receive training in areas where a need for personnel actually exists. We know this to be the case because the industries in the area help to make the determination of need.

But I do not want to leave my colleagues thinking that those in the 31st District are on the verge of discovering the solution to high unemployment. Even the best of plans has striking obstacles to overcome. I think I will always remember the frustration I felt when COTTI was first getting started. We had found a business that was willing to offer training. We had even picked the first 20 trainees to go into the plant. Shortly before the trainees were to report for their first day of training the company began laying off workers.

The suddenness of that experience is repeated constantly on a more personal basis in my district. I now have an employee in my district office who was informed while she was in the middle of her vacation at her previous place of employment that she was being laid off. For many years, California has been seen as the land of milk and honey. That is not far from true. But occasionally, even in California, the milk goes sour.

□ 2120

Mr. RAHALL. Mr. Speaker, I thank the gentleman from California for his participation in this discussion on unemployment in my district this evening.

Mr. KOSTMAYER. Mr. Speaker, will the gentleman yield?

Mr. RAHALL. I yield to the gentleman from Pennsylvania.

Mr. KOSTMAYER. Mr. Speaker, contrary to the repeated contentions of the President, uenmployment is a grave problem in our country.

And contrary to those repeated contentions of the President, Mr. Speaker, the American people still care about the unemployment problem, and care about their neighbors who are out of work. Just last week Newsweek magazine published a poll in which respondents were asked which national issues they perceive to be most important. Overwhelmingly, the issue which was cited most often was unemployment, some 73 percent responding affirmatively that it was important. Significantly, the issue next most frequently cited was that of protecting American jobs, 62 percent.

In many ways, Mr. Speaker, the Eighth Congressional District of Pennsylvania can be viewed as a microcosm of the country as a whole. In my district, we are faced with severe unemployment problems, as well as a significant problem in protecting American jobs from unfair foreign competition. In Croydon and Bristol, in Perkasie and Sellersville, in Quakertown and Levittown, in Willow Grove and Doylestown in Huntingdon Valley and Yardley, in Dublin and Newtown, our people know what it is to want a job.

Pennsylvania on the whole has an unemployment rate over 12 percent according to the most recent statistics. Parts of my district have rates over 14 percent.

People want to work—of this I have no doubt. A short time ago, Mr. Speaker, I initiated a JOBS Telethon in cooperation with a major newspaper in Bucks County, Pa. In one weekend that JOBS Telethon, manned by scores of volunteers, took over 7,000 calls from unemployed individuals seeking help in finding work.

I am happy to say that we managed to help some of these hard working, but out-of-work men and women. I asked employers to phone in 1 week later and let us know what jobs they had available. We matched this employer data with the skills of our pool of unemployed, and managed to get a lot of jobs filled.

But not nearly enough, Mr. Speaker. There are simply not enough jobs out there, contrary to what the President says.

In southeastern Pennsylvania we are also faced with a crisis of protecting American jobs from foreign invasion. At the huge Fairless Works of United States Steel, 2,000 to 3,000 jobs may be lost due to the import of subsidized steel slabs from Europe. When this deal was announced I flew to England and Scotland to speak with British Steel officials, and labor leaders. It is clear that this steel is subsidized as other steel products were found to be just last year in an action brought by American steel companies. Yet it is unclear that the law will be adequately enforced to protect the American jobs at risk.

The American public is prepared to accept free and open trade, Mr. Speaker, but only trade that is fair. When a foreign government makes a conscious decision to protect its workers by subsidy, and the cost of that decision is jobs in the United States, something is wrong, contrary to what the President might say.

The American people, just like the people of Bucks and eastern Montgomery County, want action on employment and jobs—not promises—and I hope that the President gets the message.

Mr. MOODY. Mr. Speaker, will the gentleman yield?

Mr. RAHALL. I yield to the gentleman from Wisconsin.

Mr. MOODY. I thank the gentleman from West Virginia for yielding.

It is appropriate that we talk this evening about unemployment. We are now at the midway mark in 1983. We are now at the 30th month of the Reagan administration, five-eighths of his term having been consumed.

His policies are clearly set. Their imprint is now indelibly etched on the Nation.

We know how bad unemployment was when Jimmy Carter left office in 1980: about 7.7 percent. We know that Ronald Reagan promised that by 1983 his policies would bring unemployment down to 6.6 percent.

But how many of us guessed that by the beginning of 1983 unemployment would not be at 7.7 percent, but would have climbed to 11 percent?

There are now over 11.2 million Americans out of work, more than all of the people employed in the neighboring nation of Canada. Teenage unemployment is twice that of adults, and black teenage unemployment is twice that of white teenage unemployment.

There are over 4 million Americans out of work today who had their jobs when Ronald Reagan took office.

What is to blame for this terrible state of affairs?

Is it the policies of Jimmy Carter? If those policies were still in place that could be charged. But they are not. In 1981 and 1982 Ronald Reagan got everything he asked Congress for in terms of economic policy changes: domestic spending cuts of massive proportions, huge tax cuts, virtual elimination of the corporate income tax for certain companies, huge military spending increases. These policies which were supposed to balance the budget by 1984 and bring down unemployment. But they did not do that. They had the reverse effect. Unemployment went up and deficits skyrocketed.

Worst of all, the future remains very uncertain. The current slight upturn we are now experiencing is indeed very fragile. As the economy continues to improve high deficits are certain to crowd out private investments, raise interest rates and choke off the recovery.

Let me take just a moment to talk about what national unemployment means for my area of the country, Milwaukee and southern Wisconsin. Wisconsin Job Service has 200,000 job applications on file, or approximately 40 applications for every available job. Recently at the A. O. Smith Co. in Milwaukee 20,000 applicants showed

up to apply for 200 jobs, or 100 applicants for each job. No one can accuse the constituents in my district of not wanting to work, and I think the same is true all over the Nation.

Let me read just one of the hundreds of letters I have been receiving from my constituents regarding unemployment.

"Dear Mr. Moody:

"Can you assist me in finding a job, part-time or full-time? I am not choosy.

"Things are really bad in the inner city. People are tired of being pushed deeper and deeper into a dead-end life. Me, I am tired of being poor. I want to work, but no job.

"Welfare is a joke and crime has its bad points.

"Sooner or later things are going to blow sky high. I hope you 'fat cats' in Washington are ready to pick up the pieces.

"Good luck, sir. I hope you can help to bring about some form of change."

As this letter points out, unemployment cannot be measured in terms of statistical figures alone. It has real, tragic, human effects. It is destroying individuals. It is destroying families. It is destroying communities. Unless it is remedied soon, it threatens to destroy the fabric and cohesiveness of our Nation.

The people of my district are imploring the President to leave off his fixation with military spending, to leave off his flirtation with war in Central America, to leave off his pursuit of an expensive nuclear arms race, to leave off the pathetic effort of his Interior Secretary, James Watt, to pick up a few bucks toward the deficit by selling coal, gas, and oil leases for private use at bargain basement prices.

What the people of my district are imploring the President to do is redesign his budget and revenue policies to bring down real interest rates, reduce the budget deficit, spur the economy, and lead the Nation back to the policies of employment, growth, prosperity and domestic fairness that generally characterized the 1960's and 1970's.

Only then can my district, along with those of my colleagues here, begin the long, hard road back to jobs, to dignity, to material progress, and to hope.

□ 2130

Mr. RAHALL. On behalf of the organizers of this special order this evening, my colleagues from West Virginia, Congressman WISE, Congressman MOLLOHAN and Congressman STAGGERS and my colleague from Ohio, Congresswoman KAPTUR, we want to thank all of those who have participated thus far this evening in this special order and certainly those who have participated during the time that I control, I want to extend my congratulations on statements and remarks very well written and spoken from the heart and very well representative of their congressional districts.

Mr. Speaker, tonight we heard the President during his news conference say that the economy is strong and getting stronger. He went on to say that the American economy is beginning to sparkle. For many in West Virginia, the only sparkle that they will see during the months ahead may be the sparkles of fireworks next Fourth of July weekend. It is certainly not any sparkle in the economy that they are seeing. They have been without jobs for several years now; they have experienced not a recession but a depression. And it is not getting any better for them. The issue of unemployment has been a major topic of discussion on this floor of the House of Representatives, not only in the last several hours this evening but for the last several years. During 1 minute speeches, special orders, and debate on various pieces of legislation, Members have discussed the hardships of over 12 million Americans who are currently without employment.

President Reagan takes great pleasure in sharing with the public in speeches or at press conferences letters that he receives from citizens complimenting him on his work.

Rarely, if ever, have I heard him refer to a letter which is in disagreement with him.

For this reason, I am happy to participate in this special order and once again commend my colleague from West Virginia for taking the time this evening. I think it is important as many of my colleagues have already done during these special orders, to read what our constituents have to say about the state of our Nation's economy, letters that perhaps the President has received also but to which he has not referred in his press conferences or speeches to the American people. Before I do, however, I believe it is important to point out that in my district the unemployment rate has gone up in the last month. For that matter, in five of the eight counties that comprise the Fourth Congressional District in southern West Virginia the unemployment rate has increased. If unemployment is indeed one of the "unfortunate evils" of fighting inflation as this administration contends, then why have we not turned the corner if the economy is really here, if the American economy is truly gaining strength?

The decrease in the rate of inflation is advertised as the administration's proudest achievement. Yet, the facts show that the average American is actually losing ground in real terms, as per capita income in my State of West Virginia is 20.3 percent below the national average. Corresponding to the most recent statistics the percentage of unemployed persons has increased in southern West Virginia from 18.7 percent to 19 percent.

The number of those out of work has gone up from 29,130 to 29,390.

For the record, I would like to submit the unemployment totals for the Fourth Congressional District for May which show as follows:

In Cabell County the rate is 14 percent, Logan County, 21 percent, McDowell County, 30 percent. One of the highest if not the highest unemployment figures in the Nation for a county and many in that county who are affected would say that is on the low side. Many in respectful positions of leadership have said that the unemployment in that county is approaching 45 percent. Mercer County, 14.4 percent, Mingo County, 19.1 percent, Raleigh County, 15.2 percent, Wayne County, 12.9 percent and Wyoming County, 25.7 percent rate of unemployment for a district average of 19 percent.

The issue of unemployment is much more human than these cold statistics portray. From them we do not see the unpaid bills, the hungry faces, the uncertain futures and the shattered dreams. In recent months I have been saddened by many of the letters that I have received from the people in my district. They very clearly portray the hardship, frustration, sense of loss, and the absence of any hope.

These individuals have worked for a living before. They know what it is like to put in a hard day's work for a fair wage. They know what it takes to pay bills, make mortgage payments and to feed, clothe, and educate their children.

It may sound corny but they do not want handouts, they do not want to stand in a welfare line, they want to stand in a payroll line.

So, tonight, Mr. Speaker, for the President and for our colleagues who do not see the need to participate in this special order, I would like to read just a few of the many letters that I have received from constituents in the Fourth District. They explain the situation much better than I could this evening and from a much more human and personal standpoint.

From Accoville, W. Va., in Logan County, and I quote:

Mr. RAHALL. I've been out of work 5 or 6 months . . . I'm married and have three stepsons that have to eat. And have utility bills that have to be paid . . . But tell me this, how am I suppose to pay them when you can't even buy a job in West Virginia? . . . All I ask for is a fair chance. Why can't I find some work? I have never been on unemployment before.

From my hometown of Beckley, W. Va., I quote:

Mr. RAHALL. I've looked for jobs all over Beckley, up to Summersville. I have even made calls to Ohio, Pennsylvania, Indiana, and called some friends I have in Hawaii. I

have answered practically every ad in the paper with no positive reply . . . I have been told that they're only hiring college students, ha, I'd try to get in on this but I ain't got no money for college . . . I've also heard of jobs overseas but have no way of getting in contact with employers . . . Soon I will be kicked out of my trailer, which I've scrapped for 8 months to make payments. My electricity is going to be turned off as is my water. My phone has already been cut off. The grocer has given me credit, but I need to find a job to pay him and the others.

From Prichard, W. Va., in Wayne County.

DEAR CONGRESSMAN: I can't afford to buy gas for my truck to look for work anymore. My utilities, trailer payments and doctor bills come to $337 per month, plus I have two children in school . . . I've looked everywhere and there is no available work. I just can't find a job.

I might add here, Mr. Speaker, that that is an additional burden upon those who are unemployed and go to the unemployment offices. The first question that is asked is: "How many possible employers have you been to? Where all have you looked for work? Show us with whom you talked and what the responses were?" Many of these individuals, however, Mr. Speaker, because they are out of work and because they have no income can no longer afford the gas to travel around to the many employers which they are required to contact before they can receive unemployment compensation.

This is an additional burden upon them.

From Fort Gay, W. Va., in Wayne County:

CONGRESSMAN RAHALL: In nineteen years I have never had to receive unemployment compensation. I have been unemployed for weeks before, however this is the worst time of my life . . . I have three children in school and it is difficult to try to explain to them that you are unemployed and not receiving something. So I hope you understand my anxiousness concerning finding work.

That is a common phrase in many of the letters that I have received, "It is hard to explain to my children."

From Huntington, W. Va., in Cabell County:

Mr. RAHALL: I have been out of work 11 months now and have not been able to find a job since I am 55 years of age . . . I want a job, but it looks like I will have to leave West Virginia to find one.

From War, W. Va., in McDowell County:

DEAR CONGRESSMAN RAHALL: In April, 1982, my husband was laid-off. He is willing and able to work but with the state of the economy he can't find any type of work. It seems unfair that a God fearing family must suffer due to cuts in programs that are intended to help the American people . . . Our situation is a desperate one. I hope you will consider its seriousness. If there is something you can do we would be very grateful.

□ 2140

From Anawalt, W. Va.:

Mr. RAHALL: I am in desperate need. I do not have a job and cannot find one. I got a job last year in the mines and worked 2½ months and was laid off. I got another job and worked 2 months and was laid off again . . . I've tried everwhere to get a job. As you know, jobs are hard to find these days.

From Capels, W. Va.:

Mr. RAHALL: I am a coal miner and that is the only work I have ever done. And I am sure you know there are not many places to go in McDowell County for a job. I have a wife and two children ages 6 years and 8 months. My trailer payment, phone payment, and ground rent are due now . . . Time is running out, and I don't know where else to turn.

From Davin, W. Va., in McDowell County, as I conclude reading from my letters.

This person states:

SIR: I am a coal miner. This is the first time in my 13 years working that I have been out of work for any significant period of time. I've been out of work since December, and have unemployment insurance coming in. I have friends and their families who have been off longer and their unemployment is running out . . . It is shameful that a nation as large as the United States has let Japan and smaller countries outdo our great nation in productivity . . . Pardon me if I sound bitter, but I have a deep sense of pride and am starting to wonder where I will go and what I will do after my unemployment insurance runs out.

Mr. Speaker, these are not isolated cases. I regret to say they are more the norm in the type of mail I receive in my five congressional offices.

I fear that if this depression—and that is what it is for many in West Virginia—continues much longer, the hearts of these fine people will be destroyed along with their hopes.

Over 20 years ago, President John F. Kennedy was so moved by what he saw in West Virginia, that he made the revitalization of the Appalachian region a priority.

And out of that commitment was born the Appalachian Regional Commission that has done so much good for West Virginia.

But what did we find the Reagan administration making as one of their top priorities upon entering office, nothing but the abolition of the Appalachian Regional Commission.

With the fine dedicated efforts of the West Virginia congressional delegation and with the understanding of this Congress and with the appropriate authorizing and appropriations committees here in the House and Senate, we have been able to save the Appalachian Regional Commission from total elimination as this administration has proposed.

We need that same type of understanding and commitment to this Nation's most current pressing ill—unemployment. Passing the blame, no; it will not put 12 million people back to work, nor will saying that all the economic indicators look good or that the American economy is beginning to sparkle. None of that is going to put these 12 million people back to work, nor will referring to statistic after statistic showing how interest rates have come down, or productivity is increasing, or other signs that the President points to, none of this will put the unemployed back to work.

A fair and energetic approach to this situation is what is needed and we have started right here tonight.

Again, in conclusion, I commend my colleagues from West Virginia, Congressman BOB WISE, Congressman ALAN MOLLOHAN, Congressman HARLEY STAGGERS, and also the gentlewoman from Ohio, Congresswoman KAPTUR, for joining in taking out this special order this evening, and our many colleagues from across the Nation, who have tried to express this evening and have done so very eloquently and very effectively what the people of their districts feel in today's troubled times.

UNEMPLOYMENT

The SPEAKER pro tempore (Mr. MOLLOHAN). Under a previous order of the House, the gentleman from West Virginia (Mr. STAGGERS) is recognized for 60 minutes.

Mr. STAGGERS. Mr. Speaker, I also commend my colleagues from West Virginia and Ohio for helping organize the special orders tonight, and I thank all who have participated.

I now yield to the gentleman from California (Mr. BATES).

Mr. BATES. Mr. Speaker, I want to thank the Speaker and the leadership for allowing this special order on unemployment and particularly the freshmen Congressmen from West Virginia, Congressmen BOB WISE, ALAN MOLLOHAN, HARLEY STAGGERS, JR., and also the gentlewoman from Ohio, Congresswoman MARCY KAPTUR.

I would like to take a few moments to address unemployment in California, the 44th Congressional District in San Diego.

We have been asked to report to the Congress and to the American people the state of unemployment in our districts. Unfortunately, I cannot report a rosy picture of a recession that has ended, business upturns, or long lines of unemployment growing shorter.

California's over 10-percent unemployment rate is translated into 1.2 million people looking for work. Black unemployment is twice that figure and increasing. In San Diego County alone, a haven of high technology industry, 72,000 people are looking for work and cannot find it.

It is important, I think, to reexamine just who makes up the unemployed. There is an inaccurate picture of America's unemployed as the hardcore welfare type. This is a tragically

false picture that makes solving the problem that much more difficult.

I have seen firsthand the effects upon the minority community of my district. Many of these people are the last-hired-first-fired men, women, and youth whose access to the great weath of this Nation was cut off before it began. Their rent payments, food, and medical bills are just as real as someone making $35,000 a year. The difference in their trauma of unemployment and lack of hope is concentrated in these communities and feeds upon itself.

Where is our commitment to reducing the misery of our people? Is the compassion we so often speak of, are they merely empty words? The great concentrations of unemployment in our Nation must wonder if we have a greater commitment to guns and aid for foreign nations than we do for our own people.

And there are a new kind of unemployed. We are seeing in my district of San Diego County a new kind of unemployed. The major layoffs and plant closures that have happened in California in recent months have resulted in men and women on the rolls who never before experienced unemployment. These people have had long-term, stable jobs, in effect, career. When this American worker finds himself without a job, we are forced to look to deeper causes and face far more serious consequences.

The San Diego region currently has over 9,000 people who have been laid off as a result of major plant closures. Their skills and long job experience simply serves to push those other unemployed categories further down the line.

The labor market analysts speak of these unemployed as dislocated. They have no experience at being without a job and the psychological traumas can be serious. We in this Nation have always looked at someone without a job as a person with something wrong with them. Other workers who still have jobs tend to avoid the atmosphere that surrounds the unemployed. And the isolation of these workers further damages their ability to seek and hold a job.

If this is the undeniable effect upon the stable workers in our society, what must be the long-term effects upon those further down the economic ladder.

It is crucial that we put American joblessness in this kind of perspective. The expectations of generations of Americans who look forward to a better tomorrow is breaking down. And the expectations of those who want to enter the middle class is being broken in its very formative stages. The black and brown communities of my district who have worked hard to enter the mainstream of American economic life have already suffered generations of job discrimination, high unemployment, poor public facilities, and second-rate education.

□ 2150

Now, to have placed upon them another whole layer of jobseekers, who would get the first jobs available, is just another cruel reward for their years of patience and suffering.

Probably one of the most alarming new trends is the layoff in high technology industries and electronics. We have looked at these industries as a solution to future unemployment problems, and yet now it looks as if they are just another contributor to the overall unemployment. San Diego is a haven for such industries and should have been somewhat protected from the ravages of the recession, but that was not so. That it is not illustrates the danger of putting our hopes on new technology without first solving the fundamental problems of unemployment today.

The lessons of the recession and unemployment in my district is that many of the same people bearing the brunt of the cycles of our economic system simply serve to push them further down. Retraining and education are essential. We cannot continue to extend unemployment benefits and have workers stand by idly while those dollars are lost without job training, retraining, and even creating new jobs.

I recommend we see America's unemployment as not just a matter of massive layoffs that private businesses have deferred to Government in our major industries, but as a vast and dangerous social upheaval that is taking place from the ground up, and to solve the problem at the top does not solve the problem at all.

Mr. STAGGERS. Mr. Speaker, I thank the gentleman from California for his excellent job in articulating his insights to the solutions and problems of the unemployed.

Mr. Speaker, I yield to my colleague, the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Speaker, I truly appreciate the gentleman's yielding to me at this time, and I want to commend the delegation from West Virginia and the gentlewoman from Ohio (Ms. KAPTUR) for having taken this evening to focus on the problem of unemployment across these United States.

I do not think there is any particular other issue that could be as meaningful to the people of this country as the concern with jobs and job prospects and the impossibility of finding them.

Mr. Speaker, no matter how much the Reagan administration extols the slight decline in unemployment as a signal of economic recovery, the fact remains that more than 11 million Americans are still unemployed, nearly 2 million more are too disheartened to even look for work anymore, and another 6 million work part time because they cannot find full-time jobs.

In New York City, the unemployment rate was 8.9 percent in May, a decline from 9.2 percent in April. Unfortunately, this dip does not signal new strength in the New York City jobs market. Rather, it was caused by a decline in the number of people seeking work, according to the Bureau of Labor Statistics. In fact, the number of city residents with jobs declined by 40,000 in May, and the size of the city's labor force decreased by 100,000.

Moreover, New York City has fallen behind the national average in the proportion of its population that is employed. Nationally, about 58 percent of the people are employed, whereas in New York City, fewer than 50 percent are.

Who are these people, and why are they dropping out of the labor force?

Some of them may be middle-aged workers who have spent decades in manufacturing jobs. Manufacturing employment in the city has declined steadily in the past couple of decades, culminating in a loss of 43,000 jobs during this recession. Among the largest losses have been jobs in textiles and the garment industry. Under pressure from imports and the recession, this entire industry is facing extinction. Most of these workers are women and minorities, whose skill and education level are too low to enable them to move easily into other areas of work.

Equally tragic is the phenomenon of youth who have dropped out of the labor market because there are no jobs for them. In New York City, as in most metropolitan areas across the country, thousands of minority youth have lost all hope of finding work. For 16- to 19-year-olds, the New York City jobless rate was 32.5 percent in the first quarter of 1983, far above the national rate of 24.6 percent. For minority youth, the unemployment level is in excess of 50 percent.

Most of these youths have few job skills and little education. The city's high school dropout rate is now a staggering 45 percent. Nearly 30 percent of New Yorkers between the ages of 18 and 24 and 40 percent of those over 24 have no high school degree.

Where will they find work? Only 17 percent of New York City jobs in 50 key occupations will accept applicants who have less than a high school education, according to BLS.

The administration's response to this tragic phenomenon has been to sharply reduce funding for education as well as youth employment and training programs at the same time the President travels the country in a sudden discovery that there is an edu-

cational problem in the country. The President's budget cuts have sliced into almost every program affecting the education and training of American youth, no matter how successful the program.

The President is perpetuating a cruel falsehood in his assertion that an expanding economy is the only real solution of youth unemployment. The economy, of course, is not expanding in the urban areas where youth unemployment constitutes one of the Nation's most serious social problems. Under the Youth Employment Demonstration Projects Act (YEDPA) of CETA, we acquired vital data on how to help young people enter the labor force. The administration's apparent belief that the Nation cannot afford youth employment and training programs reveals its inability to seriously consider the long-range implications of its actions or inaction. The truth is that we cannot afford not to establish special programs for youth. In simple terms, waiting for an expanding economy to solve youth employment problems means closing off the labor market to millions of young people. To do so would not only exacerbate the Nation's social problems but would also compound the national tragedy of untapped human potential.

Again, I want to thank the gentleman for yielding to me, and I wish to commend all of those who have been responsible for this special order this evening.

Mr. STAGGERS. Mr. Speaker, I would also like to thank my colleague, the gentleman from New York (Mr. WEISS), for being here at this late hour and sharing with us his concerns for those who are hardest hit by unemployment, especially the youth of our Nation.

Mr. Speaker, at this time I yield to our colleague, the gentleman from Pennsylvania (Mr. KOLTER).

Mr. KOLTER. Mr. Speaker, I thank the gentleman from West Virginia for granting me this time to join my colleagues in a brief discussion on the greatest sin of the 1980's, that sin being unemployment.

Mr. Speaker, the American economy is like a huge ship. When times are good, there is clear sailing. When economic expansion comes to a halt, it is like a ship losing headway. The administration's solution to that problem is to start throwing people overboard. The result is to make the ship lighter and faster. But the price is millions of shattered dreams and millions of ruined hopes.

We keep hearing that recovery is on the way. The President has told us that the economy is on the mend. The Commerce Department has been reporting monthly increases in sales and production in many sectors of the economy. The news from Wall Street is all good. It seems that recovery is a certainty at least in some measure.

There are differences of opinion about the length and strength of the impending recovery. Some predict a prolonged and substantial rally, while others claim that rising interest rates and the looming Federal deficit will shorten the recovery and reduce its effect. But there is one disturbing aspect of the recovery that all the experts agree on: There will be no significant reduction in nationwide unemployment. I find this to be an accurate summary of the President's program: too little, too late.

There is no such thing as a recovery unless it is a recovery for all Americans. No one can be proud of an economic solution which denies millions of working men and women the right to share in the fruits of economic recovery. The burden of our economic problems should be shared equally by all members of our society, not laid squarely on the shoulders of our newly unemployed workers.

We need to address the problem of unemployment swiftly and directly. And, we need to reduce the effects of unemployment while we do everything we can to eliminate it. Emergency housing assistance, emergency health insurance assistance, increases in trade adjustment assistance, and unemployment compensation will help lessen the disastrous effects of unemployment. But these forms of Government assistance are only helpful. They are not what the majority of Americans want. Americans want jobs. They want to work. They want jobs, and the dignity and respect that come from earning an honest day's wages.

Billions of dollars are spent every year on mergers and acquisitions. United States Steel buys Marathon Oil. Du Pont buys Conoco. Peter buys Paul. But not one job is created by the expenditure of these billions of dollars. We in Congress must establish an industrial policy which stops this wasteful spending and funnels these billions into rebuilding our industrial base. We must catch up to the European and Japanese economies which were rebuilt after the war. Our industrial base is not the only thing that needs rebuilding. We must rebuild our deteriorating infrastructure. In 1965, we spent 4 percent of our Federal budget on public works. Today, we spend 2 percent. As a result our bridges, our highways, the municipal water systems, the prisons and jails, our ports, and our mass transit systems are rapidly becoming inadequate.

Forty billion dollars spent on MX missiles becomes a "bargaining chip"; $40 billion spent on public works becomes a lasting monument to improved efficiency and greater comfort for millions, as well as an opportunity for thousands to find meaningful employment, $40 billion is peanuts compared to the $1½ trillion that President Reagan proposes to spend on building up our defense. A trillion and a half, just to scare the Soviets. And virtually nothing to put Americans back to work or to restore our decaying public works.

There is work to be done. There are over 10 million Americans who are unemployed. There are over 10 million reasons why we should not increase defense spending quite so much. There are over 10 million reasons we should spend some of that money to rebuild America.

□ 2200

Mr. STAGGERS. Mr. Speaker, I thank my neighbor from the north, the gentleman from Pennsylvania (Mr. KOLTER).

At this time I would like to say that I, too, have received many letters and comments from the unemployed in my district. However, to set the tone for this occasion, I would like to read part of a letter from an unemployed constituent, Mr. Ralph Cummings, Jr., of Masontown, W. Va. He had planned to be with us tonight, to travel down to be with us tonight. I hope this letter will help point out the despair that far too many of our people are feeling. I believe that this will show you that statistics reveal only a small part of the human injustice and misery brought on by unemployment.

Mr. Cummings writes, and I quote:

Just put yourself in the place of the unemployed. A year ago, you were making 12 dollars an hour. One day you go to work and at the end of the shift, your crew is called into the mine foreman's office. He tells you that you are going to be laid off for thirty days. "But don't worry," he says, "as soon as we cut through rock we're in, you will be called back."

At first, panic sets in. Then you start to think about how much you are going to lose in thirty days. You get in your car and drive home. On the way, you think about how you are going to compensate for the wages you're going to lose in those thirty days. You think about how you are going to tell your family that you have been laid off. You get home and sit down to dinner. You still haven't thought of a way to tell them as you sit there picking at your food.

Your wife knows that something is wrong and finally asks. You tell her that you've been laid off, but don't worry, they said we would be back in thirty days. Maybe we should take our vacation early so that I can work through regular vacation to make up for what I'm going to lose this month. That sounds like a pretty good solution, so you pack up and head for the in-laws. You spend a week there and return home.

You go to the mine the next day to see how things are going. "Not too good," the mine foreman says. Then he goes into his office and closes the door. You stand there wondering what you said that was wrong. Finally, you go out to your car in the parking lot. As you drive off, you notice that a few of your buddies' cars are there. Those guys are lucky—they're already back to work.

Maybe it won't be too long before I'll get called back. A month passes and you finally get your first unemployment check. Out of this check, you have to pay the bills. A little bit of figuring tells you that there's no way you're going to make it on unemployment.

Month after month goes by and you don't have a job. Every day, you go through the same routine. Get the newspaper and turn to the help-wanted section. Nothing is there unless you have some kind of degree. Sure, you could try one of those sales jobs, but you tried that before and proved to be a failure. You decided to go to this other coal mine down the road. You find a sign on the gate: "No help wanted."

You come home discouraged, and try to think of something to do. You get the mail and find more bills stacking up. Later that day, Reagan comes on TV and says that all of these people laid off are now classified as displaced workers, and will probably never get called back to their former jobs.

A few more months go by and you see this ad in the newspaper that says, "Learn how to drive a truck . . . start training locally; great future opportunity."

You call the number and they tell you that you need some cash to go to school. You tell them you have a pretty good tax return coming and make an appointment. You go and talk to the guy and find out that there is a demand for truck drivers. He tells you that within a week after you finish school you'll be making at least $400 a week. You go to the school, and find five other men from West Virginia—all laid-off coal miners, doing the same thing you are doing. You graduate at the top of the class and come home. You go to a few trucking companies and find out that you have to have at least two years of experience to get a job.

You call the school and ask for help, and they give you a list of companies to call. All of them are out of State. You don't really want to go out of State, but you call anyway. You get the same reply that the trucking company here gave you. You keep trying and trying to find a job, but nothing is there. Finally, you find a company that will hire you if you have your own truck.

You go to a bank that has some repossessed trucks and explain your situation to them. They run a credit check on you. You have good credit and are given an appointment to see the bank vice president. You arrive at the bank 15 minutes early because you want to make a good impression. You sit there and wait.

Finally, he arrives thirty minutes late and you go into his office. He goes over and sits at his big fancy desk and looks over your loan application. He pauses a few minutes and asks, "How much money do you have to put down on a truck?" Evidently, he didn't look at the application too closely. Common sense should tell him that if you've been laid off for a year, you don't have any money to put down. And it says in the application that you have been laid off. And besides, you don't think you would have to have something down on these trucks because they were just sitting there rusting and being vandalized. And here you are with a job waiting that would pay enough money to pay for the truck that wasn't being paid for before you came along.

□ 2210

The letter goes on, Mr. Speaker, but I believe that the point has been made.

Mr. Cummings' letter could have been written by any one of 11 million unemployed Americans. Unemployment is not just a problem—it is a national disgrace. It is time to combine conventional wisdom and new ideas to bring about a solution to an old problem.

The commitment I seek is not to outworn views, but to old values that will never wear out. Programs may sometimes become obsolete, but the idea of fairness always endures. Circumstances may change, but the work of compassion must continue.

Mr. Speaker, in 1932, Franklin Roosevelt said that Napoleon reportedly lost the battle of Waterloo because he forgot his infantry, staking too much upon the more spectacular but less substantial cavalry. The parallel made by Roosevelt to describe the Hoover administration's regard for the dire plight of millions of Americans snared in the economic trap known as the Great Depression can provide us with insight into our current economic dilemma. What Roosevelt said of the Hoover administration, as well could be said of the current administration: "It has either forgotten or it does not want to remember the infantry of our economic army."

Mr. Speaker, the Nation may well be on the mend, but "on the mend" does not provide sorely needed jobs for millions of Americans hit hardest during the recession. The recovery may well be a reality for the financial community, for the companies who have disinvested, merged or transplanted their production facilities outside of U.S. borders, but the recovery is not a reality in the coalfields of Webster County, W. Va., where unemployment is neary 30 percent; the recovery is not a reality in Fayette County, W. Va., where coalminers dominate the 22-percent unemployment number, the story is the same throughout the coalfields of West Virginia's Second Congressional District. Wherever coal is mined, you will find idled miners suffering the personal hardships that accompany long-term unemployment.

But the Second District is not only a land of coal, it is a land blessed with abundant farm lands, and here the uncertain economic fortunes have dealt the small farmer a devastating blow. He is forced by low prices to look for full-time jobs or look for work in the evenings and weekends just to hold on to a way of life that is the essence of the American spirit.

Throughout the Second District one can see the remnants of the boom, more evident of the bust . . . deteriorating coal camp communities, pitiful roads, and crime more characteristic of inner cities. The business cycles are the realm of economists, but the realities of boom and bust are borne by the people who Roosevelt termed the forgotten man at the bottom of the economic pyramid. The time is now to do something about the incessant business cycles that wreak havoc on those who least control the capital investments made in our country.

The recovery that will reportedly bring us out of the recession will not be that vigorous according to some economists and the administration, but this is good, we are told, because it will, Mr. Speaker, provide us a more stable economic footing. But the reality of the projections show that under the administration's current economic program of huge deficits there will remain some 8 million Americans unemployed in 1986. Eight million American workers will be denied the right to receive rewards from fruitful labor, will be denied the right to create a better life for their children, and they will be denied the right to provide for their own security in old age. A recovery that leaves 8 million Americans out of the work force is no recovery at all. The challenge facing us now is as great as the challenge faced and met during the dark days of the Great Depression. It was realized then that building from the top down did not work, and we must now realize that only by building from the bottom up can we hope to provide an economic order that reflects our democratic traditions . . . an economy constructed as if all Americans mattered, not just the few who squeeze the most profit out of each dollar.

Mr. Speaker, in addition, I would like to relate an incident that I was made aware of yesterday.

Three teenagers from my district, aware of the dire situation that the jobless in my district face, decided to take the matter into their own hands. It was yesterday that these three concerned individuals—Donald Green and Nancy and Rusty Grantham—pedaled down on bicycles to Washington to express their discontent with the unemployment situation.

They began their trek at noon yesterday, when they left from Martinsburg, W. Va., to bike about 100 miles to present me with a tee-shirt that I have here before me.

As we can see, Mr. Speaker, the front of the tee-shirt speaks of the pride West Virginians have in our State. It says: "Almost Heaven, West Virginia," and on the back, Mr. Speaker, it says, "Number One in Unemployment." That shows the tragedy that is happening in West Virginia today.

Mr. Speaker, I want to take this opportunity to commend those teenagers who feel so strongly about the current economic conditions in my district. Again I commend my colleagues who have taken part in these special orders tonight. I commend the gentleman from West Virginia (Mr. WISE), for helping organize the special orders, and I commend as well the gentleman from West Viriginia (Mr. MOLLOHAN), the gentleman from West Virginia

(Mr. RAHALL), and the gentlewoman from Ohio (Ms. KAPTUR).

In closing, I would like to point out that the philosophy, "Live and let live," is OK philosophy, but I would submit that to "live and help live" is a better philosophy.

Mr. Speaker, I yield back the balance of my time.

UNEMPLOYMENT

The SPEAKER pro tempore (Mr. WISE). Under a previous order of the House, the gentleman from West Virginia (Mr. MOLLOHAN) is recognized for 60 minutes.

Mr. MOLLOHAN. Mr. Speaker, I thank the Chair, and I yield to the gentleman from North Carolina (Mr. VALENTINE).

Mr. VALENTINE. Mr. Speaker, I want to take this opportunity to express my appreciation to those of my colleagues who have arranged for this special order on what is, without question, the greatest problem facing our country today.

The situation in the district which I have the honor of representing in the Congress—that is the Second District of North Carolina, Mr. Speaker—is, I believe, perhaps different from many places in the Union, in that we have in that district, side by side, a county with the lowest, or one of the lowest, unemployment rates in the Nation, and a county with one of the highest unemployment rates in the Nation. That, I think, is such a brutal contrast that it makes the problem that we are here discussing even worse because we see on one side of the county line the embodiment and the bloom and the fruition of the American dream, comparatively speaking, yet across the line we see the brutality of unemployment.

Unemployment is far more, I suggest, Mr. Speaker, than a set of statistics. When prolonged, it becomes a disease which affects human beings as much as cancer or any other grave illness. When no work is available, the trauma that results from loss of self-esteem can harm the individual who must act as head of a household and often destroys the very fiber that holds a family together.

In recent months joblessness in this country has reached the highest levels, as many speakers here tonight have stated, since the Great Depression, with millions of our fellow Americans out of work.

Yet high unemployment affects a lot more people than those in the unemployment lines. It hurts all of the members of a worker's family as they try to make ends meet against steadily rising prices and steadily shrinking savings. It hurts the local business people who depend on local payrolls to sell the goods and services that they have to offer. It hurts the manufacturers who rely on economic stability to make long-term decisions that in turn create jobs.

Most of all, it hurts the worker who depends on steady employment for his livelihood, his sense of self-respect, and his share of the American dream.

Two years ago President Reagan promised the creation of 13 million new jobs in this country by 1986, but his flawed economic policies have failed to create 1 additional job.

□ 2220

The fact is that 3 million more Americans are unemployed today than when this administration took office. The administration takes comfort in the fact that the civilian unemployment rate marginally dropped in May, down one-tenth of 1 percent, to a still staggering level of 10.1 percent; but, in truth, Mr. Speaker, this drop only reflects a declining labor force, not an increasing number of unemployed workers finding jobs.

For black workers, Mr. Speaker, and in the Second District of North Carolina I am happy to say that almost 40 percent of the registered Democrats are black, and among these, my brothers, the figures are much worse. Unemployment among black workers in May stood at 20.6 percent; among black teenagers, 49.4 percent; and among black male teenagers, an unbelievable 53.1 percent.

In my own district, the working people have had their share, Mr. Speaker, of this type of misery. The figure for unemployment in my district, even considering the fact that I alluded to when I first came to the well of the House that in that district among those 10 counties and 1 township is a county with one of the lowest rates in the Nation, but considering that, the average rate of unemployment in my district is 9.3 percent. Out of a total labor force of 270,000 people, more than 25,000 workers are unable to find work.

Mr. Speaker, in concluding my brief remarks, I want to say that I am one Member of Congress who is here to say and to confess that I believe it is sheer fantasy to think that the Government has sole responsibility to solve this enormous problem; but we do have, Mr. Speaker, a responsibility to create the proper atmosphere in which private enterprise can jump in with meaningful, lasting opportunities.

I urge my colleagues, those who are here, who see and hear what occurs this evening, I urge all of them, all of you, to join us who are here tonight in making employment a first priority of this legislative body.

Mr. Speaker, I again compliment the fair lady and the gentleman who have made all this possible.

Mr. MOLLOHAN. Mr. Speaker, I thank the gentleman from North Carolina who represents his district so well and who has spoken so eloquently on this subject of the special order tonight for participating in my hour of this special order. The gentleman spoke of the economic contrasts, high unemployment existing in close proximity to relative prosperity, that I think creates a certain confusion as to what approach we as a nation should take in addressing this economic quagmire in which we find ourselves.

I would suggest that while some sectors of the economy are enjoying relative prosperity today, that the Atari experience in California where we saw a high-tech industry moving out of this Nation in favor of Taiwan where it could take advantage of lower production costs, teaches us that the problems facing our Nation today are generic and will if they are not affecting today some industry, one day will affect those industries, and high interest rates and unfair foreign competition ought to be the concern of everybody, no matter what district they represent.

Mr. Speaker, I yield to my colleague, the distinguished gentleman from Pennsylvania (Mr. RIDGE).

Mr. RIDGE. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I, too, want to sound very much like the echo in addressing the message that many of my colleagues have given and congratulations to you and to the rest of the West Virginia delegation and to the gentlewoman from Ohio.

I stand here not only in support of the focus of the special order, but also as a living testimony that both sides of the aisle were asked to participate and I am very pleased that that courtesy was extended to me. I am very pleased that I have been given an opportunity to share a few thoughts that I have on this extremely important, most important national problem.

As a Congressman who represents 3 cities in the top 10 in terms of metropolitan unemployment, those are Sharon, Pa., in excess of 20 percent; Erie, Pa., with almost 16 percent; and in a district that has almost 20 percent unemployment, I appreciate and am most grateful for that opportunity.

Many previous speakers, many of our colleagues have focused on particular problems that many of our constituents deal with because of their unemployment. I can focus because of personal experience from a father who worked two jobs to put two sons and a daughter through college and who left a part time job voluntarily because of corporate decisions, was involuntarily terminated from his regular full time employment after almost 30 years, and from a mother who entered the work force to assist in that particular effort to educate her family, who is also because of the decision and because of

the economy found herself in the unemployment lines.

I, too, would like to focus my remarks, not about the problems of unemployment, because they have been addressed eloquently not only through the remarks of many of our colleagues, but also from the written record and letters sent by many of our constituents.

You know, I have participated in some of the debate and, indeed, supported many of the targeted assistance programs that the Congress of the United States has deemed fit, necessary and proper and, indeed, they were to help the unemployed; the targeted jobs bill, the extension of unemployment benefits; the housing assistance, and various kinds of assistance. That is a small part of the puzzle; but I think from time to time—well, I do not think, I know—that in the long run, the long term, we do not want to deal with those anymore. We do not want to have those problems that require those kind of legislative answers. Until such time as we have relatively full employment, we are going to have to attack them and attack them we do, and I will continue to join in a bipartisan effort for well conceived legislation attacking those problems and I commend my colleagues for their efforts in that regard; but we have spent a lot of time focusing on these problems. I am not going to get into a partisan dialog blaming the administration for what it has done or what it has not done; but I would like to share a few thoughts with my colleagues, not about unemployment and unemployment statistics, but about jobs and jobs creation and how to put these people back to work. The focus of this evening is to demonstrate, and I again commend my colleagues because they have done it so well, a national concern about unemployment and putting people back to work. With your indulgence for a few minutes, I have listened to most of the debate, some people have focused on one side of the problem, that is, how can we support those people who are unemployed until we put them back on their feet and give them meaningful jobs. I would like to discuss and share a few thoughts with you about jobs, how we are going to put them back to work.

You know, I do not think, because there is a general understanding on both sides of the aisle, that we want or think that we can legislate them all back to work. If you take the 12 million people unemployed and you think you can legislate them into positions with minimum salaries of $15,000, plus benefits, you know you are going to double the deficit in 1 year and you are going to need a new allocation the next year and another allocation in the next year. Hopefully, there is just general agreement that while we may have a responsibility and an opportunity from time to time to help to put some of the people back to work through targeted economic assistance and programs, we are not going to legislate them all back to work.

□ 2230

It seems to me that we can ask them to retrain and to be reeducated and that is something that we want to help them do.

But in my view, and in my opinion, that again is just a small part of the problem because we cannot put the burden just on the unemployed men and women. Basically they are unemployed through no fault of their own, so when we are talking about jobs and we are talking about putting people back to work I am certainly hopeful that we are thinking in terms of readjusting our thinking as a country, we are thinking in terms of asking our corporate leaders to readjust their thinking and we are thinking in terms of asking our labor leaders to readjust their thinking and for our political leaders to reassess their thinking.

Mr. WATKINS. Mr. Speaker, will the gentleman yield?

Mr. MOLLOHAN. I yield to the gentleman from Oklahoma.

Mr. WATKINS. I would like to enter into a little discussion because I think it is a very legitimate type question to ask. I wish this was at the height of the day with the room full because I think these are serious questions that have to be asked on how do we resolve some of these problems.

I think the Japanese have moved out in the forefront and we have forfeited a great deal of our production and manufacturing and all to that country, not by accident, not by happenstance. But I think the Japanese have shown us what it means to sit down as labor leaders and as industrial leaders and government and to focus on a direction and reach a consensus on that direction on how to go.

I have submitted and am working on legislation in an area that I have been trying to perfect more or less in my rural, depressed area of southeast Oklahoma which is very similar to West Virginia and some of the other areas where there is no Fortune 500 going to move there. There is not going to be any major industries.

But I do not think that we have unleashed the ingenuity of the American people. In my area I have put together an industrial innovation center, going back to the basics, because I have chased smokestacks for all of these years, all of my adult life, and I have basically given up. I have finally said, "Hey, I don't think they are going to move there quick enough to save most of our people."

But through an industrial innovation effort, going back to the basics, realizing that everything you own, everything that you see in this room, everything that you touch, at one time was a product or a process which was an idea. We need to start developing ideas with a technology to develop not only high tech but low tech, new products and new processes, which means new businesses and new industries. New industries and new businesses mean jobs.

But every time we have looked at trying to initiate something the administration has cut back on it.

But I think it has to be a carefully parlayed partnership in order for us to move out of this situation of $200 billion deficits because we cannot get there by just more budget cuts. We cannot get there with just huge tax cuts. We have to unleash a partnership like we have never done before, but we have to go back to the basic situation of saying we have got the ingenuity, we have the mind. In fact, in my area we are teaching the first course in preentrepreneurship on the vocational technical level. Why? Because new products are not developed by MIT or the Fortune 500. They are developed by skilled workers, the housewife, the farmer, and the rancher, because they run into a crisis and crisis is the mother of invention.

That then becomes that product or process, that new product or process, and that then becomes a new business or industry. A new business or industry then means jobs.

But we are generating that in my district. We are not going to look to happenstance, because I have waited all of these years to try for someone else to do something for our area. I realized in my area, a rural, depressed, decayed area of America, that we cannot wait any longer. We are going to have to go out on our own. We are going to have to lift ourselves up by our bootstraps. We are going to have to use the ingenuity, the creativity, and we are going to have this free enterprise curriculum developed on the vocational tech level, because I am not an experienced or an intelligent person in the electronics or mechanics or many of those areas. But I want to get the best minds possible working in that area. They are the ones who are going to invent new products in electronics. They are the ones that are going to invent new things in mechanics.

But we have to go back to saying our people have got the ingenuity, they have the creativity, and they have the knowhow. They have the desire.

But we have got to offer them in that partnership a way to do it and I am convinced we can do it. But we cannot do it and say we are going to shut everything down in this country and we are going to pull everything out because that is going to cause a deeper division, a deeper split than we have ever seen before.

I hope that sometime we can have this discussion at 3 o'clock in the afternoon so that many of our other colleagues, and hopefully some of our leaders, will listen because I do believe on the Democratic side and the Republican side we have to confront this if we are going to have the quality of life that we all approve of.

So I think there is a way, but we have to say that it cannot just occur by accident or happenstance, but we have to plan it and work toward it and stress it among all of the leaders of this country.

Mr. RIDGE. I thank the gentleman from Oklahoma for his comments and for his strong, positive statement in terms of getting back to basics and harnessing the energy of a very innovative and creative people. If the gentleman will set the time and place I will be happy to enjoy and participate in that colloquy with him on the floor.

I think you do highlight, if I might just briefly continue, Mr. Speaker, some of the concerns that I had and I just wanted to share in terms of the focus of what we are doing this evening.

We as Congress, as a legislative body, promote or discourage different kinds of conduct. We give incentives or disincentives to do or not to do something because of laws that we promote and promulgate.

It seems to me in terms of partnership as the gentleman from Oklahoma talked about, and the general thrust of what the focus of this evening involves, it is these kinds of incentives in terms of talking and convincing, and giving incentives for the corporate leaders of the world, and the planners, to look, long-term and to modernize.

There are going to have to be some significant readjustments in order to put people back to work, in order to make some of our basic industry more competitive. It may involve a different look in terms of short-term profit and loss statements and dividends.

There is going to have to be some rethinking and readjusting because in the 1950's and the 1960's when wages increased, productivity went down. That is just a general statement but there are some very definite cases that we could point out, and maybe as we are looking to turning the country around, and we are looking to putting people back to work in both labor and management, we have to take a look at creating different incentives for themselves, and make wage increases and profitsharing tied into increased productivity.

So what I am saying is that, as the gentleman just mentioned, there is plenty of opportunity because there is the challenge out there. Not only do we have to take a look and ask business and labor unions and nonunions to participate, but we as a body, Congress as an institution, has a responsibility and an obligation as well.

It is just not enough to tell the private sector and the unemployed men and women to do it and the empoyees of this country to do it. We have some responsibility.

I just hope that from time to time as we look at these incentives and what we are trying to do we look at the long-term implications of what we are trying to do.

The gentleman just mentioned we have a lot of ingenuity and we have a lot of creativity in this country and indeed we do. I was struck most by some committee hearings that we are having in the Economic Stabilization Subcommittee. The gentleman from New York, JOHN LAFALCE, a very able, capable guy, brought in witnesses and we have had all kinds of witnesses. An economist from MIT, Lester Thoreau, commented about the Hausian phase of American industry and the American society and said we enjoyed an effortless superiority, an effortless superiority, he said, because we really did not have any competition.

The industrial base of the other countries in Europe and Japan was laid waste because of World War II, so we do have to readjust our thinking because that kind of superiority is something we do not enjoy any more.

Congress will have a role in creating incentives to promote this kind of rethinking.

I think in terms of what we did just the other day, and I do not say it in terms of criticism, but as an observation, that there were some discussions and rhetoric on the floor that somehow people who earned over $35,000 should have a tax increase.

Some people thought it was necessary to have revenue enhancement. Other people thought it was necessary to promote small business.

When we are talking about the $35,000 bracket, we are talking about 2.2 million small business men. It is not as if the tooth fairy comes down every weekend and lays a paycheck at the side of their pillow. They are out there and they are investing. They are working 7 days a week, 14, 16, 18 hours a day.

We want to promote them to do that. We want to promote them, we want to encourage them to create jobs.

This body decided at this time, for whatever reason, that revenue enhancement was more important than perhaps giving an incentive to small business. I am not saying whether that is right. I am not saying whether that is wrong.

But hopefully as we look at the tax laws as incentives to do or not to do different things, we will take a look at the implications of creating jobs and the implications on the job market.

Finally, hopefully we as a body will consider, and I know it is very difficult because there are 1 out of 6 jobs in my district which depend on the international marketplace, 1 out of 6, and there are 5 billion people on the face of the Earth, and maybe by the year 2000 there will be 6 billion people on the face of the Earth.

□ 2240

And if we structure our responses to unemployment, if we structure how we are going to try to put these people back to work and limit ourselves to a market of 235 or 240 million people, it is a short-term, not a long-term solution, and by no means will it be permanent. So, hopefully again and I implore my colleagues, as we are looking to address the problems with imports and the problems and indeed they exist with unfair competition, and that exists, and the problems with dumping, with subsidized products being sent into this country; they are problems, if we look for ways to resolve these problems, let us do what we are expecting the business community to do, or labor leaders to do, let us look long-term. If it is necessary for us to be protectionist from time to time in order to protect an industry so that it can retool and become competitive in the international marketplace, let us consider it, let us not dismiss it out of hand. But if that particular approach will only apply a band aid and will not make that industry more competitive, internationally, then let us consider the implications of that as well.

Mr. Speaker, once again, I want to thank you, our West Virginia colleagues, the gentlewoman from Ohio. I wanted to share a few thoughts with you about not only the problems our unemployed people have trying to get through in their day-to-day struggle to exist, but some of the responsibilities we have as a legislative body to come up with some meaningful, long-term, hopefully bipartisan solutions so that these people can find meaningful and productive jobs in the private sector.

I thank the Speaker very much.

Mr. MOLLOHAN. Mr. Speaker, I want to thank the gentleman from Pennsylvania for his remarks and for his observations and participating in my hour of this special order. I would like to echo and reinforce the thoughts that I heard him speak with regard to unfair foreign competition.

I think it is time, as I talked to in my remarks, for this country to recognize that there is such a thing as unfair foreign competition. And in its most obvious form, it is for subsidization, whether it is feedstock subsidization, direct-grant subsidization, predatory financing, no matter what extra advantage the foreign country has given to its producers, it is unfair because of the foreign government participation in the foreign manufacturing process

which allows them to dump, to sell products in this country at a cost less than the manufacturing price. That is exporting jobs. I certainly appreciate and echo the gentleman's comments along those lines. It is a problem deeply felt in my congressional district which is the heart of the West Virginia bituminous coalfields, which is heavily dependent upon the basic steel industry, which is heavily dependent on the chemical industry, on the glass industry, and on major manufacturing. Those are the kinds of industries, basic industries in this country, that are particularly sensitive to unfair foreign competition. They are also particularly sensitive, when you combine that problem with the national economic trend of high interest rates and the restrictive monetary policy, and I think that explains, Mr. Speaker, why, unfortunately, our State of West Virginia is suffering the highest unemployment in the Nation.

I think we have to get about those problems, and our colleague from Pennsylvania's comments are certainly pointed as they related to our State of West Virginia.

I want to thank the gentleman, my colleague, Mr. WISE from West Virginia, for organizing this tonight. It has been I think a very effective opportunity for Members of the Congress to bring this excruciating, personally felt problem home to the Congress and to reflect to those out in our districts that we are not forgetting them.

Mr. Speaker, over the past few months I have received repeated letters from a constituent—a man who has been unemployed for the better part of a year—who asks about unemployment legislation. I respond that the Government is terribly concerned about the unemployed. I mention the jobs bills; I mention the so-called phase II and phase III programs. The man continues to write to me. But his letters have become shorter and shorter, until his last correspondence was nothing more than a single question spelled out in large, block letters: "Why has the Government forgotten the unemployed?"

Mr. Speaker, I have begun to ask myself that question. Popular political wisdom now holds that the economic recovery—that elusive economic recovery, Mr. Speaker—will carry the President through a successful reelection campaign. The Nation's unemployment rate hovers around 10 percent, yet all of a sudden we are in an economic recovery. West Virginia's unemployment rate has accommodated the economic recovery by dropping from 21 percent in February to 19 percent in April, and my district is lucky, by West Virginia standards, to have only a 17-percent rate. Apparently the approximately 12 million unemployed persons in this country have been dismissed as nothing more than the one statistic that customarily lags behind other indices of economic recovery. This is why I have joined in this special order tonight: I would like to respond to my constituent, to assure him that he, and the 12 million others in his position, are not forgotten.

My constituent knows why he is unemployed. We are in a deep recession caused, largely, by high interest rates and unrealistic, ineffective international trade policies. These two factors have hit West Virginia particularly hard because the economy in my region rests on the basic industries of coal, steel, glass, chemicals, oil, and gas. Before the onset of this recession, West Virginia's industry looked forward to a bright future, with high growth projections in the utility industry; that high growth somehow turned into a marked decline. The largest consumer of raw steel is, of course, the automobile industry; my colleagues from Michigan have already mentioned the problems of automobile production. The glass and chemical industries, and basic manufacturing in my district also declined with the sagging economy. Some of the results: over 6,000 unemployed mineworkers, 2,800 workers laid off at Weirton Steel, 620 workers permanently laid off at Blaw Knox Foundry in Wheeling; 650 at the Wheeling-Pittsburgh foundry, 98 at the Cresent Glass Co. at Wellsburg, 107 at Celotex Roofing in Chester, and 455 at Anchor-Hocking Glass Co. in Chester. This is only a very partial list, Mr. Speaker; if I were to continue, I would use more than my allotted 60 minutes.

My constituent is aware of the problem. He may not particularly care about the problem's sources—high interest rates and unfair trade practices—but he is awfully interested in its solution. That the President has done nothing but aggravate these factors is another thing the constituent knows. Unemployment in the first district stood at 12.2 percent the month Ronald Reagan took the oath of office. The most recent figure was 17.3 percent in April. The President has engineered the largest deficits this country has ever seen, and my constituent knows that these deficits are the leading factor in high interest rates.

□ 2250

Finally, the constituent knows that the President has dedicated his administration to pursuing, as Trade Representative William Brock phrased it, "the Holy Grail of free trade."

I would like my constituent to know that unemployment can be conquered. It will not happen by the trickle-down theory and tax gifts to the wealthy, but by a comprehensive Government restoration of the workingman's opportunity in the private sector. We need plans, as Franklin Roosevelt put it, "that build from the bottom up and not from the top down, that put their faith once more in the forgotten man at the bottom of the economic pyramid." We need short-term steps to alleviate the problem's symptoms, and we need to begin laying the foundation for more fundamental solutions, as well. As reflected by the many here tonight, our people back home are writing us and they are demanding nothing less, as evidenced by two letters from my constituents, which I would like to share.

The first is from an unemployed person who previously worked in the work force. He writes:

DEAR CONGRESSMAN MOLLOHAN: I am writing to you for help and support to get the people of West Virginia and the nation back to work. Create jobs, decrease dependency on foreign imports, such as oil, steel, and chemicals. We have the workers and technology. So, create bills to help our industries, not foreign industries.

I am a proud West Virginian.

Since President Reagan and his administration took office, unemployment has reached an all-time high. The President says to "stay the course", but how long is this course? When will the American workers start to recover from this "infinite" course of suffering, frustration, and extremely high unemployment?

What happens when all the benefits are exhausted?

So, to you again, we the American working class asks: "Give us jobs. Give us back our pride!"

Take care of the immediate needs of our state and nation. Uncle Sam can't carry the whole planet on his shoulders. We the American workers and voters elected you to represent us. Therefore, I respectfully and urgently request your help to getting West Virginia and the Nation back on top where we belong.

I do not think it could have been said much better, Mr. Speaker.

The second letter is from a teenager, not yet graduated from high school, from New Martinsville, W. Va., in my district. He writes:

DEAR CONGRESSMAN MOLLOHAN: I am concerned that West Virginia has the highest rate of unemployment in the United States.

What is Congress doing at present to get people back to work in this state?

I am still in high school, but I will be graduating in two years. Is there a chance that in the near future there will be more jobs for us? Or will I have to leave my home state in order to get a job?

Mr. Speaker, this House has already taken some necessary short-term steps, including adoption of the jobs bill. The American Conservation Corps to provide jobs for unemployed youth, like the one, whose letter just read, the Emergency Agriculture Credit Act to aid farmers facing bankruptcy or foreclosure, and the Emergency Housing Assistance Act to aid homeowners threatened with foreclosure because of unemployment or underemployment. The budget resolution adopted by both Houses of Congress last week includes further steps we must take, notably the Hawkins jobs bill.

A final immediate step, included in the first budget resolution's reserve fund, is an extension of the Federal supplemental compensation program, which is due to expire September 30 of this year. The FSC program provides additional weeks of unemployment compensation to those persons who have exhausted their regular and extended benefits. I introduced a bill today authorizing the simple 6-month extension included in the budget resolution, and I urge my colleagues and request that they cosponsor this legislation.

Let me make it clear, Mr. Speaker, that I feel it is a shame that we have to deal with this type of legislation, this legislation that treats this unfortunate symptom. These are intermediate steps only; they do not restore the workingman's opportunity, but they do allow him to survive until we can implement the needed fundamental changes. Unemployment will not decline significantly until this country once again has a stable, productive economy and rejects its current self-destructive trade practice. I am amazed at our alleged economic recovery, not only because unemployment remains unacceptably high, but also because we continue to foster a national debt over $1 trillion. We will not recover from this recession until interest rates drop, and interest rates will not drop until we end this frightening deficit spending. The President argues that interest rates have declined since he took office. That is true, but so has inflation, thus real interest rates—taking inflation into account—have dropped only silghtly during his administration.

One of the reasons we voted for the budget last week was that it projected a deficit on "only" $169 to $179 billion. It makes me ill to say "only $169 billion," But the President's alternative of no budget resolution would mean a deficit in excess of $200 billion in the next fiscal year. The major good in this budget is that it exists at all and that it is the result of a serious bipartisan effort to curb deficit spending and restore a measure of fiscal sanity to this Government. The Democratic leadership of the House joined the Republican leadership of the Senate in this effort; the ball is now in the President's court: he can join us, or, if he chooses, he can probably destroy the budget process and any hopes of cutting deficit spending in the forseeable future. The result would be continued high interest rates that would stifle consumption at home and, by maintaining the artificially high value of the dollar on foreign exchange markets, contribute and exacerbate our current trade difficulties.

Our unemployment problems are not due solely to our domestic policies, however. The predatory foreign trade practices of other nations and this country's failure to effectively counteract those practices is having a disasterous effect on many U.S. industries, including many located in the First Congressional District of West Virginia. Steel, glass, and chemicals, major manufacturing, as I said previously, are particularly vulnerable to these practices.

The President, a self-described "unrestrained free trade advocate" seems unaware of the costs imposed by his position. A sobering example of the threat of unfair foreign competition is this country's response to Mexican subsidization of its carbon black industry. It is blatant.

Carbon black is manufactured in my district, among others across the country, by Cabot Corp., which employs over 100 people. These workers' jobs are threatened not by slack demand for the product, but by the actions of the Mexican Government and our failure to respond to those actions effectively. The Mexican Government heavily subsidizes its carbon black industry and discriminates against foreign purchasers of carbon black feedstock, the main component of carbon black. While U.S. companies must pay $25 per barrel for the feedstock, Mexican carbon black producers pay only $2 per barrel. American producers cannot long compete when they pay $23 more per barrel differential than their Mexican counterparts and competitors.

□ 2300

The Commerce Department, in a recent ruling, did not even recognize this subsidy because it is not a direct cash subsidy but a feedstock subsidy, which was sold to other industries in Mexico. Thus, the Government of Mexico is permitted to continue giving away its feedstock to Mexican producers for one-thirtieth of the world price, and American carbon black companies are not even allowed the meager countervailing duty as a remedy which they sought.

Examples of this problem dominate our foreign trade relations. We continue to grant large amounts of aid to countries that in turn subsidize their industries, and these industries, in turn, compete with American companies and threaten and take American jobs. We are exporting employment, importing unemployment, Mr. Speaker, by our trade policy.

Current foreign trade laws are an inadequate response to this problem. Months pass before a final decision is rendered after a petition is filed, months in which American companies struggle to keep alive against the inundation of foreign goods. Agency and Commission recommendations can, and typically are, rejected by the President. Meaningful relief from these practices is almost impossible to receive.

Our trade laws are indeed an anachronism in today's world. While other nations have closed their doors to our products, ours remain wide open. Other nations add sizable duties to U.S. products entering their borders, while we keep our duties low or remove them altogether on products which are in competition in regard to.

While other nations take action to protect their native industries and actually pursue the vulnerable and profitable U.S. markets, we stand idly by, unable to even pass domestic content legislation.

Our concern for America's industries has been falsely branded "protectionism" by the misinformed. Our flaccid response to the unfair foreign trade practices must be replaced by a vigorous, effective approach to a pervasive problem that endangers American business and industry across the board.

Mr. Speaker, I know all the words spoken by all of us here tonight will not give my constituents a job and will not, by themselves, do anything to alleviate the tremendous suffering endured by the millions of unemployed across this country. But they are not meaningless words, for they outline the substantive steps taken in total that we can and must begin to take.

Mr. Speaker, I appreciate the opportunity to participate in what I think is a particularly meaningful discussion of the No. 1 problem facing this country today. I commend my colleague, the gentleman from West Virginia, for organizing it, and I am pleased to have participated in sponsoring this hour with my colleague, the gentlewoman from Ohio, and my colleagues from West Virginia, Mr. RAHALL and Mr. STAGGERS.

● Mr. RODINO. Mr. Speaker, I am pleased and honored to be participating in this special order on unemployment. I wish to commend my distinguished colleague, BOB WISE, for his efforts to bring the problem of unemployment to the fore.

Unemployment in my district, the 10th Congressional District in New Jersey, is now almost the highest it has ever been. Unemployment in the country as a whole is now the highest since the Great Depression, over 10 percent, and that figure does not include discouraged workers and those who can only find part-time work. The largest city in my district, Newark, has 13.1-percent unemployment, three points above the national average. Newark's poverty level is the worst in the country, with one-third of its residents living below the poverty line.

Unemployment in the industrial Northeast/Midwest is now 11.5 percent, in large part due to the unfair penalization of the Northeast/Midwest, especially the cities, by the Federal Government. New Jersey only

gets $0.71 back for every tax dollar sent to the Federal Government—the second lowest amount in the country—while a State in the Southwest, such as New Mexico, gets back $1.74 back for every tax dollar sent to the Government.

The administration's tax policies contribute to the economic malaise of the Northeast in general and my district in particular. Our taxes are higher, because Washington's contribution to essential services is less. Industry becomes unwilling to reinvest in areas with high taxes and leaves for the West. All this is supported by our taxes—our resources going toward our decline. The President's budget, of course, only exacerbates the problem. Many of the services he cut went to the Northeast, while much of the defense budget that he increased goes to the West.

No wonder industry is unwilling to stay in the older cities of the Northeast. The President's cut in essential services increases poverty and unemployment in the cities. The tax base erodes further as the affluent leave the cities. Recently the Western Electric plant closed in Kearny, N.J., throwing 4,000 people of work. I have cosponsored a bill, The National Employment Priorities Act, which will help economically depressed areas which are suffering from plant closings and business failures.

Our No. 1 priority must be putting Americans back to work. We in the Congress must convince the President that 10-percent unemployment does not constitute a recovery, and try to make him realize that his policies have aggravated the unemployment problem. It is up to us in the Democratic Party and in the Congress to regain our commitment to full employment, to the Humphrey-Hawkins Act. We must develop effective legislation to help the problem of unemployment and the social problems caused by unemployment. The country cannot and will not recover until its people are working and its industrial base is restored.●

● Mr. UDALL. Mr. Speaker, I rise today along with many of my colleagues in an effort to draw attention to the issue of unemployment and specifically how it affects the second district of Arizona. While the national unemployment rate has dropped to 10.1 percent there are many areas of the country where the unemployment problem is even worse, including many areas in Arizona. The economy in Arizona's second district has been particularly hurt by the failing copper industry and the devaluation of the peso.

Troubles in the copper industry have brought about mass layoffs in Pima and Maricopa counties. In March 1983 Pima County had an unemployment rate of 11.4 percent and Maricopa County had 8.8 percent unemployment. Many of these people cannot be helped until the national economy improves, and the demand for copper picks up.

Towns along the United States-Mexico border in Arizona are suffering from another economic calamity, the peso devaluation. In Nogales, Ariz., and other nearby towns, the peso devaluation has caused a drastic decline in the trade industry with Mexico. Last summer I attended a task force meeting in Nogales and listened to statements made by the mayor, councilmen, local bankers, and merchants concerning the far-reaching effects of the peso devaluation. A year later, the problem has become even worse. Unemployment in Nogales has risen from 11.8 percent in February 1982, to 23.6 percent in February 1983, because of the peso devaluation. The only thing which has kept these towns alive are the few plants that have been able to survive. Yuma County, also affected by border trade, experienced an unemployment rate of 17.7 percent in March 1983.

It is apparent that recent improvements in the national unemployment rate are not reflected in all areas. While the national unemployment rate may continue to drop, this is not an indication that the entire Nation is going back to work. It will take a long time before a stable economy corrects all the damage caused in Arizona by the copper mine layoffs and the peso devaluation.

At the time of the peso devaluation I introduced an Economic Disaster Loan bill which was endorsed by Arizona merchants. And the Small Business Committee approved the bill, but more steps in this direction must be taken to aid economically depressed areas. We must work together to insure that a wide variety of measures to resolve our country's economic condition are considered. As individual representatives we must insure that the special needs of our districts are not forgotten.●

● Mr. DINGELL. Mr. Speaker, this past weekend I joined in the first Great Lakes Governor's Conference held in my home State of Michigan to discuss the very serious economic difficulties now confronting our region. It is a measure of the crisis facing the Great Lakes region and the Nation as a whole that these great industrial States are compelled now to consider joint action to relieve the suffering of their citizens and take steps to rebuild their shattered economies. The foremost concern of those attending the conference was the high rate of unemployment which currently besets our region.

Economic indicators and analysts are predicting a recovery, but unemployed workers in depressed segments of the economy, such as Michigan and, particularly, my 16th district cannot subsist on the thin nourishment provided by these rosy predictions.

In 1980 when President Reagan took office the unemployment level in Detroit stood at 13.1 percent. Today that figure has risen to over 17 percent. There are areas which have little hope for a sustained recovery in the near future and will require assistance to survive.

Like many other States, Michigan is hard pressed to continue providing basic services since long-term economic recession has reduced State revenues. States have been forced to drastically cut services causing great hardship. At the same time, the administration has continued to call for major reductions in social security and other vital domestic and human service programs.

Beyond the economic ramifications lie the deep personal tragedies experienced by the unemployed. The human cost, both mental and physical, has been tremendous. Public health officials have noted the dramatic rise in recent years of stress-related problems in these regions suffering from high unemployment. Many of the region's jobless have foregone essential medical treatment because their health insurance has expired. My own Energy and Commerce Committee has acted to provide help to these people through legislation to extend health benefits for the unemployed. This will help, but nothing will heal the scars borne by honest working men and women who, through no fault of their own, find themselves unable to find the jobs they need to provide for themselves and their families.

It is time to lay aside partisan bickering and ideological posturing and get behind a program to relieve the suffering of unemployment by providing jobs. Again, the Energy and Commerce Committee, which I chair, has taken a first step toward restoring the health of the American automobile industry which was for so long the backbone of our national economy. My committee has reported to the House H.R. 1234, the domestic content bill, which will require that significant American labor and American parts be included in cars sold in America. This will stop the hemorrhaging of American dollars and American jobs to Japan.

But more is required. We must have a national industrialization policy and a national trade policy to restore America as the economic leader of the world and revitalize our troubled economy. Never since the Great Depression did the American working man and woman need leadership as they need it today.●

● Mr. KILDEE. Mr. Speaker, I am joining this special order on the floor of the U.S. House of Representatives because of the unemployment crisis still confronting us. To say that I am

pleased that the Nation has started on a modest recovery is a great understatement. It would be better to use the word "relieved," because of the suffering that has been inflicted on the people of my district by this harshest and longest recession since the 1930's. While the President boasts of the beginning of this recovery, we should not lose sight of the fact that the recovery is needed because of the recession that this President and his administration has brought upon us. The recession never had to happen. It occurred because this administration decided to fight inflation by sacrificing employment. We appear to have won a pyrrhic victory over inflation at the cost of the worst unemployment rate and the highest rate of business failures since the Depression, severe interest rates, the largest Federal deficits by far in our history, a disastrous situation in agriculture, and a diminishment of our industrial base.

To say that the economy is recovering is to talk in relative terms only. Recovery has a very long way to go in the Seventh Congressional District of Michigan where unemployment is still nearly twice the national average. In Genesee County, which makes up the bulk of my district, 33,575 jobless workers still were looking for employment in April, the last month for which statistics are available. That translates to an unemployment rate of 17.5 percent for Genesee County, and 22.8 percent in the city of Flint. Even these high rates represents an improvement from January, when the unemployment rates were 21.6 percent, 27.8 percent, respectively. And it certainly is an improvement from last year at the worst of the Reagan recession when unemployment in Flint went above 25 percent. However, such improvement has little meaning to the thousands and thousands of my constituents who are still without work or whose lives have been so disrupted by the policy of this administration.

The human suffering resulting from widespread and prolonged unemployment is not easily described, but I will say that the economic crisis brought on by this administration in my district is the worst I have seen in my adult lifetime.

I wish to commend the gentleman from West Virginia (Mr. WISE) for his efforts to focus more attention on the unemployment crisis with this special order. As the Congress acts to reduce the unemployment and to alleviate the hardships already incurred, let us be guided by President Franklin Delano Roosevelt's second inaugural address when he said: "The test of our progress is not whether we add more to the abundance of those who have much; it is whether we provide enough for those who have too little."●

● Mr. ROE. Mr. Speaker, I rise today to address what continues to be one of the major problems plaguing our society today: unemployment.

As we stand on this floor today, there are still more than 11 million of our fellow Americans who are out of work. That figure represents 10 percent of our work force.

When the current administration came into office, the Nation's unemployment rate stood at 7.4 percent. At that time, I considered that to be a totally unacceptable figure.

What we have seen over the past 2 years is a steady rise in unemployment to the point where it reached a record setting 12 percent.

Mr. Speaker, the national unemployment figures are shocking enough. But we all know only too well the devastating effect that unemployment has had on our home congressional districts. And that is especially true for those of us like myself who come from the older industrial areas of the East and Midwest.

In my own congressional district, the city of Paterson is reeling from a 16-percent unemployment rate. The figure among minority youths in that city has topped 20 percent in recent months.

Mr. Speaker, we are truly deluding ourselves if we believe that the current record sessions on Wall Street are a true indicator of how well the majority of people in this Nation are doing economically.

We in Congress have a mandate to do something for those 11 million unemployed. Through proper investments in rebuilding the crumbling infrastructure of our Nation, we can create long-lasting viable job opportunities for those unfortunate individuals who have a true desire to earn an honest day's pay.

Mr. Speaker, our States are running out of money to pay their unemployed. My own State of New Jersey currently owes millions of dollars in borrowed Federal unemployment benefits for its citizens.

Unless the unemployment situation is corrected, our Nation will never be able to sustain full economic recovery. The fact of the matter is for every 1 percent jump in the unemployment rate, the Federal deficit rises by $25 billion because of lost taxes and additional unemployment benefits.

I would like to extend a thank you to my colleagues for holding this special order today. It will send a message to the American people, especially those facing frustration in their job seeking efforts, that they have not been forgotten.●

● Mr. DE LA GARZA. Mr. Speaker, the 15th Congressional District of Texas, which I am honored to represent in the House, spreads from the Mexican border to the outskirts of San Antonio. While there are 15 counties in the district, close to half the population is in the 3 counties along the Rio Grande, bordering on Mexico.

Last night on the CBS news, Starr County was referred to as the poorest county in the Nation. During 1982 the average unemployment rate was 33.5 percent. So far in 1983, the unemployment rate has been close to 50 percent. This year, one out of every two people desiring gainful employment have not been able to find work.

The other two counties along the border have not fared much better. Hidalgo County, the largest in my district suffered a 15 percent unemployment rate in 1982, and is averaging close to 20 percent unemployment this year. Zapata County, also on the border, experienced 13.4 percent unemployment in 1982 and is averaging 17 percent unemployment this year.

Although the U.S. recession has certainly had a strong impact on the border economy, the greatest blow has come from the fall of the Mexican economy. Many of the border businesses depend on buyers from Mexico. The Mexican financial crisis has hurt sales so badly that many stores have been forced to close their doors, increasing the unemployment problem.

As one travels north from the border the situation appears to improve, but only because many of the counties are sparsely populated. The larger counties in the northern part of the district suffer unemployment rates above the national average.

While many can look forward to better times as the economy improves, I am afraid it will take a long time for the recovery to reach the people in my district, unless there is a rapid improvement in the Mexican economy. Though the problems of the border region may seem far away to those who represent the "industrial heartland," there is reason for concern. The stores on the border which are permanently closed will no longer serve as an export outlet for the manufactured goods of the rest of the country, thereby limiting the future sales of U.S.-made goods to Mexico and further slowing our economic recovery.

A somewhat ironic situation is presently developing along this part of the border with respect to the Job Training Partnership Act which goes into effect this year. Under the act, appropriated funds can only be used for job training; there is no allowance for public service jobs. While the President's desire to use Federal funds for industrial job training rather than what he considers make work jobs makes excellent press copy, it does not work so well in reality.

With their high unemployment rates the border areas in my district are certainly eligible for job training funds, but as there is little industry there, the President's dreams will be hard to fulfill. Contrary to the Presi-

dent's stated belief, the help wanted sections of my district newspapers are not filled with jobs for skilled workers. There are few jobs available, skilled or unskilled.●

● Mr. MITCHELL. Mr. Speaker. In the "Economic Report of the President," which was transmitted to the Congress in February 1983, President Reagan stated—

> The unemployment that many of our citizens are experiencing is a consequence of the disinflation. * * * In spite of the present high unemployment rate and the accompanying hardships, it is essential that we maintain the gains against inflation that we have recently achieved at substantial cost.

In other words, the President will continue to pursue his draconian economic program, which has already generated the largest unemployment rates since the Great Depression.

The prevailing philosophy among most of our chief policymakers is to continue in the tradeoff: keep unemployment high in order to fight inflation. President Reagan believes that oppressive interest rates will extirpate inflation and will lead the way to a sustained economic recovery. Indeed, the administration has referred to the recent increase in housing starts as evidence that an economic recovery has occurred.

The Nation's current 10-percent unemployment rate, however, indicates that the President's ill-founded economic policy continues to nourish the recession. Like many of the country's urban areas, Baltimore City's unemployment rate is higher than the national average. In Baltimore City, the unemployment rate is about 11 percent. However, Baltimore's unemployment problem is more severe for youths, minorities, and minority youths in particular. Unemployment rates in these categories are 24 percent, 17.9 percent, and 44.7 percent respectively.

The incredulous failure rate among small businesses is further testimony to the egregious impact of the President's economic program. In Baltimore City alone, more than 7,000 small businesses failed in 1982. For each small business failure, three to eight people are thrown into unemployment

To combat the current unemployment rate that threatens my district, and the district of my colleagues, Representative BARBARA MIKULSKI and I introduced H.R. 2653, the Public Works Employment Act. This bill allocates $7 billion to generate employment opportunities through the implementation of infrastructural development projects.

President Reagan has stated that he is opposed to public works programs. He believes that such programs will only shift unemployment from one industry to another at the cost of increasing the Federal budget deficit.

I strongly urge my colleagues to reject President Reagan's inherently flawed economic program—a program that attempts to improve the health of the economy by reducing the employment opportunities for the people of this Nation. The passage of a public works bill should be one of the critical components in an overall comprehensive approach to the problems of unemployment. Such an approach will reduce the above average unemployment rate, which the President's policies have generated in my district and others.●

● Mr. CLARKE. Mr. Speaker, the most pressing problem faced by our Nation today is unemployment. Over 11 million people were out of work in May. In some government and business publications, the decline in unemployment, compared to December's 10.6 percent level, is being heralded as a harbinger of recovery. Granted, there are fewer people in the unemployment lines than in December, but that should not blind us to the fact that unemployment is still at a higher level than it was 1 year ago.

My constituents in western North Carolina have little to cheer about. The unemployment rate in the 16 counties which I represent is 11.8 percent.

People suffer when they are out of work, and communities suffer. Marital difficulties, alcoholism, health problems resulting from tension and anxiety, and child abuse all increase in times of high unemployment. Discouraged workers lose their self-esteem.

What is behind these continuing high unemployment figures? The key is continued high interest rates. High interest rates discourage the long-term investments that the industrial community so urgently needs to refurbish and expand its facilities. As interest rates rise, companies are unwilling to seek and borrow the capital they need to modernize. Individuals can not afford to build homes and buy automobiles.

High Federal deficits place constant pressure on the credit markets. Federal borrowing absorbs much of the capital needed to finance retooling and modernization of America's industrial plants.

The human cost, of course, is unemployment.

I have cosponsored several measures to help the unemployed of my district and the country. H.R. 10 is one of these. Title I of this bill establishes a successor agency to the Economic Development Administration which will provide grants for public capital facilities, small business loans, and technical assistance planning. These grants will be available to States, economic development districts, units of local government, and Indian tribes.

H.R. 10, which amends the Public Works and Economic Development Act of 1965 and the Appalachian Regional Development Act of 1965, will help communities in especially distressed areas. It also provides funding for the Appalachian Highway System.

H.R. 999 establishes the American Conservation Corps. This program is much like the CCC of the 1930's. It will provide employment at the minimum wage for young men from 18 to 26 in national forests, national parks, recreation areas, and other public facilities.

H.R. 2544 establishes an emergency public works program primarily aimed at restoring the deteriorating infrastructure of our cities and States—roads, bridges, and so forth.

We must continue to explore these and all other avenues which will provide additional employment for our people.●

● Mr. SIKORSKI. Mr. Speaker, 11 million people unemployed; 10.2 percent of the work force without jobs; 1.6 million people unemployed more than 1 year. In Minnesota, labor force and employment levels are still below year-ago levels. In the nine-county Twin City metropolitan area, more than 11,000 people are unemployed this year than the same time last year.

Plants have shut down in Minnesota. Factories such a the Ashland Oil Co. and Tonka Toys in my own district may be closing their doors thanks to the administration's economic policies. Large corporations, with high-tech industries, thought they were immune to Reaganomics. Well, Honeywell, Control Data, and 3M have laid people off. No one is immune. These are not just numbers. These figures represent the lives of real people who are suffering due to Reagonomics.

President Reagan once said that unemployment insurance "provides prepaid vacations for a segment of our society which has made it a way of life." A way life. All I can say is that it is time to show Mr. Reagan a new way of life before more Americans are given the "luxury" of an enforced vacation from providing their families with the necessities of life.●

● Mr. ERDREICH. Mr. Speaker, the State of Alabama, once known as "the Industrial Center of the South," has suffered disproportionately greater hardship as a result of the recessionary period through which we all have struggled.

The State's economy, which is heavily reliant upon the manufacturing industry, has been beset by steel mill closings, layoffs at automobile plants, and declining demand for coal, oil, and natural gas.

Alabama has one of this country's highest jobless rates; only West Virginia and Michigan have more people who are without a substantive means of feeding, clothing, and housing their families.

Yet, it is true that we are seeing beginning signs of recovery from the recession * * * that the unemployment rate is, indeed, coming down.

In Jefferson County, Ala., my home district, unemployment has fallen consecutively for the past 4 months, from a record high of 16½ percent in January of this year to 12½ percent in May. Manufacturing employment has stabilized in Jefferson County * * * another welcome sign. But one need only look beyond surface indicators to find that these positive signs need to blossom much more to be of benefit to thousands of residents of the Sixth District of Alabama.

While manufacturing employment has stabilized, few of the workers who were laid off are being called back to the job. Thousands who have virtually spent all of their adult lives in the steel mills and coal mines in and around Jefferson County now find themselves with a skill that today is providing no regular employment.

According to the Alabama State Office of Employment, almost 15,000 people in Jefferson County were without jobs in 1982 for 15 weeks or longer. * * * and special problems encountered by the long-term unemployed somehow falls between the cracks of statistics and pronouncements of economic recovery.

During hearings held in Birmingham in March on hunger and malnutrition, I heard firsthand how depressed economics and limited employment had perpetuated widespread poverty and caused many families to give up any hope for a better future.

A representative of the Alabama Department of Pensions and Security testified during those hearings that 280,000 people in Alabama were without jobs. He noted that while one out of every five Alabamians lived below the poverty level at the time of the 1980 census, the economic times had certainly caused many more people to join the ranks of the needy and the jobless.

Reports that the economy is on the upswing have little meaning to those who have seen their period of unemployment go from weeks to months, and sometimes, even to years.

We in the Congress must not relax our efforts to see that these people have the opportunity to return to the mainstream of American life. Hope may be on the horizon, but let us in Congress enhance that hope through prudent action aimed toward relieving the short-term plight of these thousands of hard-working Americans, and more importantly, toward restoring this Nation's economy to the point where all persons wanting to work will have that opportunity.

● Mr. HERTEL of Michigan. Mr. Speaker, the pain and frustration of unemployment has affected more people in Michigan's 14th District for a longer period than almost any where else in the country. The stress affects not only those who lose their jobs, but people who fear the loss of employment and income.

Michigan has been in a depression for 3 years. We had double-digit unemployment long before the rest of the country even worried about reaching 9 percent. The long-term unemployed—those who have been jobless for more than 15 weeks—now comprise over two-fifths of all jobless workers.

The district I represent covers portions of three counties: Wayne, Macomb, and Oakland—the most densely populated area in the State. The latest unemployment figures show that over 100,000 people are out of work in Detroit—an unemployment rate of 21.2 percent, double the national average. In Macomb County 19.3 percent of the work force is without jobs. In the city of Warren, the third largest city in the State, one out of every five persons is out of work. And in Sterling Heights over 16 percent of the people are without jobs.

Last year, President Reagan acknowledge to then-Gov. William Milliken that Michigan was in the midst of a depression. At the time, the State unemployment rate was double the national average. More than 700,000 people were out of work and the State budget had been cut by over 20 percent. With the President's acknowledgement of our State's tragic unemployment problem, the Michigan congressional delegation—every Democratic and Republican Member signed a letter to President Reagan requesting a meeting to discuss the causes and possible solutions to Michigan's particular economic problems. The President could not find time in his schedule to talk about this problem.

During the 1980 campaign Reagan said he would put the people back to work. But unemployment has increased from 7 percent to over 10 percent in the last 2 years. And real unemployment is much worse than the official statistics show because the official rate does not include those who are forced to work part time or those who have given up entirely in their desperate and useless search for work.

The President's plan for economic recovery has further assaulted the unemployed worker. The disastrous job-destroying budget, tax and high interest policies of the Reagan administration are pushing vast numbers of American workers and their families lower down the economic ladder. The current recession has put people out of work who have never been out of work before in their lives. They are people who want to work. Yet, the Reagan administration is stripping them of the little dignity they have left.

Our Nation's factories, mines, and utilities are operating at less than 70 percent of capacity—a tragic waste of human and material resources, and a testimonial to the failure of President Reagan's supply-side economics. The economic cost to the Nation of this terrible waste of human resource and industrial capacity approaches $100 billion in lost production for every 1 percent of unemployment.

Last year, over one quarter of the work force—about 30 million workers—suffered some unemployment, and another quarter of the work force felt the impact of the recession through cuts in hours and earnings.

The lowest paid workers have been forced to live at a frightening level of poverty. They are being joined increasingly by workers with valuable, hard won skills who previously had a respected place in the community. For all groups, the damage is magnified by the deep budget cuts in social programs at the exact moment that the recession makes them so needed. These are the very programs workers have paid for all their lives.

The social cost of a recession is illustrated in an increase in heart attacks, alcohol abuse, suicides, divorce, child abuse, mental illness, and crime. Child abuse is three times greater in families where the breadwinner is unemployed and joblessness is the single most important factor whether abuse occurs.

Families affected by plant closings experience more childhood illnesses and less plentiful food, clothing, and medical care than those in "working" families. Children thrive on routine and continuity; changes present a great stress risk to them. In fact, the situation was so dire in Hamtramck, a Polish community in my distict, that the economically depressed Poland sent them CARE packages at Christmas time.

If the high rate of employment that exists in Japan were duplicated in the United States it would generate $400 billion, which in turn would yield $125 billion in Federal revenue.

Exposure to unemployment is so widespread that if it were an infectious disease like polio or measles, our Nation would vigorously pursue policies against it.

We should be debating how to go forward, to build a prosperous nation not how to allocate pain.●

● Mr. OTTINGER. Mr. Speaker, I commend the gentleman from West Virginia for calling this timely special order on unemployment. I believe it is important, at a time when we are discussing the enormous amounts of money involved in such issues as the budget, tax cap and our swollen deficits, that we take the time to remember the millions who are out of work. We need to regain our sense of reality and consider these people, who are the tragic evidence of the failure of President Reagan's economic program. All

of the President's claims about economic recovery eventually come face to face with the misery his policies have inflicted on the jobless.

The district I represent, Westchester County, N.Y., does not depend on any single industry for its employment, as the most economically devastated areas of the country do. Many of my constituents commute to New York City, others run small businesses or work in the county. They need not depend on a particular industry such as coal or steel for employment. But Westchester has not been spared by the recession, or by the alarming decline in industry. The residents of such cities as Yonkers, Port Chester, New Rochelle, Mount Vernon, and Tarrytown remain dependent on industry. Many of them have already lost jobs to plant closings, while others anticipate the closing of their factories in the coming months. The impact of losing one's job security is devastating both economically and psychologically.

One of the major employers in my district is a General Motors plant in North Tarrytown. At its peak the plant employed 4,700 workers, but in September of 1982 the company eliminated the second shift, cutting the work force nearly in half to 2,600 workers. The plant is a major employer in both North Tarrytown and surrounding towns. The total annual payroll of the plant is $124 million. The company spends close to $82 million in the New York metropolitan area on parts, equipment, supplies and services. The overall employment impact of the Tarrytown operation totals 7,800 to 8,000 jobs. If the plant were to close the town could lose as much as half of their $4 million in revenues.

General Motors officials say the Tarrytown plant is no longer competitive with the company's other plants. They argue that the taxes and utility bills are far too high. They point out that it is the only GM assembly which cannot directly ship cars by rail but must instead truck them out. The plant's access to local highways is limited to a single route which the company insists must be expanded. Last, in order to comply with clean air requirements, the plant must spend $180 million to refurbish its paint shop.

Solving these problems requires investment; an estimated $270 million will be needed to renovate the paint shop, expand the plant as well as increase railway and highway access to the facility. Much of that will have to come from public financing. I, along with my colleagues HAMILTON FISH and BENJAMIN GILMAN, have been working with local and State officials, GM representatives and the Power Authority of the State of New York (PASNY) to find ways to meet the investment needs of the plant.

While we are exploring possible funding, we do so with some trepidation, beause we have been this way before. A decade ago Westchester County dealt with a problem similar to what we face today with the Tarrytown plant. In 1972, Otis Elevator Co. in Yonkers, with the assistance of $14 million in public funds, refurbished and expanded its plant to remain competitive with other elevator plants in the country. At the dedication of the new buildings, Otis officials announced that by 1980 the plant would increase employment from 1,400 to 1,900. By December 1982, after a series of layoffs and rumors that the plant would close, the new owner of the elevator company, United Technologies, announced that the plant would be shut down since it was no longer "economical" to operate. The city of Yonkers has filed suit against the company in an effort to recoup some of the funds the city lost in its efforts to save the Otis plant. Angelo Martinelli, the city's mayor, argues that Otis, in accepting the public funds, is obligated to remain in Yonkers; United Technologies claims it has no such obligations.

I believe it is vital that we in Westchester County do everything within our power to keep the GM plant in the region. I have sat through negotiations with local and GM officials, where we have explored solutions to save the plant. I sit on a finance committee, which has been searching for funds for the necessary investments. The State has all but committed $10 million to help raise bridges so the assembled cars can be shipped from the plant by rail rather than trucks.

But, I find I hesitate with the lesson of Otis hanging over our heads. I worry we could find ourselves in the same position with General Motors. And General Motors as yet has been able to do little to reassure us. Management in Detroit has neither expressed a commitment to the plant if renovated, nor encouraged our efforts to see if renovation is feasible. That lack of commitment serves no one's interests. It impedes our efforts to find investment funds. And as a local newspaper reported: "At GM where a shift produces 480 cars each 8-hour workday the impending layoffs and rumors—of closing—have dealt a severe blow to worker morale."

Many companies large and small are folding or losing large amounts of money due to both the recession and the increased international competitiveness of foreign products. Companies throughout the country are reacting by closing their less competitive plants. They decry the cost of renovating; I believe the alternative is more costly. The jobs sacrificed and the revenues lost can only hurt America in the long run. To retain our competitiveness we must refurbish as many of our plants as possible, not close them.

General Motors is a prime example of a company which must make the investment necessary to compete with imports. Its North Tarrytown plant requires investment to remain operating and they need financial commitment from State and local officials. We are prepared to make such a commitment, but no State, no region can risk that a company will take the money and run.

It is becoming apparent, as stiffening foreign competition threatens American economic stability, that government cannot stand by idly while American jobs disappear. It is in the public interest that government aid productivity improvements by business through both direct investment and improvements in public services and infrastructure. But such assistance cannot come without a mechanism to insure that public funds are not spent for naught.

If a community is willing to invest in the renovation of a facility in order to preserve jobs, the company must make a commitment to keep the plant open for a specified amount of time. These guidelines are absolutely necessary in assuring both parties involved that their investments will prove profitable. When a company concludes that no investment will make a facilty economical, and that the plant must be closed, a community needs sufficient time to prepare. Whether a community can find an alternative use for a plant, or merely needs time to find employment for those displaced, it cannot afford the huge cost of sudden and unexpected social and economic changes.

Some might argue that such mechanisms are too cumbersome, that they would impede the efficient operation of our companies. Some might argue that the cost of the such proposals is too high. The price we have paid without such protections is higher still. The waste of human potential and industrial capacity is enormous. Past experience dictates the need for a system where the local officials do whatever possible to insure that a plant remains in their community.

There needs to be more respect and more consideration of the worker, who will suffer the greatest when a plant is closed. While companies continually argue that it is economically more viable to close a plant than keep it in operation, I find the opposite to be true. The only way we can insure that America remains a healthy and strong environment, is to keep our workers employed and to continue producing internationally competitive goods. Closing plants is not the answer. Cooperation between corporate and public officials is.●

● Mr. OWENS. Mr. Speaker, unemployment is a plague that has descended upon us. It did not come from supernatural wrath or a sudden quirk of

nature. It has come as the direct result of economic and social policies which ignore the strengths and needs of our people. There is nothing inevitable about massive unemployment.

As the representative of an urban constituency, I cannot ignore this disaster which has been visited upon us by the policies of the current administration. New York City is currently enduring an unemployment rate of 8.9 percent. The 12th Congressional District in Brooklyn, with a large minority population, suffers from an unemployment rate of 10.3 percent which is distributed unevenly throughout the population. The white adult unemployment rate is unacceptably high; however, the adult black and Hispanic rates, at 14 and 15.4 percent, respectively, are well beyond unacceptable. The black youth unemployment rate is more than 50 percent. These disastrous figures indicate a criminal neglect of people who could and would contribute to the society if they were but given the chance.

The reality of unemployment must be changed. Such a change will not happen unless we have a conscious Federal policy which establishes job creation as a high priority. The time has come for Congress to recognize the magnitude of disaster and to take active steps to change the situation. Government alone can have an impact on the present structural unemployment. Economic policies must be altered to reduce unemployment. The administration's unprecedented combination of monetary contraction coupled with fiscal expansion is a disaster that had deepened and extended a condition which might well have occurred anyway. This cynical neglect of employment generating economic policies must end. Even as other economic indicators show positive changes, the need for emergency employment programs remains critical. It is time to stop talking about the virtue of hard work and start passing legislation which provides jobs for the unemployed who stand ready, willing, and able to work. Society owes every adult human being the opportunity to earn an income which guarantees a dignified survival. It is the duty of the executive branch and Congress to create job opportunities for all who want to work.●

● Mr. HAWKINS. Mr. Speaker, I commend my freshman colleagues for calling this Special Order on Unemployment, the most pressing issue facing this Congress and this Nation. Many of us, including our new colleagues, ran and were elected on the basis of jobs. We told our constituents that it was time to stop the immoral, illegal, and dangerous economic policies of this administration and instead embark on a policy of economic and employment growth. We were right on election day 1982 and we are right today. We must move to attack this pernicious threat to our economy, our society, and our citizenry.

The administration's policy of deliberately creating massive unemployment is costly, dehumanizing, and dangerous. Every point of additional unemployment costs our Nation billions in lost production and billions in lost tax revenues while adding to the deficit. Indeed, the deficits the President criticizes are largely due to the unwarranted 1981 tax giveaways and the Reagan recession. The administration must bear the responsibility for this run of red ink.

Every point of additional unemployment results in dramatic increases in alcoholism, child abuse, stress problems, domestic violence, suicide, homicide, physical, and psychological maladies. The administration must accept the moral and political responsibility for this attack on the health of American citizens.

Every point of additional unemployment brings us closer to the day when the millions of frustrated unemployed Americans may strike out blindly against the society which is pressing them down. To be without a job in America is to be considered less of a person. The uncaring economic policies practiced by the administration are eroding the patience and the pride of millions of innocent Americans.

The current massive levels of unemployment are a direct result of the administration's fiscal and monetary policies. This administration deliberately created the most severe post-war recession in order to fight inflation. Yes, the inflationary dragon has been temporarily put at bay, but only through the sledgehammer approach which has slashed production, revenues, and employment. Inflation has been broken across the backs of the millions of innocent workers who have been thrown out of their jobs. Is it fair to punish these millions, disproportionately minority and lower income, in order for the wealthy to prosper? Is it good economics to reduce the purchasing power of millions of would be consumers by eliminating their jobs? Is it good for business to push up bankruptcy rates to all time highs? You and I know that the answers to these questions is a resounding no.

The human and economic carnage created by this administration's vendetta against America is clear to all. The rate of total unemployment has climbed to highs not seen since the darkest days of the Depression. Minority unemployment remains at absolutely staggering levels. The number of people out of work has risen to record levels as has the average length of unemployment. By any measure, the unemployment crisis we face is the most severe we have confronted in 40 years.

What response have we seen from the administration which has caused this disaster? The President wonders whether the plight of an unemployed worker in North Succotash should be worthy of news coverage. Mr. President, the unemployment crisis which you have created, which directly affected some 25 percent of the Nation's workers last year, is indeed worthy of coverage each and every night. Further, this crisis is worthy of our attention and consideration.

The hungry who line up for pitiful handouts of cheese are worthy of our attention. The sick who have lost their health insurance are worthy of our attention. The unemployed homeowner who can no longer afford his or her mortgage is worthy of our attention. The older worker whose skills are no longer adequate in a changing economy is worthy of our attention. The inner-city teenager who sees no future after school is worthy of our attention. Yes, Mr. President, these people are worthy of news coverage and of our consideration and attention. We represent these people. We must act now to address their needs.

There are three major steps we can take now to respond to this crisis. It is our responsibility to take action for we know that the administration will not respond to the Nation's needs. First, we must immediately enact legislation which will addess the dangerous side effects caused by massive unemployment. By this I mean nutrition, health, mortgage, training, and education assistance among other areas which will address some of the hardships caused by unwarranted unemployment. The House has begun to move on some of these matters but the needs are so great that speedy and substantial assistance is necessary.

Second, we must adopt macroeconomic fiscal and monetary policies which will promote stable, job producing economic growth. This means abandoning the administration endorsed tight money policy. This means a rational fiscal policy which assays fair taxes to pay for needed public outlays. Adopting proper macroeconomic strategies would allow a balanced and vigorous economic expansion. This is absolutely crucial, for only in a growing economy can we insure adequate supply of goods and services, employment for our workers and revenues to balance the budget.

Even with appropriate long-term economic policies, we will still be faced with the pressing matter of millions of people who need and desire employment now. Coupled with the tremendous service, repair, and rehabilitation needs our Nation faces, we have an ideal opportunity to remedy two severe problems at the same time. I have introduced legislation, H.R. 1036, the Community Renewal Employment

Act, which provides up to a million jobs for those who need them now providing necessary community repair and service work. The Education and Labor Committee has seen the virtues of this bill and has reported it out favorably. I urge my colleages to study and support this legislation.

Direct job creation is the most cost effective, timely and efficient means of stimulating employment during a recessionary period. The jobs created under this program will be targeted to the individuals and areas in greatest need and will be directed to provide crucially needed improvements in education and other essential community facilities and services critical to the public welfare. The need for such work is clear. The number of willing and able workers is overwhelming. H.R. 1036 meshes community and employment needs in an effective and efficient manner.

I urge my colleagues to respond now to the continuing employment crisis. Our Nation has created no new net jobs since the beginning of the Reagan administration. We need direct job creation now, coupled with remedial measures and proper long-term economic policies. This bottom up approach to economic growth will ease inflation, boost employment, and cut the deficit. Putting people back to work is the sanest way to economic recovery. The administration's deliberate misuse of unemployment as a means of fighting inflation borders on an unlawful abuse of public trust and accountability. It is up to responsible Members of Congress to act now in the national interest.●

● Mrs. COLLINS. Mr. Speaker, I would like to take the opportunity to thank my good friend Congressman BOB WISE and all my other colleagues who have risen to speak out against the gravest problems facing our Nation today—unemployment.

This year, the national unemployment rate has shot up to a level higher than any since the Great Depression. More than 10 percent of the American work force is unemployed. For minorities and the young, the rate is many times higher: 48 percent of the black teenagers who want to work cannot find a job.

In my own district, the problem of unemployment is particularly acute. Chicago is a great city, but it is an old city. Many of our industries must dismiss good workers simply in order to remain solvent in an increasingly competitive marketplace. Unfortunately, the workers often have no place to go: They have been trained to perform a task which is no longer needed.

Earlier this month I held a "Third Wave" forum in Chicago to discuss the future of the American economy. According to Alvin Toffler and other futurists, the United States is changing from an industrialized society to a high-technology, service-oriented new economy. While this shift may be both inevitable and desirable, I am concerned about its effects on the blue-collar and clerical workers who are displaced. We must retrain these workers to make sure they can survive in this new economy.

The Reagan administration, however, does not seem to care about these displaced workers. The President's policies have directly contributed to the worst recession since World War II. The unemployment rate in Chicago has risen 3 percentage points, to 10.8 percent, since President Reagan took office in 1981, only 2½ years ago.

The introduction of cheaper, subsidized foreign imports, especially in the auto and steel industries, has further damaged the economy in Chicago and the Nation. How can the American worker hope to keep his job if foreign corporations continue to undersell American companies?

These problems in the American economy have a trickling-down effect which hurts everyone involved. As the automobile manufacturers face decreased demand, they have less need for auto parts and steel from support industries, leading to increased unemployment throughout the economy. We in Congress have the power to offer these ailing industries Federal aid to break these vicious circles. We must work together to nurse these industries back to health, so that they in turn can give our citizens jobs again.

Administration officials tell us that we are already in the midst of a recovery, but even the most optimistic economists predict that the unemployment rate will remain above 10 percent for the rest of this year. For the men and women who still cannot find work, despite the supposed health of the economy, the recovery is a myth.

President Reagan gives tax cuts to the rich, but the poor only receive budget cuts. Social programs to help our Nation's unemployed and indigent have been eviscerated in the last 2 years. Despite record-high unemployment, the administration has proposed only $3.6 billion for employment programs and job training in fiscal year 1984, down 18 percent from fiscal year 1983, and an incredible 59 percent reduction from the $8.8 billion appropriated in fiscal year 1980.

If the unemployment rate is almost 50 percent higher under this President than under the last, then why does Reagan want to reduce funds for job training by more than 50 percent? Our President cannot hear the voices of the unemployed. Unlike big businesses and special interest groups, our Nation's jobless do not have a corps of lobbyists who speak up for their interests.

My colleagues, we in Congress are speaking out today. With this Special Order, we will give the jobless a voice, and we will shout so loudly that even the President will have to listen.

Reducing unemployment must be our Nation's top priority. Despite this so-called recovery, the jobless are not recovering. We can change that. By appropriating sufficient funds for job training, public works, and education, we can alleviate the current crisis. Congress must take the initiative now. We have seen what President Reagan has done for the unemployed. Now let's show him what we can do.●

● Mr. GRAY. Mr. Speaker, I appreciate having the opportunity to join my colleagues, this evening, to discuss what I feel is the No. 1 problem facing this country today—unemployment.

Today's widespread unemployment is a deliberate result of this administration's economic policy, and the price for that policy—nearly 20 million Americans in human terms—is too high to pay.

We can ill afford to allow this current crisis to continue unaddressed. It is time to put the jobs and lives of Americans first and foremost in all of our economic and fiscal policy decisions.

When this administration first took office, unemployment stood at 7.4 percent and was falling. Today, unemployment nationwide stands at 10.2 percent.

While nearly 11 million Americans are officially listed as unemployed, that figure only represents the tip of the iceberg.

Between 2 and 3 million unemployed Americans have become so discouraged by their failure to find work that they no longer appear on the official unemployment statistics.

Another 2 million American workers are forced to work part-time because they cannot find full-time work.

And 4 million other part-time workers say they need to work longer hours just to maintain themselves, but cannot because there is nothing available.

And in the Second Congressional District of Pennsylvania, which I represent, the unemployment picture is just as bleak. While overall unemployment in the city of Philadelphia officially stands at 10.4 percent, unemployment in my district stands at nearly 25 percent—or one out of every four adults.

Teenage unemployment is well over 60 percent and because of Federal budget cuts, there will be fewer summer jobs for our youth.

Unfortunately, this statistic does not reveal another stark reality of our local unemployment problem. Of the nearly 80,000 plus unemployed citizens of Philadelphia, nearly half are minority, the majority of whom live in my district.

Now there have been some who point to recent upturns in the econo-

my as an indication that things are getting better. They say "we are on the road to recovery".

Well, in Philadelphia, it just is not so.

Greater Philadelphia was once one of the largest and most productive manufacturing and textile centers in the country. Today, however, the situation is quite different, as the city is now staggering under the impact of decades of substantial erosion in a once thriving manufacturing and textile base. In fact, Philadelphia has lost over 125,000 jobs in the last decade.

Real job growth and opportunities in recent years, both nationally and in Philadelphia, have tended to come from new technologies, services, and consumer product industries.

On the other hand, the manufacturing sector of our local economy has experienced a considerable decline.

For example, Philadelphia has experienced a decline of 15.2 percent in manufacturing jobs since 1979. At the same time, however, Philadelphia's service industry has not expanded at a pace strong enough to offset our manufacturing job losses.

Simply put, the expansion of the service sector of our economy, while vitally important, will not create enough new long-term jobs to meet the needs of our unemployed.

Personally, I have never been totally convinced that the service sector of our economy will indeed prove to be the "economic panacea" it is purported to be.

And if events such as the recent layoff by Atari of 1,000 white collar employees is indicative—the "technological renaissance" that so many predict, may be short lived.

As a member of the recent House/Senate conference on the budget, I fought extremely hard for inclusion of adequate funds to support phase 2 of our economic recovery program.

As a result, over $5.4 billion in fiscal year 1983 and $8.3 billion in fiscal year 1984 is reserved for House-initiated economic stimulus programs.

This money is specifically aimed at creating immediate employment opportunities and providing emergency relief for those suffering from the ravages of unemployment, and was supported by a majority of the Members of both Houses.

Mr. Chairman, in closing, it is my fundamental belief that this administration has turned its back on our unemployed citizens. Notwithstanding this tragedy, it is this Congress fundamental responsibility to address this issue, and in so doing, embrace a new economic policy that puts jobs and people first.

It is imperative that we continue to seek viable and cooperative solutions to the problems of our Nation and urban areas like Philadelphia. The costs of failure are too grim to imagine and too painful to permit and too criminal to ignore.●

● Mr. OBERSTAR. Mr. Speaker, none of us should be pleased to participate in this special order this evening. We are here out of necessity—the necessity of speaking out against the harsh economic adversities the people we represent are suffering.

The subject of tonight's special order is the economic, social, and personal tragedy of double-digit unemployment in the United States.

National economic policy has failed the unemployed. Unfairness, in fact, has been the characteristic of the budget and tax policies of the present administration for the past 2½ years. In 1981, the adminstration persuaded Congress, to its shame, to enact enormous tax reductions providing disproportionate benefits to the wealthiest of Americans. In that same year, again at the instigation of the administration, Congress enacted reductions in those programs specifically designed to alleviate the problems of unemployed Americans.

It is cruelly ironic that, at the commencement of a major recession, the administration requested and Congress granted, in the Reconciliation Act of 1981, changes in the Federal unemployment benefits program which sharply reduced the ability of the Federal Government to respond to sharply increased unemployment.

I opposed the Reconciliation Act because it eliminated the national trigger for extended unemployment benefits, raised individual State triggers, and changed the means of calculating the insured unemployment rate (IUR) so as to produce an artificially low IUR as the recession lengthened.

Record peacetime increases in defense spending and the enactment of the absurdly misnamed "Economic Recovery Tax Act of 1981" have left us with destabilizing Federal deficits and misdirected spending priorities. I represent a district, counties which have some of the highest unemployment rates in the United States.

At the end of March, the last month for which we have county-by-county figures, we had the following unemployment rates in the northeastern seven counties of my district:

Aitkin	26.1
Carlton	16.1
Cook	17.6
Itasca	22.4
Koochiching	15.4
Lake	24.4
St. Louis	23.0

In communities entirely dependent on the taconite industry for their livelihood, unemployment remains consistently over 50 percent. The Reagan administration's claim of economic recovery is only a mirage for the men and women whose tragedy is summarized by these statistics.

Full economic recovery will require some action by Congress. We must limit the defense spending increases which are shifting resources from productive private sector use into unnecessary and wasteful weapons while contributing to the devastatingly high Federal deficits.

We must stop the hemorrhage of Federal revenues resulting from the 1981 Tax Act. Congress began that process last year in approving the Tax Equity Act of 1982, legislation passed by bipartisan majorities in the House and Senate and signed by President Reagan in September. The House continued that effort last week by passing H.R. 1183, legislation which I was pleased to cosponsor, to cap the third year of the tax cut scheduled to take effect July 1.

Finally, we must end the delay in acting upon phase II of an emergency Federal jobs program. I chair the House Economic Development Subcommittee. In May, the subcommittee and the full House Public Works and Transportation Committee approved my bill, H.R. 2544, authorizing an emergency $3.2 billion public works job program. H.R. 2544, which the House must pass early this summer, will provide direct Federal assistance to local communities to employ unemployed Americans in the process of rebuilding our Nation's infrastructure. In addition, the House in July will act upon my bill, H.R. 10, which revises the Economic Development Act of 1965 to help local communities attract private sector investment for long-term economic development.

Until we achieve true economic recovery, we should continue to unravel the damage to the Federal unemployment compensation program done by the Omnibus Reconciliation Act of 1981. As a supporter of the Federal supplemental compensation program enacted last summer to provide emergency relief to the Nation's unemployed, I believe it is essential that we pass legislation extending the FSC program beyond the current expiration date of September 30, 1983. It is the minimum that we can do for the millions of Americans who, through no fault of their own, have lost jobs, savings, homes, and a great deal of their opportunity for the members of this House concerned about the unemployed in their districts to speak tonight on this critical problem. I very much hope that the expressions of concern tonight will lead to expeditious, expanded efforts to provide meaningful assistance to the unemployed, rather than just promises of eventual economic recovery.●

● Mr. LEVINE of California. Mr. Speaker, I regret the need for this special order on unemployment, but I very much appreciate having the opportunity to participate.

When President Reagan presented his economic program to the public shortly after being sworn into office in 1981, he promised that unemployment would be no higher than 6.4 percent by 1984. He promised that his program would create 13 million new jobs. Instead, we have a 10.1 percent jobless rate with 11 million people unemployed. Although the economy is showing signs of recovery, there is no indication that this recovery will significantly reduce unemployment in the near future.

But, Mr. Speaker, these statistics do not adequately tell the story of frustration, desperation, and fear experienced by the millions of Americans who find themselves unemployed. Many are unemployed for the first time in their lives. Worse, the statistics do not even include workers who have become so disillusioned that they have stopped looking for work. These people who want to work but feel they will not find a job are left out of the unemployment statistics. As a result, they do not appear in either the civilian labor force statistics or in the monthly unemployment data. Yet their numbers continue to grow. This threatens to create an invisible underclass of millions of Americans.

Between March 1982 and March 1983, California lost 130,000 jobs, with cutbacks in manufacturing industries accounting for over three-quarters of the reductions. From 1980 to 1982, there were 402 business closings and resulting job losses totaling 46,968 in Los Angeles County. This does not include plant relocations or job layoffs. From the end of 1980 to March of this year, Los Angeles County unemployment increased from 6.6 to 10.1 percent. In the city of Los Angeles it rose from 7.4 to 11.3 percent, and in Santa Monica from 6.8 to 7.4 percent.

Although these numbers by themselves are disturbing, they do not begin to reflect the chaos and human misery which accompany the sudden loss of employment. I have talked with and heard from many people in my district who are trying to readjust and cope in their period of joblessness. I have been particularly moved by the plight of Ivan Sanchez.

Mr. Sanchez once ran a profitable contracting business in Manhattan Beach, Calif. He points to the economic slowdown brought about by the Reagan administration's programs as the beginning of the end. Gradually, his business slowed and failed. He spent all his reserves, borrowed money and eventually was forced to sell his home. The IRS placed a levy on his personal, business, and savings accounts. Married with two daughters, he is now penniless.

His story is about more than the loss of a job, however. It is about the loss of pride. It is a painful account of the fear and frustrations felt by this man struggling to get back on his feet. To rebuild his life, his first priority is like that of so many others in similar positions: to get a job.

Mr. Speaker, I am inserting Mr. Sanchez' eloquent letter into the CONGRESSIONAL RECORD so that my colleagues will have the opportunity to read it. As he concludes, "Maybe together we can effect a change in policy and restore some dignity to our great country."

IVAN A. SANCHEZ,
GENERAL BUILDING CONTRACTOR,
Manhattan Beach, Calif., June 6, 1983.

Mr. RON BLUMBERG,
Office of Mel Levine.

DEAR RON: On May 26, 1983, I was contacted by Rosa Alma of the Manhattan Beach branch of the Bank of America, and I was notified that the I.R.S. had placed a levy on my personal, business, and savings account, appropriating all my money leaving me penniless and destitute.

I am a general contractor who up to the time that the present administration came to power was busy and prospering, with offices and shop at Western Business Center, 20610 Manhattan Place, employing people, paying taxes, and proud homeowner of a house at 1705 Pacific Ave in Manhattan Beach.

Since this administration has been in power I began to notice the slow-down and immediate stoppage of business activity. Through all my efforts to solicit business of any kind I was unable to create any income. My reserves soon exhausted, and I lost my offices, and the worst that I did not imagine possible happened: I also lost my home after trying everything in my power to save it.

In order to keep from foreclosure, and bad credit, I had to borrow $6,000.00 to pay my second, and sell my house losing all my equity.

I am married to Letizia (Ebert) Sanchez, and we have two lovely daughters, Katrina, age 5½, and Erika, 2½. Katrina is a very gifted child who has been enrolled with Mrs. Goodin's Preschool at Ladera, and prior at Tuvia Preschool, also enrolled in ballet and tap dance classes.

It is very clear to me that entrepreneurs like myself by employing people and circulating large sums of money kept the government healthy, and that now, instead of supporting and nourishing the government, I am taking away from the government and the fibers of our society are deteriorating.

People with money have reaped the harvest of property that the hard-working have lost. The Big Corporations have made a laughingstock of the I.R.S. and the American tax payer by taking full advantage of the tax cut give-aways by this administration and the big bullies, at great expense to the tax payers, come and levy my bank account, a person's account who is unemployed collecting unemployment benefits. It makes me want to throw up.

I cannot be proud of a government that sends its youth to war, and then dishonors them, takes away from the old, helpless, disadvantaged, and poor, and gives more to those who already have more than they will ever be able to use. At this rate, the communists will not even have to fire a shot—just let us continue on this course, and the country will fall apart by itself.

My words are angry words, I know, but I am angry. I am in a position that is absurd. I owe more money now to the I.R.S. after paying $575.00 than my original tax bill was, having to deal with a big government that employs persons who use a small vocabulary and pass the buck. They conveniently forget that they are employed by tax payers, and place tremendous burdens on me in the form of paper work and running around compiling useless information just for the right to owe more money that I don't have. It does not make sense.

Ron, I am unemployed; my wife is working very hard, I have to take care of the house and the kids, we are falling more and more behind. My first priority is to find gainful employment. The I.R.S. expects me to file 3 years of complicated returns by June 9th. I am not an accountant, and do not know one that will do my work for free nor do I have the money. The I.R.S. is also threatening to ruin my credit by filing a lien on my future income at the County Recorder's office with absurd interest, thereby making it impossible for me to ever expect to regain my dignity as a self-employed person, or to be able to be employed without the threat of sometime in the future having my wages garnisheed, or my bank account levied.

Please use whatever power you have, and intervene on my behalf to ensure that a realistic solution to these problems take place instead of the impossible demeaning task 1 face now.

Thanks to you and my determination, I was able to lift the levy on my accounts at a cost of $50.00 which I will never see again. As I told you on the phone, I was threatened by two armed guards because I was understandably upset. This, I shall never forget.

With the slightest provocation I felt then that my wife could have been left a widow and my children fatherless. I would rather part with money, however, I do not have any to part with and the way the IRS adds interest I will never be able to pay their demands.

I am in the process of gathering documentation to provide to you of my condition so that you may see what a hopeless situation I am in. Maybe together we can effect a change in policy and restore some dignity to our great Country.●

● Mr. STARK. Mr. Speaker, our colleague, Mr. WISE recently circulated a "Dear Colleague" informing Members of the House that a special order would be held at the close of business today, so that Members could address the problems of unemployment—my district. Perhaps the most telling aspect of this letter was the speed with which more than 50 Members volunteered to participate. The Members are from all over the United States—from agricultural areas, urban centers, and U.S. territories.

In Alameda County, much of which I represent, unemployment remains high, at 9.4 percent. According to the University of California, Berkeley, Department of City and Regional Planning, more than 90 plants have closed in the last few years affecting more than 15,000 workers. In my own district, the closure of the General Motors plant in the neighboring district, has left many workers with mortgage problems, outstanding bills, and little hope. We wait anxiously for the Federal Trade Commission to make its final decision on the pro-

posed joint venture plan between General Motors and Toyota, as it offers some ray of hope for hundreds of unemployed.

The administration's budget proposal estimated an unemployment rate of 10.7 in calendar year 1983, 9.9 percent in 1984, 8.9 percent in 1985, and 8.1 percent in 1986. To project these rates, while proclaiming that the economy is on the mend is unacceptable.

The fundamental changes in the nature of our industries signals the need for cooperation among all sectors of our society. The pains of unemployment and dislocation must be given serious attention. These two factors must be foremost in consideration of a program for economic recovery.

I am saddened that so many Members of this House have requested the opportunity to address the House on the unemployment tragedies of their districts. Yet, I am still encouraged—for we have not failed to notice these tragedies. And we will continue to fight unemployment—my district.●

● Mr. STOKES. Mr. Speaker, I appreciate the timely call for a special order on unemployment taken out by my distinguished colleague, BOB WISE from the State of West Virginia. West Virginians, like Ohioans, and like people nationwide, have a clear, firsthand knowledge of a fact that President Reagan and his administration have made every conceivable effort to define out of existence: the fact that unemployment has reached epidemic proportions in this Nation. It is a genuine scourge afflicting millions who rely on the administration and Congress to stop its spread.

The drop in the national unemployment rate from 10.3 percent in April to 10.1 prcent as of May 25 means that instead of 11,328,000 unemployed there are now only 11,192,000 unemployed. The Reagan administration is rejoicing. Only 11.2 million people are looking for work. The Reagan administration shamelessly justifies its maneuverings last September to change the method of calculation of the insured unemployment rate (IUR) which serves as the trigger mechanism to entitle a State to extended unemployment benefits.

Consequently, Mr. Speaker, in my State, Ohio, with the second worst unemployment rate in the country, 14 percent, over 60,000 people who are still unemployed and desperately searching for a job, have been defined out of existence. Removing them from the ranks of consideration as human beings who trust their Government to remember their plight has two drastic effects: first, it denies them unemployment benefits to meet their daily needs. Second, by removing them from the statistics used to trigger off extended unemployment benefits, the effects of denying benefits are compounded monthly.

The unemployment rate in the city of Cleveland, which I represent in conjunction with my esteemed colleague MARY ROSE OAKAR, is 12 percent for whites and 23.6 for blacks. Mr. Speaker, I have no intention of using cruel manipulations of statistics nor alterations of unemployment formulas to ignore out of existence people that our economy has rejected as expendable and that the Reagan administration has damned as uncountable. That is why I have joined another of my respected colleagues from Ohio, DON PEASE, in cosponsoring two legislative measures which would insure that realistic unemployment figures would be used in determining unemployment benefits.

These two measures would extend unemployment benefits by, respectively, lowering the trigger mechanism by which a State such as Ohio may receive funds for extended benefits, and by affecting the computational formula in a way that expands the definition of who is eligible to receive extended benefits. The passage of this legislation is the very least that Congress can do to see to it that people receive the benefits they fully deserve in lieu of the jobs that they deserve but cannot find.

Mr. Speaker, I want to submit the most unequivocal evidence that a Congressional Representative can produce to demonstrate my point that there are real human beings in our Nation whose exclusion from our unemployment statistics does not mean that the scourge of unemployment is evaporating. This is a letter that was written to me on May 17 by Mrs. Charles H. Anderson who lives in my District:

DEAR MR. STOKES: From the way I understand it, unemployment figures are based on the percentage of those who collect unemployment benefits. What about those souls whose benefits have run out, can no longer collect, yet cannot find jobs? Are they not still statistics?

My husband and I, along with friends and family, are among the unemployed. I am 24 years old and have been laid off since August of 1982. My husband, a machinist, is 26 and has been laid off approximately 18 months of our nearly 3 years of marriage. The latest has been since April of 1982. We have a 19-month-old child to support. We love her dearly, she came at the wrong time but we do the best we can. We have no medical insurance, we cannot afford it. Welfare would not help us. Believe me, it is hard. With a child that age and all the trips to the doctor for shots and illnesses the bills are unbelievable. But we do the best we can. Now you want to cut down benefits? What are people like us supposed to do? Welfare? My husband and I would much rather be out making a living on our own. We would rather not need any help from the State or Government, but if it comes down to it, what other choices do we have? Who wants to sit around and stare at the four walls most of that time? There is only so much you can do to your home—we rent—before it's done.

You probably think I should be grateful, there are others out there with worse problems than ours. I agree. People who have had our jobs for 10, 20 and 30 years and are laid off have built their lives with hopes of the future. All their dreams and hopes are shattering. People who have spent most of their lives building and paying on their dreams are losing them. Most young people like us cannot even afford to think about our dreams.

Getting back to the reason of my letter which is the pending decision to reduce unemployment compensation to 38 weeks. My husband was told the middle of April he had 1½ to 2 months left of his benefits. Just like that, after he signs up for more extended benefits, he gets a notice saying he is no longer eligible for benefits but to keep on reporting. No warning, not anything. Sort of like a slap in the face. Jobs are scarce and hard to find. Good jobs. Have you ever tried raising a family on $3.35 an hour? With utility bills, rent every month and all the necessities plus a car payment it is financially impossible. When you apply for welfare they don't consider some of the necessities or even a car payment as part of it. Then what are we supposed to do. Get rid of your car. It costs almost as much to ride the bus as it does to put gas in your car anymore. I think you are doing a sad and unfair thing, reducing unemployment benefits because for most it has run out. It does not necessarily mean they have jobs. Try counting those who cannot find work. Dropping from making $8 to $10 to $13 an hour to $3, $4, and $5 an hour to absolutely nothing, all of a sudden, is a bit of a shock whether they knew it was coming or not.

To find a job anymore both the older people and the young people just starting out have at least one strike against them. For the older people that have worked 20 years on their jobs—say, the 40-55 year-old bracket—that are out of work and looking for jobs, the employers they talk to realize either they are nearing retirement or after 20 years on the same job with better pay, good benefits, and seniority, there is the possibility they will go back to the old job so they look for younger people. As for the younger people, to get a good paying decent job, employers want 5 to 10 years experience. What do you do? Believe me, it's not like we aren't trying. It just gets discouraging.

I realize my husband and I are only two of the thousands of people in the same boat. Yet I hear of divorces, attempted and apparent suicide, even if there are only a very few, it is still there, of people who just cannot cope anymore. Right now there is food on my table and a roof over my head. That's all that matters. I am thankful. But what about next year. What about those who don't have that now. The harder it becomes, the harder we will try.

I, along with many others I'm sure, would like to see the extended benefits continue. But I'm sure we all would like to go back to work more, trying to make a decent living.

I'm sure you get my letters like this, this is only my opinion and situation. I just wanted to get this off my chest. I appreciate your taking your time to hear me out.

Mr. Speaker, Mr. WISE, my esteemed colleagues, thank you for affording me the opportunity to let you know that our constituents have a far better grasp of the unemployment problem and its ramifications than the magician who sits in the White House. He is trying to recalculate out of exist-

ence the incalculable human pain that fills the vacuum of a job loss.●

● Mr. FEIGHAN. Mr. Speaker, I am extremely pleased to be participating in this special order on unemployment. I think it is an issue of vital importance to every Member of Congress. I commend my colleague from West Virginia for sponsoring it.

When Ronald Reagan took office he assured the American people that prosperity was just around the corner. That might have been an encouraging thought to the millions of Americans unemployed in 1980. But the fact remains that recovery from our current recession has not materialized as promised by the President. Unemployment has been, and remains, the issue of major concern for most Americans. It certainly is of major concern to my constituents in the 19th District of Ohio.

In my district, the disastrous effects of long term unemployment continue to take their toll. Too many of my constituents have already exhausted their unemployment benefits. They have already used up their savings as well. Increasing numbers of my constituents can no longer continue to meet their mortgage payments and risk losing their homes. In 1982, unemployment rates, both for Ohio and for the Nation, reached their highest peaks in more than four decades. In Ohio, that means that nearly one out of every eight workers was without a job.

In the counties that make up my district, unemployment is presently between 11.4 and 15.8 percent. Those percentages are not just numbers—they represent thousands of real people—who have contributed to the growth of our economy. Responsible, hard-working people—many of whom have served our country in the armed services. Unemployed people who would give anything for a chance to make their own way once again.

When I leave here for the Independence Day recess, I will be going back to my district, and I will hear from my constituents who are unemployed, what I hear each time I go home. I am going to hear that they do not want to collect welfare or even unemployment benefits. What they want are jobs.

I was recently able to help an unemployed constituent obtain a temporary position after he had been laid off a job he held for over 20 years, due to the closing of a business. He wrote to me: "It feels so good to have a feeling of accomplishment again at the end of a workday."

Another unemployed constituent who is still searching for work writes: "The American people are the strength of our Nation * * * 8 million people going back to work will diminish the deficit in toto * * *."

These comments are only two of many that I received urging Congress to do something to put people back to work. One letter after another expresses the heartfelt conviction of the letter writer that putting people back to work is the way to keep America strong.

Maybe there are not any easy solutions to the problems of unemployment—but we just cannot ignore the problems and hope they will go away. They have not and they will not.

In the meanwhile, we can take some actions right now to help ease the pain of unemployment for the hundreds of thousands of Americans who must face it. We can pass legislation to make it easier for unemployed Americans to keep their homes. We can also make it easier for them to obtain unemployment benefits.

I recently introduced legislation to make extended unemployment benefits available to States that have unemployment rates of 9 percent or more. Because of a flaw in the present unemployment compensation law, these benefits are being denied to workers in the very States hit hardest by the recession for the longest period of time. This situation is totally unacceptable to me, and I want to see it changed. I am hopeful that the Ways and Means Committee will see fit to address this unfair situation soon. In my view, until we are able to solve some of the larger problems that have contributed to the high unemployment rate throughout the Nation, passing legislation such as my bill, H.R. 3112, is the very least that we can do for the unemployed of this country.

Thank you, Mr. Speaker.●

● Mr. SUNIA. Mr. Speaker, I rise this evening to participate in this unique special order that is vital, relevant, and timely.

I would, first of all, like to thank the West Virgina delegation of Members, WISE, RAHALL, STAGGERS, and MOLLOHAN, and Ms. MARCY KAPTUR—she has to be dedicated to join those wild and wonderful lads!

Unemployment in American Samoa is not quite the same as it is in the contiguous 48, the fabulous 50 or even some of the other territories.

It is especially unique since we do not qualify for unemployment insurance as do most of the other territories and, of course, the States.

Why then am I here? Largely as an educational endeavor to familiarize you with the uniqueness of our unemployment situation. Which is mainly boot-strapped by the local government, by the private sector and, of course, by our own Fa'a-Samoa of the Samoan way of life.

To say that many of the unemployed are really not unemployed by BLS standards would do disservice to my district and set a dangerious precedent—as Congressman WISE initiated and started us with: "Don't build that Dam-Dam in my District!"—not really addressing the problem nor the multiple solutions available.

We do, indeed, have unemployment—an intolerable rate predicted at about 9-10 percent of our approximate 12,000-plus work force out of an estimated 32,395 people.[1] Our Government—the ASG—American Samoa Government—cannot and should not absorb the unemployed as the latter day Interior Department-appointed Governors decided was a special form of Samoan unemployment insurance—"if you need two employees, hire four"—it is good for the economy. That kind of supply side idiocy has confounded the local government for the last decade—a bitter pill to swallow when, by attrition the "piper must be paid."

The democratically sponsored and successfully guided through Congress bill earlier this first session has the proper solution, this humble Member feels, and that lies in jobs creation and the retraining and redirection of our Nation's lifeblood—our work force. I am proud and grateful that our small island territory was and will be benefited by this progressive and farsighted legislation. We are fortunate to have leadership in the Speaker and majority leaders' offices as well as the whips that so masterfully guided this and other jobs legislation through our legislative Chambers, both this House and the other House, and convinced the President—if ever he can be convinced, that a Democratic position on anything is the correct one—to sign the measure when it reached his desk—he probably would have been unemployed himself had he not signed this most important piece of legislation.

In closing, I would like to thank the cosponsors of this special order for allowing me the opportunity of educating you all on the unemployment situation in my district—the territory of American Samoa—the only U.S. possession south of the Equator.

Thank you and Soifua.●

● Mr. MORRISON of Connecticut. Mr. Speaker, the President would have us believe that unemployment is no longer a serious problem. Once again, he claims that his stiff recessionary medicine has finally done its job against inflation and that economic indicators point to a quick recovery. While, on one hand, expressing compassion for the jobless, the President, on the other, suggests that jobs abound, and that anyone can get work who is willing to stop loafing, get off the Federal dole, and apply a little effort.

However, Mr. Reagan's cheery picture is cruelly wrong. By many measures, May unemployment was the worst since 1948. The country still suf-

[1] 1980 unofficial census figure.

fers from what George Stigler, the Noble Prize-winning economist from the University of Chicago, calls a full-fledged depression. Yes, the administration has achieved some price stability, but at a cost, measured in lost production and in the suffering and misery of the unemployed, which is obscene.

Connecticut, suffering a mere 7-percent May unemployment rate, has been fortunate in comparison to the rest of the Nation. Yet, Connecticut's success is only relative. The State's unemployment is now more than double what would have been considered acceptable in the past. In my district, recent unemployment figures have gone as high as 7.4 percent in Hamden, 9.1 in West Haven, 9.4 in East Haven, 9.6 in Stratford, 9.6 in Milford, and 9.4 in New Haven. However, these figures are misleading. For example, in New Haven, many of the city's residents have either given up hope of finding work and have left the labor force or have been forced into unskilled jobs at low pay. New Haven's relatively low official rate of unemployment is belied by the fact that it is the seventh poorest city in the United States, with over one-quarter of its people living below the poverty line.

As bad as the problems in my district and in Connecticut may be, the jobless in the Nation's industrial center have even less hope. American heavy industries which produce automobiles, basic steel, and rubber are in danger of becoming permanently uncompetitive with foreign competitors. The near failures of many of the industrial giants are not the results merely of the recent depression, but instead represent long trends. Worse even than the situation during the Great Depression, each of hundreds of thousands of workers in Michigan, Ohio, and Indiana has had to come to terms with the permanent loss of his or her job. After exhausting unemployment benefits, many have packed up their families and moved south, hoping to find employment in the thriving Sun Belt. Yet, the area already is saturated with willing workers. And for many a new arrival, the only alternative to the breadline is to become 1 of 2 million day laborers, doing, for minimum wage, the dangerous or filthy work that other workers refuse. Betrayed and disoriented, these economic outcasts have felt the death of the American dream.

Many, including those in the White House, do not comprehend the horrible wounds which current depression-level joblessness tears into our society. To lose one's job is not simply to have an enforced vacation with an unearned paycheck compliments of Uncle Sam. Each additional percent of unemployment means over 1 million new workers thrown out of their jobs; thousands of new cases of alcoholism; thousands of new cases of physical and mental illnesses caused by increased stress, anxiety, and depression; large increases in crime, thousands of ruined marriages; grotesque increases in cases of child abuse; thousands more children who require psychiatric care and thousands of premature deaths. Indeed, the impact of the present depression on health is so severe that, if it were an infectious disease, it would qualify as an epidemic killer, against which our Nation would pursue vigorous measures. Yet, during this period of high unemployment, when workers have desperately needed professional care and support, such care has rarely been available. Along with their jobs, most workers lose health insurance. In addition, during hard economic times, cities are hard pressed to fund agencies for health and human services.

The rough claw of unemployment reaches far beyond the 10.1 percent of the labor force now without work. When joblessness is high, many must accept menial or part-time work or must live in fear of losing their jobs. Others simply stop looking, giving up hope of finding work. Now, the average American has either lost his job, is in danger of losing his job, or has a family member without work.

Unemployment discriminates, hurting most severely those who already suffer our society's deepest inequities. Older workers, finding that employers refuse to retrain them for only a few years of service, are condemned to menial labor or are forced, bitter and discouraged, into retirement. Minorities, the young, and the unskilled have unemployment rates more than double the national level. Furthermore, because of the last-hired-first-fired policy of many employers, the recent depression has erased many of the job market gains which minorities and women had won. Indeed, over 50 percent of young black women are unemployed.

Our sick economy threatens to create in our society an underclass permanently excluded from the economic system. Most young members of minority groups now either are jobless or are employed in low-paying, short-term jobs with no hope for advancement. Unemployed or employed in menial labor, these young minorities are denied the training needed to get better jobs. The economic system, thus, sentences them and their children to poverty and exploitation.

The administration cites the strong stock market and a slight moderation in the unemployment rate as evidence that the U.S. economic tragedy will soon be behind us. Having passed its jobs bill, the Congress, too, is in danger of becoming complacent. Yet, can we accept an economic recovery in which the unemployment rate will not go below 9 percent before 1986? Can we accept a recovery where each week we read of thousands standing in line to apply for a handful of jobs? No; we must not believe that our problems are over and that we can go on to other matters. For paper profits on Wall Street do not mean jobs on Main Street.

The President has said that we should share equally in the sacrifices necessary to fix our economy. Yet those hurt most by the recent depression—the poor and powerless—have been least helped by the recovery. Auto company profits have increased, but mainly because operations have been streamlined by permanently firing thousands of assembly workers. Rising stock prices have enriched the wealthy, but more than 11 million workers still have no jobs. We are experiencing a tragic perversion of the trickle-down theory; problems cascade down on the disadvantaged while the rich hoard the trickle of benefits.

The Government must work to end the enormous waste represented by depression-level unemployment. We cannot rely on those in private business. For, according to polls, they do not care; a shocking proportion of corporation chairmen and bank presidents believes that large industrial companies should be allowed to fail even if such failures cause huge unemployment. We must support legislation to insure that laid-off workers continue to be covered by health insurance. We must support programs to retrain permanently laid-off industrial workers for other jobs. And we must help the unemployed to relocate to areas where they are needed. Without these programs, the administration's attempts at economic alchemy will further punish those who have already sacrificed the most.●

● Mr. WON PAT. Mr. Speaker, I am pleased today to join with my colleagues in this special order to discuss unemployment—in my district.

Congressman BOB WISE is to be congratulated for reserving this time to permit all of us to speak out about an issue which is of great importance to the Congress and to our constituents.

America is indeed waiting, as Congressman WISE says, for Congress and the President to do something about the growing rate of unemployment across the Nation. We read the papers daily and see glowing statements from the White House which say that interest rates are down and the economy is getting better. But I and millions of other Americans are wondering when the bright new future will trickle down to the workingman and workingwoman to provide them with the jobs they need so badly to feed their families.

Unemployment is a major problem in my own congressional district of Guam. While the official estimates

fluctuate between 11 and 14 percent, these figures do not reflect the complete picture of unemployment in my territory. The sacrifice of human potential and individual self-worth point to the grimmer aspects of this problem.

I deeply fear for the future. The 1980 census indicated that 40 percent of Guam's population is under 19 years of age. This spring, nearly 2,000 students graduated from Guam's high schools. They face a future which is bleak and for many of them jobless. While these young people may have more mobility than their older counterparts seeking jobs, I fear that the best of the next generation of Guamanians will be drained off of the island by the chance for greater, or at least some, opportunity on the U.S. mainland. I see no viable program in the future to change their lot and this is a shame. It is a waste of valuable human resources.

Unemployment problems for Guam are compounded by the isolation of our island community. Our people cannot drive across a State line to seek greater employment opportunities. Relocating a family across an expanse of ocean is, of course, an often insurmountable expense. More importantly, I do not want the people of Guam to have to leave their homes and their families for adequate employment opportunities. I know that you, as my colleagues, can understand why lack of employment presents such a threat to our community and family traditions.

Additionally, our economy is very dependent upon the Military Establishment in Guam. It accounts for 20 percent of those employed. While the current administration emphasizes the need for personnel reductions, as well as pay and benefit cuts, I wonder where my people can turn to. The local government is undergoing a fiscal crisis just trying to provide basic services.

The people of Guam cannot survive additional cuts in programs which provide Federal assistance in job training or basic necessities. It is up to this Congress to lead the way for an economic recovery for all the citizens of this great Nation, not just the select few.

I hope and pray that the leadership gathered here can bring us back from the grip of this economic and spiritual depression.●

● Mr. RAY. Mr. Speaker, the Third District of Georgia is unique in many ways. Economically, it relies on the millions of dollars spent in purchases by the two military bases, Fort Benning and Robins Air Force Base. Another critical area, which I think we have overlooked on a national scale is our textile industry—an industry we are dependent on—yet one we have not protected from foreign competition.

Unemployment in Georgia's Third District textile-related industries can be traced to two major causes: The economy and imports. With housing starts low and a sizable decrease in automobile production, the carpets and other fibers usually needed in large quantities have not been purchased. In my district this has resulted in almost 20 percent of the workers in Third District mills laid-off, some permanently. The textile industry is the largest producer of goods in Georgia and is the 10th largest employer in the Nation. Of the recent 4.6-percent increase in the gross State product, 19.4 percent is attributed to the productivity of textile workers. Unemployment in this industry is felt even more deeply in several Third District counties where textile-related industries have scaled down production by 40 to 50 percent. Georgia statistics show that textile workers have suffered many layoffs, from 6.4 percent of the work force in 1977 to 4.7 percent in 1982.

Nationally, the textile industry reflects the problems felt by the Third District. Ten years ago the textile industry employed 1 million plus—now, the figure is down to 730,000. Currently, imports make up approximately 30 percent of the domestic market. This year's projected import growth could well amount to another 1 billion square yard equivalents—equal to another Hong Kong and eliminating another 100,000 jobs in the industry.

How can we help the textile industries rehire their workers in Georgia's Third District and in the Nation?

First I think we have to listen when they tell us we are losing out to foreign competition. I also think we need to prevent our textile companies from suffering the fate which our automobile manufacturers are facing. In short, we have got to get aggressive with our trade policy and help our textile producers produce.

Only by strengthening the markets and restoring the industry to maximum production can we hope to halt this disastrous economic slide in the Third District of Georgia and the Nation.

There are 92,000 unemployed textile workers nationally. Hundreds of my constituents would like to have their jobs back. They do not necessarily want Federal handouts. They want the Congress of the United States to protect the markets and the fledgling emerging economy.

I think we need a consensus here tonight—A bipartisan pledge of support to all our industries to find ways to help them provide the jobs we need so badly. Our workers are more than ready to work. All they ask is a chance. It is up to us to help them find it.●

● Mr. ALBOSTA. Mr. Speaker, I represent the 10th Congressional District in Michigan where during this supposed economic recovery period people still suffer from up to 22-percent unemployment. Nationally, Michigan has the dubious distinction of leading the Nation in joblessness with an unemployment rate of 14.7 percent. What I find especially disheartening is the fact that in addition to 11.2 million unemployed Americans, there is estimated to be 1.8 million discouraged workers who have stopped looking for jobs and have given up hope. Many such discouraged workers are in Michigan where we have suffered from an unemployment rate above 10 percent for 3½ years.

One of the shameful aspects of unemployment in Michigan is that the State no longer receives extended benefits due to the formula which is used to determine eligibility. At present, only those receiving regular unemployment benefits are included in the computation, while those receiving extended benefits or who have exhausted all their benefits are excluded. In my State alone, an estimated 200,000 people are in this excluded category. I encourage my colleagues to support legislation which would change the formula to reflect a State's unemployment situation.

In my district specifically, we are experiencing 15.4-percent unemployment, with a loss of jobs in a variety of occupations. Many of the people in the 10th District have worked in the auto industry; however, there is concern that this industry will never attain its previous levels of employment. Rural America forms the heart of my district, but family farms, an American tradition, are being foreclosed upon or are facing desperate financial problems. Young people simply cannot afford to start and maintain farms during the recession. Their efforts should be supported and encouraged to insure that this tradition does not suffer further and that families are removed from farming altogether. Perhaps most discouraging of all, graduates of schools in my district are often forced to seek their futures elsewhere. I would like to emphasize this last fact, for it is difficult to express the sadness of seeing our fellow Michiganders leave the State in search of employment. Michigan had an extremely low growth rate in the last decade: 4.3 percent, as compared to the Nation's average of 11.4 percent. Additionally, the State's population has declined since the 1980 census, with future growth predicted to be about a third of the national rate. Action must be taken to stem this exodus so that our strength as a region does not decline.

All is not despair in Michigan, however, because the State does have many things going for it: A large, competent work force that wants to work,

fine education facilities, beautiful natural resources, and an established industrial base. Michigan is building on these good qualities to get people to work again, but the State's actions need to be complemented with Federal assistance because Michigan has been suffering in this economic depression for far longer than many other States. The Federal Government must not now sit back, claiming recovery, when high unemployment and the lingering effects of long-term unemployment continue. Michigan, with the greatest need for assistance, has consistently received the smallest return of its Federal tax dollars. This cannot be allowed to continue. Michigan has taken steps to get its economic house in order, and with targeted Federal assistance, the State will regain its proud status as an industrial leader.●

● Mr. LAFALCE. Mr. Speaker, I would like to thank my colleagues for organizing this special session of the House of Representatives on unemployment in America. Rarely do Members of Congress have the opportunity to spend an entire evening focusing on any single issue, let alone one as important and serious as the persistent high unemployment which continues to drain the economic and social vitality of our Nation.

This session, a chance to share and discuss the unemployment that we are experiencing in our own districts, could not have occurred at a better time—a time when we are seeing some signs of economic recovery; a time when many sectors of the economy appear to be on the mend.

Such indications of declining unemployment are a welcome sign—but, I hope that the decline will not reduce national concern. We as a Congress and as a nation must not allow the signs of recovery to lull us into a false sense of economic security. We must remain sensitive to the plight of the literally millions of individuals who remain out of work.

The unemployment rate in my own western New York area is horrendous. While some parts of the country may be on the road to recovery, large portions of New York's 32d Congressional District remain plagued by 10 to 20 percent unemployment rates. Many are the long-term unemployed who have lost their unemployment benefits, savings, and even homes. Indeed, the true levels of unemployment are much higher because the reported figures do not reflect those people who have been out of work for so long that they are not even counted among the Nation's or our communities' jobless. It is estimated that in the Erie/Niagara County region, which includes the city of Buffalo, that the number of these discouraged workers—unemployed, but not included in the actual unemployment rate—has risen to over 30,000 people in the past 3 years alone.

My district, from Buffalo to Niagara Falls, to Rochester has been ravaged by year after year of record high unemployment. In 1982, the average number of people out of work in the Buffalo area was 69,700. Twice during the year, the number exceeded 80,000 individuals. In the period from 1980 to 1982, the region's manufacturing sector entered an unprecedented tailspin. Of over 40,000 nonfarm jobs lost, 32,000, or 80 percent were in the manufacturing sector. Jobs lost in the auto and steel industries accounted for a full 60 percent of this manufacturing loss. Today, the unemployement rate is 12.9 percent, up from 11.8 percent a year ago. Of the 70,000 people out of work, 32,000 or 45 percent are displaced workers who, even in a recovery, cannot be expected to regain their employment. It is expected that these will be joined by an additional 5,000 displaced workers in the next several years.

In the Rochester region, which includes Monroe, Orleans, Wayne, and Livingston Counties, the average number of individuals out of work in 1982 was 34,425. On two occasions the number peaked at over 40,000, and today rests at 41,700 or 8.8 percent. This compares to only 6.2 percent or about 29,000 people out of work a year ago. Monroe County, which typically experiences much lower unemployment than the rest of the Nation is not only not far behind now, but is also experiencing unemployment rates for blacks and Hispanics that are much higher than the national average for these groups.

I am second to no one in welcoming the signs of recovery and rejoicing when a worker is able to return to his or her job. In fact, in each of the Buffalo and Rochester areas of my district about 5,000 individuals have gone back to work in the past month alone. But let us not forget that the 70,000 people out of work in the Buffalo area today is 5,000 more than were unemployed 1 year ago and 21,760 more than were unemployed just 2 years ago. In the Rochester area, the 41,700 out of work today is 12,400 more than a year ago and almost 16,000 more than 2 years ago. If we are indeed turning the corner toward economic recovery, as I hope we are, let us not turn our backs on or forget about the people, families, and communities that have been shaken by the distructive forces of unemployment.●

● Mr. LEHMAN of California. Mr. Speaker, my remarks today are those of a person frustrated by the claims of economic recovery so smugly being asserted by the White House, while at the same time, I represent a district where one out of five of my adult constitutents is now on the unemployment rolls rather than the payrolls they deserve.

In my district, the list of companies that have gone under since inauguration day 1980 reads like a "Who's Who" of what was once a vibrant Central Valley economy—Libbey-Owens-Ford, Fibreboard, California Canners and Growers, H. J. Heinz, Sperry-New Holland, and Fruehauf all have closed or substantially cut back their operations leaving hundreds of people without work.

My district is a diverse one. It includes beautiful mountains and lakes, small communities nestled in the foothills, agricultural communities, and large growing urban centers. Everywhere the message is the same—people are hurting, despite the hopeful signs, the bottom line is that people are not working.

I, for one, cannot say that we have a recovery or that this Government has lived up to its commitment to the people when so many men and women who have worked all their lives, saved their money, raised families and planned their retirements, are forced idle by the policy of recovery through recession.

The most eloquent statement that can be read on the extent of this problem is a recitation of the unemployment figures in my district:

Fresno, 15.5 percent; San Joaquin; 17.1 percent; Tuolumne, 17.5 percent; Calaveras, 17.1 percent; Mono, 13.9 percent.

We have an obligation to bring about economic recovery in this Nation. In fact, that issue alone will be the one by which history will judge this Congress. The Democratic program is designed to put our people back to work, to balance the budget, and to make our tax system more equitable. Unfortunately, rather than a bipartisan effort that looked possible a few months ago when this Congress worked with the President on the jobs bill and social security, we have an administration that now wants to grit its teeth and play politics with our Nation's economy, at the expense of our constituents who are looking for work.

We in Congress have always been willing to compromise, to seek solutions with the administration, to govern by reason. But we cannot tolerate a recovery that includes a permanent unemployment level of 10 percent, a $200 million budget deficit, and tax breaks for the rich that create no new jobs, but only raise the deficit and put more people out of work.

The question is fairness, and that is what the democratic program is all about.●

● Mr. COLEMAN of Texas. Mr. Speaker, I appreciate the efforts of my distinguished colleagues for bringing the critical topic of our Nation's unemployment to the House floor for our consideration.

Unemployment in my district and across the Nation has reached unprecedented proportions, and we must take the time and make the effort to correct this problem. I applaud the first concurrent budget resolution, as originally passed by the House of Representatives, for recognizing unemployment as a major stumbling block to our national economic recovery. Every percentage point of unemployment adds an additional $25 to $30 billion to our already skyrocketing deficit. While we have recently seen a decrease in the unemployment rates, both nationally and in west Texas, we should not become overconfident and disregard education and training programs—a mistake that seems to be endorsed by this administration. Effective funding levels for education and training programs are essential to a sound economic recovery, one that sees reduced inflation rates, reduced unemployment levels, and reduced interest rates to allow for substantial investment.

I would like to turn to discuss the situation in El Paso for a moment. West Texas is unique in that we share a substantial common border with Mexico. While unemployment in El Paso may be as high as 13 percent, that figure is still a substantial incentive for those individuals on the Mexican side of the border who face unemployment rates of more than 30 percent to cross over to El Paso. Native El Pasoans and west Texans who are seeking employment become undercut by the lower wage rates that undocumented aliens are willing to receive.

The spillover onto the El Paso economy takes place in several ways. First, a drain is placed on the economy because a greater demand is created for social services that are already strained by the increased numbers of individuals seeking health and welfare services. And the overall situation is exacerbated by the fact that as high as the official rates seem, they do not include discouraged workers or workers who have had their hours cut back. Furthermore, the Hispanic and youth unemployment rates have increased, and these two factors add to the toll taken on El Paso's border economy.

The jobs bill legislation that passed the Congress in March was warmly welcomed in west Texas. That bill initiated public works projects and put many of the unemployed back to work. The second phase of the jobs bill should be considered in the near future and is essential if we intend to put many of the structurally unemployed back to work. The recession has played havoc with the markets for many industries, and the second phase of the jobs bill is badly needed to retrain many individuals who may have to seek employment in a different field.

The recent emphasis on high technology is a case in point. High technology jobs require a level of expertise that we must be prepared for—a goal that can only be accomplished by funding our Nation's schools adequately and by providing an incentive for students to seek an academic career.

I am pleased that west Texas has seen an improvement in the unemployment situation. But I must emphasize that this improvement could be temporary. We must prepare for the worst or run the risk of losing our position as the best-educated, industrialized democracy in the world.●

● Mr. CORRADA. Mr. Speaker, it is with pleasure that I stand here tonight to talk about the unemployment situation in my district, Puerto Rico. As national unemployment figures rise above 10 percent and public attention focuses on the need for jobs, I watch the island suffer under a May unemployment figure of 23.1 percent. Over the course of the past 2 years, our unemployment rates have been as low as 17.7 percent and as high as 25.3 percent, and never acceptable.

Yet, the figures show little of the real impact of unemployment.

This past month, fully 217,000 persons were actively looking for work. This does not count those who have decided to return to school, those who have accepted part-time jobs earning abysmal salaries, or those who have simply given up hope and have stopped looking. Just as the construction industry is beginning to move here on the mainland, Puerto Rican statistics show that construction suffered the largest loss in job slots during May—over 5,000 jobs affecting mostly males ages 25 to 44. We are not losing the second household income, nor the wages in a single-person household, but our unemployment is hitting the major family breadwinner in his prime years.

Clearly, the private sector is not fully prepared to absorb the large unemployed workforce which so desperately needs an opportunity. In the context of an economic situation where almost one of every four adults is in search of work, sole dependence on the private sector is not feasible.

The economic and social costs of unemployment are staggering. It is estimated that every 1 percent of unemployment cost $25 to $30 billion in lost revenues and increased entitlement costs for social security, unemployment insurance, food stamps, medicare, and welfare. Additionally, unemployment worsens the real but immeasurable costs in mental health, family disruption, school dropouts, physical illness, and crime.

I urge my colleagues to strongly consider legislation now pending before this body which would provide Federal support for employment in areas of long-term unemployment. I believe that it is only through this type of intervention that we can ameliorate the present day economic situation, particularly in areas which are hardest hit, such as Puerto Rico.●

● Mr. YATRON. Mr. Speaker, I want to personally thank the gentleman from West Virginia for calling this special order so we can continue to focus on the chronic problem of unemployment.

Reducing unemployment is one of the greatest challenges facing our Nation. The high rate of joblessness is mainifest in the untold human misery for millions of Americans whose lives have been devastated by the lack of work. High unemployment has greatly exacerbated our economic problems by adding significantly to the budget deficit and reducing revenues for social security.

Although there are many positive signs pointing to a sustained upturn in economic activity, unemployment still exceeds 10 percent and is not expected to decline appreciably for several years. Compounding the problem is the fact that the baby boom generation has reached the adult age and is now entering the labor market.

While the problem of unemployment must be discussed in macro terms for the purpose of developing national initiatives to stimulate job creation, I believe it is critically important to examine the extent of the problem in each of our congressional districts. That is why this special order is so important.

Unemployment in the Sixth Congressional District of Pennsylvania is considerably above the national level. The overwhelming number of people affected by joblessness in my district are hardworking, honest citizens who do not look for, or want, Government handouts. They want jobs. They want the opportunity to earn a living, build a better life, and provide for themselves, their families, and their future. The lack of work has caused these people to lose their homes, their health, their dreams, and their self-respect. The social difficulties stemming from unemployment has victimized many good families.

It is absolutely essential that the Congress continue to address the serious unemployment situation, in all its ramifications, We need a balanced policy encouraging the growth of high technology and service industries, while maintaining a sound manufacturing base and preserving those basic industries which are vital to our economy and defense. Our trade laws must reflect our commitment to free and open commerce among nations. However, these laws must also promote exports and eliminate trade barriers to our goods and unfair competition from heavily subsidized Government imports. Moreover, we must work for an

improved educational system to guarantee that future workers will possess employment related skills.

I will continue my efforts to reduce the level of unemployment in our country and I am confident that the Congress will initiate the necessary actions to stimulate job opportunities.●

● Mr. TALLON. Mr. Speaker, I would first like to thank my colleagues from West Virginia for providing this opportunity for a Special Order on Unemployment.

I know we have all seen firsthand the emotional side of unemployment. Fortunately, unemployment has dropped slightly in my district during the last 6 months. But it still continues to hover around 10 percent. Throughout my district in South Carolina, I see teenagers who have just graduated from high school with no opportunities in sight, men and women I grew up with who have been laid off with no idea of when they might be returning to work, and the older worker who has been phased out during their most productive years.

We know it is not fair. We know these people and their families are suffering. We know their despair runs to the core of their self-esteem. The promises of economic recovery provide little comfort for those still looking for a job.

There are over 30,000 people out of work in my district. The source of this unemployment runs the gamut from industrial workers who are laid off indefinitely, to small family-owned businesses who just could no longer make ends meet, to family farmers who face foreclosure.

This is the emotional, personal side of unemployment. And we should respond with compassion. But we should also search to the root of the problem, correct it, and get our economy turned around and our people back to work. We are wasting our most valuable natural resource—the American worker.

To find the realistic approach to getting American workers working again is to look to the history of this great Nation. Our free enterprise system and the development of the private sector was based on reasonable, stable and long-term interest rates. Any businessman knows that he must be somewhat able to forecast the future in terms of supply, demand, costs and hopefully, profit, to be successful.

To battle unemployment, we must lower interest rates. Consumers cannot make major purchases that require borrowing, so they do not buy, and demand for our goods drops. Businesses are unwilling to make investments when the cost of borrowing is so high. The high-interest rates raise exchange rates and increase the cost of American goods overseas, thereby making our goods less competitive and reducing exports.

The high Federal deficits we face feed high-interest rates which choke growth and investment, force businesses to cut back or close, and send workers from jobs to the unemployment lines.

For the first time we have a recession coupled with high-interest rates. Inflation has been reduced, but at a tremendous cost to our labor force and productive capacity.

In order to lower interest rates, we must agree now to lower the Federal deficit. We need to closely examine where each dollar is spent and not throw money recklessly at any program. As responsible lawmakers, we must make structural changes to expand the tax base, and reduce the rapid increases in health care costs and defense spending that are leading us to astronomical deficits.

By reducing the Federal deficit, we will be sending a message to the financial markets. Competition by the Government and the private sector for the supply of available credit will surely lead to further disaster.

The best jobs bill we can give this country is the assurance of long-term, stable interest rates that will restore the confidence of the financial community.

As we deal with the immediate problems of interest rates and deficits, we can begin the longer job of rebuilding a strong and competitive economy.

We must develop an industrial policy that will make our basic industries competitive again. This should include trade protection from foreign competition while American industries restructure, action to eliminate trade barriers set up by other Nations, legislation to create export trading companies so small business can compete in foreign markets. Industrial policy should also look to industries of the furture by expanding research and development.

The problems of unemployment in the personal and practical sense are clear. So are the solutions. I urge my colleagues to move toward real economic recovery that will not let the suffering of our work force and the decline of our economy continue.

POLICIES THAT LEAD TO UNEMPLOYMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WALKER) is recognized for 60 minutes.

Mr. WALKER. Mr. Speaker, I think we have had a very useful discussion by a number of Members on the floor tonight about the unemployment problem that the Nation faces. I am pleased to have been able to listen to most of it and to join with many of my colleagues in expressing, too, my belief that we must begin to work toward bringing down unemployment rates.

It seems to me that the one thing that we can assure ourselves of is that work is an essential part of what America is all about. We have long been a nation of growth. We know that we cannot grow without work. But conversely, we know that we cannot have work without growth.

Now, it seems to me that if I have a criticism of what took place here tonight it is that we have pretty much spent an evening listening to the doom-mongers and the nay-sayers. There is no doubt that what they say is true about unemployment. It is much too high. It has been too high, and it has been too high far too long.

We can go back and trace the unemployment problems not just to the beginning of this administration, or even into the years of Jimmy Carter. You can go back a decade or more and see where the problems of unemployment have begun to accrue to this society. And the fault rests not in the White House, for the most part. The fault rests right here. We are the people who have caused most of the unemployment that we now see across the country.

Now, we might have done it for all of the best reasons. The laws that we passed that brought about unemployment, the economic policies that we developed that brought about unemployment, all of those things may have been done for all of the best reasons; but the fact is that the unemployment that now plagues our society started right in this Congress and continues today because this Congress cannot respond.

There are literally about 2 million people in this country who are unemployed today because of what Government is doing to them. Because of the rules and regulations and policies and procedures of Government, 2 million Americans are not working today who could be working. And I think that is a tragedy. I think that is wrong. I think it is high time that if indeed employment is our No. 1 priority—and I believe it should be—then it is high time that we begin to stop the process of creating unemployment here in the Congress. And it is high time that we begin to change the laws, the rules, the regulations, the procedures, the policies that bring about unemployment.

I have no doubt at all of the tragic problems that were relayed by many of my colleagues here tonight, as they read letters from their constituents; I have no doubt that those tragic problems exist, and they exist in every one of their districts. They exist in mine. And I think that the question that we have to pose to ourselves is: What are we going to do about it?

It is not good enough to simply say that the problem exists. We know that. It has existed for a long, long

time. But what are we going to do about it?

Well, I submit that one of the things that we need to begin to look at first is the policies that we pursue in this body that lead to unemployment.

Let us talk about the budget, for instance. We had a budget bill up here on the floor last week. That budget bill has an awful lot to do with what happens on the employment front. What did the budget do that was ultimately passed by this body and by the other body? Well, it raised taxes, it raised spending, and it raised deficits.

Now, I wonder if any one or all of those things are good for employment. Does raising taxes help employment? No; because when you raise taxes, you take money out of the economy, just like you do with deficits. Taxes crowd out investment, just like deficits do. One is just as bad as the other.

And so when you raise taxes, well, indeed, you frustrate economic recovery, you frustrate growth; and when you frustrate growth, there cannot be any work.

Remember what I said originally? I believe it is true. You have got to have growth to have work. But work also must have growth.

Now, if we are going to have growth, we cannot do it by imposing higher taxes, particularly taxes which go to small businesses which are creating most of the jobs in this country. The vast portion of new jobs in this country are created not by the Fortune 500 companies but they are created by small businesses.

What was the first tax bill we brought to the floor the other day, after the madness of the budget proposal?

It was a tax bill designed to impact most on the small businessman. The people who were going to pay most of the additional taxes were small businessmen and farmers.

Do you think that is going to be an incentive for them to go out and hire a new employee? You see, if all of them would hire only one new employee, it would bring down unemployment considerably. But they cannot hire one new employee if we are taking the money and bringing it to Washington. And that is the problem. That is what we do when we raise taxes.

Does raising deficits help create jobs? Absolutely not. Just like taxes, that does crowd out investment. When you crowd out investment, you cannot have growth. When you cannot have growth, you cannot have jobs.

□ 2310

How about raising spending at the Federal level? Does that help create jobs? Well, there are people around here who would like to think so, people around here who think that we can increase spending levels here in the Congress and somehow some of those spending programs will create jobs and will do tremendous amounts of good for all people.

The problem is that the things that we create around here tend not to create jobs which help the unemployed. We passed a jobs bill. It has been referred to by some of my colleagues here earlier this evening. That jobs bill was supposed to help the unemployed. The fact is, we are already beginning to see the experiences rolling in from around the country as to what is happening with that jobs bill money.

The money is being spent; there is no doubt about it. But the spending has gone up, we are spending the money out there, and is it really helping the unemployed?

Well, I recently became familiar with a situation down in the State of Mississippi. They got a good deal of jobs money. Ninety percent of the money that they got is going to be used to pave streets and for drainage and recreation projects. The money is not going to give any unemployed, unskilled workers a job. The money is going to go to people who already had a job, skilled workers who were already, because of increased activity in the construction industry, plenty busy enough, but this is going to be a little bit more money that is going to go their way.

You see, that is not atypical of what has happened in the past with the same kind of programs. The last time, back about 1977 when we had a similar program, 2 percent of the money that we spent actually got to people who were unemployed when the bill passed, and 88 percent of the jobs that were created under that bill went to people who already had a job.

So history is repeating itself. The money we are spending here supposedly to help the unemployed is not going to the unemployed at all; as a matter of fact, it is going in the opposite direction.

That is why, when some of these bills came to the floor, I offered an amendment back awhile ago that said 90 percent of the jobs created under this bill have to go to people who were unemployed at the time of the enactment of that bill. It was based upon historic precedent. That particular proposal was not very popular in this body. Most of the people who spoke tonight on the issue of unemployment voted against that amendment—voted against it.

That raises a question in my mind. Are we more concerned with the spending or are we concerned about the unemployed? I think we ought to be concerned about the unemployed, and it seems to me if we are going to spend the money we ought to at least spend the money to make certain that it goes in the direction of helping people get work.

But we will not do it just by spending. The votes on spending around here consistently show that what the spending is doing is going toward special-interest programs, to special-interest groups; it is not helping on this No. 1 priority. We had a vote today that tried to cut 4 percent on a budget around here, 4 percent out of an $8 billion budget that was about $1.2 billion over what the President wanted to spend. First it won. It won by a couple of votes. But sure enough, a couple minutes later we had to revote it again and then it lost by 10 votes. It would have saved $300 million or $400 million, but it could not be sustained.

That kind of spending, those kinds of spending programs, that kind of money that adds to deficits, costs people jobs because it takes money out of investment, that takes money out of growth, and without growth we do not have work, and without work we do not have jobs.

What is happening out in the country as they have taken a look at this budget process that we have gone through around here? What has been the reaction of the people who have to create the jobs out there? Have they been impressed with what we did? No; the stock market has dropped since that budget passed. Interest rates are said to be going back up. Why? Well, they are responding to the fact that we do not have the will in this body to do what is necessary to put people to work.

For a period of some months, the financial markets began to get the feeling that we might have that kind of will. Now they find out that we do not, and there is beginning to be a negative reaction, and there is a good possibility within the next few weeks that interest rates will begin to go back up again, with all the economic devastation that that could cause, with the increased unemployment that that could cause.

Why? Because of something that the administration is doing? No; because of what we did right here when we designed an economic policy that had every tenet of it absolutely wrong.

Well, that raises a question. Why did we move off on this kind of an economic course when we see that an economic recovery was really underway? Was it politics? Well, I contended that it was, and I think there is some justification for that. I happen to think that there are some people who are getting worried about the fact that a strong economic recovery looking toward 1984 will not be very good politics in 1984 for people who are in opposition to this administration.

That may be, but the fact remains that there is an economic recovery underway. I heard it described this evening in a variety of ways. I heard it described as fragile, nonexistent, and

several other terms. But I submit that it is a very noticeable economic recovery.

Let us take a look at civilian employment. Civilian employment reached 99.6 million in May. Since December, employment in this country has increased by over 500,000, with adult men up 370,000 and adult women up 270,000, accounting for most of the increase. At 99.6 million Americans working, total employment is 300,000 higher than the average 1980 level of employment. In other words, the last year of the Jimmy Carter administration, that 1980 time period was not exactly a time of boom in this country.

Right now, because of the policies of this administration—and sure, they have taken a while to work; it has taken a couple of years for them to really move into place—because of those policies, the employment rate is beginning to move up in this country. There are 300,000 more Americans employed today than was the average during the year of 1980.

How about industrial payroll employment? The total nonagricultural employment rose by 375,000 people in May, to 89.5 million total. Consequently, the unemployment rate has dropped by 0.7 percent since December. Now, that drop in unemployment is the fastest drop in the unemployment rate in the postwar era. To say that this recovery is not working, that the economic policies are not working when you have that kind of statistics is just plain foolishness. It is not only wrong; it is foolishness to say those kinds of things.

Unemployment is still too high. It is still not coming down as fast as we would like, but it is coming down faster than at any time during a recovery in the postwar era.

Those employment increases have been widespread. The Bureau of Labor Statistics diffusion index reached 70 percent in May. This is the index that the BLS uses to predict future hiring trends, and anything over the 50-percent threshold is considered to be a positive indicator. That 70-percent figure is one of the highest we have seen in a decade.

The construction industry added 80,000 jobs last month. Manufacturing employment increased by 105,000 jobs in May, after increasing by 113,000 jobs in April.

We are seeing factory hours go up. We are seeing hourly earnings go up. All of these things that are beginning to happen in the economy were happening as a result of some of the tough decisions that we made in 1981 and 1982. Now, we all know around here that the economy does not work instantaneously. It takes a period of months. It is usually about an 18-month cycle.

We are now beginning to see the results of what took place 18 months ago.

□ 2320

Those results are very positive. What is Congress doing to respond to that kind of positive trend? Are we building up on that positive trend in what we did in the 1981-82 time period? No, we are moving completely in the opposite direction. We are going back to the same policies that caused the devastation in 1980—precisely the same policies—and it is a tragedy.

It seems to me that what we ought to be doing, if we are really going to put people to work and if we are really going to make unemployment a No. 1 priority to get solved, is adopt some of the things that the economic recovery was all about—reduce Federal spending, reduce taxes, and bring about a situation where we have lower inflation which in turn can lead to lower interest rates. Those are all the kinds of things that we need to do in this Congress in order to get the economy moving again and put people back to work.

But we have some other things we ought to do, too. When we take a look at the unemployment figures, we find out that the unemployment figures are pretty well targeted. In my State of Pennsylvania unemployment is much different in some communities than it is in others. We have towns and cities in Pennsylvania where the unemployment rate is running 20 to 25 percent, and we have other communities where the unemployment rate is about 6 or 7 percent. That kind of disparity needs to be looked at because those high areas of unemployment obviously bring up the average.

So it seems to me that we need to begin to target some of our assistance toward those particular communities. That is the reason why I have introduced the Distressed Communities Act. One of the things that we can do under the kind of plan that I put forward is to let us get the Government out of the business of stopping people from working in those communities.

That is right, Mr. Speaker, the Federal Government is responsible in many of those communities for people not being at work because we impose standards on them—things like the Davis-Bacon Act, clean air standards, and all kinds of things which stop people from working in those communities.

Why not give those communities a waiver which would allow them to say, "If we have got unemployment averages in this town which are higher than the national average, we want to be able to waive those requirements for the period of time it takes us to get our unemployment down?" Why not get Government off their backs for a while? Why not let them put people to work rather than meet Government mandates?

That could produce something in the vicinity of 1 million jobs in this country in the areas that most need the jobs without one dime of Federal money being spent. That is the direction we ought to be going. That is one of the things we can do.

But the fact is that we do not like to think about doing things like that in this body because there are a lot of special interest groups out there that are tied to all those programs. Those programs did not just come out of nowhere. The things that are keeping people out of work just did not come out of nowhere. I submit that as soon as we begin talking about doing something about the Davis-Bacon Act that in itself costs 500,000 Americans their jobs, big labor will be here in droves telling us, "Oh, you can't touch Davis-Bacon."

I know that is true. We held some hearings on the revenue sharing bill, and I suggested that one of the things we ought to do in the revenue sharing bill is give communities the ability to waive Davis-Bacon if they could show that it would increase employment in their communities. Labor, which should be most concerned about employment, came in and testified against that amendment. I found it incredible. I said, "Do you mean to tell me that the AFL-CIO is testifying against jobs?" I asked that because the operative language in my amendment referred to jobs. It had nothing to do with the cost of Davis-Bacon or anything else. It just said, "Jobs," and they came in and testified against it.

The special interests in this country are far more concerned about their own little perks and the little institutions they have in society than they are about the No. 1 priority, putting people to work.

I think we also ought to begin to look in this body at what impact the legislation we pass has on jobs. I think our legislation ought to include job impact statements. I think when we bring a bill out here on the floor to debate it, we ought to know precisely how many jobs it is going to cost people. I think we ought to make that determination in the committees around here before we ever bring legislation to the floor so that we would know whether some of these bills we pass are going to lock so many Americans out of their jobs.

We have already had some of those bills out here this year. We had a couple of wilderness bills out here this year and we knew that several thousand people were going to lose their jobs because of the adoption of those bills.

Again I offered some amendments. I offered an amendment to a couple of those wilderness bills that said the

Secretary should be given the power to waive any of the requirements in those bills that would result in people losing their jobs. It was a fairly easy issue—trees versus jobs. I was asking, "What is more important to you? What is your No. 1 priority? Is it jobs or is it trees?"

I have got to say that an awful lot of Members who spoke on this floor tonight voted for trees instead of jobs. They said the trees were far more important to them than the jobs that were being lost. And it was on the record. It was a record vote, and anyone can check it.

Then I think we ought to move in the direction as well as more jobs for the actual unemployed. I think when we talk about jobs bills here and we run bills out here onto the floor that are supposedly aimed at the unemployed, we ought to have a mandate in them that says that the jobs can only go to people who are unemployed. We should not simply use the unemployed as a political kickball that we bring out here to pass all kinds of spending bills but the money never gets to them. I think it is high time that when we develop legislation around here that is supposedly going to help unemployed people, we make sure it goes to the unemployed and not again to a lot of special interest powers out across the country. The programs we have put together in the past have not done that, and I think that ought to be a mandate.

Finally, I think we have got to deal with this problem of unfair foreign competition, and I think that we can deal with it in a very meaningful way. We should simply start saying to countries around the world, "We will treat your products in this country precisely in the same way you treat our products in your country." We should say, "if you have limitations on our products coming into your country, you are going to find those same barriers in our country. Insofar as you are going to allow us to compete freely in your marketplace, we will allow you to compete freely in our marketplace."

That gives us two advantages. It shuts down our markets to unfair competition, and it also begins the process of opening world markets to our products.

I still think the American worker will turn out the best product in the world, the highest quality product, and a product that can be proudly inscribed with "Made in America." We have got to have access to those markets, though. A reciprocity type of approach would give us access to those markets and give us an opportunity to have our goods compete in the world market rather than just having foreign goods competing in our marketplace.

Then, finally, I think it is high time that we began to look toward the future as well. We have got to look toward where jobs are going to be in the future. We hear a lot of talk about high tech and all of that. That is really only a part of the story. High tech is going to offer some jobs, but not nearly enough to make up for basic industry losses. But there are some areas of the American adventure that are going to produce massive numbers of new jobs for people in the future.

I serve on the Committee on Science and Technology. We have had some experts testifying before our Space Subcommittee who tell us that if we would make the proper commitment to the industrialization and commercialization of outer space, we could create a trillion-dollar economy from outer space by the turn of the century. Now, when we break down a trillion dollar economy in 1983 terms of jobs, that is 35 million jobs that do not exist today.

We have got to begin to move in some of those kinds of directions. We have got to begin to take the opportunities we have to commercialize and industrialize that next frontier, outer space. It is not a dream. It is not "Buck Rogers" to say that. There are companies that are already beginning to work on this kind of process. This administration is trying to move us in that direction.

This administration has proposed, for instance, that we sell some of our satellites out there that have a potential for commercialization, like Landsat and the weather satellites. That is running into intense controversy and opposition in this Congress. Many Members oppose that idea of selling those satellites. They throw up all the concepts that somehow we are going to lose valuable information the Government should have and all that. The fact is that they do not want to give up the power of control of what we put out there, and yet that is the direction we have got to move if we are going to produce jobs. The opposition to commercialization of outer space is opposition to jobs in the future.

□ 2330

I go back to where I started, and that is what we need is growth. We cannot grow without work. We cannot have work without growth.

I think that the special orders taken by my colleagues this evening help say the unemployment is, indeed, a problem that spreads across America in far too many districts, that the solution is in a future filled with growth. We have got to develop the policies here in this body which allow growth to go forward.

ARTS AND HUMANITIES TAX REFORM ACT OF 1983

The SPEAKER pro-tempore. Under a previous order of the House, the gentleman from New York (Mr. GREEN) is recognized for 10 minutes.

● Mr. GREEN. Mr. Speaker, I am pleased to be introducing today the Arts and Humanities Tax Reform Act of 1983. This legislation would amend the Internal Revenue Code to disregard, in the valuation for estate tax purposes of certain items created by the decedent during his or her life, any amount which would have been ordinary income if the item had been sold at its fair market value; to allow a charitable deduction based on the fair market value of a creation; and to establish new guidelines for deducting the business use of a place of residence.

Under present law, an artist's heirs pay an estate tax on the decedent's creative property which is based on its fair market value. Unfortunately, an artist will frequently request that the family destroy works of art at the time of his or her death in order to protect the heirs from exorbitant estate tax charges. I believe this is a great loss to the Nation, its artists, scholars, and historians, and to the decedent's heirs. Section 2 of my bill provides that, when an artist dies, the estate tax charged the heirs will be based on the cost of the materials in the work, and not the price at which the item could be sold.

I would add that a work or creative property may be defined as any copyright, musical or artistic composition, letter or memorandum, or any similar property which was in the decedent's possession at the time of his or her death, and was created through the efforts of the individual. Second, I would point out that creative work does not include any property which was held by a decedent who was at any time an officer or employee of the United States and which was created by the decedent in carrying out an official duty.

While, for estate tax purposes, works are valued at market price, a creative work is valued for charitable deduction purposes at the cost of materials in the work. Section 3 of my bill would allow artists to take a deduction for donations to nonprofit groups at the fair market value of the donated property.

In making these changes, we would promote rather than discourage creativity and advocate the sharing of artwork and creativity with the public. By providing a tax incentive for the contribution of works to charitable organizations—museums, libraries, and galleries—and a lighter estate tax charged an artist's family, we are encouraging wider distribution of artwork, development of artistic re-

sources in individuals, and are recognizing the importance of preserving an artist's creation.

Section 4 addresses a problem which is voiced again and again by artists, particularly in New York City. Under current law, a taxpayer is allowed to deduct expenses attributable to the business use of his or her place of residence only when a portion of the home is used exclusively and on a regular basis as a place of business. Many artists and writers who seek to deduct expenses for the business use of their homes and live either in loft-type space in small quarters have a difficult time providing exclusive use of a portion of their home when it is not separated from the remainder of the dwelling by a wall. My bill addresses this problem and would allow the deduction in cases in which a portion of the home is used to a substantial extent and on a regular basis for business purposes, thus allowing a part of a room, not necessarily a separate room, to be considered a workplace for tax purposes. Section 4 also directs the Secretary of the Treasury to promulgate regulations in order to implement the substantial extent provision within 90 days of enactment of the legislation. Within 120 days of enactment, the Treasury must recommend to the House Ways and Means and the Senate Finance Committees legislation which would provide statutory standards to replace the substantial extent provision.

This legislation is designed to allow the artistic community to develop without fear of the tax burden which being an artist presently creates. In light of the severe budget cuts recently proposed by the administration in this area, I believe it is particularly important to provide these incentives to artists, and remove the disincentives to creativity which currently exist. I have submitted to the RECORD the text of my bill for review by ny colleagues:

H.R. 3429

A bill to amend the Internal Revenue Code of 1954 to disregard, in the evaluation for estate tax purposes of certain items created by the decedent during his life, any amount which would have been ordinary income is such item had been sold by the decedent at its fair market value, to allow a charitable deduction based on the fair market value of such items, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Arts and Humanities Tax Reform Act of 1983".

SEC. 2. VALUATION OF CREATIVE PROPERTY FOR ESTATE TAX PURPOSES.

(a) IN GENERAL.—Part III of subchapter A of chapter 11 of the Internal Revenue Code of 1954 (relating to gross estate) is amended by inserting after section 2032A the following new section:

"SEC. 2032B. VALUATION OF CERTAIN ITEMS CREATED BY THE DECEDENT.

"(a) GENERAL RULE.—If the decedent was (at the time of death) a citizen or resident of the United States, then, for purposes of this chapter, the value of qualified creative property shall be determined under subsection (b).

"(b) VALUE OF QUALIFIED CREATIVE PROPERTY.—For purposes of subsection (a), the value of qualified creative property of the decedent shall not include any amount which would have been ordinary income if such property has been sold by the decedent at its fair market value (determined at the time of the valuation of such property).

"(c) QUALIFIED CREATIVE PROPERTY DEFINED.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified creative property' means any copyright, any literary, musical, or artistic composition, any letter or memorandum, or any similar property—

"(A) which was held by the decedent at the time of his death, and

"(B) which was created by the personal efforts of the decedent.

"(2) CERTAIN PROPERTY EXCLUDED.—The term 'qualified creative property' does not include any property—

"(A) which was held by a decedent who was at any time an officer or employee of the United States or of any State or political subdivision of such State, and

"(B) which was created by the decedent in carrying out his official duties as such an officer or employee.".

(b) CLERICAL AMENDMENT.—The table of sections for such part III is amended by inserting after the item relating to section 2032A the following new item:

"Sec. 2032B. Valuation of certain items created by the decedent.".

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to estates of decedents dying on or after January 1, 1983.

SEC. 3. VALUATION OF CREATIVE PROPERTY FOR CHARITABLE DEDUCTION PURPOSES.

(a) IN GENERAL.—Subsection (e) of section 170 of the Internal Revenue Code of 1954 (relating to certain contributions of ordinary income and capital gain property) is amended by adding at the end thereof the following new paragraph:

"(4) SPECIAL RULE FOR CERTAIN PROPERTY CREATED BY THE TAXPAYER.—

"(A) IN GENERAL.—The reduction under paragraph (1)(A) shall not apply to any charitable contribution of property—

"(i) which is a copyright, a literary, musical, or artistic composition, a letter or memorandum, or a similar property, and

"(ii) which is contributed by a taxpayer whose personal efforts created such property.

"(B) EXCEPTION.—Subparagraph (A) shall not apply to any property—

"(i) which is contributed by any officer or employee of the United States or of any State or political subdivision of such State whose personal efforts created such property, and

"(ii) which was so created by such officer or employee in carrying out his official duties.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to contributions made after December 31, 1982, in taxable years ending after such date.

SEC. 4. BUSINESS USE OF HOME.

(a) IN GENERAL.—Paragraph (1) of section 280A(c) of the Internal Revenue Code of 1954 (relating to exceptions for certain business or rental use; limitations on deductions for such use) is amended by striking out "exclusively used" and inserting in lieu therefore "used to a substantial extent and".

(b) REGULATIONS FOR LEGISLATION.—The Secretary of the Treasury or his delegate shall, not later than 120 days after the date of the enactment of this Act, submit to the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate recommendations for legislation which provide objective statutory standards, for allowing deductions in cases where a portion of a dwelling unit is used for business purposes on other than an exclusive basis.

(c) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years begining after December 31, 1982.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Utah (Mr. MARRIOTT) is recognized for 5 minutes.

● Mr. MARRIOTT. Mr. Speaker, I was unable to be present on the floor of the House of Representatives on Thursday, June 23, 1983, for rollcall vote No. 214. Had I been present I would have voted "nay" on the conference report on House Joint Resolution 91, revising the congressional budget for the U.S. Government for fiscal year 1983 and setting forth the congressional budget for the U.S. Government for fiscal years 1984, 1985, and 1986. This is just an extension of the old philosophy of tax, tax, spend, spend.●

SERBIAN COMMEMORATION OF THE BATTLE OF KOSOVO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, on June 28, Americans of Serbian descent and Serbs worldwide commemorate the courage of their countrymen who sacrificed their lives defending their homeland in the Battle of Kosovo in 1389. Actually fought on June 15, the battle is celebrated on June 28 under the Gregorian calendar. In this battle, the Serbians sought to protect their religion and national existence, but the force of the Turkish Army was overpowering and they were defeated.

In its efforts to conquer all of Europe in the 1330's, the Turkish Army began its campaign to take the Serbian state in 1371, defeating the Serbs at the Maritsa River. The fall of the Serbs as an independent people was completed in 1389 on the Plains of Kosovo. In the Battle of Kosovo, the Serbian Tsar, Prince Lazar and the Turkish Sultan, Murad I, were both killed. The Serbian knight, or voyvode, Milosh Obilich, who slew the sultan in his tent, has been immortalized in na-

tional songs and legends, as has the battle itself. Although defeated, the heroic spirit of the Serbians' brave defense of their independence is a permanent part of their national heritage.

The Serbian people lived completely under Turkish domination beginning in 1459, when Serbia became part of the Ottoman Empire. For the next 400 years, the courageous Serbians were harshly ruled by Ottoman overlords, who subjected them to cruel, inhumane treatment. Nevertheless, throughout the years the Serbian people were united by the Serbian Orthodox Church which nurtured in them a sense of national pride and culture. The deterioration of the Turkish Empire in the late 18th and early 19th centuries led to a series of events that enabled Serbia to regain its autonomy in 1830 and its independence as a kingdom in 1882.

At the conclusion of World War I, under the direction of the Serbian royal dynasty, the Kingdom of Serbs, Croatians, and Slovenians was established. The name was changed to Yugoslavia 11 years later. In 1945, the monarchy was abolished when the Communists invaded and dominated Yugoslavia, and the official observance of the Battle of Kosovo was banned by the Communist government. Despite this effort to destroy the national pride and heritage of the Serbians, the Battle of Kosovo is a historic memory in the hearts of Serbs everywhere.

Mr. Speaker, the courage and determination to overcome tremendous odds in the name of freedom has for centuries strengthened the Serbian people and their cultural heritage. Americans of Serbian descent have made strong and lasting contributions to the strength and greatness of the United States.

I am proud to join with Serbian Americans in the 11th District of Illinois, which I am honored to represent, and throughout the Nation, who are commemorating the historic Battle of Kosovo. The dedication and patriotism displayed by these courageous people is inspiring to the entire world.●

LEGISLATION PROVIDING SUBSISTANCE ALLOWANCES TO CERTAIN LAW ENFORCEMENT OFFICERS ARE NOT TAXABLE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama (Mr. SHELBY) is recognized for 5 minutes.

● Mr. SHELBY. Mr. Speaker, I introduced legislation today to exclude from gross income meal allowances paid to certain law enforcement officers by their employers.

For many years such meal allowances were interpreted to be excluded by section 119 of the Internal Revenue Code. That section excludes from an employee's gross income the value of employer-furnished meals if they are provided for the employer's convenience, on its business premises, and for substantially noncompensatory reasons.

In 1972 the Internal Revenue Service ruled that subsistence allowances provided to State troopers do not fall within section 119. The U.S. Tax Court upheld the IRS ruling; while conceding that the meal allowances were furnished for the convenience of the employer, the court held that section 119 excluded only meals in kind, not meal allowances. The U.S. Court of Appeals for the Third Circuit disagreed with the Internal Revenue Service and the tax court, but was subsequently reversed by the Supreme Court in the Kowalski decision, which held that these meal allowances are taxable income.

The IRS applied this ruling retroactively through 1971, creating severe financial hardship for State troopers by holding them liable for taxes on all meal allowances paid them back through that date. Senator Jim Allen of Alabama introducted legislation to alleviate this hardship by excluding the meal allowances from taxable income. As finally passed, however, the bill only overruled the retroactive effect of the Kowalski decision.

I do not believe Congress intended to omit these meal allowances from the exclusion provided for in section 119. The purpose behind this section is to allow an employer to provide meals to employees for substantially noncompensatory employment-related reasons. The regulations for this section state that a noncompensatory purpose exists where employees must be present to deal with emergencies during work hours. It is unfair and unjust to exclude a State trooper's subsistence allowance from the benefits of this important provision of the Tax Code simply because meals are not provided on official premises and are in the form of an allowance.

Alabama, and many other States, instituted the cash allowance system in order to permit troopers and other law enforcement officers to remain on call in their assigned patrol areas during their break. Often, the officers' law enforcement duties carry them far from home. Since these officers are assigned on a countywide basis, many cannot return to their offices or homes for meals because of their responsibilities. An officer cannot call for relief at mealtime if his duties demand his presence.

There can be little question that our law enforcement officers perform one of the most difficult and demanding jobs imaginable. Our citizens' safety and well-being depend on their swift action in enforcing the law. These officers take their meals only when and where the time allows because of the nature of their jobs. In essence, these officers must serve their State's needs before they can serve their own. I see no reason why this allowance for meals should not be excluded from their taxable income.

The bill I have introduced would simply amend section 119 to specifically provide that subsistence allowances to certain law enforcement offices are not taxable. I feel that this is important legislation, which will aid the State law enforcement officers of our Nation. Let me stress that this bill will benefit law enforcement officers of every State who receive subsistence allowances.

I urge the support of my colleagues for this legislation.●

UNIVERSAL TELEPHONE SERVICES AND RATEPAYER PROTECTION ACT OF 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. SWIFT) is recognized for 10 minutes.

● Mr. SWIFT. Mr. Speaker, in order to deal with the changing technologies and judicial and regulatory decisions that are affecting the telephone industry today in a way that will not force millions of Americans off the phone system, I have today introduced legislation, H.R. 3440, the Universal Telephone Service and Ratepayer Protection Act of 1983. As the House Subcommittee on Telecommunications begins its work in this vitally important area, I hope that my colleagues will examine closely the proposals outlined in this bill and give them careful consideration. Following is a section-by-section outline of the bill:

SECTION-BY-SECTION ANALYSIS

SHORT TITLE AND TABLE OF CONTENTS

Section 1. The title of the bill is the Universal Telephone Service and Ratepayer Protection Act of 1983. The bill has nine sections.

STATEMENT OF FINDINGS AND PURPOSE

Section 2. The fifty-year effort to bring affordable and universally available telephone service to the public has served the nation well. Universal telephone service has contributed to the Nation's economic, social, and political integration and development. Each telephone subscriber receives a more valuable service when anyone else in the country can be called. Universal service is threatened by pending rate increases that will impact especially hard upon the poor, elderly, handicapped and those living in high-cost urban and rural areas. The bill will assure nationwide availability of communications services at affordable rates that will allow full participation for all Americans in the nation's economic, political and social life; assure that the responsibility for achieving such nationwide availability is shared equitably by all current and emerging communications technologies; and will rely to the maximum extent possible upon state regulatory authority to assure

availability of such services at affordable rates.

DEFINITIONS

Section 3. The bill defines certain specialized terms. The definitions are amended to the 1934 Communications Act as Section 153.

Exchange areas are the areas within which local telephone service is provided. Exchange transmissions include all communications within an exchange area. Exchange service is the provision of exchange transmission service by an exchange common carrier. An exchange common carrier provides transmission services on a universal common carrier basis within an exchange area and these services are provided with exchange facilities.

Interexchange transmission is between points in more than one exchange area. Interexchange service is interexchange transmission provided by an interexchange common carrier. An interexchange common carrier provides interexchange communications services on a common carrier basis between points in more than one exchange and these services are provided with interexchange facilities.

Exchange access is service provided by an exchange common carrier for the origination and termination of interexchange transmissions. The Universal Service Board is the state-federal joint board, created under Section 227 (Section 6 of the bill), which has three state regulatory commissioners and two FCC commissioners.

EXCHANGE ACCESS AND BYPASS

Section 4. The bill adds a new section to Title II of the 1934 Communications Act, Section 225.

Presently telephone companies use a system of separations and settlements that collects and distributes funds long distance service. Subsection (a) requires the Universal Service Board to create a new system of charges that will replace the present system in order to compensate exchange common carriers for their costs of providing access to their local exchange for interstate transmission. In doing so, the Board should work to achieve equitable treatment for all interexchange communication that connects to local exchanges; assure that payments and assignment of costs are carried out in a open fashion; compensate exchange carriers for their costs of providing exchange access; and ensure the continued availability of universally available exchange service at affordable rates. Further, the Board will establish a system of charges to be collected from those who own or operate services that do not connect with the exchange carrier but which provide comparable service. In determining these charges, the Board should consider the value to private systems and to the public in general of nationally available and affordable communication services; disincentives to interconnection that are created by access charges; the value to carriers and those carriers' ratepayers if those private systems were interconnected; and the need to encourage carriers to provide services which are available through non-interconnected services. Funds from these charges are to be maintained in a separate account, created under subsection 226(d). If necessary to administer this section, the Board will establish requirements that non-connecting systems will notify the Board.

Subsection (b) requires exchange carriers to file tariffs for their charges for providing direct and indirect connection to the local exchange. Under subsection (g), the FCC's authority under this subsection will be delegated to states that comply with the requirements of this section and with rules and procedures promulgated under it. Tariffs must be filed with the FCC (or state) and should include information on separate charges for each service, facility, or other supporting function that exchange carrier provides for access. Exchange carriers may file, and the FCC (or state) may require carriers to file, a single tariff for all areas they serve in a single state. If more than one carrier provides service to a single exchange, they may file joint tariffs and divide revenues in a manner approved by the FCC (or state). State commissions have authority to require all exchange carriers within their state to divide revenues from access charges. Exchange access and payment for it will be only allowed when it is according to applicable tariffs. The FCC (or state) is bound by formulas established by the Universal Service Board.

Subsection (c) requires that exchange carries supply only those services, facilities, and support for access that is requested; that tariffs specify separate charges on an element-by-element basis; and that differences in charges will be based on differences in costs. Each tariff will have four charges, three costs (charges for costs caused solely by exchange access; charges for other costs that are directly attributable to exchange access; and charges for a portion of costs for services, facilities or other factors that are used jointly or in common with providing exchange service) and a surcharge established by the Universal Service Board to fund the Universal Service Fund (created under section 226). Only these costs may be included in access charges. Other costs for interstate exchange access will be recovered by eligible carriers from the Universal Service Fund. Exchange access charges to customers must be proportional to their use of interexchange service.

Although subsection (c) requires that charges be based on costs of providing access, subsection (d) requires that for those interstate interexchange carriers that are offered inferior service to that received by other carriers will have their access charge discounted to reflect the lower value.

Subsection (e) requires that the FCC establish standardized methods for ascertaining and apportioning costs of services and facilities that are used jointly or in common between exchange service and exchange access. These decisions will be consistent with decisions of the Universal Service Board. The FCC will also establish standard forms for record-keeping.

Subsection (f). No exchange carrier is required to allow joint ownership of its switching facilities or required to allow other carriers to locate their equipment on its premises. Exchange carriers are not required to bill customers for other carriers; they are allowed to only if they include billing services as a separate tariff item. Exchange carriers with fewer then 50,000 customer lines may use statistical cost studies (that include other carriers in a similar class) to support their tariffs for exchange access.

Subsection (g). The FCC is required to delegate authority under subsection (b) to any state that complies with the provisions of this section and with rules adopted under it. For tariffs approved by a state, any carrier or customer that alleges that charges are not based on costs, that flat charges are being assessed on customers for access of that discounts are not being offered to reflect the lower quality of service offered may file a petition for review with the FCC. An identical petition must also be filed with the state commission and the FCC cannot act earlier than 60 days or after the state commission has issued an adverse ruling.

Subsection (h) requires that initial access charge tariffs will take effect before 1986 and will provide for a three-year transition.

Subsection (i) requires that each tariff submission by a carrier must include a certification that the carrier is complying with provisions of this section.

Section 4 of the bill also voids the access charge decision adopted by the FCC in December, 1982 and which is scheduled to go into effect in January, 1984.

UNIVERSAL SERVICE FUND

Section 5. The bill adds a new section to Title II of the 1934 Communications Act, Section 226.

To assure the continued availability of affordable telephone service on a universal basis, subsection (a) requires that the Universal Service Board establish a Universal Service Fund. This fund will have three accounts: to pay for costs for eligible carriers whose costs per customer access line exceed 115 percent of the national average (subsection (b)); to pay for costs that exceed 115 percent of the national average for connecting lines to and from an exchange area for interexchange service (subsection (c)); and to pay for costs caused by those bypassing the exchange carrier (subsection (d)). Funds in the third account may also be used to supplement the first two. These accounts will be funded by revenues raised from a surcharge on access charges and by charges assessed on non-connecting systems. The Board will determine the charges necessary to finance the payments required by this section.

Under subsection (b) eligible carriers may recover their costs for providing exchange service to the extent their cost per customer access line exceeds 115 percent of the national average. Eligible carriers are either those with fewer than 50,000 lines or who, although they have more than 50,000 lines, have REA telephone loans or guarantees approved prior to 1983. Those with more than 50,000 lines will only qualify for payments for those exchanges that have REA loans.

Those exchanges whose costs to connect to interexchange service exceed 115 percent of the national average will qualify under subsection (c) to recover their costs that exceed 115 percent.

Under subsection (d), the third fund, which is funded by charges on those that bypass the exchange carrier, will be used to offset costs caused by such nonconnection and to supplement the funds otherwise available under the first two funds.

Subsection (e) requires that the accounts will be administered with as few delays possible and on the basis of uniform and simple standards which are readily applied to the information included in each application. Payments will be subject to audit and adjustment by the Board to assure that they are proper and are used to maintain afforable rates.

UNIVERSAL SERVICE BOARD

Section 6. The bill adds a new section to Title II of the 1934 Communications Act, Section 227.

Within 30 days the FCC is required to establish a Universal Service Board, consisting of two FCC commissioners and three state commissioners. The Board will: 1) establish

and maintain formulas for funding the Universal Service Fund and distributing funds from it; 2) provide for a transition from the present system of separations and settlements to the new system of access charges; and 3) determine relative assignment of joint and common costs. In making its decisions on joint and common costs, the Board will encourage reliance upon exchange common carriers for distributing interexchange transmissions; promote the availability of exchange service at affordable rates; and take into account the costs of providing exchange service and exchange access, investment needed to meet demands for exchange service and exchange access, and the use of exchange facilities for exchange service and exchange access. Any determination by the Board is final, subject to judicial review. The Board may appoint staff and an administrative committee, made up of representatives of exchange and interexchange carriers and customers, to administer the Universal Service Fund accounts.

STATE COMMISSION AUTHORITY

Section 7. The bill adds a new section to Title II of the 1934 Communications Act, Section 228.

Although the FCC may adopt technical regulations, states have authority to regulate exchange service, interexchange service involves communications service to the extent that such service involves communication between points within the state (except communication that does not cross property lines or remains within a single site). Under this authority states may classify facilities used for such purposes even if they are also used for interstate communications and may determine depreciation methods for those portions of such facilities attributable to providing service within the state. Such decisions will be in accordance with guidelines established by the Universal Service Board and depreciation methods will promote the economic viability of the carriers involved. The states or the Universal Service Board may require any person providing communication to provide information needed to carry out their responsibilities and keep informed about technical developments.

PRESERVATION OF BASIC TELEPHONE SERVICES

Section 8. The bill adds a new section to Title II of the 1934 Communications Act, Section 229.

State commissions may require exchange carriers to lease and maintain basic one-line telephones and inside wirings to persons within the state under tariffs that include all costs of providing and maintaining them. A basic one-line telephone is defined by the FCC as the type of equipment essential for basic participation in nationwide telecommunications. In defining such equipment, the FCC may not reduce the quality of basic one-line telephones presently available.

EFFECTIVE DATE

Section 9. The amendments made by this Act will take effect on the date of enactment or January 1, 1984, whichever is later.●

● Mr. WYDEN. Mr. Speaker, I am delighted today to be able to introduce, along with my colleagues Mr. SWIFT and Mr. ALEXANDER, this much-needed legislation that will ensure that the poor, the elderly and rural residents are not priced out of basic telephone services.

We know that, given the events of recent months, we have a big job ahead of us. But it is a critical one.

America is in the middle of a technological revolution. The fruits of the marketplace—home banking, home shopping, in-home computer linkups, and other whizbang gadgetry and services—are just around the corner.

But AL SWIFT, BILL ALELXANDER, and I think it is wrong for some in our society to have access to micro-optics while our senior citizens may not be able to afford a telephone to call the doctor.

We want it understood that while we favor competition in the telecommunications industry, we simply will not let our most vulnerable citizens be cut off from society.

Recent actions by the Federal Communications Commission—including the access charge decision—could put basic phone service out of reach for millions of older Americans, the urban poor, and those who live in rural areas.

The implications are staggering. I was director of the Oregon Gray Panthers for 7 years before coming to Congress and I am still close to senior citizens groups. When I was home in my district this weekend the issue of phone rates came up repeatedly at my town hall meetings. And what I saw was raw fear: Fear that seniors would not be able to stretch meager savings far enough to cover the phone rates hikes. Fear that they would be cut off from their lifeline—their only link with the outside world.

Hundreds of thousands of elderly in this country are now walking an economic tightrope, balancing their food costs against their utility bills, and their utility bills against health care premiums. Major phone rate increases could push them off of that economic tightrope.

Because Mr. SWIFT and I do not believe Congress wants to create a social subclass of Americans who cannot afford a telephone, earlier this month we introduced a resolution (H.R. 231) which calls on the FCC to gather the data necessary to determine how many Americans will have to give up phone service as a result of its actions. Some 157 of our colleagues already have agreed to cosponsor our bill and the Telecommunications Subcommittee will mark it up tomorrow.

Today, however, we take a much larger bite out of the apple by introducing a bill that will restructure the phone rate system in a more equitable fashion. To this end, it overturns the Federal Communication Commission's access charge decision—a decision which was made with little apparent regard for the impact on the American telephone consumer.

Our bill also calls for the equitable sharing of charges and fees for telephone service. Those parties capable of bypassing local access, who could otherwise avoid paying their fair share of the costs, will be required to contribute toward the cost of maintaining local service. Long-distance companies will also be required to contribute. These provisions will insure that the costs of maintaining local service do not fall unfairly on small business and residential consumers.

A third provision of our bill provides for the establishment of a universal service fund. The purpose of the fund is to guarantee affordable service for those who live in high cost areas. A system of support would be available to those local phone companies whose operating costs were above 115 percent of the national average.

Finally, our bill places authority to regulate intrastate calls and service with the States—where it should be.

This bill may appear to be a menagerie of complicated terms and provisions. It talks about interexchange transmission, exchange access, separations and settlements, tariff submissions, and bypass.

Its goal, however, is straightforward: To guarantee that the principle of universal telephone service in this country is not tossed out the window.

We feel that it is high time Congress take the decisionmaking authority over telecommunications out of the hands of unelected administrators and judges. For more than 15 years, we have abdicated our responsibilities, and if we do not act now, Americans are going to pay dearly.●

H.R. 2760—COVERT ACTION IN NICARAGUA: EDITORIAL COMMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BOLAND) is recognized for 10 minutes.

● Mr. BOLAND. Mr. Speaker, the House soon will be considering H.R. 2760, one of the more important measures to come before it in this or any other session of Congress.

H.R. 2760 would prohibit any further funding for military or paramilitary operations within Nicaragua and would authorize $80 million in overt security assistance funds to friendly Central American countries.

It has been carefully considered by the Permanent Select Committee on Intelligence and the Committee on Foreign Affairs and reported favorably by each.

I urge all Members to carefully study the issues raised by H.R. 2760 in preparation for the forthcoming secret session of the House which will consider them.

In this regard I have found the following editorials helpful and commend them to all Members:

[From the Washington Post, Mar. 11, 1982]

NONINTERVENTION

Things are getting out of hand in respect to Nicaragua. The tone and, according to the latest news reports, the content of President Reagan's approach are getting progressively more threatening. Whether the Nicaraguans are intimidated is not clear. It is evident, however, that Mr. Reagan is moving rapidly toward the outer limit of the support he can reasonably expect from the American people and from this country's friends in the hemisphere. He badly needs to slow down, collect his thoughts and put them out in public view.

There is, we believe, a central ambiguity to the line the administration seems to be taking now, an ambiguity fed partly by design and partly by indecision and careless thinking. Is the American purpose merely to prevent the Sandinista rulers of Nicaragua from imposing on and disrupting the lives of their neighbors? Or is it to put an end altogether to Sandinista rule? The administratin has not openly professed that more ambitious second goal, but some of its private words, deeds and plans suggest it wishes to proceed toward it, or to get the Sandinistas to believe it will. In that latter purpose, by the way, it has succeeded. The Sandinistas do believe Mr. Reagan intends to try to do them in, and they are mobilizing their considerable diplomatic and propaganda resources to block him.

Should this country try to destroy the Sandinista revolution? The reasons to say yes may be seductive. The Sandinistas are lending themselves to the purposes of foreign countries hostile to the United States. They are double-crossing the many Nicaraguans who accepted their lead in the anti Somoza struggle. And the more the regime reveals these tendencies, the stronger the temptation in the United States to move, in one way or another, against it.

It would, however, be dangerous and wrongheaded to do so. Such an act would cut across the one principle that offers a basis on which the United States has a chance to avert far greater trouble than it has gotten into or even imagined so far. The principle is that of nonintervention.

It can never be forgotten that in Latin America, and especially in Nicaragua, the United States is viewed as the Great Intervenor. The right-wing police regimes of the hemisphere may join Washington in an effort, by open or covert means, to change the regime in Managua—but no other Latin government or element will. The substantial support the United States has received for its effort to build reform in El Salvador will inevitably fade away as Washington is seen to be returning to the role of intervenor in Nicaragua. The American public, plenty leery already, would not put up with such intervention; nor should it. The ground on which the United States stands as it asks others to oppose Nicaraguan intervention in El Salvador crumbles as the United States sponsors intervention in Nicaragua.

It can be argued that the purpose of the CIA's anti-Nicaragua operations is merely to give the Sandinistas second thoughts about their help in Salvador, not overthrow the regime. But you have to be pretty forgetful, or pretty dumb, to buy that argument. Anyway, if there is one thing that the United States has proved itself to be bad at in recent years, it is subverting Latin regimes. There has been no "success" in this department since Guatemala in 1954, and the results there are no advertisement for more of the same.

It follows that before President Reagan goes any further he should clarify the thrust of his policy. He could state that he regards the Sandinistas as bad news, for their international connections and revolutionary ambitions as well as for their repressive domestic proclivities, but that he has decided that in order best to influence them he will forswear an intent to unseat them. Instead he will honor the traditional hemisphere ideal of nonintervention and call upon others to join him to ensure that the Sandinista government respects that ideal in its practical affairs. The means will be hardheaded, legitimate and generally acceptable and will blunt the crippling allegation that he seeks to "intervene."

This will not tie up every loose end of American policy toward Nicaragua. But it will help remedy its central flaw. From the fundamental decision to abandon interventionism, everything else follows.

[From the Boston Globe, Aug. 12, 1982]

HONDURAS ON THE BRINK

For months, friends of Honduras have feared that its weak civilian government would be undermined by the US policy of "using" Honduras as a staging area and an agent in the widening Central American war.

Those fears are now coming true. A number of recent signs suggest that the Reagan Administration's insistence on a military victory in El Salvador, and on a continued war of nerves with Nicaragua, is beginning to spill the violence over into Honduras. There is a trend toward bombings, bank robberies and other guerrilla operations that are clearly acts of retribution.

Honduras could and ought to be an innocent bystander. It is the third poorest country in the western hemisphere and has a small wealthy oligarchy typical of the region. Class differences are more muted than in Salvador or Guatemala, however. The Honduran upper classes have not shared the vicious repressive instincts that provoked revolution elsewhere.

During the 1960s, under a moderate military dictatorship, Honduras embraced the goals of John Kennedy's Alliance for Progress and initiated significant land and labor reform. Allowed to stand aside from the troubles outside its borders—and provided sufficient economic assistance—Honduras could avoid the cycle of bloodshed and pull itself up.

It appears that Honduras will not have that opportunity. Although a civilian government took over last year, the power of the Honduran military is growing. U.S. military aid is being poured in, along with numerous overt and covert US military advisers and CIA personnel, and even some Argentine troops brought in to disguise the American presence. As always happens when civilian governments are not well established, this aid gives the military a disproportionate influence.

Honduras faces no threat that would justify all the aid. It is simply a payoff for doing the Administration's dirty work. For months, Honduran forces have allowed exiled National Guardsmen of the former Nicaraguan dictator Anastasio Somoza, and some counterrevolutionary factions of Miskito Indians, to launch counterrevolutionary raids across the Nicaraguan border.

Now, tense relations with Nicaragua are reportedly building toward war hysteria. Honduras could have eased those tensions months ago by accepting a Nicaraguan offer of joint border patrols, but, probably on a signal from Washington, it has turned a deaf ear. Meanwhile, to the west, Honduran forces have been cooperating with Salvadoran troops in a series of secret hammer-and anvil operations to trap Salvadoran guerrillas along the border.

The cost of being a spear carrier for the Reagan administration was breathtakingly evident in the earnest words of a Honduran officer in a recent radio interview: "The US will supply all the arms, equipment and body bags that we need, and all we have to do is supply the bodies."

[From the Miami Herald, Nov. 4, 1982]

SOMOZA'S GHOST

There's a constant temptation for U.S. officials to try quick-and-duty military solutions abroad when long-range American interests actually require the consistent application of pressure toward humane democracy. That temptation is rising once again in Central America, where military activity is escalating while most Americans are distacted by the more-visible drama of Lebanon.

It is clear that the four-year-old Sandinista revolution in Nicaragua has fallen into the tightening grip of its most extreme Marxist participants. Progressive Nicaraguans seeking elections and a mixed economy have felt increasing pressure. A top priority for U.S. Central American policy should be to bolster those moderate elements within Nicaragua.

Instead, the Reagan Administration is undermining them by virtually sponsoring the growth of an armed counter-revolution that includes hated remnants of the late dictator Anastasio Somoza's national guard. The presence of those unsavory elements, newly re-armed, just across the border in Honduras serves only the Sandinistas. It gives them an excuse to continue their own arms buildup and their internal repression, all in the name of "security".

Additionally, the buildup potentially threatens the newly elected civilian government of Honduras. Reagan Administration generosity to the Honduran military could shift the current delicate balance between the 15,000-man army and the trend toward civilian rule. Some Hondurans fear that their country is becoming "the Lebanon of Central America" as powerful external forces divide their nation. That fear is well-founded.

Few Americans, and certainly few congressmen, disagree with the goals of maintaining pluralism in Nicaragua, minimizing Cuban-Soviet influence in the region, and assuring the security of Nicaragua's non-Marxist neighbors. The re-arming of the former Somoza forces, however, cannot achieve those ends. Instead, it could serve to fuel resentment against the United States by Central Americans who believe that Washington cynically is willing to saddle their nations with any dictator who wraps himself in the banner of anti-communism.

There is no long-range benefit for the United States in such polarization. To the contrary, those resentments too often become kindling for the missionaries of Marxism who strap their own brand of dictatorship to the powerful yearning for freedom from tyrants.

The Reagan Administration should not be seduced into continuing this anachronistic confrontation across the Honduran-Nicaraguan border. It's counterproductive. Congress should tell the Administration so by requiring a clearly defined policy goal to

justify every shipment of arms and military expertise to Central America.

[From the New York Times, Nov. 5, 1982]

NOT-SO-SECRET WAR IN HONDURAS

"Bay of Pigs II?" was the cover headline on a June 1981 New Republic article on war games in Honduras by forces that seek to destabilize Nicaragua. Now a Newsweek cover story explores "America's Secret War," asserting that an American-managed covert operation in Honduras is nearly out of control.

Democracies do some things well, but dirty tricks are not conspicuous among them. Part of the difficulty—law and morality aside—is the inquisitive, competitive free press. It is doubtless tempting to abandon diplomacy and try for a quick fix by using exile armies as proxies to eliminate a vexatious regime. But it can only work in the unlikely event that the press joins in pretending there is no official complicity.

Once that pretense in exposed, Washington's pious censure of others for meddling across frontiers sounds like so much humbug. The United States now concedes supplying arms to insurgents; why then is it wrong for Nicaragua to do the same? If one superpower claims special exemption in trespassing against the sovereignty of smaller neighbors, can it plausibly deny its rival the same prerogative—in Poland, for instance?

Quick fixes, moreover, are rarely that. In 1954 an elected leftist regime in Guatemala was dispatched by an exile army, palpably under American sponsorship. The unintended result was grim: three decades of unstable government, spasms of brutal repression and a chronic insurgency.

There might still be compelling arguments for trying risky measures if no other choices remained, but the situation in Nicaragua is not that desperate. Nicaragua's Sandinist rulers have ignored promises to hold elections and harassed the surviving opposition. But the opposition does survive. Venezuela and Mexico urge talks on the crucial matters of foreign arms and advisers, a course that has yet to be put to a good-faith test.

The scale of American aid to insurgents is in dispute, but not the practice. It has a sadly familiar smell. In the absence of diplomacy, an ever-eager clandestine apparatus grows more active. In the absence of clear direction from Washington, those in the field take charge. So it was that joint U.S.-Honduran maneuvers were scheduled for Dec. 5, within hours of President Reagan's scheduled visit to Costa Rica. Someone had the good sense to notice; the maneuvers are now postponed, subject to reconsideration by a sobered State Department.

Let the Newsweek report serve as a warning bell to Secretary Shultz. He would do his boss a favor by asking the right questions about Honduras before President Reagan begins his good-neighbor visit to five Latin countries. One Bay of Pigs is enough.

[From the Los Angeles Times, Nov. 8, 1982]

GOING WRONG IN NICARAGUA

Reagan Administration officials have confirmed that the United States is involved with clandestine military operations against the Sandinista government in Nicaragua.

The admission comes as no surprise to knowledgeable observers of Central America, who have suspected that the cross-border raiders harassing the Sandinistas from Honduras had at least tacit support from the U.S. government. American officials have been worried about the revolutionary regime in Managua ever since the Sandinistas helped overthrow dictator Anastasio Somoza in 1979, then began an open flirtation with Cuba and the Soviet Union. U.S. concern turned to anger when some Sandinistas began aiding the leftist rebels fighting the U.S.-backed government in El Salvador. The initial aim of the clandestine operations against Nicaragua was to hamper the supply lines between Nicaragua and the Salvadoran insurgents.

Unfortunately for the United States, the original plan for undercover activity against Nicaragua may be getting out of hand, according to published reports.

The clandestine operations are not being conducted by well-meaning but disillusioned Nicaraguans who want to correct the course of a popular revolution that has gone awry. Most of them are the work of Somoza's former soldiers, who fled into Honduras as refugees after the rebellion. These somocistas are as widely detested in Nicaragua as the old dictator was. All the somocistas want is vengeance against the Sandinistas, and they could not care less about reform in Nicaragua.

The Sandinistas have been so heavy-handed and zealously Marxist in carrying out their revolution that there are plenty of disillusioned Nicaraguans for the United States to work with if it truly wants to promote a democratic alternative there. Respected political leaders and even former Sandinista military heroes like Eden Pastora are working against the Sandinistas from exile. Under these circumstances, it is simply crazy for the United States to be associated in any way with the hated somocistas.

The Reagan Administration can dispute published reports about the extent of clandestine activity against the Sandinistas. It can deny that the aim of the activity is to overthrow their government. But there is no denying that being linked with the somocistas is the single most counterproductive thing that the United States can do in dealing with Nicaragua. The United States should quit before it gets further behind.

[From the San Diego Tribune, Nov. 10, 1982]

THE NICARAGUAN BAY OF PIGS

The Secret is out about the covert war in Nicaragua, and the United States should pull back before it makes things worse.

The Sandinista regime is no friend of America. It came to power after a bloody civil war that polarized Nicaraguan society and pitted even moderate Nicaraguans against the tyrannical regime of Anastasio Somoza. When Somoza fled in 1979, it was as much because of a collapse of U.S. support as military defeat, so the Sandinistas owe at least that factor to their coming to power. But the Nicaraguan revolution soon started to consume its moderates, and the United States hardened its position against the Sandinistas.

In 1981 the civil war in El Salvador flared up, fueled, according to then Secretary of State Alexander Haig, by communist arms shipped from Nicaragua. And the domino theory was resurrected to justify sending U.S. military advisers and CIA operatives not only to El Salvador, but also to Honduras, which lies between El Salvador and Nicaragua.

But here the plan started getting out of control. As Newsweek magazine reported Nov. 8, U.S. Ambassador to Honduras John D. Negroponte "is overseeing an ambitious covert campaign to arm, train and direct Nicaraguan exiles to intercept the flow of arms to leftist guerrillas in El Salvador. But the operation has another objective: to harass and undermine the Cuban-backed government of Nicaragua."

According to U.S. officials quoted by Newsweek, the covert campaign involves backing supporters of the Somoza regime who are attempting to wage a guerrilla war of revenge in Nicaragua from bases in Honduras. It involves blowing up bridges, electrical facilities and other installations in Nicaragua. It involves joint U.S.-Honduras military maneuvers in the area, slated for next month, maneuvers that some officials believe could presage a Honduran invasion of Nicaragua.

If this sounds familiar, it is. The U.S. covertly armed and trained disgrunted Cuban exiles in Central America and gave support to their attempted invasion of Cuba in 1961. That fiasco was called the Bay of Pigs invasion, and it not only failed, but entrenched Fidel Castro more firmly in Cuba.

America has reason to be concerned about the Sandinistas. They are stifling dissent and spurring a large military buildup. But we are backing the wrong people in Nicaragua; the Somocistas are hated by nearly all Nicaraguans. We are increasing the military's power in Honduras, which has only had a civilian democracy for one year, and thereby breeding turmoil in the country we are trying to stabilize. And we are using anti-democratic methods which cause Central Americans, including our neighbors in Mexico, to question America's commitment to end interventionism.

Secretary of State George Shultz, who inherited Haig's plan but does not necessarily share his domino theory about Central America, was reported to be dissatisfied with the secret war operation in Nicaragua. A government source quoted by Newsweek said: "Only Shultz can change it if there is still time."

We hope he does. This administration cannot tolerate another Bay of Pigs-style invasion. And the alternative—U.S. participation in a full scale war in Central America—is unacceptable to this country. A better approach is to accept Mexico's offer to mediate in negotiations between Nicaragua, Honduras and the United States.

[From the Miami Herald, Dec. 8, 1982]

A COVERT WAR?

Is the United States waging a secret war against Nicaragua from within neighboring Honduras? President Reagan's ambassador to Honduras, John Negroponte, refuses to discuss the question with press or public. It is therefore time for Congress to exert its Consitutional authority to demand answers.

There's no doubt whatever that a contra movement of anti-Sandinista Nicaraguan exiles is camped along that border. Nor is there any doubt that the Central Intelligence Agency's staff in Honduras has increased dramatically in recent months. Additionally, several prominent U.S. news organizations have reported that Ambassador Negroponte personally is directing a covert CIA war against the Sandinista government. Elements of the late dictator Anastasio Somoza's hated National Guard are among the newly earned contra forces.

Ambassador Negroponte all but smirked as he refused to discuss the allegations with The Herald. He did acknowledge that it is

widely perceived that such a war is under way. However, the ambassador even refused to discuss the potential reaction in other Latin American nations to the belief that Washington is attempting to subvert the Sandinista government.

The danger of such a secretive attitude by the Government official on the scene is clear. It is also reminisent of two generations of earlier secret wars that became major U.S. blunders. One was in Cuba, at the Bay of Pigs in 1961. Another was in Vietnam a few years later.

The United States and especially south Florida have a direct stake in Central America. A war there would send thousands of refugees fleeing north. Further, the armed, embittered remnants of whichever side loses are likely to become quasi-independent guerrilla bands that prey on their neighbors to survive. It is no exaggeration when Hondurans worry aloud that their nation could become "the Lebanon of Central America."

To what end is the Regan Administration fostering, or at least taking covert actions that would tend to foster, such a destructive course? The Administration and its ambassador refuse to answer. Let Congress then summon the officials involved from the State Department, the CIA, the Pentagon, and the White House itself to reply quickly, before this covert U.S. meddling ignites another overt U.S. disaster.

[From the St. Louis Post-Dispatch, Dec. 9, 1982]

SECRET WAR AGAINST NICARAGUA

While piously protesting that Cuba and the Soviet Union, with the help of Nicaragua, are secretly shipping arms and ammunition to Salvadoran insurgents through Honduras, the Reagan administration is apparently engaging in a far more dirty form of intervention in Central America. The New York Times, in an article that has been confirmed by various sources, has reported that in Honduras the CIA is indirectly providing money, training and military equipment to paramilitary groups whose avowed aim is to overthrow Nicaragua's Sandinist government. The operation, said to involve 150 agents based in Honduras and dozens more in neighboring countries, is reported to be the largest covert CIA action in nearly a decade and to be funded by a $31.3 million military aid program to Honduras in fiscal 1982.

This proxy secret war not only violates international law but U.S. law as well. The U.S. Neutrality Act expressly forbids the raising of secret armies to unseat a regime that the United States recognizes as lawful. Moreover, the covert operation is likely to be counterproductive for U.S. interests. It will prompt leftist Nicaragua, fearful of invasion, to further build up its armed forces and become more dependent on support from the Soviet Union and Cuba. It will intensify Latin American animosity toward U.S. intervention in the region and heighten distrust of Washington.

Although the CIA's past covert operations in Cuba, in Angola, in Chile and elsewhere have been exposed and discredited, the Reagan administration seems to be relying more and more on the CIA's dirty tricks as a tool of foreign policy. The House has now voted to ban covert U.S. aid to exile groups for the purpose of overthrowing the Sandinist government or provoking a military clash between Nicaragua and Honduras. The Senate should do the same. The proper procedure for the pursuit of U.S. objectives in Latin America and elsewhere is open diplomacy, not secretly subsidized killing.

[From the Atlanta Journal, Dec. 10, 1982]

CONGRESS HAS RIGHT, DUTY TO LIMIT NICARAGUA ROLE

You don't have to be either a pacifist or a sympathizer with the Sandinista regime in Nicaragua to approve of the U.S. House action prohibiting the CIA and other agencies from supporting military training aimed at the overthrow of that government, or trying to provoke a war between Nicaragua and Honduras.

While we disliked the Somoza regime in Nicaragua, we have been disappointed that the Sandinistas seem to be more active in promoting Marxism in other countries than in restoring democracy in their own country.

Thus, we do not consider it wrong for the United States to assist El Salvador and Honduras in resisting infiltration by Nicaraguans and trying to stop arms shipments from Nicragua to rebels in those countries. As far as international law is concerned, intervention in the affairs of another nation is equally improper whether it comes from a leftist regime or a right wing one.

But it is another matter to attack Nicaragua itself, or to foment an attack upon it by another country. Let us be sure that we and our allies remain in the position of defending against aggression rather than appearing to be aggressors ourselves.

Some of the actions the United States is reported to have been supporting or at least considering amount to acts of war against Nicaragua. Sending troops across the border certainly is an act of war.

If and when the time comes that this kind of action really is necessary in the national interest of the United States, Congress should be involved in the decision. Under our Constitution the executive branch has primary responsibility for the conduct of foreign relations; we do not believe that Congress should make a habit of interfering in diplomacy. But the power to declare war belongs to Congress, and thus Congress must monitor closely foreign policy actions that could make war inevitable. It is both appropriate and timely for Congress to issue a warning against any kind of secret war against Nicaragua.

[From the St. Louis Post-Dispatch, Dec. 19, 1982]

A SELF-FULFILLING PROPHECY?

The Sandinista government of Nicaragua, still trying to discover where it should go politically and how far, faces increasing domestic difficulties. None of these, however, has much to do with the Reagan administration's blatant efforts to subvert that government.

A remarkable demonstration of domestic criticism has come from Nicaragua's ambassador to the United States, Francisco Fiallos Navarro. He called for a "dramatic change" in the direction of the government he represents. Mr. Fiallos asked for free elections, lifting of the state of emergency and unrestricted freedom of the press which, he said, was a condition of democracy.

Unfortunately, Mr. Fiallos did not get freedom of the press—the government prevented publication of his interview with La Prensa, an opposition newspaper which has been censored before. Government spokesmen say his statement shows "how flexible we are," meanwhile being inflexible about letting Nicaraguans know what he said.

The Sandinistas, however, are under some sever restraints as to how far they can go toward Marxist ideals. The Catholic hierarchy, which won public support by opposing the previous Somoza dictatorship, has been critical of the new regime, forcing it into an uneasy kind of truce with the church. Moreover, the government has had to secure short-term credits from American and western banks to meet a $40 million interest payment on its foreign debt.

In substance, Nicaragua has not yet fully determined its course or totally signed up with the communist bloc. But the Reagan administration, in its single-minded effort to block communist influence, is hardly helping its own cause.

Officials in Washington concede that the administration is supporting an effort to "destabilize" the Sandinista government. How? By supporting attacks into Nicaragua by well armed insurgents, usually operating from neighboring Honduras. Numerous reports have stated that the CIA is indirectly supplying these paramilitary groups, to the point where the program may be the largest CIA covert action in nearly a decade.

These paramilitary forces include many former National Guardsmen who served under the Somoza dictatorship. And the people of Nicaragua certainly know it. Nothing could be more effective in rallying them to their government than blatant outside interference in behalf of bands of Somozistas whom they threw out after decades of oppression. Even as to human rights, the present government is better than its predecessor.

The administration policy obviously cannot overthrow the Nicaraguan government; it is not even supposed to do so. The kind of minor harassment provided, from the sources providing it, is bound to be self-defeating. The policy offers Nicaraguans the propect of returning to a past that they have discarded. If this interventionism is suposed to demonstrate that Nicaragua represents a communist threat, the result could be a self-fulfilling prophecy.

[From the Christian Science Monitor, Dec. 22, 1982]

NICARAGUA NEED NOT COPY CUBA

The occupational hazard of revolutions is to become mirror images, of the tyrannies they overthrow. Freedom-loving Nicaraguans are trying to stem the post-revolutionary extremism which is taking their country in this direction. They are dismayed at United States policies that they see as giving the extremists an excuse for repressive measures. By this reasoning, hard-line leftists are bolstered as Washington continues to avoid diplomacy in favor of supporting armed action by remnants of the old Somoza dictatorship's national guard and other opponents of the Managua regime.

For a time the US appeared to be opening the diplomatic door a crack. It would be wise to pursue this line and renounce any overt or covert backing of force against Nicaragua's Sandinista government. Even the most open Nicaraguan critics of the regime's excesses see US intervention as counterproductive.

But if Washington would be repaid by listening to these critics, so would the regime that has become a magnet for Washington's anticommunist efforts. The latest Nicaraguan to speak out is Francisco Fiallos Navarro, who has been ousted as ambassador to the United States for doing so. He was preceded by exile Edén Gómez, the redoubt-

able Commander Zero of the revolution against Somoza, who last spring denounced the radicalism of former fellow-Sandinistas seeking to "hold on to power at all cost."

Mr. Fiallos recognizes the Nicaraguan revolution as irreversible but warns against its taking the country from a rightist dictatorship to a leftist dictatorship. He calls for political pluralism, free elections, a lifting of censorship. By returning to such stated ideals of the revolution, its leaders would not only serve their own people but give the United States an offer it could hardly refuse. The Reagan administration has long spoken of such reforms as conditions for restoring relations.

One misapprehension to dispel is the equating of Nicaragua with Cuba as a domino certain to topple toward abject communism and Muscovite serfdom. So far, for example, foreign and many other private businesses carry on in Nicaragua; at this stage after the Cuban revolution almost all private enterprises had been expropriated.

Nicaragua is not down the drain. It can be saved from that future so long as there are Nicaraguans from its broad-based revolution willing to stand up to the self-seeking exploiters of it—and outside powers such as the US willing to respond to their heartfelt pleas.

[From the Los Angeles Times, Dec. 26, 1982]

DANGEROUS COURSE

The undercover operations that the Central Intelligence Agency is carrying out against the revolutionary government in Nicaragua may be the most overt "covert" actions in which the agency has ever engaged.

The initial reports on the activities, which involve U.S. support for paramilitary groups waging guerrilla warfare against the Sandinista-dominated government in Managua, portrayed them as being out of control and dangerously close to sparking a regional war in Central America. In an effort to counter the negative publicity, U.S. intelligence sources have begun leaking even more information about them. The latest reports indicate that operations along the Honduras-Nicaragua border are running smoothly and fit in with the Reagan Administration's policy for Central America.

Both versions are most likely overstated. But, considering the current political instability all over Central America, the potential damage that any obvious North American intervention there would do to future U.S. relations with the region's governments, and the nature of some of the people with whom the CIA is allied in the operations, we wonder if the Administration fully comprehends the dangerous course on which the CIA has embarked.

Covert action against Nicaragua is being justified on the ground that some Sandinista commanders are secretly aiding the leftist rebels trying to overthrow the U.S-supported government in El Salvador. The presidential order authorizing the covert action reportedly says that the CIA should "harass" the Sandinistas but not work to overthrow their government. The agency is following a "tit-for-tat" strategy, striking at Nicaragua with sabotage only when the Salvadoran rebels carry out similar operations.

"The message to Managua is that 'there's a price to aiding the rebels,'" A U.S. intelligence official was quoted as saying. "If you stop, we'll stop the groups harassing you."

Therein lies part of the problem. Some analysts, even within the Reagan Administration, seriously doubt whether the CIA can stop, or in any way control, the paramilitary forces that it is helping to train and supply. Those counter-revolutionaries have their own agenda, and were engaging in action against the Sandinistas before the United States stepped into the picture.

Some of the Sandinistas' opponents are unsavory people. The best-organized paramilitary groups are made up of former members of the National Guard run by the late Nicaraguan dictator Anastasio Somoza. These so-called somocistas are as hated by the average Nicaraguan as the old dictator was, and their activities are financed by wealthy Nicaraguan exiles who made their money under the corrupt Somoza regime. Intelligence sources insist that the presidential order on covert action specifically prohibits assistance to former followers of Somoza. That is laudatory, but what sounds like good policy in Washington can easily go awry in the jungles of Central America.

But the most ironic thing about these covert activities by the CIA is that, regardless of their military value, they may backfire politically. That will happen if they generate sympathy and public support for the Sandinistas at a time when their heavy-handed Marxism is costing them the support of democratic Nicaraguans like Francisco Fiallos, the ambassador to the United States who recently resigned in protest against the policies of the Sandinistas.

When Fiallos stepped down, he not only criticized the Sandinistas but also warned the Reagan Administration against working against them so hard that they will again become heroes inside Nicaragua. He urged the United States to let Nicaraguans settle their own problems. That is sound advice, even if it is hard to accept for an Administration that is understandably impatient with the Sandinistas revolutionary fervor.

[From the Atlanta Journal, Dec. 30, 1982]

CONGRESS SHOULD PREVAIL ON POLICY IN NICARAGUA

Administration officials say the Defense Department and the Central Intelligence Agency will comply with congressional action prohibiting the United States from supporting military operations designed to overthrow the government of Nicaragua.

They'd better. Since the U.S. Constitution gives to Congress the power to declare war, it would seem that executive agencies shouldn't commit what amount to acts of war without consulting Congress, particularly when there is no need for an emergency decision.

The situation in Nicaragua is complex. At about the time Congress was acting, the Nicaraguan ambassador to the United States was ousted by his government because he had criticized its policies and warned his people of the danger of a leftist dictatorship.

"To overthrow a rightist dictatorship does not give us the right to repress our people," said Francisco Fiallos Navarro. And when he spoke of "us", he meant the Sandinista regime he had been representing.

We share his concern about the trend toward a leftist dictatorship in Nicaragua, and that is precisely the trend which suggests to some people that we ought to intervene there.

But even after expressing alarm about the emerging trend in Nicaragua, Fiallos denounced any idea of U.S. intervention. "The worst things they (the Reagan administration) could do is help the Somozistas," he said.

Fiallos is right. He speaks for the substantial majority of Nicaraguans who wanted to see the right-wing Somoza dictatorship ousted but who did not want to see it replaced by a dictatorship of the left. He believes the democratic majority in Nicaragua can yet prevail if outside interference from all quarters is halted. "The problem of Nicaragua should be solved by Nicaraguans," in his view.

U.S. policy can properly seek to keep leftist Nicaraguans from interfering in El Salvador. In furtherance of Fiallos' idea of letting Nicaraguans solve the problem of Nicaragua, U.S. policy also can properly seek to get leftist Cubans out of Nicaragua.

But we should not go beyond that to try to impose our preference upon Nicaragua by force. And if we are still a democracy, the Defense Department and the CIA will certainly respect the authority of Congress to make decisions on war and peace.

[From the New York Times, Jan. 5, 1983]

QUIT THE BAY OF PIGLETS

When Congress asked why the C.I.A. is waging a secret war to overthrow the leftist regime in Nicaragua, the Administration said it isn't; America is only trying to harass the Sandinist junta, not overthrow it. This spongy distinction failed to impress the legislators. At the bipartisan urging of its intelligence committees, Congress has now informed President Reagan that he may not use American arms or manpower against Nicaragua.

This constitutes a second warning to an Administration that seems to be sleepwalking into Credibility Gap. The Congressional resolution—adopted 411-0 by the House, and approved in conference by the Senate—followed many press accounts of United States help for clandestine forces raiding Nicaragua. The publicity proves that there is no way to hide such large-scale involvement with emigré adventurers.

Perhaps such covert action is justifiable after conventional diplomacy fails. But the Reagan Administration hasn't made that case even to sympathetic members of Congress.

New York's Senator Moynihan, vice chairman of the Senate intelligence committee, has said it is a serious question "whether or not the Administration is in violation of the law for the first time since the Gulf of Tonkin resolution." His doubts are shared by the Republicans' John Chafee of Rhode Island.

Any secret commitment of American forces to attacks in or against Nicaragua would violate both the Neutrality Act and the War Powers Act. The laws make no exception for mere harassment. There can now be no doubt about Congress' intent in this affair; its resolution forbids the use of "military equipment, military training or advice, or other support for military activities . . . for the purpose of overthrowing the Government of Nicaragua or provoking a military exchange between Nicaragua and Honduras."

News reports have put the number of C.I.A. operatives among Nicaraguan rebels in Honduras as high as 150. But Congress is said to have been assured by C.I.A. Director Casey that fewer than 50 agents are involved. It seems to have been conceded that Nicaragua's borders may have been violated by the U.S.-assisted insurgents, whose raids are meant by Washington to punish the Managua regime for supplying arms to guerrillas in El Salvador.

The operation isn't large enough to achieve any military objective but it's too large to conceal or explain away. It's a Bay of Piglets. Let President Reagan heed the views of Congress and end this meddling before it turns into something worse than an embarrassment.

[From the Boston Sunday Globe, Mar. 27, 1983]

REAGAN'S SWAMP OF PIGS?

A US-sponsored cloak-and-dagger operation in Central America is showing signs of careening out of control, raising the possibility of a regional war.

Intensive "covert action" began at least a year ago along the Honduran-Nicaraguan border. House and Senate intelligence committees approved the plan with the apparent understanding that the CIA-Pentagon aim was merely to "interdict" arms allegedly being shipped from Nicaragua to leftists in El Salvador. Ancillary harassment by CIA-funded commandos now appears to be expanding into Made-in-USA counterrevolution.

Within the past week an exile group, many of whose members were associated with the regime of the former dictator Anastasio Somoza, reportedly launched widespread attacks inside Nicaragua intended to trigger civil war. The Nicaraguan government claims Honduran troops participated in at least one fight along the northern border, and tensions are also high on the Costa Rican border where the counterrevolutionaries threaten to open a southern front. Several hundred anti-Sandinista guerrillas are also reportedly operating in mountainous areas inside the country, about 60 miles from Managua, the capital.

Apparently congressional committees with oversight responsibility had worried from the outset that the operation would get out of control. They reportedly approved harassing operations, but stipulated no use of US funds either to overthrow the government of Nicaragua or to provoke a Honduran-Nicaraguan war. Last fall Rep. Edward Boland (D-Mass.), chairman of the House Intelligence Committee, offered an amendment to the appropriations bill giving that distinction the force of law. For whatever reason, the line drawn by Congress appears to have been crossed.

Depending on what motives are assumed, the Administration has either naively created a Frankenstein monster or set the stage for deepening US involvement. With a false move, hostilities could spill across into Honduras or Costa Rica. If Nicaragua "goes to the source" of the counterrevolution, the Administration could be impelled to send troops to Honduras or Costa Rica, creating the critical mass for regional war. Meanwhile this adventurism gives the Sandinistas an excuse to turn to Cuba for additional aid and to continue the "state of emergency" that legitimizes a clampdown on the political opposition.

Cloak-and-dagger antics of the sort can never be adequately controlled. Even if the CIA and Pentagon seek to foment only a touch of chaos, the characters to whom they farm out the violence almost inevitably have other ideas. The Somocista agenda, a return to power in Managua, is an utterly unacceptable aim for the United States. Once guns and money are "in the pipeline" they can't be recalled.

If interdiction of arms traffic from Nicaragua to El Salvador were the aim, as claimed, there would be no need to sponsor any operations inside Nicaragua, other than intelligence gathering, and consequently there would be no need to act in secret stifiling congressional debate.

The secret aggression the Administration is facilitating is outlawed under the United Nations charter and the charter of the Organization of American States. US leaders such as Secretary of State George Shultz, who excoriate Salvadoran insurgents for wanting to "shoot their way into power," will be widely dismissed as hypocrites. The only certain result is a wave of justified resentment throughout the region and a hardening of the Sandinista regime.

Cynics would say the Administration wants the Sandinistas to overreact. If they harden their regime they'll alienate their people and prove the right-wing contention that democratic values cannot survive in leftist revolution. If they cross borders they'll provide an excuse to put US ground forces in the region.

Congress must pull the plug on the Nicaraguan operation before it is too late.

CARGO PREFERENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. IRELAND) is recognized for 5 minutes.

● Mr. IRELAND. Mr. Speaker, yesterday Congresswoman VIRGINIA SMITH introduced House Concurrent Resolution 136 which expresses the sense of Congress in opposition to any further, dangerous expansion of cargo preference. I am an original cosponsor of this measure.

The State of Florida produces more phosphate than any other in the United States. Phosphate is the key ingredient in fertilizer. The Florida phosphate industry exports about 19 million tons of bulk phosphate and related fertilizer materials each year on foreign vessels since freight rates for U.S. ships average 100 to 300 percent higher. The vessels employed are all bulk cargo ships—typically 30,000 to 50,000 tons.

Phosphate is a generic product, thus price is the most critical issue in sale. Florida producers would not be able to compete with foreign phosphate producers if forced to absorb these higher transportation costs.

It is estimated that as much as 40 percent of the 19 million export tons would be irretrievably lost if the cargo preference legislation currently before the Merchant Marine and Fisheries Committee was enacted. Such a reduction in production would result in the loss of 6,000 to 8,000 jobs in Florida, of the 75,000 now generated by the phosphate industry.

In more general terms there are a number of reasons why proposals which do advocate cargo preference have been rejected by Congress over the years. The proposed cargo preference legislation covers a wide variety of commodities shipped in international trade, including iron ore, coal, crude oil, petroleum products, chemicals, bauxite, aluminum, grains, soybeans, rice, sugar, sorghum, iron and steel scrap, and forest products in addition to phosphate rock and fertilizers. The substantially increased cost of ocean transportation for these products would be borne by the American consumer and those Americans seeking to sell their products overseas.

In addition, cargo preference totally violates any concept of free trade. The United States is currently a signatory to more than 40 treaties with foreign nations, including some of our closest allies, in which there are provisions to accord equal treatment and equal access to the vessels of the treaty partners. If the merchant vessels of treaty partners were denied the right to compete for certain dry bulk commercial cargoes in the U.S. export and import trades those treaty commitments would be violated.

Mr. Speaker, the implications of enactment of any further cargo preference legislation is that of a Government bailout of the U.S.-flag merchant marine and U.S. shipbuilders. We must prevail against cargo preference in order to underscore the reality that competitiveness must be earned, not legislated. At the same time, it will preserve the benefits of the open access, free market system for U.S. bulk exports and imports, and will assure the continuance of reliable, efficient and low cost ocean transportation that is critically important to the future state of the American economy. I urge my colleagues to support House Congressional Resolution 136.●

ERRATA AND CORRECTIONS IN THE JOINT STATEMENT OF MANAGERS WHICH ACCOMPANIED THE CONFERENCE REPORT ON HOUSE CONGRESSIONAL RESOLUTION 91

(Mr. JONES of Oklahoma asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. JONES of Oklahoma. Mr. Speaker, I submit for printing in the CONGRESSIONAL RECORD the following errata and corrections in the joint statement of managers which accompanied the conference report on House Congressional Resolution 91, the first concurrent resolution on the budget for fiscal year 1984. These changes are to reflect printing errors, and represent what was agreed to in each House of Congress when the budget resolution was approved on June 23, 1983. I am also submitting for printing the concurrent resolution as adopted by both Houses.

Copies of the errata and corrections are available from the House and Senate Budget Committees.

ERRATA AND CORRECTIONS [1]

CONFERENCE REPORT TO ACCOMPANY H. CON. RES. 91, THE FIRST CONCURRENT RESOLUTION ON THE BUDGET FOR FISCAL YEAR 1984

(S. Rept. 98-155, June 20, 1983; H. Rept. 98-248, June 21, 1983)

Page 5: In section (6)(A), the word "sections" on the second line should be "section".

Page 6: In the section on National Defense, for each of fiscal years 1984 and 1985 add "(E) New secondary loan guarantee commitments, $0.".

Page 13: In section (11)(i), the heading should read "Health (550), including amounts reserved pursuant to section 2:".

Page 20: In section (20) Allowances, there should be a period at the end of line (E) in fiscal year 1983 and fiscal year 1984.

Page 25: In Miscellaneous Provisions, SEC. 4, on the sixth and twelfth lines after the words "Congressional Budget Act" add ", made pursuant to section 302(a) of such Act,".

Page 25: In Miscellaneous Provisions, SEC. 5(b) third line, "jurisdication" should be "jurisdiction".

Page 26: In Miscellaneous Provisions, SEC. 6:

In subsection (1) first line, "betweeen" should be "between".

In subsection (2), the period at the end of the second line should be a comma.

In the second line of the full paragraph after subsection (6), the word "committee" should be capitalized.

Page 27: In the table, fiscal year 1983 outlays ("0") for function 350: Agriculture should be "24,450".

Page 31: In the table in the Economic Assumptions section:

The first line should be "Gross national product:".

The fifth line from the bottom should be "Three-month Treasury bill rate (percent)".

Page 32: In the table, the Revenue change for Fiscal year 1986 should be "+46.0".

Page 33: In the section of Function 570: Medical Insurance and Function 650: Social Security, in the third line from the bottom "surviviors" should be "survivors".

Page 33: In the section heading "Function 920. Allowances", the period should be a colon.

Page 33: In the table:

The correct amount for Senate-passed Revenues is "603,325" and the correct amount for Conference substitute Revenues is "604,300".

For function 270—Energy, House-passed Budget authority should be "4,050".

Page 34: In the table, for function 920—Allowances, Second budget resolution Outlays should be "−2,816".

Page 35: In the table, for function 300—Natural resources and environment, House-passed Budget authority should be "11,550".

Page 36: In the table at the top of the page, the title of the last function should be "950—Undistributed offsetting receipts:".

Page 44: In the table, for function 950—Undistributed offsetting receipts, House-passed Outlays should be "−23,550".

Page 45: In both tables, under "Total FY 1984-86", the heading above the left-hand column should be "BA".

Page 45: In the table showing Conference Substitute Reconciliation Instructions for House Committee:

—The sixth line should be "Small Business".

—On the Total spending reductions line, FY 1984 budget authority ("BA") should be "−1,986".

Page 46: In the Deferred Enrollment section:

—The last word in the third line of the second paragraph should be "the".

—The last word in the third line of the third paragraph should be "procedures".

Page 47: In the section on Monetary Policy, in subsection (4) of the conference substitute, the period at the end of the second line should be a comma.

Page 52 and 53: The heading on the table that begins on page 52 and ends on page 53 should read as follows: "Fiscal Year 1984—Credit Budget Aggregates and Functional Categories Excluding Credit Budget Impact of Amounts Reserved Pursuant to Section 2".

Page 53: In the table that begins on page 53, the title of the third functional category should be preceded by "300—".

Page 57: In the table, for function 500—Education, training, employment, and social services, House-passed New primary loan guarantee commitments should be "6,650" and Senate passed New primary loan guarantee commitments should be "6,600".

That the Congress hereby determines and declares that the concurrent resolution on the budget for fiscal year 1983 is hereby revised and replaced, the first concurrent resolution on the budget for fiscal year 1984 is hereby established, and the appropriate budgetary levels for fiscal years 1985 and 1986 are hereby set forth:

(a) The following budgetary levels are appropriate for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985:

(1) The recommended levels of Federal revenues are as follows:

Fiscal year 1983: $604,300,000,000.
Fiscal year 1984: $679,600,000,000.
Fiscal year 1985: $750,500,000,000.
Fiscal year 1986: $835,800,000,000.

and the amounts by which the aggregate levels of Federal revenues should be changed are as follows:

Fiscal year 1983: −$100,000,000.
Fiscal year 1984: +$12,000,000,000.
Fiscal year 1985: +$15,000,000,000.
Fiscal year 1986: +$46,000,000,000.

and the amounts for Federal Insurance Contributions Act revenues for hospital insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1983: $35,900,000,000.
Fiscal year 1984: $40,000,000,000.
Fiscal year 1985: $44,700,000,000.
Fiscal year 1986: $51,400,000,000.

and the amounts for Federal Insurance Contributions Act revenues and other revenues pursuant to Public Law 98-21 for old age, survivors, and disability insurance within the recommended levels of Federal revenues are as follows:

Fiscal year 1983: $148,800,000,000.
Fiscal year 1984: $167,900,000,000.
Fiscal year 1985: $187,300,000,000.
Fiscal year 1986: $203,300,000,000.

(2)(A) The appropriate levels of total new budget authority, including amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $883,360,000,000.
Fiscal year 1984: $928,725,000,000.
Fiscal year 1985: $996,750,000,000.
Fiscal year 1986: $1,059,300,000,000.

(B) The appropriate levels of total new budget authority, excluding amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $877,200,000,000.
Fiscal year 1984: $919,500,000,000.
Fiscal year 1985: $990,500,000,000.
Fiscal year 1986: $1,054,600,000,000.

(3)(A) The appropriate levels of total budget outlays, including amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $812,850,000,000.
Fiscal year 1984: $858,925,000,000.
Fiscal year 1985: $911,600,000,000.
Fiscal year 1986: $966,635,000,000.

(B) The appropriate levels of total budget outlays, excluding amounts reserved pursuant to section 2, are as follows:

Fiscal year 1983: $807,400,000,000.
Fiscal year 1984: $849,500,000,000.
Fiscal year 1985: $906,750,000,000.
Fiscal year 1986: $962,950,000,000.

(4)(A) Unless subparagraph (B) applies, the amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors are as follows:

Fiscal year 1983: $203,100,000,000.
Fiscal year 1984: $169,900,000,000.
Fiscal year 1985: $156,250,000,000.
Fiscal year 1986: $127,150,000,000.

(B) If all of the adjustments provided for in section 2 of this resolution are made, the amounts of the deficits in the budget which are appropriate in the light of economic conditions and all other relevant factors shall not exceed:

Fiscal year 1983: $208,550,000,000.
Fiscal year 1984: $179,325,000,000.
Fiscal year 1985: $161,100,000,000.
Fiscal year 1986: $130,835,000,000.

(5) The appropriate levels of the public debt are as follows:

Fiscal year 1983: $1,389,000,000,000.
Fiscal year 1984: $1,614,600,000,000.
Fiscal year 1985: $1,830,100,000,000.
Fiscal year 1986: $2,022,800,000,000.

and the amounts by which the statutory limits on such debt should be accordingly increased are as follows:

Fiscal year 1983: $246,100,000,000.
Fiscal year 1984: $225,600,000,000.
Fiscal year 1985: $215,500,000,000.
Fiscal year 1986: $192,700,000,000.

(6)(A) The appropriate levels of total Federal credit activity, including amounts reserved pursuant to section 2, for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

Fiscal year 1983:

(i) New direct loan obligations, $54,250,000,000.

(ii) New primary loan guarantee commitments, $99,600,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1984:

(i) New direct loan obligations, $47,900,000,000.

(ii) New primary loan guarantee commitments, $101,700,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1985:

(i) New direct loan obligations, $47,800,000,000.

(ii) New primary loan guarantee commitments, $106,600,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1986:

(i) New direct loan obligations, $47,750,000,000.

(ii) New primary loan guarantee commitments, $106,800,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

[1] Includes corrections to reflect the resolution as agreed to by the House and Senate.

(B) The appropriate levels of total Federal credit activity, excluding amounts reserved pursuant to section 2, for the fiscal years beginning on October 1, 1982, October 1, 1983, October 1, 1984, and October 1, 1985, are as follows:

Fiscal year 1983:

(i) New direct loan obligations, $52,700,000,000.

(ii) New primary loan guarantee commitments, $99,600,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1984:

(i) New direct loan obligations, $46,700,000,000.

(ii) New primary loan guarantee commitments, $100,100,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1985:

(i) New direct loan obligations, $46,700,000,000.

(ii) New primary loan guarantee commitments, $103,050,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

Fiscal year 1986:

(i) New direct loan obligations, $47,750,000,000.

(ii) New primary loan guarantee commitments, $106,800,000,000.

(iii) New secondary loan guarantee commitments, $68,250,000,000.

(b) The Congress hereby determines and declares the appropriate levels of budget authority and budget outlays, and the appropriate levels of new direct loan obligations and new loan guarantee commitments for fiscal years 1983 through 1986 for each major functional category are:

(1) National Defense (050):

Fiscal year 1983:

(A) New budget authority, $244,600,000,000.

(B) Outlays, $214,300,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $268,600,000,000.

(B) Outlays, $240,000,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $297,300,000,000.

(B) Outlays, $265,300,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $329,000,000,000.

(B) Outlays, $295,000,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

(2) International Affairs (150):

Fiscal year 1983:

(A) New budget authority, $24,850,000,000.

(B) Outlays, $11,500,000,000.

(C) New direct loan obligations, $10,650,000,000.

(D) New primary loan guarantee commitments, $9,250,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $18,700,000,000.

(B) Outlays, $12,950,000,000.

(C) New direct loan obligations, $12,000,000,000.

(D) New primary loan guarantee commitments, $10,300,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $16,800,000,000.

(B) Outlays, $13,000,000,000.

(C) New direct loan obligations, $12,300,000,000.

(D) New primary loan guarantee commitments, $10,300,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $16,250,000,000.

(B) Outlays, $12,900,000,000.

(C) New direct loan obligations, $12,850,000,000.

(D) New primary loan guarantee commitments, $10,300,000,000.

(E) New secondary loan guarantee commitments, $0.

(3) General Science, Space, and Technology (250):

Fiscal year 1983:

(A) New budget authority, $7,900,000,000.

(B) Outlays, $7,700,000,000.

(C) New direct loan obligations, $200,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $8,700,000,000.

(B) Outlays, $8,300,000,000.

(C) New direct loan obligations, $50,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $8,500,000,000.

(B) Outlays, $8,500,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $8,150,000,000.

(B) Outlays, $8,300,000,000.

(C) New direct loan obligations, $0.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

(4) Energy (270):

Fiscal year 1983:

(A) New budget authority, $3,950,000,000.

(B) Outlays, $4,450,000,000.

(C) New direct loan obligations, $11,600,000,000.

(D) New primary loan guarantee commitments, $150,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $4,200,000,000.

(B) Outlays, $4,300,000,000.

(C) New direct loan obligations, $12,050,000,000.

(D) New primary loan guarantee commitments, $150,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $3,900,000,000.

(B) Outlays, $3,150,000,000.

(C) New direct loan obligations, $12,500,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $3,500,000,000.

(B) Outlays, $3,050,000,000.

(C) New direct loan obligations, $12,600,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

(5) Natural Resources and Environment (300):

Fiscal year 1983:

(A) New budget authority, $12,400,000,000.

(B) Outlays, $12,450,000,000.

(C) New direct loan obligations, $50,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $12,050,000,000.

(B) Outlays, $12,500,000,000.

(C) New direct loan obligations, $50,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $11,850,000,000.

(B) Outlays, $12,550,000,000.

(C) New direct loan obligations, $50,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1986:

(A) New budget authority, $11,700,000,000.

(B) Outlays, $12,150,000,000.

(C) New direct loan obligations, $50,000,000.

(D) New primary loan guarantee commitments, $0.

(E) New secondary loan guarantee commitments, $0.

(6)(i) Agriculture (350), including amounts reserved pursuant to section 2:

Fiscal year 1983:

(A) New budget authority, $24,650,000,000.

(B) Outlays, $24,450,000,000.

(C) New direct loan obligations, $19,400,000,000.

(D) New primary loan guarantee commitments, $5,550,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1984:

(A) New budget authority, $13,600,000,000.

(B) Outlays, $12,100,000,000.

(C) New direct loan obligations, $13,300,000,000.

(D) New primary loan guarantee commitments, $4,350,000,000.

(E) New secondary loan guarantee commitments, $0.

Fiscal year 1985:

(A) New budget authority, $14,500,000,000.

(B) Outlays, $12,400,000,000.

(C) New direct loan obligations, $12,750,000,000.

(D) New primary loan guarantee commitments, $4,350,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $13,200,000,000.
(B) Outlays, $13,100,000,000.
(C) New direct loan obligations, $13,200,000,000.
(D) New primary loan guarantee commitments, $4,350,000,000.
(E) New secondary loan guarantee commitments, $0.
(ii) Agriculture (350), excluding amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $24,200,000,000.
(B) Outlays, $24,000,000,000.
(C) New direct loan obligations, $18,600,000,000.
(D) New primary loan guarantee commitments, $5,550,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $13,000,000,000.
(B) Outlays, $11,500,000,000.
(C) New direct loan obligations, $12,100,000,000.
(D) New primary loan guarantee commitments, $3,750,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $14,500,000,000.
(B) Outlays, $12,400,000,000.
(C) New direct loan obligations, $11,650,000,000.
(D) New primary loan guarantee commitments, $3,800,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $13,200,000,000.
(B) Outlays, $13,100,000,000.
(C) New direct loan obligations, $12,200,000,000.
(D) New primary loan guarantee commitments, $3,850,000,000.
(E) New secondary loan guarantee commitments, $0.
(7)(i) Commerce and Housing Credit (370), including amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $6,060,000,000.
(B) Outlays, $3,550,000,000.
(C) New direct loan obligations, $7,200,000,000.
(D) New primary loan guarantee commitments, $53,700,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
Fiscal year 1984:
(A) New budget authority, $6,000,000,000.
(B) Outlays, $2,450,000,000.
(C) New direct loan obligations, $5,900,000,000.
(D) New primary loan guarantee commitments, $54,200,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
Fiscal year 1985:
(A) New budget authority, $6,250,000,000.
(B) Outlays, $500,000,000.
(C) New direct loan obligations, $5,800,000,000.
(D) New primary loan guarantee commitments, $54,200,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
Fiscal year 1986:
(A) New budget authority, $6,450,000,000.
(B) Outlays, $260,000,000.
(C) New direct loan obligations, $5,800,000,000.
(D) New primary loan guarantee commitments, $54,200,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
(ii) Commerce and Housing Credit (370), excluding amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $5,300,000,000.
(B) Outlays, $3,500,000,000.
(C) New direct loan obligations, $6,450,000,000.
(D) New primary loan guarantee commitments, $53,700,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
Fiscal year 1984:
(A) New budget authority, $6,000,000,000.
(B) Outlays, $2,250,000,000.
(C) New direct loan obligations, $5,900,000,000.
(D) New primary loan guarantee commitments, $54,200,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
Fiscal year 1985:
(A) New budget authority, $6,250,000,000.
(B) Outlays, $150,000,000.
(C) New direct loan obligations, $5,800,000,000.
(D) New primary loan guarantee commitments, $54,200,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
Fiscal year 1986:
(A) New budget authority, $6,450,000,000.
(B) Outlays, $100,000,000.
(C) New direct loan obligations, $5,800,000,000.
(D) New primary loan guarantee commitments, $54,200,000,000.
(E) New secondary loan guarantee commitments, $68,250,000,000.
(8) Transportation (400):
Fiscal year 1983:
(A) New budget authority, $26,850,000,000.
(B) Outlays, $22,100,000,000.
(C) New direct loan obligations, $200,000,000.
(D) New primary loan guarantee commitments, $1,050,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $28,000,000,000.
(B) Outlays, $26,000,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $600,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $28,950,000,000.
(B) Outlays, $27,000,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $350,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, $29,800,000,000.
(B) Outlays, $28,100,000,000.
(C) New direct loan obligations, $100,000,000.
(D) New primary loan guarantee commitments, $300,000,000.
(E) New secondary loan guarantee commitments, $0.
(9)(i) Community and Regional Development (450), including amounts reserved pursuant to section 2:
Fiscal year 1983:
(A) New budget authority, $8,650,000,000.
(B) Outlays, $7,800,000,000.
(C) New direct loan obligations, $2,100,000,000.
(D) New primary loan guarantee commitments, $500,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, $6,975,000,000.
(B) Outlays, $8,225,000,000.
(C) New direct loan obligations, $1,700,000,000.
(D) New primary loan guarantee commitments, $1,500,000,000.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, $9,900,000,000.
(B) Outlays, $9,200,000,000.
(C) New direct loan obligations, $1,800,000,000.
(D) New primary loan guarantee commitments, $3,500,000,000.

(B) Outlays, −$19,100,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1984:
(A) New budget authority, −$18,050,000,000.
(B) Outlays, −$18,050,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1985:
(A) New budget authority, −$18,900,000,000.
(B) Outlays, −$18,900,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.
Fiscal year 1986:
(A) New budget authority, −$23,750,000,000.
(B) Outlays, −$23,750,000,000.
(C) New direct loan obligations, $0.
(D) New primary loan guarantee commitments, $0.
(E) New secondary loan guarantee commitments, $0.

RESERVE PROGRAMS

SEC. 2. (a) The following amounts of new budget authority and budget outlays for fiscal year 1983 and fiscal year 1984 are hereby reserved by the Congress for subsequent allocation to committees under section 302(a) of the Congressional Budget Act of 1974 for the functions and programs listed in the Statement of Managers, accompanying this resolution:
Fiscal year 1983:
(1) New budget authority, $6,060,000,000.
(2) Outlays, $5,350,000,000.
Fiscal year 1984:
(1) New budget authority, $8,325,000,000.
(2) Outlays, $8,525,000,000.
(b) In the House of Representatives:
(1) Upon the enactment of any legislation referred to in subsection (a) which requires an appropriation, or upon enactment of an appropriation for such purpose before the authorizing legislation is enacted, the Committee on the Budget is authorized and directed to report to the House a revised allocation of new budget authority and budget outlays for fiscal years 1983 and 1984 to the Committee on Appropriations reflecting the content of such legislation; and
(2) When one or more committees, other than the Committee on Appropriations, report legislation only referred to in subsection (a) providing new spending authority defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, or providing new budget authority, or when the Committee on Rules reports a resolution providing for consideration of such legislation which has not been reported by a committee, the Committee on the Budget is authorized and directed to report to the House a revised allocation of such new spending authority for fiscal years 1983 and 1984 to the appropriate committee reflecting the content of such legislation: *Provided, however,* That if such legislation is rejected by either House, the Committee on the Budget is authorized and directed to report to the House a similar reduction in the appropriate allocation.
(c) In the Senate:
(1) Upon the enactment of any legislation referred to in subsection (a) which requires an appropriation, the Committee on the Budget is directed to report to the Senate a revised allocation of new budget authority and budget outlays for fiscal years 1983 and 1984 to the Committee on Appropriations or any other appropriate committee reflecting the content of such legislation insofar as it relates to the programs referred to in subsection (a); and
(2) When the Senate moves to proceed or proceeds to consider legislation referred to in subsection (a) providing new spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, or providing new budget authority, the Committee on the Budget is directed to report to the Senate a revised allocation of such new spending authority for fiscal years 1983 and 1984 to the appropriate committee reflecting the content of such legislation insofar as it relates to the programs referred to in subsection (a) above: *Provided, however,* That if such legislation is rejected by either House, the Committee on the Budget is directed to report to the Senate a similar reduction in the appropriate allocation.
(d) Any revised allocation reported to the House or Senate pursuant to subsection (b) or (c) of this section shall be considered to be the allocation made pursuant to section 302(a) of the Congressional Budget Act of 1974 for purposes of sections 4 and 5 of this resolution and section 401(b)(2) of such Act. The adjustments made pursuant to those sections for each program shall not exceed the amounts provided for such program as set forth in the statement of managers.
(e) For purposes of section 311(a) of the Congressional Budget Act of 1974, the appropriate levels of new budget authority and budget outlays for fiscal years 1983 and 1984 shall be considered to be the following:
Fiscal Year 1983 Budget Authority $877,200,000,000.
Fiscal Year 1983 Budget Outlays $807,400,000,000.
Fiscal Year 1984 Budget Authority $919,500,000,000.
Fiscal Year 1984 Budget Outlays $849,500,000,000:
Provided, however, That if a revised allocation is made pursuant to subsection (b) or (c) then such levels shall be similarly adjusted in any report pursuant to such subsections to reflect the revised allocation.

RECONCILIATION

SEC. 3. (a) Not later than July 22, 1983, Senate committees named in subsections (b) through (e) of this section shall submit their recommendations to the Senate Committee on the Budget and not later than July 22, 1983, the House committees named in subsections (f) through (l) of this section shall submit their recommendations to the House Budget Committee. After receiving those recommendations, the Committees on the Budget shall report to the House and Senate a reconciliation bill or resolution or both carrying out all such recommendations without any substantive revision.
(b)(1) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $400,000,000 in fiscal year 1984; to reduce outlays by $500,000,000 in fiscal year 1985; and to reduce outlays by $800,000,000 in fiscal year 1986.

(2) The Senate Committee on Finance shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $12,000,000,000 in fiscal year 1984; $15,000,000,000 in fiscal year 1985; and $46,000,000,000 in fiscal year 1986.

(c) The Senate Committee on Governmental Affairs shall report changes within the jurisdiction of that committee, (1) sufficient to achieve savings in budget authority and outlays, or (2) which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority and outlays, or (3) any combination thereof, as follows: $1,619,000,000 in budget authority and $1,900,000,000 in outlays in fiscal year 1984; $2,332,000,000 in budget authority and $2,841,000,000 in outlays in fiscal year 1985; and $3,235,000,000 in budget authority and $4,144,000,000 in outlays in fiscal year 1986.

(d) The Senate Committee on Small Business shall report changes in laws within the jurisdiction of that committee which will result in savings in budget authority and outlays, as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

(e) The Senate Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $228,000,000 and outlays by $226,000,000 in fiscal year 1984; to reduce budget authority by $139,000,000 and outlays by $138,000,000 in fiscal year 1985; and to reduce budget authority by $141,000,000 and outlays by $140,000,000 in fiscal year 1986.

(f) The House Committee on Armed Services shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $253,000,000 and outlays by $253,000,000 in fiscal year 1984; to reduce budget authority by $360,000,000 and outlays by $360,000,000 in fiscal year 1985; and to reduce budget authority by $621,000,000 and outlays by $621,000,000 in fiscal year 1986.

(g) The House Committee on Energy and Commerce shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $400,000,000 in fiscal year 1984; to reduce outlays by $500,000,000 in fiscal year 1985; and to reduce outlays by $800,000,000 in fiscal year 1986.

(h) The House Committee on Foreign Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $3,000,000 in fiscal year 1984; to reduce outlays by $4,000,000 in fiscal year 1985; and to reduce outlays by $4,000,000 in fiscal year 1986.

(i) The House Committee on Post Office and Civil Service shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $1,619,000,000 and outlays by $1,900,000,000 in fiscal year 1984; to reduce budget authority by $2,332,000,000 and outlays by $2,841,000,000 in fiscal year 1985; and to reduce budget authority by $3,235,000,000 and outlays by $4,144,000,000 in fiscal year 1986.

(j) The House Committee on Small Business shall report changes in laws within the jurisdiction of that committee which will result in savings in budget authority and outlays, as follows: $139,000,000 in budget authority and $287,000,000 in outlays in fiscal year 1984; $555,000,000 in budget authority and $466,000,000 in outlays in fiscal year 1985; and $544,000,000 in budget authority and $443,000,000 in outlays in fiscal year 1986.

(k) The House Committee on Veterans' Affairs shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce budget authority by $228,000,000 and outlays by $226,000,000 in fiscal year 1984; to reduce budget authority by $139,000,000 and outlays by $138,000,000 in fiscal year 1985; and to reduce budget authority by $141,000,000 and outlays by $140,000,000 in fiscal year 1986.

(l)(1) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee which provide spending authority as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $400,000,000 in fiscal year 1984; to reduce outlays by $500,000,000 in fiscal year 1985; and to reduce outlays by $800,000,000 in fiscal year 1986.

(2) The House Committee on Ways and Means shall report changes in laws within the jurisdiction of that committee sufficient to increase revenues as follows: $12,000,000,000 in fiscal year 1984; $15,000,000,000 in fiscal year 1985; and $46,000,000,000 in fiscal year 1986.

(3) If the changes in laws reported to the House by the Committee on Ways and Means pursuant to paragraph (2) of this subsection contain changes involving the imposition of new or expanded taxes to directly finance programs within the jurisdiction of any other committee of the House (including, but not limited to, inland waterways or deep draft ports) or the imposition of any new or expanded user fees within the jurisdiction of any other committee of the House, an appropriate referral pursuant to Rule X of the Rules of the House should be considered.

(m) Should provisions in Subtitle A of Title I of Public Law 97-253, relating to 50 cent per hundredweight assessments against milk producers, be finally adjudicated by the courts to be unconstitutional or unenforceable, the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry shall report changes in laws within their jurisdiction within 30 days of that disposition which provide spending authority only as defined in section 401(c)(2)(C) of the Congressional Budget Act of 1974, sufficient to reduce outlays by $1,243,000,000 in fiscal year 1984; to reduce outlays by $1,332,000,000 in fiscal year 1985; and to reduce outlays by $1,327,000,000 in fiscal year 1986.

MISCELLANEOUS PROVISIONS

SEC. 4. No bill or resolution providing new discretionary budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974, for fiscal year 1984, which exceeds the appropriate allocation of new discretionary budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act, made pursuant to section 302(a) of such Act, shall be enrolled in the House of Representatives, and no bill or resolution providing new budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act of 1974, for fiscal year 1984, which exceeds the appropriate allocation of new budget authority or new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act, made pursuant to section 302(a) of such Act, shall be enrolled in the Senate, until after the Congress has completed action on the second concurrent resolution on the budget required to be reported under section 310 of such Act or until October 1, 1983, whichever occurs first.

SEC. 5. (a) If Congress has not completed action by October 1, 1983, on the concurrent resolution on the budget required to be reported under section 310(a) of the Congressional Budget Act of 1974 for the 1984 fiscal year, then this concurrent resolution shall be deemed to be the concurrent resolution required to be reported under section 310(a) of such Act, for the purposes of section 311 of such Act.

(b) Section 311(a) of the Congressional Budget Act of 1974, as made applicable by subsection (a) of this section, shall not apply to bills, resolutions, or amendments within the jurisdiction of a committee, or any conference report on any such bill or resolution, if—

(1) the enactment of such bill or resolution as reported;

(2) the adoption and enactment of such amendment; or

(3) the enactment of such bill or resolution in the form recommended in such conference report;

would not cause the appropriate allocation for such committee of new discretionary budget authority, new budget authority, or new spending authority as described in section 401(c)(2)(C) of the Congressional Budget Act of 1974 made pursuant to section 302(a) of such Act for fiscal year 1984 to be exceeded.

(c) The provisions of this section shall cease to apply when Congress completes action on a subsequent concurrent resolution on the budget for fiscal year 1984 pursuant to section 304 or 310 of the Congressional Budget Act of 1974.

SEC. 6. MONETARY POLICY.—Inasmuch as—

(1) there is a need for coordination between fiscal and monetary policy,

(2) actual and projected budget deficits have placed a heavy burden on monetary policy,

(3) any reduction in the budget deficit brought about by this budget resolution will reduce pressures on monetary policy,

(4) there is a need for vigorous economic growth consistent with reasonable price stability,

(5) the Banking and Budget Committees of the respective Houses require information regarding the Federal Reserve's monetary policy and the economic assumptions consistent with that policy, and

(6) the Budget Committees are, therefore, interested in the recommendations of the Banking Committees of the respective Houses with respect to such information,

the House Committee on Banking, Finance and Urban Affairs, and the Senate Committee on Banking, Housing, and Urban Affairs are requested to report to their respective bodies, no later than September 30, 1983, a resolution expressing the sense of the Congress as to (A) the coordination of the Federal Reserve's monetary policy with the fiscal policy reflected in this budget resolution and the appropriate information regarding the economic assumptions and goals of the Federal Reserve System, (B) the appropriate information to implement this policy coordination including, but not limited to, the effects of the Federal Reserve's monetary policy on the economy, and (C) any other matters pertaining to the Federal Reserve's execution or congressional oversight of monetary policy, as the above Committees deem appropriate.

SEC. 7. It is the sense of the Congress that, in light of budget restraint, limited resources, and the need to foster economic growth, the House Committee on Armed Services should initiate a thorough review of military retirement programs which constitute a major sector of the defense budget and should recommend changes which would result in reduced spending under these programs.

SEC. 8. It is the sense of the Congress that the President and the Congress, through the appropriations process, should limit the on-budget new direct loan obligations of the Federal Government to an amount not to exceed $38,150,000,000 in fiscal year 1983 and $31,000,000,000 in fiscal year 1984; off-budget new direct loan obligations to an amount not to exceed $16,100,000,000 in fiscal year 1983 and $16,900,000,000 in fiscal year 1984; new primary loan guarantee commitments to an amount not to exceed $99,600,000,000 in fiscal year 1983 and $101,700,000,000 in fiscal year 1984; and new secondary loan guarantee commitments to an amount not to exceed $68,250,000,000 in fiscal year 1983 and $68,250,000,000 in fiscal year 1984. It is further the sense of the Congress that the President and the Congress should limit total Federal Financing Bank origination of direct loans guaranteed by other Federal agencies to $15,000,000,000, in fiscal year 1983 and $15,500,000,000 in fiscal year 1984, and Federal Financing Bank purchases of certificates of beneficial ownership from Federal agencies to $12,050,000,000 in fiscal year 1983 and $13,950,000,000 in fiscal year 1984. It is further the sense of the Congress that direct borrowing transactions of Federal agencies should be, to the maximum extent possible, restricted to the Federal Financing Bank.

SEC. 9. It is the sense of the Congress and the budgets of Federal agencies initiating Federal Financing Bank purchases of certificates of beneficial ownership and originations of guaranteed loans should include the budget authority and outlays resulting from the transactions. The Congress recommends that the committees with jurisdiction over the Federal Financing Bank Act of 1973 consider expeditiously legislation to require that the budgetary impact of such Federal Financing Bank transactions be included in the budgets of the initiating agencies beginning with the fiscal year 1985 budget.

CONFERENCE REPORT ON H.R. 3135

Mr. FAZIO submitted the following conference report and statement on the bill (H.R. 3135) making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 98-271)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3135) making appropriations for the legislative branch for the fiscal year ending September 30, 1984, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 22.

That the House recede from its disagreement to the amendments of the Senate numbered 8, 13, 14, 16, 20, and 21, and agree to the same.

Amendment numbered 3:

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows:

In lieu of the section number stricken and proposed by said amendment, insert the following: *108*; and the Senate agree to the same.

Amendment numbered 4:

That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows:

In lieu of the section number stricken and proposed by said amendment, insert the following: *109*; and the Senate agree to the same.

Amendment numbered 5:

That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows:

In lieu of the section number stricken and proposed by said amendment, insert the following: *110*; and the Senate agree to the same.

Amendment numbered 6:

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows:

In lieu of the section number stricken and proposed by said amendment, insert the following: *111*; and the Senate agree to the same.

Amendment numbered 7:

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows:

In lieu of the section number stricken and proposed by said amendment, insert the following: *112*; and the Senate agree to the same.

Amendment numbered 9:

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows:

In lieu of the sum stricken and proposed by said amendment, insert the following: *$14,653,000*; and the Senate agree to the same.

Amendment numbered 10:

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows:

In lieu of the number stricken and proposed by said amendment, insert the following: *139*; and the Senate agree to the same.

Amendment numbered 18:

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows:

In lieu of the sum stricken and proposed by said amendment, insert the following: *$5,980,000*; and the Senate agree to the same.

Amendment numbered 19:

That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows:

In lieu of the sum stricken and proposed by said amendment, insert the following: *$850,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 2, 11, 12, 15, and 17.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3135) making appropriations for the Legislative Branch for the fiscal year ending September 30, 1984, and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

TITLE I— CONGRESSIONAL OPERATIONS

SENATE

Amendment No. 1: Reported in technical disagreement. Inasmuch as the amendment relates solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer a motion to recede and concur in the Senate amendment with an amendment which deletes Sec. 107, regarding reimbursement for computer equipment and services. Sec. 107 has been deleted by the conferees at the request of the managers on the part of the Senate.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

ADMINISTRATIVE PROVISIONS

Amendment No. 2: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 107. Subsections (a) and (b) of section 106 of the Legislative Branch Appropriation Act, 1963 (2 U.S.C. 60j) on or after October 1, 1983, shall not apply to any individual

whose pay is disbursed by the Secretary of the Senate; except that, any individual who prior to such date was entitled to longevity compensation under such subsections on the basis of service performed prior to such date shall continue to be entitled to such compensation, but no individual shall accrue any longevity compensation on the basis of service performed on or after such date.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees agree with the intent of the Senate amendment which was designed to affect only employees on the Senate rolls. Since the Senate language inadvertently also affects some employees who are carried on House rolls who would be adversely and unintentionally affected, the managers have agreed to language which specifies that only employees whose pay is disbursed by the Secretary of the Senate are affected.

HOUSE OF REPRESENTATIVES

ADMINISTRATIVE PROVISIONS

Amendment Nos. 3 through 7: Change section numbers.

JOINT ITEMS

OFFICE OF ATTENDING PHYSICIAN

Amendment No. 8: Appropriates $653,000 as proposed by the Senate instead of $653,200 as proposed by the House.

OFFICE OF TECHNOLOGY ASSESSMENT

Salaries and expenses

Amendment No. 9: Appropriates $14,653,000 instead of $13,933,000 as proposed by the House and $15,800,000 as proposed by the Senate. The conferees wish to caution OTA to use the additional funds above the House allowance for the nine additional staff and related costs, and not for items which will inflate their base budget.

Amendment No. 10: Provides a limitation of 139 staff employees instead of 130 as proposed by the House and 145 as proposed by the Senate.

ARCHITECT OF THE CAPITOL

CAPITOL BUILDINGS AND GROUNDS

Capitol buildings

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur with the Senate amendment regarding vehicle use. The conferees are agreed that a driver-messenger for the passenger vehicle in the office of the Architect of the Capitol be retained for the daily conduct of official business by the Architect and members of his staff, provided that the driver-messenger or other employees of the Architect shall not be available for the purpose of transporting the Architect or members of his staff between their domiciles and place of employment.

Amendment No. 12: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that the cost limitation in H. Con. Res. 550, 92nd Congress, be increased by $167,000.

Amendment No. 13: Appropriates $10,630,000 as proposed by the Senate instead of $10,568,000 as proposed by the House.

Amendment No. 14: Provides that $940,000 shall remain available until expended as proposed by the Senate instead of $773,000 as proposed by the House.

Senate office buildings

Amendment No. 15: Reported in technical disagreement. Inasmuch as the amendment relates solely to the Senate and in accord with long practice, under which each body determines its own housekeeping requirements and the other concurs without intervention, the managers on the part of the House will offer a motion to recede and concur in the Senate amendment.

Capitol Power Plant

Amendment No. 16: Appropriates $23,542,000 as proposed by the Senate instead of $23,792,000 as proposed by the House.

LIBRARY OF CONGRESS

CONGRESSIONAL RESEARCH SERVICE

Salaries and expenses

Amendment No. 17: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: *$36,620,000 to carry out the provisions of Section 203 of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 166), and section 203(g) of such act is amended, effective hereafter, to read as follows:*

"(g) The Director of the Congressional Research Service will submit to the Librarian of Congress for review, consideration, evaluation, and approval, the budget estimates of the Congressional Research Service for inclusion in the Budget of the United States Government."

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The managers agree that the additional amount above the $35,543,550 proposed by the House bill will be allocated as follows: $22,545 for a GS-9 paralegal; $14,990 for a GS-5 library technician; $32,693 for a GS-12 fiscal policy analyst; $27,277 for a GS-11 crime analyst; $22,545 for a GS-9 bibliographer; $516,717 for other mandatory personnel items (ingrade increases, medicare and pay raise annualization, etc.); $219,500 for non-personal items (travel, equipment, etc.); $310,293 for a reduction in the lapse rate; and $90,000 in savings in personnel costs, tuition, training, professional or consultant services. The managers have agreed to include language to provide additional oversight over CRS budget preparation, review, and execution in order to achieve efficiencies and economies in the operation of the Service and to locate areas of duplication with the other Library of Congress operations.

TITLE II—OTHER AGENCIES

ARCHITECT OF THE CAPITOL

LIBRARY BUILDINGS AND GROUNDS

Structural and mechanical care

Amendment No. 18: Appropriates $5,980,000 instead of $5,230,000 as proposed by the House and $6,380,000 as proposed by the Senate. The conferees have provided funds to repair the terrace and steps at the front entrance to the Thomas Jefferson Building.

Amendment No. 19: Provides that $850,000 shall remain available until expended instead of $100,000 as proposed by the House and $1,250,000 as proposed by the Senate.

COPYRIGHT ROYALTY TRIBUNAL

Salaries and expenses

Amendment No. 20: Provides $700,000 as proposed by the Senate instead of $650,000 as proposed by the House.

Amendment No. 21: Provides $490,000 as proposed by the Senate instead of $455,000 as proposed by the House.

TITLE III—GENERAL PROVISIONS

Amendment No. 22: Deletes language proposed by the Senate regarding a consulting architect.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1984 recommended by the Committee of Conference, with comparisons to the fiscal year 1983 amount, the 1984 budget estimates, and the House and Senate bills for 1984 follow:

New budget (obligational) authority, fiscal year 1983	$1,335,697,663
Budget estimates of new (obligational) authority, fiscal year 1984	[1] 1,495,478,200
House bill, fiscal year 1984	1,208,397,750
Senate bill, fiscal year 1984	1,475,986,000
Conference agreement, fiscal year 1984	1,473,359,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1983	+137,661,337
Budget estimates of new (obligational) authority, fiscal year 1984	−22,119,200
House bill, fiscal year 1984	+264,961,250
Senate bill, fiscal year 1984	−2,627,000

[1] Includes $268,143,000 of budget estimates not considered by the House.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 96. Joint resolution to designate August 1, 1983, as "Helsinki Human Rights Day."

ADJOURNMENT

Mr. MOLLOHAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 31 minutes p.m.), the House adjourned until tomorrow, Wednesday, June 29, 1983, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1438. A communication from the President of the United States, transmitting a letter waiving the fiscal year 1983 ceiling on troops permanently stationed ashore in European NATO countries by the number of personnel associated with the planned deployment of ground-launched cruise missiles to Europe, pursuant to section 799A of Public Law 97-377 (H. Doc. No. 98-78); to the Committee on Appropriations and ordered to be printed.

1439. A letter from the Deputy Secretary of Defense, transmitting a report on four violations relating to the expenditure or obligation in excess of appropriation or apportionment, pursuant to section 1351 of title 31, United States Code; to the Committee on Appropriations.

1440. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense articles to Lebanon, pursuant to section 133(b) of title 10, United States Code; to the Committee on Armed Services.

1441. A letter from the Acting Secretary of the Navy, transmitting a draft of proposed legislation to amend section 7227 of title 10, United States Code, to provide for the furnishing of routine port services at no cost to visiting naval vessels of a friendly foreign country, when by agreement or custom such services are provided reciprocally to visiting naval vessels of the United States; to the Committee on Armed Services.

1442. A letter from the District of Columbia Auditor, transmitting a report entitled "Review of Alleged Improper Unemployment Compensation Payments," pursuant to section 455 of Public Law 93-198; to the Committee on the District of Columbia

1443. A letter from the Secretary of Education, transmitting a proposed application notice for the Secretary's discretionary program grants—improving education through the application of technology (with rules for conducting competition), pursuant to section 431(d) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1444. A letter from the Assistant Attorney General (Antitrust Division), transmitting the semiannual report for the period ending February 28, 1983 on the voluntary agreement and plan of action to implement the international energy program, pursuant to section 252(i) of the Energy Policy Conservation Act; to the Committee on Energy and Commerce.

1445. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Saudi Arabia (Transmittal No. 83-41), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1446. A letter from the Director, Defense Security Assistance Agency, transmitting the quarterly report on foreign military sales as of March 31, 1983, pursuant to section 36(a) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1447. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to

sell certain defense equipment to Lebanon (Transmittal No. 83-47), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1448. A letter from the Acting Executive Director, Commodity Futures Trading Commission, transmitting notice of proposed changes in an existing records system, pursuant to title 5 United States Code 522a(o); to the Committee on Government Operations.

1449. A letter from the Assistant Secretary, U.S. Department of Housing and Urban Development, transmitting notice of a proposed new records system for the single family computerized homes underwriting management system, pursuant to title 5 United States Code 552a(o); to the Committee on Government Operations.

1450. A letter from the Assistant Secretary of the Treasury (Administration), transmitting notice of a proposed new records system for systems and financial management, Office of the Comptroller of the Currency, pursuant to title 5 United States Code 552a(o); to the Committee on Government Operations.

1451. A letter from the Executive Director, U.S. Olympic Committee, transmitting the annual report and audit of the committee for calendar year 1982, pursuant to section 113(a) of the act of September 21, 1980, as amended; to the Committee on the Judiciary.

1452. A letter from the Chairman, National Advisory Committee on Oceans and Atmosphere, transmitting the committee's 12th annual report, pursuant to section 4 of Public Law 95-63; to the Committee on Merchant Marine and Fisheries.

1453. A letter from the Executive Director, Marine Mammal Commission, transmitting the annual report of the Commission's activities under the Freedom of Information Act for calendar year 1982, pursuant to title 5 United States Code 522(d); to the Committee on Government Operations.

1454. A letter from the Director, Office of Personnel Management, transmitting a draft of proposed legislation to restructure the Federal employees health benefits program to strengthen financial control over the program and enhance competition among participating health plans, and for other purposes; to the Committee on Post Office and Civil Service.

1455. A letter from the Executive Secretary, Office of the Secretary of Defense, transmitting a report covering the period October 1982 through March 1983 on Defense Department procurement from small and other business firms, pursuant to section 10(d) of the Small Business Act, as amended; to the Committee on Small Business.

1456. A letter from the Secretary of Health and Human Services, transmitting a draft of proposed legislation to amend the Social Security Act to finance State programs of child support enforcement based on program performance, to improve the ability of States to collect child support for non-AFDC families, and otherwise strengthen and improve such programs, and for other purposes; to the Committee on Ways and Means.

1457. A letter from the Secretary of Health and Human Services, transmitting the seventh annual report on the child support enforcement program, pursuant to section 452(a)(10) of the Social Security Act; to the Committee on Ways and Means.

1458. A letter from the Board of Trustees, Federal Hospital Insurance Trust Fund, transmitting the 1983 annual report of the board, pursuant to section 1817(b) of the Social Security Act, as amended; (H. Doc. No. 98-75); to the Committee on Ways and Means and ordered to be printed.

1459. A letter from the Chairman of the Board, U.S. Synthetic Fuels Corporation, transmitting the Corporation's financial report for the quarter ended March 31, 1983, pursuant to section 177(c) of Public Law 96-294; jointly, to the Committees on Banking, Finance and Urban Affairs and Energy and Commerce.

1460. A letter from the Board of Trustees, Federal Supplementary Medical Insurance Trust Fund, transmitting the 1983 annual report of the board, pursuant to section 1841(b) of the Social Security Act, as amended; (H. Doc. No. 98-76); jointly, to the Committees on Ways and Means and Energy and Commerce and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. S. 577. An act to provide for the conveyance of certain Federal lands adjacent to Orchard and Lake Shore Drives, Lake Lowell, Boise project, Idaho; with an amendment (Rept. No.98-269). Referred to the Committee of the Whole House on the State of the Union.

Mr. UDALL: Committee on Interior and Insular Affairs. S. 459. An act to authorize and direct the Secretary of the Interior to convey, by quitclaim deed, all right, title, and interest of the United States in and to certain lands that were withdrawn or acquired for the purposes of relocating a portion of the city of American Falls out of the area flooded by the American Falls Reservoir (Rept. No.98-270). Referred to the Committee of the Whole House on the State of the Union.

Mr. FAZIO: Committee of conference. Conference report on H.R. 3135 (Rept. No. 98-271). Ordered to be printed.

Mr. BEVILL: Committee of conference. Conference report on H.R. 3132 (Rept. No. 98-272). Ordered to be printed.

SUBSEQUENT ACTION ON A REPORTED BILL SEQUENTIALLY REFERRED

[Omitted from the Record of June 27, 1983]

Under clause 5 of rule X the following action was taken by the Speaker:

The Committee on Ways and Means discharged from the further consideration of the bill H.R. 1510.

[Submitted June 28, 1983]

Referral of H.R. 1761 to the Committee on Public Works and Transportation extended for an additional period ending not later than August 1, 1983.

Referral of H.R. 3021 to the Committee on Ways and Means extended for an additional period ending not later than June 30, 1983.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BETHUNE:

H.R. 3422. A bill relating to the naming of certain locks, dams, and reservoirs on the Arkansas River, Ark.; to the Committee on Public Works and Transportation.

By Mr. COLEMAN of Texas (for himself and Mr. BRYANT):

H.R. 3423. A bill to amend the Internal Revenue Code of 1954 to repeal the estate and gift taxes and to provide offsetting revenues by reducing the amount of the investment tax credit; to the Committee on Ways and Means.

By Mr. DELLUMS (for himself and Mr. FAUNTROY):

H.R. 3424. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to extend the authorization of appropriations for the annual Federal payment to the District of Columbia; to the Committee on the District of Columbia.

By Mr. DELLUMS (for himself, Mr. FAUNTROY, and Mr. MCKINNEY):

H.R. 3425. A bill to amend the District of Columbia Stadium Act of 1957 to direct the Secretary of the Interior to convey to the government of the District of Columbia all right, title, and interest to the Robert F. Kennedy Memorial Stadium vested in the United States; to the Committee on the District of Columbia.

By Mr. FRANK:

H.R. 3426. A bill to amend section 3323 of title 5, United States Code, to remove the restrictions that an annuitant reappointed as a Federal employee may serve only at the will of the appointing authority; to the Committee on Post Office and Civil Service.

By Mr. FRENZEL:

H.R. 3427. A bill to amend the Internal Revenue Code of 1954 to make certain changes in the tax treatment of private foundations; to the Committee on Ways and Means.

By Mr. GILMAN:

H.R. 3428. A bill to amend sections 3307(d) and 8335(b) of title 5, United States Code, with respect to age limits for appointment and mandatory retirement of law enforcement officers engaged in detention activities; to the Committee on Post Office and Civil Service.

By Mr. GREEN:

H.R. 3429. A bill to amend the Internal Revenue Code of 1954 to disregard, in the valuation for estate tax purposes of certain items created by the decedent during his life, any amount which would have been ordinary income if such item had been sold by the decedent at its fair market value, to allow a charitable deduction based on the fair market value of such items, and for other purposes; to the Committee on Ways and Means.

By Mr. HOWARD (for himself, Mr. SNYDER, Mr. ROE, and Mr. STANGELAND) (by request):

H.R. 3430. A bill to amend the Disaster Relief Act of 1974, and for other purposes; to the Committee on Public Works and Transportation.

By Mr. HUBBARD:

H.R. 3431. A bill to name the Port of Hickman, Ky., as the "Elvis Stahr Harbor, Port

of Hickman"; to the Committee on Public Works and Transportation.

By Mrs. MARTIN of Illinois:

H.R. 3432. A bill to amend the Social Security Act to provide for a program of grants to States to provide health care benefits for the unemployed, and for other purposes; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. MOLLOHAN:

H.R. 3433. A bill to extend the Federal Supplemental Compensation Act of 1982 for an additional 6 months; to the Committee on Ways and Means.

By Mr. JONES of Oklahoma (for himself, Mr. CONABLE, Mr. MURTHA, Mr. RITTER, Mrs. HALL of Indiana, Mr. NOWAK, Mr. DINGELL, and Mr. BOEHLERT):

H.R. 3434. A bill to amend the Internal Revenue Code of 1954 to facilitate industrial revitalization and employment by improving the efficiency of the investment tax credit; to the Committee on Ways and Means.

By Mr. MURPHY (for himself, Mr. PERKINS, Mr. MILLER of California, Mr. BIAGGI, Mr. SIMON, Mr. GAYDOS, Mr. WILLIAMS of Montana, and Mr. CORRADA):

H.R. 3435. A bill to revise and extend the Education of the Handicapped Act, and for other purposes; to the Committee on Education and Labor.

By Mr. OBERSTAR:

H.R. 3436. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income grants paid by the U.S. Forest Service as a result of restricting motorized traffic in the boundary waters canoe area; to the Committee on Ways and Means.

By Mr. PAUL:

H.R. 3437. A bill to amend the Military Selective Service Act to prohibit peacetime registration for the draft; to the Committee on Armed Service.

By Mr. SHELBY:

H.R. 3438. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income subsistence payments to certain law enforcement officers; to the Committee on Ways and Means.

By Mr. SOLOMON:

H.R. 3439. A bill to amend the National Security Act of 1947 to protect against the unauthorized disclosure of identities of certain former U.S. intelligence officers, agents, informants, and sources; the Permanent Select Committee on Intelligence.

By Mr. SWIFT (for himself, Mr. WYDEN, and Mr. ALEXANDER):

H.R. 3440. A bill to amend the Communications Act of 1934 to assure that communication services are universally available on a nationwide basis at affordable rates; to the Committee on Energy and Commerce.

By DYMALLY:

H.R. 3441. A bill to amend title 28, United States Code, to require civil actions to be expedited, upon motion of a party who is 65 years of age or older; to the Committee on Judiciary.

By Mr. GILMAN (for himself and Mr. MRAZEK):

H.J. Res. 309. Joint resolution to provide for the designation of the last week in June 1984 as "Helen Keller Deaf-Blind Awareness Week"; to the Committee on Post Office and Civil Service.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

198. By the SPEAKER: Memorial of the Legislature of the State of California, relative to special education; to the Committee on Education and Labor.

199. Also, memorial of the Legislature of the State of Minnesota, relative to acid rain; to the Committee on Energy and Commerce.

200. Also, memorial of the Legislature of the State of Minnesota, relative to compensation to Vietnam veterans for adverse health effects; to the Committee on Veterans' Affairs.

201. Also, memorial of the Legislature of the State of Minnesota, relative to the issuance of qualified mortgage bonds; to the Committee on Ways and Means.

202. Also, memorial of the Legislature of the State of Minnesota, relative to the steel industry; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. GEKAS introduced a bill (H.R. 3442) for the relief of Chilewich, Inc., and Bluebird Inc.; which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 85: Mr. CLAY.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

150. By the SPEAKER: Petition of the Massachusetts Conference of the United Church of Christ, Framingham, Mass., relative to the Opera Company of Boston and the Philippines; to the Committee on Foreign Affairs.

151. Also, petition of the City Council, Cleveland, Ohio, relative to extended unemployment benefits; to the Committee on Ways and Means.

152. By Mr. JONES of North Carolina: Petition of the Mexico Beach Town Council, Fla., relative to the Outer Continental Shelf; jointly, to the Committees on Merchant Marine and Fisheries and Interior and Insular Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2668

By Mr. LEVITAS:

—Page 20, insert after line 6 the following:

APPROVAL OF RULES

SEC. 16. (a) No funds appropriated to the Consumer Product Safety Commission for fiscal year 1984, 1985, 1986, 1987, and 1988 under the amendment made by section 2 of this Act may be used to place in effect a consumer product safety rule under the Consumer Safety Act, a regulation under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, or a regulation under section 4 of the Flammable Fabrics Act which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1988, unless a joint resolution approving such rule or regulation has been enacted.

(b) To carry out subsection (a) the Consumer Product Safety Commission shall transmit to the Secretary of the Senate and the Clerk of the House of Representatives a copy of each consumer product safety rule promulgated by the Commission under section 9 of the Consumer Product Safety Act, each regulation promulgated by the Commission under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, and each regulation promulgated by the Commission under section 4 of the Flammable Fabrics Act, which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1988.

(c) For purposes of subsection (a), the term "joint resolution" means—

(1) in the case of a consumer product safety rule, a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the consumer product safety rule which was promulgated by the Consumer Product Safety Commission with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately;

(2) in the case of a regulation promulgated under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the regulation which was promulgated by the Consumer Product Safety Commission under section of the Federal Hazardous Substances Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately; and

(3) in the case of a regulation promulgated under section 4 of the Flammable Fabrics Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the regulation which was promulgated by the Consumer Product Safety Commission under section 4 of the Flammable Fabrics Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately.

(To the Shelby amendment in the nature of a substitute.)

—At the end of the matter proposed to be inserted by the amendment insert the following:

APPROVAL OF RULES

SEC. 3. (a) No funds appropriated to the Consumer Product Saftey Commission for fiscal year 1984, 1985, or 1986 under the amendment made by section 2 of this Act may be used to place in effect a consumer product safety rule under the Consumer Product Safety Act, a regulation under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, or a regulation under section 4 of the Flammable Fabrics Act which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1986, unless a joint resolution approving such rule or regulation has been enacted.

(b) To carry out subsection (a) the Consumer Product Safety Commission shall transmit to the Secretary of the Senate and the Clerk of the House of Representatives a copy of each consumer product safety rule promulgated by the Commission under section 9 of the Consumer Product Safety Act, each regulation promulgated by the Commission under section 2(q)(1) or 3(e) of the Federal Hazardous Substances Act, and each regulation promulgated by the Commission under section 4 of the Flammable Fabrics Act, which rule or regulation is published in final form by the Commission after the date of the enactment of this subsection but before October 1, 1986.

(c) For purposes of subsection (a), the term "joint resolution" means—

(1) in the case of a consumer product safety rule, a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the consumer product safety rule which was promulgated by the Consumer

Product Safety Commission with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately;

(2) in the case of a regulation promulgated under section 2(q)(1) or 3(e) of the Federal Harzardous Substances Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the regulation which was promulgated by the Consumer Product Safety Commission under section of the Federal Hazardous Substances Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately; and

(3) in the case of a regulation promulgated under section 4 of the Flammable Fabrics Act, means a joint resolution of the Congress which states the following after the resolving clause: "That the Congress approves the regulation which was promulgated by the Consumer Product Safety Commission under section 4 of the Flammable Fabrics Act with respect to and which was transmitted to the Congress on ", with the blank spaces being filled in appropriately.

CONFERENCE REPORT ON H.R. 3132

Mr. BEVILL submitted the following conference report and statement on the bill (H.R. 3132) making appropriations for energy and water development for the fiscal year ending September 30, 1984, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 98-272)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3132) making appropriations for energy and water development for the fiscal year ending September 30, 1984, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 5, 8, 11, 15, 19, 20, 33, 34, 38, and 39.

That the House recede from its disagreement to the amendments of the Senate numbered 12, 28, 29, 31, 36, and 41, and agree to the same.

Amendment numbered 1:

That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$133,810,000*; and the Senate agree to the same.

Amendment numbered 2:

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$884,104,000*; and the Senate agree to the same.

Amendment numbered 3:

That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows: , *of which $5,200,000 shall be made available for the Miami Harbor, Bayfront Park project, Florida; and, in addition, notwithstanding any other provision of law, $10,000,000, to remain available until expended, for the Yatesville Lake construction project*; and the Senate agree to the same

Amendment numbered 6:

That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$300,480,000*; and the Senate agree to the same.

Amendment numbered 7:

That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,184,492,000*; and the Senate agree to the same.

Amendment numbered 9:

That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$33,831,000*; and the Senate agree to the same.

Amendment numbered 10:

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$33,161,000*; and the Senate agree to the same.

Amendment numbered 13:

That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows:

In lieu of the sum proposed by said amendment insert *$10,000,000*; and the Senate agree to the same.

Amendment numbered 14:

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$165,600,000;* and the Senate agree to the same.

Amendment numbered 18:

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$45,000,000;* and the Senate agree to the same.

Amendment numbered 21:

That the House recede from its disagreement to the amendment of the Senate numbered 21, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$1,951,609,000*; and the Senate agree to the same.

Amendment numbered 23:

That the House recede from its disagreement to the amendment to the Senate numbered 23, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$638,250,000*; and the Senate agree to the same.

Amendment numbered 24:

That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$6,547,875,000*; and the Senate agree to the same.

Amendment numbered 27:

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$366,056,000*; and the Senate agree to the same.

Amendment numbered 30:

That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$156,437,000*; and the Senate agree to the same.

Amendment numbered 32:

That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$194,630,000*; and the Senate agree to the same.

Amendment numbered 35:

That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment, as follows:

Restore the matter stricken by said amendment amended to read as follows:

SEC. 306. Not more than $500,000 of funds available to the Federal Energy Regulatory Commission shall be available for updating the comprehensive water resources analysis covering Merced county, Mariposa county, Madera county and Fresno county in California, in accordance with the provisions of sections 4(a) and 10(a) of the Federal Power Act including such public hearings as are necessary and appropriate for that purpose: Provided, That notwithstanding any other provision of law or regulation, the construction of any dam or hydroelectric facility on Whiskey Creek, Nelder Creek, and Lewis Fork of the Fresno River, all located in Merced county, Mariposa county, Madera county and Fresno county in California, shall be suspended and deferred until completion of the aforementioned updating of the comprehensive water resource analysis covering that area, and any permit, license, or exemption issued by the Federal Energy Regulatory Commission shall be modified as necessary to be consistent with the results of that analysis.

And the Senate agree to the same.

Amendment numbered 37:

That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$145,000,000*; and the Senate agree to the same.

Amendment numbered 40:

That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$125,500,000*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 16, 17, 22, 25, and 26.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3132) making appropriations for energy and water development for fiscal year ending September 30, 1984, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effects of the action agreed upon by the managers and recommended in the accompanying conference report.

Report language included by the House which is not changed by the report of the Senate, and Senate report language which is not changed by the conference is approved by the committee of conference. The statement of the managers, while repeating some report language for emphasis, does not intend to negate the language referred to above unless expressly provided herein.

TITLE I—DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

General investigations

Amendment No. 1: Appropriates $133,810,000 for general investigations instead of $148,733,000 as proposed by the House and $118,435,000 as proposed by the Senate.

In connection with the San Francisco Bay Shoreline, California, study, $100,000 is included to continue the flood control investigation of the White Slough area in Solano County.

Of the funds appropriated for the Eastern South Dakota and Upper Big Sioux River, SD&IA study, up to $130,000 may be transferred to the U.S. Geological Survey for hydrologic investigation of the Big Sioux aquifer supported by the State of South Dakota.

The conferees recommend that the scope of the current Savannah Harbor, Comprehensive Study, Ga., be enlarged to consider the impacts of proposed upstream landside container facilities in conjunction with completion of the present study. In addition to the $168,000 appropriated for this study, $125,000 of available funds is to be used to investigate these impacts.

Because of the recent severe flooding in the Salt Lake metropolitan area, the corps is directed to use $400,000 of available funds to update and confirm project data related to the Little Dell Lake in Utah. The Corps of Engineers is further directed to accelerate project planning and preparation in anticipation of construction.

The conference agreement includes $300,000 to update the White River, Ark., authorization report. The updated study should include a review of improvements needed in the Black River, Ark., portion of the White River Basin, particularly streambank erosion control in the Lawrence County, Ark., reach of the Black River.

The conference agreement includes an additional $400,000 over the budget for the Ohio River Main Stem study to expedite completion of the interim report on the Montgomery Locks and Dam, Dashields Lock and Dam and Emsworth Locks and Dam.

The conference agreement includes $50,000 for the Monroe County, Florida, study.

The funds appropriated are to be allocated as shown on the following table:

- (PHASE I) AUTHORIZED FOR PHASE I STAGE OF ADVANCE ENGINEERING AND DESIGN IN THE WATER RESOURCES DEVELOPMENT ACT OF 1974 OR 1976
- (CP&E) CONTINUATION OF PLANNING AND ENGINEERING

Construction, general

Amendment No. 2: Appropriates $884,104,000 for construction, general instead of $882,829,000 as proposed by the House and $885,779,000 as proposed by the Senate.

The conferees are aware of the proposal to require increased cost sharing on the Blue River Channel Improvement, Mo., and Canaveral Harbor, Fla., projects. Congress has funded these projects for construction since 1979 and 1964, respectively, and the conferees reaffirm their past position that once the decision on construction is made, local cooperation is set in accordance with the authorizing document. Therefore, the Committee directs the Corps of Engineers to proceed with construction of these projects on that basis.

The conferees concur with the House and Senate Committee reports in funding the Tennessee-Tombigbee Water project from available funds. This action is not intended to show any decrease in the rate of activity leading to a scheduled September 1985 open-to-navigation date. During the House debate, it was stipulated that the remaining cost to complete the project for navigation and related features was $202,000,000. Of that amount, $180,000,000 is from the available deferred funds, and the remaining $22,000,000, if needed, from unobligated balances. Further, the conferees are agreed to the following language which was included in the Senate Bill:

No funds under this heading shall be used for further study or construction or in any fashion for a federally funded waterway which extends the Tennessee-Tombigbee project south from the city of Demopolis, Alabama.

In approving this language, the conferees are in agreement that no funds from this appropriation shall be used to construct any expansion of the currently authorized channel dimensions of, or to build duplicate locks for, the existing Black Warrior-Tombigbee Waterway south of Demopolis, Ala., to accommodate traffic increases on the Black Warrior-Tombigbee Waterway anticipated to be generated by completion of the Tennessee-Tombigbee Waterway. It is not the intent of the conferees to restrict necessary operation, maintenance, restoration, or rehabilitation on the existing, authorized Black Warrior-Tombigbee Waterway.

The conferees are aware of Congressional testimony on the need to construct access points and recreation facilities on the Ouachita and Black Rivers in the vicinity of the Felsenthal National Wildlife Refuge, Arkansas, in the Felsenthal Pool. Testimony indicates significant prior commitments to local interests to provide access roads, boat ramps, recreation and sanitary facilities. Accordingly, the conferees have included funds in the bill for the Corps to proceed with this work consistent with prior commitments.

In connection with the Pearl River project, the Committee is aware of possible economic, real estate, and induced drainage problems in other reaches associated with providing flood protection at the Jackson reach first. Therefore, in the development of the improvements for flood protection for the Jackson, Mississippi, area, the Corps shall carefully consider and minimize the adverse impacts of these works on other reaches of the Pearl River.

The funds included in the bill for the Sardis Lake, Okla., project include $500,000 for a water intake structure and $500,000 for recreation facilities.

The conference agreement includes $700,000 for the Burns Waterway Small Boat Harbor, Indiana, and $700,000 for the Cedar Island-Keaton Beach, Fla., projects under Section 107, Small Navigation Projects; $2,000,000 for the Key Biscayne, Fla., project under Section 103, Small Beach Erosion Control Projects; $1,300,000 for the Paauau Stream, Hawaii, project and $500,000 for the Salyersville, Ky., project under Section 205, Small Flood Control Projects; $125,000 for the Maple River, Mich., project under section 208, Small Snagging and Clearing Projects; $5,200,000 for the Miami Harbor Bayfront Park, Fla., and $300,000 for the John H. Bankhead, Ala., project under the Recreation at Completed Projects category.

The conferees direct that no upfront financing or cost sharing of projects under the small continuing authority programs be implemented until Congress fully considers and addresses such "innovative financing".

Amendment No. 3: Restores language proposed by the House and stricken by the Senate amended to read as follows:

, of which $5,200,000 shall be made available for the Miami Harbor, Bayfront Park project, Florida; and, in addition, notwithstanding any other provision of law, $10,000,000, to remain available until expended, for the Yatesville Lake construction project

Amendment No. 4: Deletes language proposed by the Senate relating to the Tennessee-Tombigbee project.

The funds appropriated are to be allocated as shown in the following table:

TYPE OF PROJECT:
(N) NAVIGATION
(FC) FLOOD CONTROL
(BE) BEACH EROSION CONTROL
(MP) MULTIPLE-PURPOSE, INCLUDING POWER

Revolving Fund

Amendment No. 5: Appropriates $9,500,000 as proposed by the House for a Corps of Engineers' learning facility and restores the House language.

Flood Control, Mississippi River and Tributaries, Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee

Amendment No. 6: Appropriates $300,480,000 for Flood Control, Mississippi River and Tributaries, Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee instead of $310,330,000 as proposed by the House and $297,960,000 as proposed by the Senate.

The Committee is aware of the value of the lower lake at Sardis Lake and that such lake could be maintained for fishing and boating without retarding the flow from the reservoir. Therefore, the Corps is directed to plan, design, and construct the works necessary to maintain desirable water levels in the lower lake without adversely impacting the drainage of flood water from the upper lake. The Committee is also aware of sedimentation problems occurring in parts of the lower lake and Upper Little Tallahatchie River and directs the Corps to determine if removal of such material is feasible at this time to fulfill the purposes of the project.

The funds appropriated are to be allocated as shown in the following table:

Type of Project	Flood Control, Mississippi River and Tributaries	Budget estimate	Conference allowance
	GENERAL INVESTIGATIONS		
	SURVEYS:		
	GENERAL STUDIES:		
(FDP)	BOEUF-TENSAS BASIN, AR & LA	185,000	985,000

TITLE II--DEPARTMENT OF THE INTERIOR
BUREAU OF RECLAMATION

General Investigations

Amendment No. 9: Appropriates $33,831,000 instead of $34,431,000 as proposed by the House and $31,981,000 as proposed by the Senate.

Amendment No. 10: Provides that $33,161,000 is to be derived from the reclamation fund instead of $33,761,000 as proposed by the House and $31,361,000 as proposed by the Senate.

Amendment No. 11: Deletes language proposed by the Senate relating to the reimbursement of costs of advanced planning studies.

The funds are to be allocated as shown in the following table:

PROJECT TITLE	BUDGET ESTIMATE	CONFERENCE ALLOWANCE
GENERAL INVESTIGATIONS		
ARIZONA		
LOWER COLORADO RIVER WATER CONSV.&EFFICIENT USE PROG..	400,000	400,000
CALIFORNIA

Construction program

Amendment No. 12: Appropriates $683,818,000 for the construction program as proposed by the Senate instead of $696,538,000 as proposed by the House.

The conference report includes a total of $45,360,000 for the McGee Creek, Okla., project, including $5,000,000 for roads associated with the project.

Amendment No. 13: Appropriates $10,000,000 for the Tucson Division instead of $15,000,000 as proposed by the House and restores House language stricken by the State.

Amendment No. 14: Provides that $165,600,000 shall be available for transfers to the Lower Colorado River Basin Development Fund instead of $179,000,000 as proposed by the House and $155,600,000 as proposed by the Senate.

Amendment No. 15: Deletes language proposed by the Senate relating to Garrison Diversion Unit.

While the conferees have agreed to delete the Senate bill language, the conferees direct that:

No appropriation, fund, or authority under this heading shall be used for construction of features of the Garrison Diversion Unit in North Dakota affecting waters flowing into Canada through chemical pollution, introduction of foreign biota, destructively increasing or decreasing quantity and/or rate of flow, or in any other harmful way.

Amendment No. 16: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides that not to exceed $20,000 shall be available to initiate a rehabilitation and betterment program with the Twin Falls Canal Company.

Amendment No. 17: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

: Provided further, That of the amount herein appropriated $3,000,000 shall be available to enable the Secretary of the Interior to begin work on rehabilitating the Velarde Community Ditch Project, New Mexico, in accordance with the Federal Reclamation Laws (Act of June 17, 1902, 32 Stat. 788, and Acts amendatory thereof or supplementary thereto) for the purposes of diverting and conveying water to irrigated project lands. The principal features of the project shall consist of improvements such as the installation of more permanent diversion dams and headgates, wasteways, arroyo siphons, and concrete lining of ditches in order to improve irrigation efficiency, conserve water, and reduce operation and maintenance costs. The cost of the rehabilitation will be nonreimburseable and constructed features will be turned over to the appropriate entity for operation and maintenance

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The funds are to be allocated as shown in the following table:

Loan Program

Amendment No. 18: Appropriates $45,000,000 for the loan program instead of $52,970,000 as proposed by the House and $40,500,000 as proposed by the Senate.

Amendment No. 19: Provides a limitation of $51,802,000 for gross obligations for the principal amount of direct loans as proposed by the House instead of $43,332,000 as proposed by the Senate.

The funds are to be allocated as shown in the following table:

General administrative expenses

Amendment No. 20: Appropriates $53,750,000 for general administrative expenses as proposed by the House instead of $53,400,000 as proposed by the Senate.

TITLE III—DEPARTMENT OF ENERGY

The summary table at the end of this title sets forth the conference agreement with respect to individual appropriations, programs and activities for the Department

Energy supply, research and development activities

Amendment No. 21: Appropriates $1,951,609,000 for Energy Supply, Research and Development Activities, instead of $1,964,209,000 as proposed by the House and $1,943,709,000 as proposed by the Senate.

Solar Energy

Solar Thermal Energy Systems.—The conferees agree to provide $6,000,000 for detailed design of one central solar power receiver under the House-stipulated conditions. No funds are available for salt gradient research. Up to $2,000,000 may be used for the thermal energy storage program identified in the House Report.

Wind Energy Systems.—The conferees agree with the Senate Report language concerning MOD 5A and 5B funding allocations and the wind systems comprehensive program management plan.

Biomass and Alcohol Fuels.—The conferees agree to provide $4,000,000 for regional biomass energy programs.

Ocean Energy Systems.—The conferees agree that funds are available for only feasibility studies of open-cycle systems and $1,500,000 is available for cold water pipe research.

Electric Energy Systems.—The conference agreement provides for the deep sea cable project under the guidance of the Senate Report.

Nuclear Fission

Breeder Reactor Systems.—The conference agreement provides $4,000,000 for design activities on the breeder reactor engineering test facility.

Remedial Action Program.—The conferees direct that the Department give priority to the undertaking of a decontamination research and development project involving the following sites and their vicinity properties, and has added funds to initiate the work: $2,000,000 for the site and vicinity properties in Wayne/Pequanak, New Jersey; $2,000,000 for the site and vicinity properties in Maywood, New Jersey; $500,000 for the site and vicinity properties near Albany, New York; and $500,000 for the former Cotter Corp. site at Latty Avenue, Hazelwood, Missouri.

Commercial Nuclear Waste.—The conferees agree that $9,600,000 is available for the subseabed waste program in fiscal year 1984.

Environment

Liquified Gas Fuels Safety Test Facility.—The conferees agree that the Department should proceed immediately to select a site and initiate construction on the Liquified Gaseous Fuels Safety Test Facility using funds available in fiscal year 1983 and fiscal year 1984. Additional funding requirements shall be submitted with the fiscal year 1985 budget request if additional construction funding is determined to be necessary.

Magnetic Fusion

The conferees agree that the Administration shall consider including funding in the fiscal year 1985 budget submission for aneutronix fusion activities for consideration by the Congress. Of the funds available, $2,000,000 is for operating expenses on Elmo Bumpy Torus to continue concept development activities, and funds are available as specified in the Senate Report for advanced torodial concepts and for fusion systems engineering activities.

Supporting research and technical analysis

The conferees agree that, prior to obligation of funds provided for the National Center for Advanced Materials, the Vitreous State Laboratory and the National Center for Chemical Research, the Department of Energy shall conduct a technical review and approve each project.

(Deferral)

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate overturning a portion of proposed Deferral No. 83-72.

Uranium supply and enrichment activities

The conferees agree to the following allocation of funding within the appropriations available for uranium supply and enrichment:

	Fiscal year 1984 budget	Conference agreement
GCEP operating expenses:		
(Advanced Centrifuge Development)	$106,400,000	$117,400,000
GCEP Construction	572,000,000	546,000,000
AIS Technology	59,900,000	89,900,000
AIS Development Module	2,400,000	2,400,000
General Reduction		−23,000,000
Uranium Resource Assessment		3,000,000
Subtotal	740,000,000	735,700,000
Other Items Not in Conference	1,499,300,000	1,499,300,000
Total	2,240,300,000	2,235,000,000

The conferees concur with the Senate in regard to procurement of baseline centrifuge machines and with the House in regard to continuation of the uranium resource assessment program at a reduced level.

General science and research activities

Amendment No. 23: Appropriates $638,250,000 for General Science and Research Activities instead of $643,250,000 as proposed by the House and $635,250,000 as proposed by the Senate.

The conference allowance includes $32,000,000 for the linear collider at the Stanford Linear Accelerator Center and $5,000,000 for the Colliding Beam Accelerator funded under the ISABELLE project. The allowance also includes funding for LAMPF and Bevalac as described in House Rept. No. 98-217. The conferees agree with the provisions for muon catalysis and nuclear data file as proposed by the Senate but direct that these activities be included under the Energy Supply, Research and Development Activities account.

Atomic energy defense activities

Amendment No. 24: Appropriates $6,547,875,000 for Atomic Energy Defense Activities instead of $6,558,375,000 as proposed by the House and $6,500,875,000 as proposed by the Senate.

Research, Development and Test.—The conference allowance includes $7,000,000 for buffer land acquisition at LLNL as proposed by the House and $5,600,000 for the new detonator facility at LANL as proposed by the Senate. Also included is $23,500,000 for the nuclear test facilities revitalization project.

Inertial Confinement Fusion.—The conference allowance includes $145,000,000. The increase over the budget shall be applied proportionately over the 1983 levels.

Production and Surveillance.—The conference allowance includes $1,666,915,000 for operating expenses which represents an increase of $192,415,000 over 1983 which is consistent with the overall increase in workload. The conference allowance includes $30,000,000 for MX warhead production facilities. Obligation of these funds is contingent upon approvals required in Senate Rept. No. 98-153. The $5,000,000 reduction in unobligated balances should be applied against the total Production and Surveillance program.

Materials Production.—The conference allowance includes $60,000,000 for Special Isotope Separation and $7,500,000 for the Process Facility Modifications at Purex. The conference includes $140,000,000 for enriched material as proposed by the Senate.

Defense Waste and By-products Management.—The conference allowance includes $15,600,000 for the by-product and beneficial use program.

Amendment No. 25: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, with an amendment as follows:

Delete the matter stricken by said amendment and insert the following:

: Provided, That notwithstanding any other provision of law, no funds may be obligated or expended after the date of enactment of this Act for Project 82-D-109 unless the President certifies to Congress that—

(1) for each 155mm nuclear weapon produced an existing 155mm nuclear weapon shall be removed from the stockpile and permanently dismantled; and

(2) formal notification has been received from the North Atlantic Treaty Organization nation in which such weapons are sought to be deployed that such nation has approved replacement of existing 155mm nuclear weapons with the new 155mm nuclear weapon.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference includes $50,000,000 for Project 82-D-109, 155mm artillery fired atomic projectile production facilities. The conference agreement would prohibit the obligation of the funds pending a Presidential certification.

Amendment No. 26: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate, with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

None of the funds appropriated by this Act, or by any other Act, or by any other provision of law shall be available for the purpose of restarting the L-Reactor at the Savannah River Plant, Aiken, South Carolina, until the Department of Energy completes an Environmental Impact Statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 and until issued a discharge permit pursuant to the Federal Water Pollution Control Act (33 U.S.C. 1251, et seq.) as amended, which permit shall incorporate the terms and conditions provided in the Memorandum of Understanding entered into between the Department of Energy and the State of South Carolina dated April 27, 1983, relating to studies and mitigation programs associated

with such restart. For purposes of this paragraph the term "restarting" shall mean any activity related to the operation of the L-Reactor that would achieve criticality, generate fission products within the reactor, discharge cooling water from nuclear operations directly or indirectly into Steel Creek, or result in cooling system testing discharges which exceed the volume, frequency and duration of test discharges conducted prior to June 28, 1983.

Consistent with the National Environmental Policy Act of 1969, and in consultation with State officials of South Carolina and Georgia, the preparation and completion of the Environmental Impact Statement called for in the preceding paragraph shall be expedited. The Secretary of Energy may reduce the public comment period, except that such period shall not be reduced to less than thirty days, and the Secretary shall provide his Record of Decision, based upon the completed Environmental Impact Statement, not sooner than December 1, 1983, and not later than January 1, 1984.

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference agreement would require the preparation of an Environmental Impact Statement as required by the Senate, but would allow L-Reactor to be loaded with unirradiated fuel and continue with nonnuclear flow testing pending the completion of the Environmental Impact Statement. The conferees agree that this amendment not establish a precedent with regard to future decisions concerning compliance with the National Environmental Policy Act.

DEPARTMENTAL ADMINISTRATION

Amendment No. 27: Appropriates $366,056,000 for Departmental Administration instead of $371,056,000 as proposed by the House and $361,056,000 as proposed by the Senate.

The conferees agree that $500,000 shall be available for the Council of Energy Resource Tribes.

Amendment No. 28: Inserts language proposed by the Senate changing "such that the" to "so as to result in a" for purposes of clarification.

Amendment No. 29: Inserts language proposed by the Senate changing "not be greater" to "estimated at not more" for purposes of clarification.

Amendment No. 30: Identifies $156,437,000 instead of $161,437,000 as proposed by the House and $151,437,000 as proposed by the Senate as the final estimated appropriation for Departmental Administration.

POWER MARKETING ADMINISTRATION

BONNEVILLE POWER ADMINISTRATION FUND

Amendment No. 31: Deletes House language restricing the use of new borrowing authority.

CONSTRUCTION, REHABILITATION, OPERATION AND MAINTENANCE, WESTERN AREA POWER ADMINISTRATION

Amendment No. 32: Appropriates $194,630,000 for Construction, Operation and Maintenance, Western Area Power Administration instead of $184,630,000 as proposed by the House and $204,630,000 as proposed by the Senate

FEDERAL ENERGY REGULATORY COMMISSION

Salaries and expenses

Amendment No. 33: Appropriates $89,582,000 as proposed by the House instead of $94,582,000 as proposed by the Senate.

Amendment No. 34: Indentifies $29,582,000 as proposed by the House instead of $34,582,000 as proposed by the Senate as the final estimated appropriation for the Federal Energy Regulatory Commission.

Amendment No. 35: Restores language proposed by the House, amended to delete reference to the "Fifteenth Congressional District" and references the Counties of Merced, Mariposa, Madera and Fresno in California of that District.

	Budget estimate	Conference allowance
ENERGY SUPPLY RESEARCH AND DEVELOPMENT		
SOLAR ENERGY		
I. Solar applications		
A. Solar building energy systems	8,375	17,200
C. Photovoltaic energy systems		
Operating expenses	32,700	49,700
Construction	---	1,500
Subtotal, Photovoltaic energy systems	32,700	51,200
D. Solar thermal energy systems		
Operating expenses	13,325	33,750
Capital equipment	250	7,750
Subtotal, Solar thermal energy system	13,575	41,500
E. Biomass and alcohol energy systems		
Operating expenses	17,300	29,000
F. Wind energy systems		
Operating expenses	8,600	26,500
G. Ocean energy systems		
Operating expenses	---	7,000
Subtotal, Solar applications	80,550	172,400
(Operating expenses)	(80,300)	(163,150)
(Plant and Capital)	(250)	(9,250)
II. Other solar energy		
A. International solar energy program - OE	---	1,000
B. Solar technology transfer - OE	3,100	3,250
E. Program support - OE	---	1,000
F. Program direction - OE	3,009	6,000
Subtotal, Other solar energy	6,109	11,250
General reduction	---	-5,000
TOTAL, SOLAR ENERGY	86,659	178,650
(Operating expenses)	(86,409)	(174,400)
(Plant and Capital)	(250)	(9,250)
(General reduction)	---	(-5,000)
GEOTHERMAL		
I. Hydrothermal industrialization		
Operating expenses	---	2,000
II. Geopressured resources		
Operating expenses	---	5,000
III. Geothermal technology development		
Operating expenses	13,059	21,459
IV. Program direction - OE	494	1,000
TOTAL, GEOTHERMAL	13,553	29,459

		Budget estimate	Conference allowance
101010	HYDROPOWER		
101015	I. Small scale hydropower development - OE.....	---	500
101040	II. Program direction - OE.....	---	250
101050	TOTAL, HYDROPOWER.....	---	750
101090	ELECTRIC ENERGY SYSTEMS AND STORAGE		
101100	I. Electric energy systems		
101105	A. Electric field effects research		
101110	Operating expenses.....	6,600	3,000
101130	B. Reliability research		
101135	Operating expenses.....	6,000	3,500
101145	C. Systems technology.....	---	11,500
101180	D. Program direction - OE.....	102	500
101185	Subtotal,Electric energy systems.....	12,702	18,500
101215	II. Energy Storage Systems		
101220	A. Battery storage		
101225	Operating expenses.....	14,000	18,000
101245	B. Thermal and mechanical storage		
101250	Operating expenses.....	---	7,000
101270	C. Program direction - OE.....	200	700
101275	Subtotal, Energy storage systems.....	14,200	25,700
101300	TOTAL, ELECTRIC ENERGY SYSTEMS AND STORAGE.....	26,902	44,200
101350	NUCLEAR		
101355	I. Converter reactor		
101360	A. High temperature reactor technology		
101365	Operating expenses.....	---	30,000
101375	Subtotal, High temperature reactor technology....	---	30,000
101380	B. Light water reactor systems		
101385	Operating expenses.....	15,000	19,500
101400	C. Three Mile Island activities		
101405	Operating expenses.....	33,000	33,000
101410	Capital equipment.....	4,000	4,000
101415	Subtotal, Three Mile Island activities.....	37,000	37,000
101420	D. Advanced reactor systems		
101425	Operating expenses.....	4,980	4,980
101440	E. Program direction - OE.....	1,190	1,190
101445	Subtotal, Converter reactor.....	58,170	92,670
101450	(Operating expenses).....	(54,170)	(88,670)
101455	(Plant and Capital).....	(4,000)	(4,000)

	Budget estimate	Conference allowance
II. Commercial nuclear waste		
1. Terminal isolation		
Operating expenses	4,700	4,700
2. Waste systems technology		
Operating expenses	9,440	9,440
Capital equipment	360	360
Subtotal, Waste systems technology	9,800	9,800
3. Waste treatment technology		
Operating expenses	5,600	5,600
Capital equipment	600	600
Construction:		
84-N-105 General plant projects	1,400	1,400
Subtotal, Waste treatment technology	7,600	7,600
4. Program direction - OE	480	480
Subtotal, Commercial nuclear waste	22,580	22,580
(Operating expenses)	(20,220)	(20,220)
(Plant and Capital)	(2,360)	(2,360)
III. Remedial action		
1. Management of surplus radioactivity contaminated DOE facilities		
Operating expenses	15,360	15,360
Capital equipment	140	140
Subtotal, Management of surplus radioactivity contaminated DOE facilities	15,500	15,500
2. Remedial action for former DOE contractors installation MED/AEC sites		
Operating expenses	11,700	16,700
Capital equipment	300	300
Subtotal, Remedial action for former DOE cont installation MED/AEC sites	12,000	17,000
3. Grand Junction remedial action OE	1,500	1,500
4. Remedial action for inactive uranium mill tailing sites		
Operating expenses	27,125	27,125
Capital equipment	775	775
Subtotal, Remedial action for inactive uranium mill tailing sites	27,900	27,900
5. West Valley		
Operating expenses	36,000	36,000
6. Program direction - OE	1,085	1,085
Subtotal, Remedial action	93,985	98,985
(Operating expenses)	(92,770)	(97,770)
(Plant and Capital)	(1,215)	(1,215)

	Budget estimate	Conference allowance
IV. Nuclear fuel cycle		
A. Spent fuel technology		
Operating expenses	4,500	4,500
Capital equipment	500	500
Subtotal, Spent fuel technology	5,000	5,000
B. Fuel cycle R&D		
Operating expenses	31,385	31,385
Capital equipment	4,000	4,000
Subtotal, Fuel cycle R&D	35,385	35,385
C. Program direction - OE	1,422	1,422
Subtotal, Nuclear fuel cycle	41,807	41,807
(Operating expenses)	(37,307)	(37,307)
(Plant and Capital)	(4,500)	(4,500)
V. Advanced nuclear systems		
A. Space and terrestrial applications		
Operating expenses	30,135	30,135
Capital equipment	2,600	2,600
Subtotal, Space and terrestrial applications	32,735	32,735
B. Program direction - OE	1,370	1,370
Subtotal, Advanced nuclear systems	34,105	34,105
(Operating expenses)	(31,505)	(31,505)
(Plant and Capital)	(2,600)	(2,600)
VI. Breeder reactor systems		
A. Liquid metal fast breeder reactor		
Operating expenses	255,600	263,600
Capital equipment	19,100	21,100
Construction:		
84-N-101 General plant projects	1,000	1,000
84-N-102 Mods. to reactors	4,000	4,000
83-N-334 Safeguards & sec. Assess, imp., ANL,INEL,Id	1,000	1,000
78-6-C Safety research experimental facility, INEL, Idaho (A-E, Long-lead procurement and limited construction only)	1,100	1,100
78-6-E Liquid metal engineering center modifications, liquid metal engineering center, Santa Susana, California (A-E and long-lead procurement only)	5,000	5,000
78-6-F Fuels & materials examination facility, richland, WA	---	4,000
Subtotal, Construction	12,100	16,100
Subtotal, Liquid metal fast breeder reactor	286,800	300,800
B. Clinch River Breeder Reactor demonstration-OE.	270,025	---

	Budget estimate	Conference allowance
C. Water cooled breeder reactor		
Operating expenses	35,500	35,500
D. Program direction - OE	10,200	10,200
Subtotal, Breeder reactor systems	602,525	346,500
(Operating expenses)	(571,325)	(309,300)
(Plant and Capital)	(31,200)	(37,200)
TOTAL, NUCLEAR	853,172	636,647
(Operating expenses)	(807,297)	(584,772)
(Plant and Capital)	(45,875)	(51,875)
ENVIRONMENT		
I. Overview and assessment		
Operating expenses	30,400	30,400
Capital equipment	1,600	1,600
Construction - LGF test facility	3,000	1,000
Subtotal, Overview and assessment	35,000	33,000
II. Biological and environmental research		
Operating expenses	157,900	171,900
Capital equipment	7,700	7,700
Construction:		
84-ER-133 General plant projects	1,000	1,000
Subtotal, Biological and environ. research	166,600	180,600
III. Program direction - OE		
A. Overview and assessment - PD	5,375	5,375
B. Bio. and env. research - PD	3,600	3,600
Subtotal, Program direction - OE	8,975	8,975
Total, Environment	210,575	222,575
(Operating expenses)	(197,275)	(211,275)
(Plant and Capital)	(13,300)	(11,300)
FUSION		
I. Magnetic fusion		
A. Confinement systems		
Operating expenses	186,050	186,050
Capital equipment	20,650	20,650
Construction:		
80-MF-3 EBT Proof of principal exp	---	2,000
Subtotal, Confinement systems	206,700	208,700
B. Development and technology		
Operating expenses	77,310	78,310
Capital equipment	7,740	7,740
Subtotal, Development and technology	85,050	86,050
C. Applied plasma physics		
Operating expenses	76,040	76,790
Capital equipment	5,060	5,060
Subtotal, Applied plasma physics	81,100	81,850

	Budget estimate	Conference allowance
D. Planning and projects		
Operating expenses	48,700	48,700
Capital equipment	4,350	4,350
Construction:		
84-GPP General plant projects	6,500	6,500
78-3-A Mirror fusion test facility	30,000	30,000
Subtotal, Construction	36,500	36,500
Subtotal, Planning and projects	89,550	89,550
E. Program direction - OE	4,600	4,600
Total, Fusion	467,000	470,750
(Operating expenses)	(392,700)	(394,450)
(Plant and Capital)	(74,300)	(76,300)
SUPPORTING RESEARCH AND TECHNICAL ANALYSIS		
I. Basic energy sciences		
A. Nuclear sciences		
Operating expenses	37,900	37,900
Capital equipment	2,150	2,150
Construction:		
84-ER-141 A I P	270	270
Subtotal, Nuclear sciences	40,320	40,320
B. Materials sciences		
Operating expenses	125,110	125,110
Capital equipment	12,780	12,780
Construction:		
84-ER-111 M S L S	2,500	2,500
84-ER-112 National center for adv materials	25,900	3,000
84-ER-141 A I P	640	640
84-ER-142 General plant projects	300	300
84-ER-14 Vitreous State Laboratory	---	5,000
84-ER-15 National Center for Chemical Research	---	5,000
Subtotal, Construction	29,340	16,440
Subtotal, Materials sciences	167,230	154,330
C. Chemical sciences		
Operating expenses	75,500	75,500
Capital equipment	6,520	6,520
Construction:		
84-ER-141 A I P	350	350
84-ER-142 General plant projects	100	100
Subtotal, Construction	450	450
Subtotal, Chemical sciences	82,470	82,470

	Budget estimate	Conference allowance
D. Engineering, mathematical, and geosciences		
Operating expenses	33,670	33,670
Capital equipment	2,120	2,120
Subtotal, Engineering, math., and geosciences	35,790	35,790
E. Advanced energy projects		
Operating expenses	9,100	9,100
Capital equipment	310	310
Subtotal, Advanced energy projects	9,410	9,410
F. Biological energy research		
Operating expenses	10,580	10,580
Capital equipment	400	400
Subtotal, Biological energy research	10,980	10,980
G. Program direction - OE	3,970	3,970
Subtotal, Basic energy sciences	350,170	337,270
(Operating expenses)	(295,830)	(295,830)
(Plant and Capital)	(54,340)	(41,440)
II. Energy oversight, research analy. & Univ support		
A. Energy research analysis - OE		
1. Assessment projects	2,869	2,869
B. University research support - OE		
2. University reactor fuel assistance	1,500	1,500
3. University laboratory coop. program	3,500	3,500
5. Energy manpower assessment program	270	270
6. Education and training	200	200
Subtotal, University research support - OE	5,470	5,470
C. University research instrumentation	6,000	4,000
D. Program direction and oversight - OE	3,400	3,400
Subtotal, Energy oversight, res analy, & Univ sup	17,739	15,739
III. Multi-program facilities		
Construction:		
84-ER-101 Rehab. old utilities (LBL)	1,000	1,000
84-ER-102 Cooling water facility, Restor. (ORNL)	600	600
84-ER-103 Road repair (various locations)	3,000	3,000
84-ER-104 Facilities support Projects (various locations)	4,000	4,000
83-E-308 Rep power sys,INEL,LLNL,ORNL,RL	7,988	7,988
83-E-309 Electronics fac., ANL	4,150	4,150
83-E-310 Utility replacements	7,500	7,500
83-E-311 Emergency response center, ORNL	2,200	2,200
82-E-301 300 area utilities (HEDL)	4,400	4,400
82-E-302 Security facility (ANL)	2,300	2,300
82-E-305 Traffic safety improvements (HEDL)	800	800

	Budget estimate	Conference allowance
81-E-325 Energy Technology Lab (Sandia).....	1,600	3,100
80-ES-11 Idaho Lab Facility (INEL).....	1,062	1,062
Subtotal, Multi-program facilities.....	40,600	42,100
Total, Supporting research and tech. analysis....	408,509	395,109

TITLE IV—INDEPENDENT AGENCIES

APPALACHIAN REGIONAL COMMISSION

Salaries and expenses

Amendment No. 36: Appropriates $2,700,000 as proposed by the Senate instead of $2,500,000 as proposed by the House.

FUNDS APPROPRIATED TO THE PRESIDENT

Appalachian Regional Development programs

Amendment No. 37: Apropriates $145,000,000 for Appalachian Regional Development Programs instead of $150,000,000 as proposed by the House and $125,000,000 as proposed by the Senate.

Amendment No. 38: Earmarks $100,000,000 for the Appalachian Development Highway System as proposed by the House instead of $80,000,000 as proposed by the Senate.

NUCLEAR REGULATORY COMMISSION

Salaries and expenses

Amendment No. 39: Appropriates $465,800,000 as proposed by the House instead of $466,800,000 as proposed by the Senate. The conference allowance includes no funds for the Nuclear Data Link.

TENNESSEE VALLEY AUTHORITY

Tennessee Valley Authority fund

Amendment No. 40: Provides $125,500,000 for Tennessee Valley Authority Fund instead of $125,950,000 as proposed by the House and $122,500,000 as proposed by the Senate.

Reprogrammings.—The conferees agree that TVA shall submit to the Committees on Appropriations of the House of Representatives and the Senate all changes to the budget justification material submitted to the Congress or the base tables included in House, Senate or Conference Report on annual appropriations measures and take no action on such changes until 30 days after notifying the Committees. Changes of 10 percent or more to any program, project or activity are to be submitted. Any item mentioned in either Committee's report shall be considered an "Item of Special Interest" and shall be subject to these reprogramming requirements irrespective of the other criteria. In addition, all new starts or program cancellations are to be submitted as a reprogramming action.

The conferees are encouraged by recent progress in achieving financial participation in the Northern Alabama Coal Gasification Project and hope that the Synthetic Fuels Corporation will proceed to an early decision.

The following table summarizes the conference agreement on the TVA program:

CONFERENCE AGREEMENT

[In thousands of dollars]

	1984 budget estimate	Conference agreement
CAPITAL INVESTMENT		
Water resources:		
Columbia Dam and Reservoir		
New look at Pickwick Landing Dam	21,000	21,000
Additions and improvements	3,015	3,015
Land and forest resources:		
Recreation facilities	100	100
Land Between the Lakes	190	190
Economic resources: Yellow Creek Port		
Community resources: Local flood damage prevention facilities	610	610
National fertilizer development, chemical facilities:		
Curtain granulation unit		
Railroad tank car replacement	590	590
Suspension fertilizer unit	588	588
Water pollution control facilities	500	500
Fluid fertilizer storage facilities	1,500	1,500
Energy-efficient fertilizer process	1,100	1,100
Optimize ammonia plant	770	770
Replacements, improvements, and pollution abatement and support facilities	1,482	1,482
Ammonia-from-coal facilities	297	297
General services facilities	3,013	3,013
Subtotal, capital investment	34,755	34,755
EXPENSES		
Natural resources:		
Water resources	2,920	2,920
Reservoir system operations	19,490	19,490
Land and forest resources	4,059	4,059
Resource management and development support	2,541	2,541
Land Between the Lakes	6,705	6,705
Economic and community resources:		
Economic resources	8,160	11,160
Community resources	4,680	4,680
Agriculture resources development	3,955	3,955
National fertilizer development	28,615	28,615
Ammonia from coal	6,025	6,025
General services	595	595
Subtotal, expenses	87,745	90,745
Unallocated reduction	−14,000	
Total program financed from appropriations	108,500	125,500
FINANCING		
Appropriations	61,229	78,229
Unobligated balance carried forward	47,271	47,271
Total financing	108,500	[1] 125,500

[1] Of the total funding for fiscal year 1984 ($125,500,000), $47,271,000 shall be derived from funds appropriated in fiscal year 1983 and $75,229,000 in new appropriations requested in fiscal year 1984.

TITLE V—GENERAL PROVISIONS

Amendment No. 41: Deletes language proposed by the House providing for a 3 percent general reduction in various programs in the bill.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1984 recommended by the Committee of Conference, with comparisons to the fiscal year 1983 amount, the 1984 budget estimates, and the House and Senate bills for 1984 follow:

New budget (obligational) authority, fiscal year 1983	$14,535,691,000
Budget estimates of new (obligational) authority, fiscal year 1984	14,610,671,000
House bill, fiscal year 1984	14,180,003,000
Senate bill, fiscal year 1984	14,170,853,000
Conference agreement, fiscal year 1984	14,307,045,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1983	−228,646,000
Budget estimates of new (obligational) authority, fiscal year 1984	−303,626,000
House bill, fiscal year 1984	+127,042,000
Senate bill, fiscal year 1984	+136,192,000

EXTENSIONS OF REMARKS

THE SEBASTIANI WINERY

HON. TONY COELHO
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. COELHO. Mr. Speaker, I would like to take this opportunity to share with my colleagues the honor of recognizing one of the truly great vintners of fine California premium wines, Sam Sebastiani. Located in Sonoma Valley, the Sebastiani Winery epitomizes the family operated wineries of California, as an embodiment of the kind of bold and proud spirit that is required of independent winemakers and private businessmen. Sam Sebastiani has a keen perception of the future, and he is applying it to his winery by implementing higher technology into the winery's equipment; and yet, he still maintains a personal touch to insure that his wine will continue to be enjoyed by the consumer. Mr. Sebastiani is orchestrating both consumer needs and technology with an ultimate regard for quality. Sam Sebastiani is an artist, a perfectionist, and an innovator in the winemaking industry who is highlighted in the following article which appeared in the Sacramento Bee:

SAM SEBASTIANI: CHANGING THE WAY A WINERY WORKS

(By Mike Dunne)

SONOMA.—Over the past three years Sebastiani Vineyards has invested some $4 million to upgrade its winemaking and expand its staff from 180 employees to 210.

During that time, however, production has plunged from 3.4 million cases annually to 2.5 million cases.

And yet, Sam Sebastiani, the winery's stylish president, is as giddy as a winemaker who has been too long in the tasting room.

The drop in sales, after all, was planned, one of several steps in Sebastiani's 10-year program to turn around the winery's image.

In the past, Sebastiani Vineyards has been known primarily as a Northern California winery mass-producing simple, inexpensive, blended everyday jug wines with such broad appellations as North Coast and California Mountain.

By the end of the decade, if Sam Sebastiani's gamble pays off, Sebastiani Vineyards will be known primarily as a Sonoma County winery specializing in complex, elegant, premium varietal wines with such specific appellations as Sonoma Valley and Wildwood Vineyards.

In short, quantity is out, quality is in. By being more picky in selecting grapes, thereby cutting back the crush, and by eliminating 11 wines, including Chianti, Sparkling Burgundy and three dessert wines, Sebastiani is providing his expanded staff with more opportunity to think, to experiment, to improve the wines he is retaining. "I want to fall out of the top 10 poor quantity, the hit parade for volume. I want to be on the hit parade for quality."

The current realignment started in early 1980 when cancer killed August Sebastiani, the proud and popular 66-year-old country farmer who had guided the winery through the years of its most spectacular growth.

In assuming stewardship, Sam Sebastiani, then 39, moved quickly to impose his upbeat style on the winery—from hiring more managers to redesigning the bottle label.

August Sebastiani was an Old Country patriarch who ran the winery forcefully and independently, without departments or budgets. Sam Sebastiani, who hadn't even seen the winery's books until after his father's death, is a team player who manages with a master's in business administration and who outfits his fellow executives in matching red jackets of slick satin.

August's winemaking techniques were simple, basic and old-fashioned, and a tour of the winery could be completed within minutes. Today, a tour can take several hours as Sam Sebastiani stops repeatedly to point out costly high-tech equipment so spacey much of it could double for some of the characters in a George Lucas movie. He budgets $50,000 a year for experiments, and has increased his staff of enologists from five in 1980 to 11 today.

August resented the encroaching suburbanization about his vineyards and winery, and fought city and neighborhood efforts to control noise, dust, traffic and other offshoots of industrial winemaking. Sam is more conciliatory; he's painted the buildings in earthern tones and cloaked them in ivy to reduce if not hide their bulk; he has built sound barriers and replaced combustion-engine forklifts with electric models to reduce noise pollution; he has extended the city's bike path through a vineyard; and, to further assure that neighbors remain neighborly, he even has bought four neighborhood residences (a couple of them, ironically, were built and sold by Sam's grandfather, Samuele, who established the family winery in 1904).

The round and robust August sold his wine by cultivating the personable image of the little old winemaker who lives in the classic Italian stone house on the hill: faded denim jacket, striped bib overalls beat-up pickup truck, dirt under the fingernails, wine stains on the fingers. The lean and manicured Sam is equally image-conscious, although he puts less emphasis on his penchant for western shirts and cowboy boots than he does on snappy graphics (embossed bottles; labels in gold gilt), point-of-sale promotions recipe booklets; large and slick displays) and ambitious advertising campaigns ($3 million in 1982 compared with $450,000 in 1980). Sam has a pick up truck, too, but he often runs to the winery from his hillside home, a contemporary expanse of California redwood.

August was a recognized ornithologist, maintaining ponds for migrating waterfowl, breeding rare and endangered doves, swans and geese, taking delight in feeding the bird that most symbolized his tenure, the cute, quaint and common duck. Sam isn't as passionately involved with birds, although he has adopted as his personal logo the bald eagle, embossing it everywhere—doors, walls, casks, labels, press releases. To Sam, the strong, stately, distinctive—and endangered—bald eagle represents the family winery in the United States today, both as threatened species and as embodiment of the kind of bold and proud spirit that is needed to survive.

How bold is Sam Sebastiani? A case in point: As he started to introduce and promote new styles of wine he began to fear that consumers would mistakenly pick up a bottle of the old style, try it and then dismiss the entire line as no different nor better. Sebastiani hired another enologist, put him in charge of "QA" (quality assurance), and dispatched him to round up and get rid of the old styles of wine, particularly the older Mountain wines and the whites from the 1979 and earlier vintages. Some of it was sold to vinegar producers for $2.57 a case; much of it simply was dumped. Sebastiani figures the disposal cost the winery $2 million.

Over the past three years, Sebastiani Vineyards has come to resemble an outreach lab for the enology and viticulture department at the University of California, Davis. Welcome to Sebastiani A&M: Next spring in conjunction with UC Davis, 38 wine-grape varieties will be planted in a test plot on nearly three acres along the bike path behind the winery. Already, an experimental winery is at work within the winery proper, and it findings have prompted changes in Sebastiani's use of oak, its trellising techniques and its harveting practices. And ready to move from drawing board to construction is what may be the most sophisticated professional tasting room in the country: At the center of the $31,000 room will be a long table that will accommodate 12 samplers, each of whom will have at his disposal a permanently installed magnifying light, a Bunsen burner to better view the wine, a flexible faucet for rinsing glasses and a stainless steel spittoon that drains directly into the winery's plumbing system.

Sebastiani has been more selective in the grapes he is buying, eliminating nearly half the tonnage his father had been accepting, signing exclusive contracts with more highly regarded vineyards, and insisting that some growers change their cultural practices if they want to continue to sell their grapes to him.

In step with what appears to be a growing consumer perception of wine as a beverage meant to be taken at meals, more of Sebastiani's promotion is geared to the marriage of wine and food. The winery also has taken over a spacious hall above the old Sebastiani Theater in downtown Sonoma and is converting it into a wine and food education center for banquets, classes, seminars, and so forth.

So what do all these changes portend for the consumer? The cheap, simple, generic Mountain wines, perhaps the most visible Sebastiani product on store shelves, probably will be eliminated within a couple of years. In effect, they are being replaced by

the August Sebastiani Country Wines, seven upgraded varietal wines that generally sell for $4.99 to $5.99 per 1.5-liter, cork-finished bottle, fast becoming the most popular line in the Sebastiani stable.

Not as many specialty wines may be released, although Sebastiani has accumulated an enviable track record over the past three years. Its low-calorie Light Country Wine was well-received and its first premium sparkling wine, the Sebastiani Brut Three-Star, was critically acclaimed. In recent months its "Eye of the Swan" Pinot Noir Blanc has eclipsed its Chenin Blanc and its Green Hungarian to become the winery's top individual seller.

More wines will carry specific vineyard appellations and more will originate with Sonoma Valley grapes. The first Sebastiani wine with a vineyard appellation is its 1982 Elizabeth Ann Muscat Canelli from Wildwood Vineyards, to be released May 1 and to retail for around $7. (Elizabeth Ann is the daughter born to Sam and Vicki Sebastiani last November; the family's private stock of the wine is adorned with a label that prominently features a teddy bear.)

The viticultural, technological and enological changes under way at Sebastiani will be reflected in vintage varietals and Proprietor's Reserve wines of more complexity, finesse, elegance and subtlety. Sebastiani is particularly excited about the 1980 "Black Beauty" Zinfandel to be released late this year, a spicy, mouth-filling wine rich with varietal character; and the 1980 "Eagle" Cabernet Sauvignon, also to be released late this year, a wine of unusual depth, complexity and layered substance, with an aroma so tingly and peppery it may be jalapeno instead of the customary bell. The Zinfandel is expected to sell for around $10, the Cabernet for $15 to $17.

In appraising the winemaking styles of the two men, Sam Sebastiani indicates that his father was a traditionalist, blissfully content to whistle a simple but pleasant little tune in the vineyards. In contrast, he pictures himself more an orchestra conductor, working with much of the same music, but adding several instruments and concentrating more on nuance, complexity and a balanced if restrained intensity.

"My father's wines were direct wines. He wasn't trying to get a symphony going; they just went 'bonk!' He had a good beat, but there were no high notes; now we're concentrating on the high notes. We want fruit and oak in synch. We're getting into nuances in the wine that never existed before," said Sebastiani.

On the day he died, August Sebastiani urged his son "to always make wines that Sonoma County can be proud of."

And if he were to reappear today and walk into Sam's office, what would be his reaction?

"He'd say, 'It's tough, but you're doing it.' "●

PROTECTING THE RIGHTS OF THE HANDICAPPED

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. MILLER of California. Mr. Speaker, it is relatively easy—and all too common—to find convenient scapegoats for society's ills. Among the easiest targets are the mentally and physically handicapped.

Such a situation may well be developing in the dramatic shift in administration policy toward laws designed to protect the rights of the handicapped to a decent education and to guarantee their access to many buildings and public conveyances.

George F. Will has rightly castigated the nasty premise that a person's rights and benefits should be determined by that person's social utility.

Realizing that Mr. Will is not noted for an excessively liberal bent of mind, I commend his column to my colleagues. He has authored a concise and convincing conservative analysis of the destructive impulse by the Reagan administration to exclude the handicapped from full inclusion in American society:

[From the Washington Post, June 22, 1983]

INCLUDE THE HANDICAPPED

(By George F. Will)

In the contemporary spirit of ruthless full disclosure, I herewith disclose that I am sleeping with a government official. Any day now the Senate will do its clear and pleasant duty, confirming Madeleine Will as assistant secretary of education for special education and rehabilitation.

Without dwelling indelicately on the erotic life of Washington, let me say that I now know what it is to sleep with the Federal Register. Madame Secretary, a veteran of service with the Maryland Association of Retarded Citizens, falls asleep talking, and wakes up talking, acronyms and numbers. Remember how approvingly Keats spoke about the Grecian urn? That is how Ms. Will speaks about P.L. 94-142 and Section 504.

P.L. 94-142, the Education for All Handicapped Children Act, is to parents of handicapped children what Social Security is to the elderly: their Magna Carta. It establishes a right to an "appropriate" education in the "least restrictive environment." Section 504 (of the Rehabilitation Act of 1973, requiring that programs receiving federal assistance be accessible to disabled persons) means nothing to most Americans but everything to millions of citizens. They are citizens who have been excluded from fair social participation not because of their handicaps but because of handicapping social attitudes.

Writing in Scientific American about architectural barriers, Gerben DeJong and Raymond Lifchez argue that Section 504 regulations are government power in the service of conservative values—the escape from dependency, the achievement of self-reliance. The most pervasive barriers are attitudinal, and the worst is the belief that disabled persons are helpless and inevitably are drains on public resources.

A conservative research institution here (the Heritage Foundation) has just published the factually preposterous and morally repulsive through that a "key reason" why acacemic achievement standards have fallen is that the federal government has "dismantled an academically demanding curriculum" by catering to "special-interest groups," such as the handicapped, and has "favored the disadvantaged pupils at the expense of those who have the highest potential to contribute positively to society."

Leave aside the philistine social analysis: the idea that profound changes in society's educational expectations and achievements are the result of recent Washington decisions rather than of complex and autonomous cultural processes. But note this dangerous doctrine: handicapped persons are among those getting too much public assistance because, by some cost-benefit criterion, they do not have the capacity to make a sufficiently "positive" contribution to society. Note the nasty premise: an individual's enjoyment of rights is conditioned by the individual's social utility.

It is almost demeaning to assure such analysts that equity is economical. Institutionalization of the retarded is almost never necessary and almost always an expensive incarceration of potential taxpayers. And physically handicapped persons are seeking removal of barriers to self-help.

Handicapped citizens are as fully citizens as those of us who are mentally non-handicapped or temporarily able-bodied. They are just beginning to have access to social benefits that other citizens take for granted. When P.L. 94-142 was passed in 1975, 25 percent of all handicapped children were underserved and another 25 percent had no educational programs at all; they were more excluded from society's basic benefits than black children were in 1954. Now, just eight years later, we are invited to believe that federal largess toward disadvantaged pupils is a threat to America's meritocracy.

The Reagan administration's most serious self-inflicted wound has been its failure to practive creative exceptionalism. It has failed to find an area for action that is an exception to its domestic austerity and deregulation—action that would announce:

Although we conservatives believe government has been irrationally intrusive, we nevertheless know these are persons who cannot help themselves until government helps them. And we know there are conservative values that are not vivified until the federal government affirms them with strong regulations.

Instead, action in part from unconservative fidelity to ideological abstractions, the Reagan administration aroused the anxiety of an enormous constituency—the handicapped and their friends. It did so with some contemplated "deregulations" involving P.L. 94-142 and Section 504, changes that Congress would never permit.

Even just a generation from now we will, I hope, be mortified by the memory of our complacent acceptance of the social segregation of the handicapped—as mortified as we are today by the memory of racial segregation. We are barely at the beginning of the last great inclusion in American life, the inclusion of the handicapped, and especially the mentally handicapped. This should have been, and still could be, the field where the Reagan administration confounds its critics and shows a subtlety in its conservatism.●

SALUTE TO BLENHEIM BOTTLING CO.

HON. ROBIN TALLON

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. TALLON. Mr. Speaker, I have the pleasure and pride to have in my

district the Blenheim Bottling Co. With a staff of five, the Blenheim Bottling Co. is the smallest soft drink company in America, but they produce the best soft drink or soda, as we call it back home, in the world. Most people who live in the Sixth District grew up drinking the ale that brings tears to your eyes, but the rest of the country is just now catching on.

Just this past Sunday, the Blenheim Bottling Co., was featured on Charles Kuralt's "On The Road," and earlier this year, "PM Magazine," sampled the ale and shared the story with its audiences nationally.

I would like to take this opportunity to salute the Blenheim Bottling Co., its owners and the people who help to produce this very fine soft drink. The company is owned and operated by brothers Ed and Ron Dennis in a small town that shares its name. The town of Blenheim has a population of less than 100. At the Blenheim Bottling Co., they produce a variety of soft drinks, but they are most famous for Blenheim Ale. It is, ladies and gentlemen, ginger ale like you have never tasted before. Ed Dennis says they make ginger ale the old-fashioned way—they burn you. He is not joking either. I have been drinking Blenheim Ale all of my life and it never fails to open up my sinus, tickle my throat, or almost strangle me with its kick. Once you get past the initial sip, you are hooked and you will never drink those other brands of ginger ale again.

I know the Dennis brothers would not want me to share their secret recipe, so they did not give it to me. I can tell you though that Blenheim Ale is bottled with mineral water found in a spring just behind the plant. The water is naturally pure, so a lot of people think the ale just might have some medicinal value.

The Blenheim Bottling Co. started production, quite coincidentally, the same year as Canada Dry. Over the past 8 years, business at the Blenheim Bottling Co. has tripled. The word has gotten around and they have developed a loyal following, shipping the hot ale as far away as Alaska, California, Texas, New York, Florida, and Pennsylvania. The Blenheim Co. produces less than 200 cases of ale per day, they do not spend much on advertising, but the word has certainly gotten around about their product.

I would like to commend the Blenheim Bottling Co. for producing America's strongest and tastiest soda and for bringing so much good publicity to South Carolina's Sixth Congressional District.●

NEW MISS NORTH CAROLINA IS NORTH WILKESBORO GIRL

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. NEAL. Mr. Speaker, we in the Fifth District are proud to report that the State of North Carolina will be represented in the Miss America Pageant this year by Deneen Graham, a very talented and beautiful young lady from North Wilkesboro. Miss Graham is a junior at the prestigious North Carolina School of the Arts, and will surely be as impressive to Miss America judges and the national viewing audience as she has been to local and statewide judges.

I would like to share with my colleagues an article from the Winston-Salem Journal which discusses Miss Graham and her victory.

The article follows:

NEW MISS NORTH CAROLINA IS NORTH WILKESBORO GIRL

RALEIGH.—Miss Elkin Valley, Deneen Graham, who performed a jazz routine to "Sing, Sing, Sing," was crowned the 1983 Miss North Carolina last night. She is the first black to ever win the title.

Miss Graham, 19, of North Wilkesboro and a junior at the N.C. School of the Arts, choreographed her dance. She wore a black evening gown in that part of the competition and later a blue and white swimsuit.

She will receive a $4,000 scholarship, $2,000 cash, a fur coat and several wardrobes. She will represent North Carolina in the Miss America pageant in Atlantic City, N.J., in September.

The first runner-up was Miss Morganton, Patricia Kim Cozort, 23, who won a $1,750 scholarship. Miss Cozort, who performed "Lucy's Aria" from the "Telephone," an opera by Giancaro Menotti, is from Drexel. She is an Appalachian State University graduate working on a master's degree in music from the University of North Carolina at Greensboro.

Second runner-up and winner of a $1,200 scholarship was Karan Chavis, 19, a junior at the University of North Carolina at Chapel Hill, representing the Greater Greensboro area. She sang a jazz version of "From This Moment On" in the talent segment.

Patrician O'Quinn, Miss Goldsboro, was third runner-up and winner of a $1,000 scholarship. Miss Johnston County, Vicki Lynne Tharrington, 20, of Smithfield, was fourth runner-up and received an $800 scholarship. The East Carolina University junior performed a jazz dance to the song "Dance."

Miss Franklin County, Martha Rose Butler, won the most talented non-finalist award and received a $400 scholarship.

The other finalists who received the most points from a five-judge panel in this week's preliminary competition were: Margaret Elizabeth Griffin of Asheville, Miss Martin County; Mary Ellen Wiggins of Stedman, Miss Fayetteville; Patsy Jeanette Wright of Columbus County, Miss Columbus County; Monica Michelle Malpass of High Point, Miss Thomasville; and Teresa Lee Strawser of Hickory, Miss Hickory.●

WATER RESOURCES AND THE CITIES

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. EDGAR. Mr. Speaker, I would like to take this opportunity to commend to my colleagues testimony which was given today by Salt Lake City Mayor Ted Wilson on behalf of the U.S. Conference of Mayors. Mayor Wilson's testimony briefly presents the views of the Nation's mayors on a variety of issues concerning water resources. Mayor Wilson is chairman of the conference's committee on energy and environment.

For obvious reasons, the mayor's testimony focuses primarily on urban water issues. In a conversation in my office today, Mayor Wilson and I discussed his longstanding interest in water policy and touched on the important policy issues outlined in his testimony. The Conference of Mayors firmly believes that the Army Corps of Engineers "should be poised to help cities with their water problems in a vigorous way," and hopes that this commitment to urban water problems will be reflected in water policy legislation now making its way through Congress.

Urban flood control problems, which have been exacerbated by congressional inaction on water policy legislation, have become especially critical this year in Salt Lake City and other Western cities. Another important issue is urban water supply, a victim of our Nation's inattention to deteriorating public infrastructure. The Conference of Mayors supports legislation—H.R. 1644—introduced by myself and Representative CONTE and cosponsored by nearly 30 of our colleagues which would provide loans for water supply rehabilitation and conservation projects for existing water supply systems throughout the country.

I am pleased to submit, for the RECORD, Mayor Ted Wilson's testimony and commend it to my colleagues:

STATEMENT OF HON. TED WILSON, MAYOR OF SALT LAKE CITY ON BEHALF OF THE U.S. CONFERENCE OF MAYORS ON WATER RESOURCES AND THE CITIES

Mr. Chairman and members of the Subcommittee, I am Ted Wilson, Mayor of Salt Lake City. I am here this morning on behalf of the U.S. Conference of Mayors, which is composed of the nation's principal cities. Within the Conference, I serve as a Trustee and as Chairman of the Committee on Energy and Environment.

Urban water policy has been one of my chief preoccupations in my two terms as Mayor. In 1977, I was active in working with the federal government to relieve some of the impacts of the drought which afflicted many of our cities. Following that, I was pleased to serve, along with Mayor Ed Koch of New York City, on the President's Inter-

governmental Water Task Force. And of course, I have spent a good part of this year preparing for, and dealing with, the aftermaths of floods in Salt Lake City and the surrounding areas.

With the permission of the Subcommittee I would like to take a moment to say that I am extremely proud of the job we did in Salt Lake City in recent weeks. All elements in our city—citizens, school kids, all government agencies, and business—pitched in to help with the preparations and emergency work designed to save lives and property. Given the heavy snowfall all winter we had every reason to believe that the situation we ultimately faced would occur and to the maximum extent possible we undertook the planning and physical work necessary to properly manage a crisis that threatened to be a disaster of awful proportions.

Water policy will often be the victim of circumstances beyond control. We learned that in Salt Lake City this spring. But though we must take into account the extremes of nature in our overall policy, the proper planning, management, and financing of our water infrastructure can make a difference. That will require a new intergovernmental commitment, partnership and resources to improve our urban water supply and flood control capability.

The U.S. Conference of Mayors commends this Subcommittee for going forward with an urban water hearing this morning. Hopefully, this is just the first step towards enacting legislation this year to begin to deal with this need.

TOWARD AN URBAN WATER RESOURCE AND FLOOD CONTROL POLICY

Now is the time to deal with urban water resource and flood control needs. In the absence of a separate approach targeted to the overall problem of urban infrastructure, we believe it is appropriate to develop an urban water policy and program within an omnibus water resources legislative package.

Regrettably, Congress has been unable to enact omnibus water legislation since 1976. The backlog of much needed projects and resources is well known to this subcommittee. Our purpose this morning is to focus on the outline of elements which such legislation should contain it if is to be relevant to the broad and diverse needs of the nation's cities.

The Army Corps of Engineers Mandate.—The Army Corps of Engineers, by virtue of its technical expertise and experience, should be poised to help cities with their water problems in a vigorous way. But it is not. We believe this is the case because Congress has not provided the Corps with the legislative mandate to do so. Omnibus water legislation should affirmatively state the national interest in urban water supply and flood control problems and direct the Corps to get energetically involved in this area.

Reimbursement for Locally Initiated Work.—Cities could begin work on water supply and flood control problems now if there was a possibility for partial reimbursement at some later point by the Corps if projects met certain criteria. This authority was included in the 1976 legislation but expired approximately one year after enactment. Such authority should become a key part of any new omnibus legislation.

Planning.—Cities also believe that the planning program under existing Corps authority should be permitted to continue. While planning benefits are nullified unless followed by effective program implementation, planning funds have, and will help to ensure, a level of quality in the expenditures ultimately made.

Cost Sharing.—As a matter of principle, Mayors can support the concept of cost-sharing for water projects. Cities have benefitted from a wide variety of targeted federal efforts in the areas of transportation, housing, community and economic development and environmental quality; many of those have had State and local matching shares. A cost sharing approach is reasonable, so long as lands, easements and rights-of-way are taken into account in calculating the local share.

Federal Water Bank.—Mr. Chairman, the points I have just discussed are important, but of secondary importance compared to the heart of the recommendation we bring to you this morning. As an outgrowth of my work on the Intergovernmental Water Policy Task Force, the U.S. Conference of Mayors has adopted policy calling for the establishment of a Federal Water Bank to provide a dedicated source of capital for the financing of urban water system improvement and expansion and flood control. Such a program could be run by the Army Corps of Engineers, and be available to municipalities in the form of low-interest loans, with a local share required, and for projects based on sound planning. We believe such an urban water bank could be the catalyst which could bring about the rejuvenation of urban water systems in this nation. With a new urban mandate for the Corps, and a financing tool such as the Federal Water Bank, a new period of rehabilitation, and restructuring could occur for the nation's urban water systems.

Conclusion.—Mr. Chairman, on behalf of the U.S. Conference of Mayors, I want to thank you for the opportunity to present our views to the Subcommittee this morning. We have an excellent opportunity to make a real difference to the nation's water supply this year and the Conference pledges its best efforts to work with you towards that end.

I would be pleased to take any questions the Subcommittee might have.●

CATHOLIC GROUPS BELIEVE MX OPPOSED TO SOCIAL JUSTICE

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. VENTO. Mr. Speaker, one of the major issues still to be faced in this session of Congress is the question of the MX missile. Members will have to decide whether they believe that the MX should become part of our national security system. In making that decision, we must remember that national security is not an end in itself but rather serves to protect our society and to maintain the values of our society. One of my reasons for opposing the MX is that this weapon clearly does violence to these values.

One of our major groups dedicated to the maintenance of the values of our Nation is Network, a Catholic organization dedicated to social justice in the same tradition as the brave church in Poland. They are known for their careful analysis of social issues. I believe Members should study the Network position on the MX with the greatest care. The MX issue is one on which Members should vote according to their conscience and not because of some supposed need for sole loyalty to an administration. Thus, at this time I would like to bring to my colleagues' attention the Network position on MX.

NETWORK OPPOSES MX

Network, a Catholic social justice lobby, has historically opposed any legislation or weapons systems that would encourage the escalation of nuclear arms globally. Network opposes the MX missile system as a dangerous escalation of the nuclear arms race because of its first strike capability.

The existence of the MX challenges the Church's teaching on disarmament. Possessing a weapon system with a first strike capability constitutes an abandonment of the already morally ambiguous U.S. policy of maintaining nuclear weapons only as deterrents.

By opposing the MX, Network is helping to prevent the needless spending of billions of dollars, which could be used more constructively to achieve national security by improving U.S. citizens' quality of life. The cost factor alone infringes on the rights of the poor to the surfeit of resources in our land. The diversion of funds to this questionable weapon system channels funds, natural resources, and human talent away from important domestic priorities such as housing, food, education, energy, and job retraining.

Network rejects the MX as furthering the race for nuclear weapons superiority. Network seeks legislative solutions that increase the probability of stopping the arms race and of beginning peaceful negotiations between the two superpowers.●

THE FEDERAL ROLE IN EDUCATION

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. MILLER of California. Mr. Speaker, during the past several weeks few issues have captured the Nation's attention and concern as much as education. Beginning with the release last month of the National Commission on Excellence in Education's study "A Nation at Risk," the ongoing debate regarding the quality of America's educational system has escalated to the national level.

After quickly examining poll data, President Reagan decided to launch a nationwide campaign to demonstrate his concern for education. But he has come to class unprepared. The President's last minute cramming on education issues has been reflected in the inaccuracy of his remarks.

I would like to call to the attention of the Members of the House a recent column from the Washington Post which succinctly summarizes a few of the misconceptions and inaccuracies

the President has articulated during recent stump speeches on education.

The article follows:

IN EDUCATION, FEDERAL DOLLARS CAN HELP

(By Phyllis McClure)

President Reagan's comments on education are a perfect example of the failure of America's schools. He commits logical fallacies, makes assertions without supporting facts and cites examples that do not support his point. Were his teachers still at their blackboards today, they would be ineligible for merit pay.

At his press conference and his graduation speech at Seton Hall University last month, the president posited this syllogism: Federal funds for education have increased. Test scores have declined. Ergo, the one must have caused the other. Twenty-five points off for this logical fallacy.

The declining test scored Reagan cites are those on the Scholastic Aptitude Test, the exam taken by college applicants. He conveniently ignores the rising scores of elementary students, notably black students, as measured by the National Assessment of Educational Progress. During the 1970s, black fourth-graders made substantial gains in reading and math, while their white classmates registered lower gains in reading and a decline in math scores. Black eighth-graders also showed a greater rate of improvement in reading and math than did their white counterparts. Overall, these achievement gains by black students had the positive effect of closing the gap between black students scores and the national average scores.

Many observers credit these results to the $3 billion annual federal investment in compensatory education (formerly Title I, now Chapter I), to the Right-to-Read effort and to state compensatory education programs. But we should not commit the same error of logic as the president, coming to the opposite conclusion: that large federal expenditures have increased test scores. There is no solid, empirical evidence directly linking cause and effect. However, there is some strongly suggestive evidence.

The strongest gains in achievement during the 1970s were in the lowest performance quartile, precisely the students for whom Title I funds are designated.

The National Assessment shows the greatest improvements in reading, rather than math and science, a reflection perhaps of the fact that most compensatory money has gone into remedial reading.

Rising test results have been reported by inner-city schools, the very ones to which Title I funds are targeted.

Evaluations showing Title I students outperforming non-Title I students independently corroborate findings of the National Assessment.

President Reagan is most critical of high schools. He then asserts that the old solution—money—has been tried but "it failed." Twenty-five points off for an unsupported assertion.

In fact, the greatest bulk of federal education funds goes to elementary and higher education. According to the Congressional Budget Office, 34 percent of federal education expenditures in fiscal year 1979 was directed to elementary students, 12 percent to secondary students and 54 percent to post-secondary students. If high schools are the weakest link in the education system, federal money is not to blame.

The president's solutions for the deficiencies of our educational system are more local control and greater parental responsibility. As an example of the first, he cited an Austin, Texas, high school that had been reformed by its principal, with assistance from a desegregation order and an infusion of federal Emergency School Aid Act money, a program that the administration and Congress eliminated two years ago. Minus 10 points for an example that contradicts the main argument.

As for parental responsibility, federal education law has done more than local policy to give some parents genuine control over their children's education. Title I legally sanctioned parent councils to advise school officials on the educational program for disadvantaged children. The Education for All Handicapped Children Act gives parents of disabled students the right to participate in, and contest if necessary, educational decisions made about their own children. For these parents, local responsibility has been a code word for no say at all.

Reagan's response to the rising clamor for educational excellence is prayer in public schools and tax subsidies for private schools. He has yet to explain how these federal policies will assist educators, parents and businessmen in reconstructing America's public schools to meet the current challenge. We do need a national debate about how to improve education and what role the federal government might play. But let that debate be based on facts, not myths and distortions.●

PEPPY EDITOR PRINTS THE POSITIVE

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. COELHO. Mr. Speaker, Members of the House will certainly take interest in the recognition Mrs. Marguerite Campbell received in the April-May issue of Modern Maturity magazine.

Mrs. Campbell, a resident of Mariposa, in my congressional district, is the spirit behind the Mariposa Gazette, California's oldest continuously published weekly paper.

Mrs. Campbell, a 70-year old grandmother, is no stranger to the newspaper business. She has been involved in the publication of the Gazette since 1919, when her family purchased the paper. At 19, Mrs. Campbell was editor of a small paper in nearby Le Grand, and was said to be the youngest woman editor in the State.

Now, as owner-editor, she uses the Gazette as a voice for the people to push for community improvements, better roads and better schools. At present, the newspaper is embroiled in a fight to have a State-owned gem collection transferred from San Francisco to Mariposa. With the acquisition of the collection, she feels Mariposa may develop a college of mines, which would be a boost for the county's economy.

Mrs. Campbell and her family, who run the 5,000 circulation paper, take pride in keeping a personal tone in the Gazette. She welcomes contributions from everyone, and focuses the theme of the paper on local developments.

Marguerite Campbell has earned the respect of the residents of Mariposa through her years of dedication to her work and her community. Our colleagues, Mr. Speaker, will certainly join with me in saluting this great community leader.

At this point I would like to include a copy of the article in which Mrs. Campbell appeared.

The article follows:

[From the Modern Maturity magazine, April-May 1983]

PEPPY EDITOR PRINTS THE POSITIVE

(By Suzanne Larronde)

"I started to set type practically when I started to school," says Marguerite Campbell, chuckling.

More than 60 years later, Campbell, owner-editor of the Mariposa Gazette, which circulates through foothill towns of central California, is still setting type on occasion—and still dreaming of ways to help her community.

At present, the weekly newspaper owned by the 70-year-old grandmother is embroiled in a fight to have a state-owned mineral and gem collection transferred from San Francisco to Mariposa. "This could be wonderful," she explains. "If we could get that, we possibly could get a college of mines. This would be good for the economy of the county. This is my dream—the college."

For Campbell, using the Gazette to push for community improvements, such as better roads and schools, has been a family tradition. Three generations of her family have operated the 5,000-circulation paper, California's oldest continuously published weekly.

Founded in 1854, the Gazette has never missed an issue. Also, it is credited with publishing the first description of the beautiful and rugged Yosemite Valley.

Campbell was six when her parents bought the Gazette in 1919. As children, she and her brother Lowell and sister Kay grew up learning the business, cleaning out hell boxes and running the "snapper," an old hand press brought around the Horn of South America to San Francisco and then shipped to Mariposa by Wells Fargo Express in the early 1850s. She remembers nights when she'd sleep on stacks of newspapers while her parents closed out the week's edition.

At 19, she was editor of a small paper in nearby Le Grand and was said to be the youngest women editor in the state. Over the years, she learned every phase of the business, from typesetter to reporter to publisher.

In the minds of many, Campbell and the Gazette are one. "When you think of the Gazette, you just naturally associate it with Marguerite," says Darlene Rhodes, one of the town's 1,500 residents.

What's like being, so to speak, the voice of a community? Campbell replies, "It's nice to have the respect of the community. I respect people and they respect me."

What's the best part of the job? "I like people," she answers. "You are happy for them in their successes and you also cry for them in their troubles."

Some of Campbell's editorials have drawn angry and torrid reactions. "Oh, we have

some hot ones," she says. "We have a file of letters we could never print. We get some beauties."

Her older son, Dalmar, is publisher, his wife, Ruth, is managing editor. A daughter, Linda, works in composition and sales; and sister Kay, 65, still helps out. Some of Campbell's eight grandchildren do odds and ends.

For Linda, Dalmar and Campbell's other son, Dexter, the Gazette provided a valuable training ground in dealing with the public. All three worked their way through college by selling ads for the paper.

Five of the Gazette's correspondents are older people. Ann Costa, a great-grandmother well versed in the lore of nearby Bear Valley, has been a contributor for more than 50 years. Mary Tanner, in her 70s, has been supplying tidbits and news for three decades. She says, "Everybody wants to know what everybody else is doing, but I print only the good—no controversy. It's all positive."

In the march of modernization, Campbell hopes the paper will maintain its personal tone. If someone wants to submit a flowery, sentimental wedding announcement, for example, it's all right with her. "That's the advantage of being a small-town paper," she says. "We can put a little more of the personal touch into it. It makes us more individual. We can be ourselves and let people contribute as they feel."

Campbell works about one day a week, filling in as needed. "If we lose a printer, then I set type," she says with a smile. About reaching 70, the peppy editor says with gusto, "That's a status age; 70 is real neat."

As to the future of the Gazette? "It's my hope that the grandchildren will continue the tradition, but only to the extent they want to. They have to be happy in what they're doing."

She adds, "Putting out a newspaper is a lot of hard work. It's an all-consuming job, but once it gets in your blood . . ."●

CITY OF HOPE HOSPITAL

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. LIPINSKI. Mr. Speaker, I am honored today to call attention to an important medical and research facility. The City of Hope Hospital, in Duarte, Calif., has worked valiantly to reduce illness, suffering, and disease that plague our world. It has served its patients, its community, and its society in a manner that deserves to be recognized and praised.

The City of Hope's loving devotion to its patients, and its family orientated treatment has rendered it a model institution from which other hospitals can learn much. All patients, even those suffering from chronic ailments, are treated with dignity and personalized service. Furthermore, the City of Hope's tremendous commitment toward relieving pain and prolonging life has helped it earn the subtitle: "A Hospital With Soul."

The City of Hope has established itself in America as a leader among research facilities. Discoveries in the manufacture of human insulin, and diagnostic testing for hereditary diseases have improved the lives of millions. Today, research investigation continues in a diverse number of areas ranging from brain and nerve function to cancer immunotherapy. With our support, and continued efforts of doctors and researchers at the City of Hope, perhaps someday the diseases that plague America today will be eliminated from our society forever.

As an American, and a Member of Congress, I am proud of the City of Hope and the progress it has made in 70 years of existence. Through hard work, dedication, and the generosity of its contributors and staff, the City of Hope has increased in size from 2 small tents to the 49 building facility that today thrives in Duarte. Without sacrificing personal treatment, the City of Hope has grown up into a medical research and treatment facility that all can be proud of. I am confident that the City of Hope will continue to expand and improve its research efforts, and I wish it the best of luck in the many years to come.●

OPPOSITION TO MX MISSILE

HON. BRUCE A. MORRISON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. MORRISON of Connecticut. Mr. Speaker, I would like to share with my colleagues a statement to the U.S. Congress from the Americans for Democratic Action, an organization which is opposed to funding for the MX missile:

STATEMENT TO THE U.S. CONGRESS FROM AMERICANS FOR DEMOCRATIC ACTION IN OPPOSITION TO THE MX MISSILE

Following the July 4th recess the House of Representatives will resume consideration of the fiscal year 1984 Defense Authorization Bill. This will include a decision to authorize funds for the actual procurement of the MX ICBM. Americans for Democratic Action stands firmly opposed to any production of the MX, a multi-billion dollar weapon system with no acceptable military justification, and technical characteristics which may well render the U.S. less secure by increasing the likelihood of nuclear war.

The decision to deploy MX missiles in existing Minuteman silos is a grave error in judgment. The MX serves no logical nuclear deterrent function placed in a vulnerable basing mode. It thus serves no acceptable American military purpose. The MX, as the Administration has repeatedly and unequivocally stated, is not a bargaining chip. And it is not an acceptable part of any effort to "lead the Administration to arms control". Americans for Democratic Action urges Members of Congress to reassess the merits of the MX itself, and the effects MX procurement will have on the arms control process.●

IN DEFENSE OF CAPITALISM

HON. GENE TAYLOR

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. TAYLOR. Mr. Speaker, Mr. Gerald J. Lynch, A consultant to the chairman of the board of Colt Industries, Inc., recently presented a most eloquent defense of capitalism, in a speech before the Economic Round Table of Los Angeles, Calif.

Mr. Lynch is highly qualified to defend the position he has taken. He is the founder of the Mensco Co., and a former vice president of the Ford Motor Co.

His remarks, which follow, have been condensed for inclusion in the RECORD.

The remarks follow:

IN DEFENSE OF CAPITALISM

This morning I would like to consider with you the philosophic basic of capitalism and its corollaries, the market system and the system of free enterprise; some of the ethical implications of capitalism; and the significance of world trade to the market system. Then I shall identify some of the current threats to and compromises with capitalism as I see them. Finally, I would offer some reflections on where I think capitalism is headed.

In his anaylsis of economy, Adam Smith concluded, in his "Wealth of Nations" some 200 years ago, that the common good could best be served by a system which induced each individual to pursue his own interest within the bounds of justice. The fundamental features of the system he advanced were free enterprise, a market economy, competition, non-intervention by the State and, most important of all, profits, which, Smith concluded, should be society's reward to the individual for his efficient management of the economic resources in his custody.

After his own analysis, Karl Marx concluded, 100 years later, that the common good could best be served by central planning, government ownership of the means of production and distribution, government assignment of economic priorities, and the allocation of rewards by the State on the basis of perceived need rather than of performance.

Adam Smith believed, notwithstanding its motivation—i.e., self-interest—that the efforts of all individuals pursuing their own economic goals and interacting together would assure the attainment of the common socio-economic goals. Marx, on the other hand, ascribed to man a nobler motivation than did Adam Smith and, in addition, credited the State with much wisdom and efficiency in managing the collective economic efforts of all.

I must emphasize that they did not differ in their goals, they differed only in their hypotheses with respect to the nature of man and their methods of encouraging, as the case of Adam Smith, or directing, as the case of Karl Marx, his economic behavior.

The record of performance of capitalism and state socialism are there for all to behold. Even the most vigorous proponents of state socialism would not deny the inescapable fact that in terms of wealth,

income, standards of living, opportunities and upward mobility, including the masses, capitalism has proven itself in practice to be by far the more effective system of achieving the common goal.

Capitalism has done more in the last 200 years to provide wealth and income and opportunities and upward mobility to more people than any other economic system known to man. During the last 200 years, capitalism revolutionized the world more than any other force. It provided the economic framework which made the industrial revolution possible. After 5,000 years of blundering, the world discovered how wealth could be produced and sustained in a systematic way.

With this record of performance, it seems almost ironical that there are pitifully few apologists for the capitalistic system as compared to critics of the system, and worse still, those who through ignorance or malice would hobble the effectiveness of the system.

For every Milton Friedman and Bill Buckley, there are probably 100 others on our college campuses who critique the system unsympathetically and others in the media who in their selection or interpretation of news, create in the public mind a distorted image of the system.

THE MARKET MECHANISM

The market system under capitalism provides a self-correcting mechanism of assuring the most efficient use of society's resources and with that the opportunity to make a profit or a loss. This system requires individuals and corporations under very awesome penalties to manage their affairs within the hard and brutal disciplines of a free market.

I believe that most of us would agree that the principal purpose of government is to establish and enforce the rules by which the game is played. And in saying this I am not unmindful of the unbelievable growth in size and complexity of our economy since the days of Adam Smith, when the largest factory in England employed no more than 20. However, as a noted philosopher once said, "A concept which is sound in principle, is sound in all of its applications."

We have discovered over a period of 200 years that in a market system things move; more breakthroughs are made; new groups rise to wealth. The market system assesses existing arrangements in order to invent others to offer new services to meet unmet needs, to discover better ways.

The market system under capitalism is not for the faint hearted. The players in the game must accept the rules of the market system. I don't know of an American business which wasn't founded at the risk of someone's personal fortune. Every industry has a long obituary column of companies which failed to make the grade. But from the successes and failures have come our gigantic industrial complexes and a resulting standard of living for the American people which is unparalleled in the history of the world.

THE "SAFETY NET"

This might be an appropriate time to discuss the "safety net" for those who through no fault of their own are the disadvantaged or unable to compete in the market system, which has been characterized by some as "Social Darwinism"—the survival of the fittest. In its administration of the market economy, the private sector does adapt to current social and cultural values. We have come a long way in the last 50 years. In the depth of the Great Depression, the Secretary of the Treasury, Andrew Mellon, said he "wanted the slump to cure itself. It would in time", he said, "it always did." He said he would "liquidate labor, liquidate stock, liquidate the farmer, liquidate real estate—people will work hard, live more moral lives, values will be adjusted and the more enterprising people will pick up the wrecks of less competent people." This response today would be considered positively antediluvian.

Most of the successful corporations today recognize that without surrendering the incentives inherent in capitalism, it is possible, nay, necessary in their own corporate interest to reconcile what appears to be competing obligations to their constituencies; i.e., shareholders, workers, communities, suppliers, and customers, obligations which at one time appeared on the surface to be irreconcilable with capitalism.

Most corporations know that the private sector does not have a divine right to provide for the economic needs of society; that the private sector exists at the sufferance of society; and that society is not only democratic and observant, but also pragmatic.

They recognize that the private sector must serve society because society holds the franchise on the free enterprise system, which is the essence of capitalism. As long as society believes that business serves it well, this franchise remains secure. But when the public perceives that it is not well served, this franchise is in danger and the whole free enterprise is in jeopardy.

They recognize that one of its major tests is the ability to provide for those who can and will work—knowing full well that a collapse of our infra-structure would precipitate what the private sector probably fears most, its only visible alternative—state socialism. However, when all else fails, the public sector must provide a "safety net" for those who are unable to compete in our market economy. This country has been extremely generous particularly during the last 20 years, in providing such a "safety net."

Let me at this stage merely pose several questions: (a) who should be included in the "safety net", what should be the criteria, and for how long? and (b) how much support can society ask from the public sector to sustain this "safety net" without reducing the effectiveness of the private sector to a point where it can no longer sustain the "safety net" let alone its own requirements?

WORLD TRADE

A word about world trade. Our market system cannot begin to attain its potential except in the context of a free exchange of goods and services with our trading partners in the world. Forty percent of our agricultural land and one out of every five new jobs are directly related to exports.

Two centuries ago Adam Smith and David Ricardo set forth the basic case for the free trade system—namely, that it is to the advantage of nations to specialize in the production of goods and services in which they are relatively more efficient and to import from other nations goods and services in which they are relatively inefficient. By adherence to this law of comparative advantage, they said, nations can attain higher levels of consumption and real income than they would acting in isolation. Comparative advantage between countries are moving targets which change over time. But one constant trend in the last 20 years has been the increase in economic inter-dependence among the nations of the world, largely because of the growth of international trade.

Thirty years ago, the major obstructions to world trade were tariff barriers which were imposed by countries at the port of entry of goods and services. These barriers have been progressively dismantled as a result of GATT, the General Agreement on Tariffs and Trade. Since World War II, tariffs have dropped from a range of 22 to 69% in the late 1930's to about 5%.

A number of countries have devised in recent years non-tariff barriers to promote exports and restrain imports. These non-tariff barriers are hard to identify and quantify, but are very subtle and effective.

THREATS AND COMPROMISES

Let me identify some of the threats and compromises which could impair the effectiveness of our economic system. At this time, I sense no organized ideological threat to the system in the United States. What I do sense are forces which, if not restrained, could make it less effective, such as (a) the increasing burden of taxation imposed on the private sector as if the yield of the private sector were inexhaustible and (b) constant tinkering by government with the system as if it were indestructible. This tinkering takes the form of (a) legislation which would attempt to correct the "inequities" of the system, (b) use of the government's power to tax to accomplish is own socio-economic goals, by indirection, and outside the market system, and (c) agitation for protectionism which would deny us and our trading partners the full benefits of participating in the world market economy.

TAX BURDEN

First let's address the tax burden levied on the private sector. The aggregate tax take of all government—federal, state and municipal—is now 37% of our gross national product, three-fourths of which is imposed by the federal government—and growing. Oversimplified, the private sector works for government from January 1 through April 20 of each year and thereafter works for itself.

Our government by definition is a non-producer. It creates no wealth. It creates none of the income it spends or distributes to the objects of its largess. In short, it sustains itself only by taxing the output of the private sector. I don't think we can ever measure precisely the loss of effort in the private sector as the total tax take is progressively increased. It probably differs as between individuals and as between corporations. I would just add this.

Any tax is a disincentive to produce—unless the tax can be passed on. In their investment, staffing, management and pricing decisions, individuals and corporations calculate their probable after-tax profits and include in their calculations tax as an element of cost. I don't think we need Economics 101 to conclude that any tax of any amount is some disincentive to produce—or for that matter to consume. In saying this, I am not unmindful that government performs services which benefit the private sector, such as national defense, public education, police and fire protection and maintenance of the "safety net." The question is at what point does the cost of government exceed its yield to society? I am not sure that on the basis of observation alone, each of you has made your own independent judgment on this matter, as have I.

SOCIAL PROGRAMS

Let's examine the largest single item in the federal budget—that of social programs.

During the last 20 years the federal government has made massive expenditures to support the social programs launched by Lyndon Johnson and the Congress in furtherance of the Great Society.

These expenditures have increased from $30 billion in 1961, not the dark ages by any means—to almost $450 billion in 1982. This amounts to approximately 12% of our GNP—a staggering load for the private sector to bear.

In retrospect, we have been overwhelmed by the moral attractions and doability of the Great Society; we have spent far too much for far too little and with little sensitivity to the impact of these expenditures on the private sector. And, in so doing we have seriously compromised our national defense and have made imperative massive increases in defense expenditures just to maintain defense parity.

During the last 15 years alone, we have spent three times as much on social programs as we have on national defense—the reverse of the ratio in the 50's and early 60's. We have added materially to the federal debt, and finally, and probably worst of all, we have created a mindset with the beneficiaries of these programs which will make it difficult, if not impossible, to reduce these programs in the near future.

It is no coincidence that during the same period of growth in productivity in the private sector decreased from 3% in 1960 to a negative growth rate by 1981; that the average growth rate during the 20-year period was only one quarter of that of Japan and one-half of that of West Germany and France; and, finally, that during the same period, our national savings rate which is the principal source of capital for our economy declined to 3% as compared to 15% in Japan.

However, it is comforting to note that not a single new social program has been suggested by anyone during the last three years—mute but convincing evidence that even the most rabid advocates of the Great Society are now convinced that "enough is enough."

TAXATION FOR NONTAX PURPOSES

Not only does government levy an aggregate tax, which in my view at least is confiscatory and adversely impacts the output of our economy, but in subtle ways uses its power to tax, to reward and penalize selected economic activities outside the market system. The Federal Tax Code, which was initially intended as a revenue raising device, has evolved into a 2,000 page document with tax rewards and penalties by which government encourages or discourages, as the case may be, selected economic activities which the free market system would not accept or try to accomplish.

These tax techniques, which have developed into an art form, constitute a very insidious compromise with our market system. In effect they constitute a species of central planning which if the full implications were apparent to us, we would reject out of hand as the first step in State Socialism.

ENTITLEMENTS

The majority of the social programs are classified as "entitlements." They occupy a privileged status which no other federal program enjoys. They are established by law until the law is repealed. Most are indexed for inflation. The programs specify criteria for qualification. People who meet these criteria automatically qualify for benefits and funds are automatically appropriated—not as a result of a considered judgment from time to time by the Congress on the basis of changing national priorities, the state of the economy, or what the country can afford.

The word "entitlement" has an unfortunate connection. It suggests to the beneficiary an absolute right to receive. I don't mean to demean public welfare, but if the payments made under these programs were truly identified on the checks as "public welfare" it is possible that some of the checks in payment would be indignantly returned.

Some assume that Social Security payments represent the payment of an annuity which has been purchased. This is not the case. During the last 30 years, benefits have been recklessly increased by Congress, without offset in taxes, well beyond the initial actuarial assumptions of the plan, with the result that the average retiree receives his contribution plus interest in a matter of months. After that, and insofar as the retiree is concerned, payments are funded by a tax on employers in the private sector and its active work force—at a current aggregate rate of 13.4% which rises next year to 14%.

The added cost to the employer must be included in the price of goods and services. This represents an added burden on the private sector in its efforts to compete in the world market with countries which have had the political discipline to fund their Social Security programs on a current basis.

This also raises the tantalizing question as to how long the producing employees of society will willingly accept the burden of sustaining the aged and the disadvantaged. Many employees know that their Social Security tax is not deductable for income tax purposes and that in fact it represents a significant reduction in income. On a salary, for example, of only $35,000 per year, an employee will pay in 1984 7% of $36,000, or $2,450 a year which, depending upon his deductions, could represent in pre-tax dollars an effective salary increase of $2,500 to $3,500—a 10% reduction. Payments to retirees are currently being funded by taxes on employers and employees. I have often thought of suggesting to the Social Security Administrator that he do his best to make clear to retirees the source of Social Security payments by including three boxes on each Social Security check, as follows: "Box A", the portion which has been funded by the Beneficiary; "Box B", the portion being funded by employers; and "Box C", the portion being funded by the active work force. I am sure that this would upset the Grey Panthers no end and possibly precipitate a revolt by the work force who are now required to redeem the promises of the secure life to the older generation.

OUTLOOK—UNITED STATES

Our greatest interest obviously rests in the outlooks for the free enterprise system in the United States. Here the outlook is not clear, principally because of our political processes which make it extremely difficult to come to grips with what ails us.

In his Inaugural Address, Ronald Reagan stressed as imperatives the reduction of inflation, reduction in the growth of Federal expenditures, tax reductions, a more restrictive role for the federal government, a restoration of incentives to save, invest and produce, stripping the government of its role in regulation in areas which could not survive a cost-benefit analysis, the surrender to the States of responsibilities which had been unwisely assumed by the federal government and, finally, the need of capturing for all America the benefits of our market system.

In his first year in office, Reagan, with support from the Congress, achieved some spectacular successes, viz., the largest tax decrease in history, indexing income taxes for inflation commencing in 1985 and the beginning of a massive defense buildup to achieve parity with the Soviet.

Now inflation, as measured by the producers' and consumer price indices, has been virtually nil for six months; short-term interest rates have been reduced by one-half; all leading economic indicators are up; and the country appears to be on the threshold of one of its greatest recoveries.

The country is now engaged in a great watershed debate as to the direction this country should take with respect to government expenditures, taxation and deficits—all of which clearly impact our system of free enterprise.

CONCLUSION

In my defense of capitalism this morning, I suspect that in some respects I have been "singing to the choir." Nonetheless, I do hope that I have encouraged you to elevate capitalism to the level of respect it has earned since its inception, and I have stimulated you to become more articulate spokesmen for the economic system to which this country has been committed for over two centuries and which has served it well.●

IN MEMORIAM: PHILLIP BURTON

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. COELHO. Mr. Speaker, I would like to take this opportunity to share with all of you a beautiful poem written in honor of our late colleague, Phillip Burton, by Mr. Charles "Gus" Garrigus. Gus is not only a personal friend of mine and a constituent, but he is also the highly acclaimed poet laureate of the State of California.

IN MEMORIAM: PHILLIP BURTON

This is the requiem of the giant redwoods,
Great sky-crowned monarchs binding heaven to earth.
This is the tribute of the Queen Sierras,
Snow-crowned grandeur serving beauty's worth.
When valley mists roll down the wildland floors,
And eagles scream and soar past crags and peaks,
And lakes, like diamonds, sparkle in the sun,
Then shall we hear the wisdom Nature speaks.
The rushing rivers and the bowered brooks,
And all this wonderous wilderness enclave
Shall witness to the cause that Burton served,
Shall speak the heritage he worked to save.
No stone or plaque can tell the way he went.
These National Lands shall be his monument.●

EL SALVADOR PUBLIC FORUM

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. MILLER of California. Mr. Speaker, on June 11, 1983, I joined with concerned citizens and a distinguished panel in my district to hear testimony from expert witnesses about the situation in El Salvador. Several hundred people attended this event, which was sponsored by the Contra Costa Coalition Against Intervention in El Salvador. I believe that this attests to the growing public concern about our deepening involvement in El Salvador and in all of Central America. It also attests to public skepticism that the current militaristic course of our policy can succeed.

I would like to share with my colleagues a resolution on El Salvador prepared in conjunction with the public forum. The statement, signed by church and local officials, and educators, calls for a broad-based political solution to Central America's turmoil, one that will end the suffering of the peoples of the region.

RESOLUTION ON EL SALVADOR

As individuals and organizations throughout Contra Costa County, we join together in common concern over the growing human suffering in El Salvador and the failure of U.S. policy to pursue wholehearted efforts for a just and lasting peace.

As U.S. citizens we are deeply concerned with the role of our government in this suffering and with the present administration's failure to recognize the human and political nature of the problems in El Salvador. By insisting that the turmoil in Central America is caused by communist-inspired outside interference, the administration has failed to produce a coherent policy which addresses the real nature and underlying cause of the conflict and violence in Central America. In its attempts to impose a military solution on the situation in Central America, this administration violates the ideals and basic values of the people of our nation.

Furthermore, the best interests of our people are being jeopardized by the drain on the economy which is occurring as badly needed funds are diverted to military use in Central America. Tax monies used to support the oppressive, brutal regime in El Salvador should—indeed, must—be made available to develop jobs and provide basic human services here in Contra Costa County and throughout the U.S.

Therefore, to avert the tragedy of continuing and escalating warfare in Central America and the tragic consequences of such warfare on the lives of U.S. citizens, we call upon our government to do the following:

1. Stop all further military aid to and intervention in El Salvador, Honduras and Guatemala.

2. Demand that the Salvadoran government respect the basic human rights of its citizens by making a concerted and significant effort to comply with internationally recognized human rights.

3. Vigorously support proposals calling for unconditional talks leading to a negotiated political solution between all parties involved in the conflict in El Salvador.

4. Stop all activity aimed at the destabilization and overthrow of the government of Nicaragua.

5. Grant temporary political asylum to Central American refugees pending a resolution of the conflict there.

To further the purpose of this hearing, we the undersigned resolve to alert the American public to the dangers of a foreign policy based on a military rather than a broad-based political solution to the tragic conflict in Central America.

FATHER GEORGE CRESPIN,
Chancellor, Oakland Diocese.
NANCY FAHDEN,
Supervisor, Contra Costa County.
JERRY FILLINGIM,
Delegate, Contra Costa Labor Council.
RICHARD WALKER,
Professor of Geography, University of California.
GEORGE MILLER,
Member of Congress, Seventh District.●

RHODE ISLAND—A BEAUTIFUL STATE

HON. FERNAND J. ST GERMAIN

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. ST GERMAIN. Mr. Speaker, I wish to say a few brief words about an article that appeared in the June 28 edition of the Wall Street Journal, a publication that usually provides accurate, to-the-point news stories of interest to the business community. The front page article—written by a journalist who has not done his homework—paints a grossly inaccurate picture of my home State, Rhode Island.

Though it is not my custom to speak out on such matters, I find it necessary in this case. How a piece that smacks of little or no research would appear anywhere in such a publication as the Journal, let alone the front page, puzzles me. The author, whose credentials that make him an expert in analyzing an entire State are never established, takes several barbs at the biggest little State in the Union that are for the most part misleading.

It is not my intention to address any of the unfounded claims and inaccuracies contained in the article here, Mr. Speaker. I merely wish to point out that Rhode Island is a beautiful State that has something to offer to everyone—breathtaking beaches, old world and new world neighborhoods, industries to provide jobs, entertainment, you name it. Whichever way you experience the Ocean State, Rhode Island is diverse, and yes, small, and as time will tell, beloved by too many to let a journalist with an ax to grind do any damage.

Rhode Island is my home and I would not have it any other way.●

OPPOSE THE MX

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. LEVINE of California. Mr. Speaker, after the July 4 recess the House will again consider the fate of the MX missile. I have spoken out numerous times in the past against funding the MX. My reasons include the following: It will not increase our national security; it will destabilize the current balance of power between the Soviet Union and the United States; and it would needlessly contribute to our ever-growing budget deficit.

This deficit is the single factor responsible for the curtailment of needed programs for the elderly, children, the unemployed and those in need of health care. The Gray Panthers recently issued a statement opposing the MX. It recommended how better to use the over $20 billion the MX will cost. I believe my colleagues will benefit from the views of the Gray Panthers, which I would like recorded in the RECORD at this point:

STATEMENT FROM THE GRAY PANTHERS TO THE U.S. CONGRESS IN OPPOSITION TO THE MX MISSILE

The MX missile is among the most costly and dangerous of the first strike nuclear weapons in the Reagan administration's military program. Even the Reagan administration's own arms control negotiator, Paul Nitze, has stated that basing these weapons in Minuteman silos is "a threatening but vulnerable U.S. first strike counterforce capability" which "would increase crisis instability."

This twenty billion dollar, ten-headed nuclear monster is transparently part of what the administration itself has described as its plan for "prevailing" in a nuclear war with the Soviet Union. Instead of funding this suicidal illusion, Congress should be fully funding Medicare, Medicaid and other social programs. Instead of aggravating the problem of unemployment by funding the military build-up, Congress should fund programs for creating socially useful jobs in education, health, and the like. The Gray Panthers will continue to work vigorously against the MX missile, for a nuclear weapons freeze and for jobs with peace.●

W. L. TOBIAS RETIRES FROM McCOMB PUBLIC SCHOOL DISTRICT

HON. WAYNE DOWDY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. DOWDY of Mississippi. Mr. Speaker, Mr. W. L. Tobias, Sr., assistant superintendent of the McComb Public School District for 15 years, is retiring after providing the school system with a total of 31 years of loyal and dedicated service.

Mr. Tobias joined the school's administration in 1962. He served as principal of a local high school during the turbulent period of integration. With his professionalism, his composure, and his full understanding of all situations, he handled himself in a manner that earned him the utmost respect of his colleagues, students, and the entire community. He was a great educator and administrator. His presence will be greatly missed. I am sure my colleagues join me in extending my best wishes to him.●

SOVIETS USE CHEMICALS TO WAGE WAR

HON. STEPHEN L. NEAL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. NEAL. Mr. Speaker, claims that the Soviets have used toxic chemicals against Southeast Asians and Afgan freedom fighters have been largely ignored by the world community and this body. Mounting evidence from independent sources, however, tend to confirm those charges. An article that appeared in the June 26, 1983, issue of Parade magazine entitled "How the Soviets Use Chemicals to Wage War," contains the most complete and damning indictment of the Soviet Union on the use of toxic chemicals that I have seen in the popular print. I am not in a position to know whether the article is accurate, but it raises some profoundly disturbing questions. Mr. Speaker, it is time to get to the bottom of this situation. I am inserting the article into the CONGRESSIONAL RECORD in order that my colleagues may consider these serious charges. The article follows:

[From Parade magazine, June 26, 1983]

HOW THE SOVIETS USE CHEMICALS TO WAGE WAR

(By Al Santoli)

The Phu Bia Mountains of Laos are greenest in November. The long winter monsoon rains have ended and wildflowers are abundant in the rugged foothills. Lee Mai, a 25-year-old schoolteacher in the village of Moung Hong, was walking in a neighbor's field when he saw the helicopters come again.

He watched in horror as the metal birds circled above the community of 300 wooden and grass thatch houses. Startled parents tried to grab their screaming children and run for cover as exploding clouds of red smoke and a musty yellow rain descended from the sky. Those covered by the wet, sticky substance began spinning wildly in uncontrollable seizures, gasping for breath, blood spouting from their noses and mouths as they died.

Two years later, November 1982, across the Phu Bia range in the village of Nong Ching, 13-year-old Mai Lor was on harvest vacation from school. Early in the morning, as she was walking to begin work in her father's rice field, she saw an airplane spray the mysterious yellow substance. After cautiously waiting a few hours, Mai entered the field. She became dizzy and nauseous; her skin turned itchy and began to blister. For a week after the attack, Mai's entire family was bedridden with fever, nausea, diarrhea and burning eyes. Neighbors who had been directly sprayed died a violent death, blood pouring from every opening in their bodies.

The Lor family learned that neighboring villages, inhabited by Hmong tribespeople—many of whom had been America's allies in the war against the Vietnamese invaders and their Pathet Lao surrogates—had experienced "yellow rain" attacks in recent months, suffering many deaths. In January 1983, the Lor family tearfully made their last visit to the Nong Ching community church and joined their neighbors in a dangerous two-week walk to seek refuge across the Mekong River in Thailand.

In 1975, the Hmong population numbered 400,000 out of a total population of 3 million Laotians. Today, it is estimated at less than 75,000. Most have been killed or driven out by starvation or lethal chemical attacks. Dr. Khamsenkeo Sengstith, former bureau director of the Laotian Communists' ministry of health, defected to Peking in 1981. He states: "The Vietnamese use chemical weapons in the air and on the ground, killing thousands upon thousands of people."

American and Thai intelligence have monitored Soviet radio transmissions inside Laos regarding shipments of chemical weapons to the Phu Bia region and a Soviet general inspecting chemical munitions depots. The Laotian Air Force is run by 500 Soviet advisers. A Laotian pilot who defected in 1979 gave a detailed description of the chemical warfare missions he flew and the overall Soviet-Vietnamese program being waged against the Hmong. His accounts were verified by previous civilian refugee and resistance-fighter testimonies and satellite photographs. The pilot said this program is named "Extinct Destruction Operations" and is intended "to wipe out the Hmong people."

In 1963, reports of chemical-biological warfare (CBW) came out of Yemen. Since then, they have come from remote mountain regions in Laos, Cambodia, Vietnam and Afghanistan. Thousands of terrified homeless people have told the same story and have shown the same horrifying medical symptoms. Soviet military manuals explain the operational use of these weapons. Soviet bloc defectors testify to their use. Physicians document and treat countless victims. Yet world governing and scientific tribunals remain paralyzed and refuse to acknowledge the use of these weapons because they fear a new chemical arms race and are intimidated by the implications of underlying Soviet intentions.

Dr. B. A. Zikria, professor of surgery at Columbia University College of Physicians and Surgeons and a pulmonary specialist, has worked inside Afghanistan, caring for Mujahidin resistance fighters and civilians. In Baluchistan, he found a large number of people suffering from a mysterious variety of symptoms including chronic nosebleeds, nausea, shortness of breath, nervous tremors and skin lesions. All the victims described being attacked by black or yellow smoke from Soviet aircraft.

Some doctors found that the victims' skin problems only responded to medicine used for chemical burns. After examining numerous patients with breathing difficulty and black spots around their lungs, which ruled out tuberculosis, Dr. Zikria discovered that in medical history this problem has only been seen in chemical warfare victims. Returning to the U.S., Dr. Zikria studied reports from Laos and Cambodia and found almost identical symptoms in reported chemical warfare victims there.

Today, in New York, Dr. Zikria says: "Though there are debates over what is causing the problem, from the clinical standpoint the evidence is overwhelming that chemical warfare is happening. The effect of the agent on the victim is more important than its identification. As with cancer, we don't know exactly what causes it, but we can diagnose it by its effects—poisoning is a medical and clinical problem. The physician's reality is that thousands of people are suffering and dying, telling the same stories and showing the same signs."

Military specialists and government scientists in the U.S., Canada, Great Britain, France, West Germany, Norway, Thailand, Israel and New Zealand have confirmed the Soviet use of chemical warfare. Yet, at the United Nations, the Soviets and their surrogate governments in the countries where it is being used veto any attempts for on-site investigations. At a recent press conference in Bangkok, French Foreign Minister Claude Cheysson said his country was convinced that chemical weapons were being used in Asia.

Recently in Paris, Parade spoke with a top French military scientist and a government chemical-warfare expert. These authorities said that though they have identified toxic weapons substances in field samples from Southeast Asia and Afghanistan, they still have not developed adequate high technology to do a complete identification of all the toxins involved. They feel that we have only seen the tip of the iceberg of the Soviet CBW arsenal and are concerned that the French Army could be caught in a surprise attack.

The United States signed an international treaty with the Soviets in 1972, banning all such weapons. However, that treaty had no provisions for verification, and the Soviets have continued to produce up to 10,000 tons a year of nerve gas and toxic weapons. Military experts estimate that the Soviets' current arms stockpile contains 400,000 to 700,000 tons of poisons—15 percent to 40 percent of their total ammunition holdings.

In a Soviet military publication, Col. Oleg Penkovskiy wrote: "Soviet artillery units are all regularly equipped with chemical warfare shells, and our artillery is regularly trained in their use. Let there be no doubt; if hostilities should erupt, the Soviet Army would use chemical weapons against its opponents. The political decision has been made, and our strategic planners have developed a doctrine . . . Chemical shells and missiles may be considered just ordinary weapons available to the military commanders to be used routinely when the situation calls for it."

In 1977, Soviet bloc chemical-biological capabilities (standard for all Soviet bloc armies) were documented in the East German "Textbook of Military Chemistry."

"Toxins are agents which are produced by biological organisms such as micro-organisms, plants and animals and cannot themselves reproduce. By the middle of 1960, the toxins selected for military purposes were included among biological warfare agents. Today it is possible to produce various toxins synthetically.

"Toxins are not living substances; they thus differ from the biological organisms, so that they can be included among chemical warfare agents. When they are used in

combat, the atmosphere can be contaminated over relatively large areas.

"The toxic warfare agents can be aerosolized. They can be used primarily in microbombs which are launched from the air or in warheads of tactical rockets. Toxic warfare agents can be applied with aircraft spray equipment and similar dispersion systems."

This account accurately confirms what terrified tribespeople and farmers in the Near East and Asia have been trying to tell a disbelieving West. These events in far-off places may seem remote to many Americans, but a comparison of Soviet-U.S. capabilities in chemical-biological weaponry reveals frightening facts and figures:

The Defense Department estimates the Soviets outnumber us in chemical munitions by up to a 10 to 1 ratio; in delivery systems by 5 to 1; in production by 14 to 1; and in decontamination vehicles by 10 to 1. Experts estimate 72 percent of U.S. chemical stocks are of doubtful military value because of deterioration.

Soviet chemical warfare troops number up to 100,000, compared to 6,000 in the U.S. Soviet troops and chemical specialists have battlefield experience in Afghanistan and Southeast Asia and have used this to develop tactical integration of toxic warfare. NATO commanders doubt our capability to deter a chemical attack. While Soviet armor is sealed against chemical penetration, U.S. armor is woefully unprotected.

A massive Soviet surprise attack on NATO could render our forces defenseless. The Soviets have the ability to spend chemical agents over a large area by a number of means. Their FROG and SCUD missiles, similar to our Pershings, all have chemical capabilities. The U.S. Navy now feels our battleships are vulnerable to Soviet cruise missiles tipped with chemical warheads.

Small chemical rockets are now used on Soviet helicopters, jets and biplanes (crop dusters). A single 200-pound toxic bomb can cover half a square kilometer with nerve gas. MiG 27 aircraft, the kind employed in Cuba, can deploy four tanks of nerve gas, each tank capable of covering four square kilometers. Satellite photos and intelligence assets have documented the existence of a large military chemical depot and training field in Cuba, where Soviet advisers train Cuban troops in chemical-biological warfare exercises.

Some Soviet toxins derived from fungi are impossible to detect by current U.S. gas alarms, and their minuscule particles could penetrate existing gas mask filters.

Though the new generation of Soviet toxins has been grouped under the term "yellow rain," a wide variety of toxic smoke colors are being used. Each causes varying effects, ranging from incapacitation, stupor and nausea to choking, neurologic fits and massive hemorrhage, causing quick death.

Guerrilla fighters in Afghanistan have experienced fatality rates of up to 70 percent, and large civilian populations have experienced rates of nearly 100 percent. Chemical experts believe that known chemicals like mustard gas, phosgene and sarin are being used, as well as new forms of toxins.

In June 1980, Dutch journalist Bernd DeBruin filmed two Soviet chemical helicopter attacks in Jalalabad, Afghanistan. The helicopters circled a village like a carousel, dropping cannisters and shooting rockets that produced a lethal yellow smoke. A few hours later, DeBruin entered the village and photographed a corpse that had turned blue-black from extensive internal hemorrhaging (all blood vessels in the body had burst) due to chemical exposure. DeBruin suffered from blisters, facial swelling, nausea, diarrhea and cramps for 10 days following the attack and still has skin lesions. DeBruin has photographed chemical shells with Soviet nomenclature. These shells and helicopter delivery systems match reports made by Cambodians since 1978.

Afghan resistance units have captured and photographed a number of Soviet chemical protective suits, antidote kits and gas masks contaminated with T-2 mycotoxin residue (not indigenous to the region). Soviet prisoners and defectors have confirmed the use of at least nine different types of chemical weapons, including the deadly sarin, phosgene and soman. One young soldier, Anatoly Sakharov, described an agent called "smirch," which has 100 percent mortality. His description matches reports from DeBruin, doctors in Afghanistan and Hmong refugees from Laos who described these effects to Parade.

Yuriy Povarnitsyn, a Soviet military chemical specialist, reported performing autopsies on Afghan villagers and taking soil samples after attacks. His account corresponds to stories coming out of Laos regarding the Vietnamese. In 1974, a Cuban emigré baffled U.S. analysts with descriptions of similar chemical warfare systems being taught in Cuba. He described a chemical land mine that validated a report by a Soviet defector in the 1960s. Similar reports recently have come out of Cambodia. After reading these descriptions, a Chinese official in Peking told a U.S. chemical expert, "We read your report with great fascination because we ran into the same mines on the Vietnam border." In 1980, the Vietnam's People's Army chemical warfare branch received the government's highest award, the Ho Chi Minh Medal.

In Cuba, Soviet instructors described the effects of the chemical mines as being "radiation-like"—which describes the effects of mycotoxins, once used in experiments by cancer researchers as an alternative to chemotherapy.

Sterling Seagrave, author of the book "Yellow Rain," says: "why are the Soviets using poisons? In a nuclear stalemate, only conventional weapons can be used in regional wars. Conventional weapons have become so complex and expensive—a new weapons system can bankrupt a national economy. Poisons, on the other hand, are cheap. And they have the killing power of nuclear weapons, without attracting so much attention.

"There's no big bang and there's no mushroom cloud. But all the people can be eliminated silently, as they have been in parts of Afghanistan. The new poisons are so bizarre and evaporate so rapidly that they make proof extremely difficult to obtain. But any serious study of Soviet military doctrine demonstrates that not only is CBW defensive gear a routine part of Soviet operations, so is CBW aggressive gear.

"In Afghanistan, for instance, Soviet helicopter gunships equipped with lethal chemical agents now perform routine duties like convoy security, which used to involve ground troops. This is only one of numerous examples that show the growing dependence on toxic weapons. And poison tactics and poison strategy have taken much of the role previously attached to tactical nuclear weapons in Soviet doctrine."

Dr. Bernard Wagner, professor of medical pathology at Columbia University, who just returned from a fact-finding visit to Southeast Asia, says with great concern:

"The threat of limited, controlled biological warfare is, at least for me, on a scale with nuclear war. With toxins having both acute and delayed effects, an aggressor can achieve his ends without the problems posed by a nuclear blast. Besides, toxins can be delivered in an insidious, almost undetectable manner.

"The current outcry against nuclear weapons must also extend to chemical-biological warfare. Our government, along with all other nations, must find a way to pressure the Soviet Union and its clients into halting this activity. Until then, prudence dictates that we formulate policies to safeguard populations at risk."

Today, while the urgent reality of chemical warfare is obscured in endless political and academic debate, thousands of defenseless men, women and children continue to suffer. On March 25, 1983, at Ban Vinai refugee camp on the Mekong River in Thailand, PARADE spoke with Tou Xiong, a 25-year-old Hmong resistance fighter. Tou has risked his life on numerous occasions to guide members of desperate families across the Laotian mountains in frantic escape from Vietnamese-Soviet "extinct distruction" campaigns. With the quiet intensity of one who has walked with death, he said:

"It is difficult for people to live in Laos because of the poison gas. Thousands and thousands of Hmong people have died. It took my group of 100 people one month to walk to Thailand. We had to pass through many patrols of Vietnamese and Pathet Lao soldiers. By the time we crossed the Mekong River, 75 people—including many babies and children—had died by starving, drowning or shooting.

"My people asked me to come to Thailand to ask the Americans if you have any medicine to take care of the poison gas today. If the Communists keep using this gas on the fields, the forests, the water and the villages, the Hmong Lao people will no longer have any life left."●

TESTIMONY OF CONGRESSMAN ROY DYSON ON H.R. 656, FEDERAL EMPLOYEE HEALTH BENEFITS REFORM ACT OF 1983, BEFORE THE SUBCOMMITTEE ON COMPENSATION AND EMPLOYEE BENEFITS

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. DYSON. Mr. Speaker, I was asked to testify before the Subcommittee on Compensation and Employee Benefits and include my testimony in the Record:

TESTIMONY OF CONGRESSMAN ROY DYSON ON H.R. 656, FEDERAL EMPLOYEE HEALTH BENEFITS REFORM ACT OF 1983, BEFORE THE SUBCOMMITTEE ON COMPENSATION AND EMPLOYEE BENEFITS

Madam Chairwoman, I appreciate the opportunity to testify before the Subcommittee on Compensation and Employee Benefits in support of H.R. 656, the "Federal Employees Health Benefits Reform Act of 1983." As you know, I am a co-sponsor of this legislation, and I strongly believe it will remedy many of the existing inefficiencies and inequities of the Federal Employees

Health Benefits Program. I address you today, however, not merely as a co-sponsor, but as a Representative whose constituents are deeply concerned over the recent policies and practices of the Office of Personnel Management.

During the last two years, as we know, benefits have been reduced by 12 percent, while premiums have increased at a rate of 56 percent. In an effort to "contain rising health costs", the Administration has simply imposed additional burdens on the federal employees enrolled in FEHB plans. One estimate of these additional costs runs as high as $500 per "average" employee. Most of the lost value in health benefits incurred by federal employees has resulted as much from the Office of Personnel Management's abject disregard for the well-being of its employees as from the uncontrolled increase in health care costs as a general service.

As I reviewed the record of last year's hearings, and especially the fascinating defense of OPM's actions by its director, Dr. Donald Devine, I was struck by the many contradictory and contorted assumptions underlying the Administration's handling of the FEHB program.

For example, it is clear that Dr. Devine assumes that preserving the financial health of the FEHBP requires sacrificing the physical and mental health of federal employees. Dr. Devine, it seems, was astonished to have discovered that the system was facing a potential $500 million "shortfall" in funding for the 1982 fiscal year. Despite the fact that conventional sources of funding were readily available to cover any unexpected costs, Dr. Devine refused to avail himself of these sources because he considered continued discretionary funding to violate his sense of "good business practices". Instead, his alleged "good business practice" led him to precipitate a crisis which we are today having to set right. While Dr. Devine's business judgement is very much in doubt, it is clear, and I am confident, that H.R. 656 can restore the program's financial integrity and fulfill our obligation to federal employees.

H.R. 656 increases the government's contribution rate to 75 percent of the premium costs for plans sponsored by the "Big Six", the largest of the more than 100 plans approved for inclusion in the FEHB program. If individuals enroll in plans which are substantially less expensive, the Government contribution can provide up to 100 percent of the premium costs.

By offering an additional 5 percent contribution to carriers of plans providing health care to annuitants over the age 65, whose medical needs are not also covered by Medicare, H.R. 656 reverses the tendency in FEHB plans to neglect the needs of the most vulnerable retirees. It permits employees involuntarily separated from their jobs to enroll in FEHB plans during their first year of unemployment, thus aiding the effort to protect the health of those without steady income. And it sets broad guidelines for minimum coverage, such as dental and mental health care, which all plans must now provide. This is in addition to the minimum "catastrophic coverage" which all plans must offer.

There are, of course, other critically important provisions contained in H.R. 656, such as the requirement that a three-week open season precede any contract period when changes in premiums or benefits have been made, when new plans have been approved, or when existing plans are terminated. And OPM will in future be prohibited from forcing carriers to reduce benefits by more than 5 percent, which should put a halt to the recent precipitous decline in the value of benefits.

In short, H.R. 656 stands on its own as a highly desirable and effective remedy to the crisis in FEHBP precipitated by Dr. Devine. But when compared with Dr. Devine's own proposed "reforms", the virtue of H.R. 656 takes on an even more brilliant luster.

The horrific record of neglect which Dr. Devine has compiled during the past two years can be eclipsed only by the probable consequences of his agenda for the years to come. He has finally unveiled a plan that has been floating around OPM for the last several months, and which, up to now, political expendiency has prevented from being formally introduced. It seems that his answer to the mess he has created is to sweep the whole program away with the so-called voucher system.

This system, which he has designed to remove the government from the role of "middleman" on the arrangement between employees and medical program carriers, is being promoted as a blow against rising health care costs. But as his actions make clear, he is less concerned about containing health care costs per-se than about reducing OPM's contribution to the health care costs of its employees. The voucher system will do this in a number of ways, but most disasterously by limiting the yearly increases in the value of the public contribution to increases in the consumer price index or some other general measure of inflation. Since medical care costs rise, as we all know, many times faster than most other services, employees will be able to purchase less and less coverage each year. The value of their benefits will plummet, and conceivably, under Dr. Devine's management, workers would be unable to afford the price of aspirin, let alone adequate medical care.

For these and a host of other reasons, H.R. 656 is a necessary and desirable reform. In closing, I will only add that many argue for these reforms on the grounds that without them, the U.S. Government cannot expect to attract highly qualified employees. It will suffer from a drain of competent staff, lost mostly to private concerns offering better health benefits. However true this point, there are also broader issues that trouble me. The Federal Government has promoted, for the last hundred years, the dynamic partnership between labor and management that has made our industrial democracy a model for the world to emulate. At no time since the Depression of 1930 has this partnership been more troubled than at this moment. Abrupt plant closings, unrewarded employee give-backs, and unilateral wage reductions must give way to a reaffirmed harmony of interests. Can we, as the nation's largest employer, expect to encourage the private sector to recommit itself to the guiding principles of an industrial democracy if we ourselves deny our responsibilities to our own employees? If our civil servants are to fulfill with skill and devotion their obligations to the career service. Can we, in good faith, mediate labor-management disputes and assist in negotiating settlements, if we continue to neglect our own obligations to deserving workers?

I think not, and I believe you and this subcommittee share my convictions.●

REPEAL OF THE ESTATE AND GIFT TAXES

HON. RONALD D. COLEMAN

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. COLEMAN of Texas. Mr. Speaker, today, I along with my colleague, Mr. Bryant, am introducing a bill which would repeal the sections of the Internal Revenue Code of 1954, pertaining to the Federal estate and gift taxes, along with the upcoming generation-skipping tax. This is a two-tier bill, because while it would repeal the Federal estate and gift taxes, it would also offset the revenue losses incurred by reducing the amount of a tax credit a corporation receives for investing in new equipment. This legislation is not merely giving away one thing and taking back another, but rather is an attempt to create a more equitable tax balance between citizen and corporation.

The original purpose of the estate and gift taxes was to check the vast amounts of wealth which were being passed from generation to generation within individual families. While the concept was just, it is no longer apparent today. Today, those in the upper income brackets have found ways to avoid the taxes. As A. James Casner, of the Harvard Law School, stated in front of the Ways and Means Committee in 1976:

> In fact, we haven't got an estate tax; what we have, you pay if you want to; if you don't want to, you don't have to.

To the contrary, however, those in the middle income brackets, those involved in family businesses and farms, are being hit hard by the tax. Upon grieving the loss of the family member who held the business, many families are forced to sell out in order to pay the taxes. Thus, for many whose dream was to pass along their years of hard work to the next generation, they have found that such a dream will not be possible.

While the Economic Recovery Tax Act of 1981 made many liberalizing revisions in the Federal estate and gift tax rules, we do not believe it went far enough. This is an antiquated, inequitable, and unproductive tax. We do not believe that these taxes check the flow of vast sums of wealth as they were once envisioned. Rather, we see this tax as a burden on the middle class, small business, family farms, and the communities which they support.

When one is forced to sell a business or farm after the death of a relative, more times than not, those holdings are bought up either by large corporations or agribusinesses. This not only affects the family, but also the well-being of the surrounding community. More often than not, when businesses

are bought up, they are bought by outside interests, thus taking away from the community in terms of its own economic well-being.

Thus, we believe the estate and gift taxes to be unrealistic as to their original goals and unfair to a majority of American people.

On the other hand, we see the recent alterations in the accelerated cost recovery system from the changes of ERTA, coupled with the investment tax credit as a gross violation in the name of fair taxation. Given the investment tax credit at 10 percent, an incentive, a capital intensive corporation is virtually subsidized to buy a piece of equipment. with the revisions of the ACRS, the cost of the equipment can be deducted over a period of a few years, as to create the following scenario. If you buy a piece of equipment at $10,000, you can immediately receive a tax credit of $1,000 from the investment tax credit. Within a period of 3 to 5 years, you can deduct 95 percent of the cost of the equipment. While these breaks were implemented to increase and stimulate investment, many economic observers believe that this is the wrong kind of investment, which will not improve our economy. We agree with this assessment. With the alterations in the ACRS, the investment tax credit institutes an unfair government subsidy of big corporations, hurting competition and leading investment away from economically sound proposals, and instead toward short-term tax free investments.

By repealing the Federal estate and gift taxes, we will no longer be threatening the existence of our family owned businesses and farms, and will be curtailing the abuse of our tax system by corporations, not for the good of the economy, but for short term monetary gain. we believe this bill to be a fair proposal for all Americans.

The following tables show the amount of revenue estimated to be gained from the Federal estate and gift taxes through fiscal year 1986, and the amount of revenue which could be gained if the investment tax credit were reduced from 10 percent to 7 percent.

	Billions
Federal estate and gift taxes—Incoming Revenue: [1]	
Fiscal year 1984	5.9
Fiscal year 1985	5.6
Fiscal year 1986	5.1
3-year total	16.6
Investment tax credit reduced from 10 to 7 percent: [2]	
Fiscal year 1984	5.6
Fiscal year 1985	6.9
Fiscal year 1986	7.9
3-year total	20.4
Revenue changes if bill were enacted:	
Fiscal year 1984	−0.3
Fiscal year 1985	+1.3
Fiscal year 1986	+2.8
3-year total	+3.8

CONGRESS CAN'T LOSE ON ITS VETO POWER

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. LEVITAS. Mr. Speaker, in light of last week's Supreme Court decision that the legislative veto is unconstitutional, I would like to remind my colleagues of the following article by Louis Fisher, which appeared last year in the Washington Post, on February 21, 1982. In this article, Fisher spells out what it would mean for our Government if this mechanism were to be struck down by the Court. I put this article in the RECORD of February 23, 1983 when it appeared. How prophetic it was.

Now that we face that situation, we are facing what Fisher predicts. Without the legislative veto, the power of the executive branch will likely be restricted rather then enhanced. And without it, Congress will have to resort to other mechanisms of control which will be much more strict and limiting, burdensome and more cumbersome that the legislative veto.

As Fisher says of the legislative veto, "Congress can't lose." In order to protect the American people from arbitrary unelected Government and an imperial Presidency, Congress must now take steps to redress the effort of the Supreme Court's decision without delay. At this point, I insert the article by Louis Fisher in the RECORD:

[From the Washington Post, Feb. 21, 1982]

CONGRESS CAN'T LOSE ON ITS VETO POWER

(By Louis Fisher)

We are witnessing an ironic turn in the historic struggle between the executive branch and Congress: a court decision which seemingly promises much greater power for the executive but which, if upheld, would likely lead to the opposite effect.

The Jan. 29 ruling, by a three-judge panel of the U.S. Court of Appeals here, gave a rude jolt to the "legislative veto," a device Congress has relied on for at least a half century to control executive actions.

Specifically, the panel struck down a one-house veto used to disapprove a gas-pricing regulation by the Federal Energy Regulatory Commission (FERC). But its language was so broad as to question the constitutionality of legislative vetoes in hundreds of other laws governing arms sales, immigration, war powers, impoundment, endless agency regulations and much else.

The D.C. panel recognized that its finding—that all legislative acts constitutionally require "presentation to the president and passage by both houses of Congress"—"may have far-reaching effects on the operation of the national government." But it may have misunderstood those effects.

Many assume the ruling portends a gain for the executive branch, a victory for orderly government, a blow to congressional interference. Think again. If the Supreme Court upholds the overly broad opinion, the net result will more likely be less power for executive officials, a more convoluted legislative process, and continued congressional involvement in administrative decisions.

Bizarre consequences? Not if you understand why the legislative veto was originally adopted. Presidents accepted (indeed, often invited) legislative vetoes because they provided a way to get more power. The bargain was clearly understood by both branches. The president essentially told Congress: "Give me more authority than you normally would, and I'll give you a chance to veto my initiatives." If presidents disliked the legislative veto, Congress would withhold authority.

Courts are familiar with this quid pro quo. In 1977 the Fourth Circuit dismissed a suit by a federal employee who protested that the Senate acted unconstitutionally when it disapproved a pay raise recommended by the president. But the legislative history convinced the court that Congress delegated the salary authority only on the condition that it could, by a one-house veto, disapprove presidential recommendations. The authority and the condition were inseparable.

The FERC case was different. Here the court decided that the grant of rulemaking authority was not tied explicitly to the one-house veto. But that is the exception, not the rule.

The record shows, for example, that the president could not tell Congress: "Thanks very much for the authority to reorganize the executive branch, but I have no intention of recognizing your right to veto my plans." Executive reorganization power and the legislative veto could not be severed.

Other examples abound. Under the Impoundment Control Act of 1974, the president may defer spending unless one house of Congress disapproves. The president is not at liberty to take the authority and ignore the condition. If the legislative veto is unconstitutional, the president will forfeit the statutory authority to defer spending.

He might claim other authorities (statutory or implied powers under the Constitution), but this would merely trigger the kind of fractious litigation we had in the early 1970s under President Nixon.

The Federal Trade Commission Act of 1980 raises a similar issue. Congress, angered by some FTC regulations, enacted legislation requiring future rules to run the gauntlet of the legislative veto. If the D.C. panel opinion is upheld, the FTC may lose its authority under the statute to issue regulations.

Uncertainties in this area, as in others, would probably force more issues into the courts, with the preponderance of evidence often on the side of the Congress. In the laws concerning arms sales, foreign trade, the sale of nuclear fuel, federal salaries, immigration, impoundment and presidential papers, for some notable examples, the delegated power and the legislative veto seem inseparable.

Congress, of course, could rewrite many of its broad delegations of power, and the executive branch also could well lose some procedural benefits. Where there is a legislative veto, presidential proposals are put on a fast-track system. Other privileges include special procedures to bypass committees, limit debate and prohibit floor amendments. Without the legislative veto, Congress would eliminate these advantages or require

the president to gain approval of both houses in a bill or joint resolution. Either approach would undercut the president.

The legislative veto is critized as a backdoor way of accomplishing what should be done directly through the regular legislative process. But if Congress is denied the legislative veto, no one should underestimate its ingenuity in inventing other devices that will be more cumbersome for the president and just as satisfactory to Congress.

President Eisenhower discovered this unpleasant fact in the 1950s when he objected to "committee vetoes" compelling agencies to obtain advance clearance from congressional panels. Attorney General Herbert Brownell called this an unconstitutional infringement on executive responsibility.

Undaunted, Congress created another procedure that yielded the same control. A bill was drafted to prohibit appropriations for certain real estate transactions unless the Public Works committees first approved the contracts. Eisenhower signed the bill after Brownell concluded that this procedure—based on the authorization appropriation process—was within Congress' power. The form had changed; the committee veto remained.

If the one-house veto over impoundment deferrals is invalid, Congress will have no trouble devising more burdensome procedures for the president. A harbinger of what might be in the works appears in the Transportation Appropriation Act for fiscal 1982, passed last December. Whenever the president proposes to defer appropriations for various rail programs, the funds must be released unless Congress within 45 days completes action on a bill approving all or part of the proposed deferral.

There is no constitutional problem here, since Congress will act through the regular legislative process. Yet in this case, in effect, the president not only ends up with a one-house veto but a more onerous version. Under the Impoundment Control Act, one house must take the initiative to disapprove a deferral. Under the tranportation statute one house can succeed through inaction.

There are other anomalies. Opponents of the legislative veto warn about the workload imposed on Congress by having to review administrative actions. But the workload is likely to be far heavier if Congress has to act positively through the regular process. The temptation will be strong for Congress to grant powers for shorter periods, forcing the president to return to Congress for extensions. Of course either house, by inaction, could deny him the authority.

Other mechanisms are also available to protect congressional prerogatives. Under the Trade Act of 1958, the president could implement certain actions for import relief only by obtaining from Congress a concurrent resolution passed by a two-thirds majority in both houses. Courts would likely find this type of concurrent resolution constitutional, since it contains a built-in override of a presidential veto. This would come as little consolation to a president forced to locate an extraordinary majority in each house before acting.

The D.C. court, in its FERC ruling, warned that the legislative veto enables Congress "to expand its role from one of oversight, with an eye to legislative revision, to one of shared administration." This increase in congressional power, according to the court, violates the separation-of-powers doctrine.

But with or without the legislative veto, Congress will remain knee-deep in administrative decisions, and it is inconceivable that any court or any president can prevent this. Call it supervision, intervention, interference or plain meddling, Congress will find a way.

If an agency adopts a regulation that offends Congress, legislators can attach language to an appropriation bill preventing the use of funds to implement the regulation. There is no constitutional question about Congress' right to do this, although riders to appropriations bills are far from ideal ways to make law. They are added without the hearings, careful consideration and substantive knowledge that more likely accompany a legislative veto.

Congress also exercises an extraordinary array of nonstatutory controls. The clearest examples are the understandings between Congress and the agencies for "reprogramming"; the shifting of funds from one program to another within the same appropriation account. Major reprogrammings must be approved by the committees (or subcommittees) with jurisdiction over the problem.

This is simply one more quid pro quo between the branches. In return for the flexibility of lump-sum appropriations, agencies agree to abide by reprogramming guidelines and committee clearance. No one wants to return to line-item funding. Since this type of control is informal and nonstatutory, it is difficult to conceive of a legal issue that might reach the courts. But the involvement of Congress in "shared administration" is just as real and binding.

Judicial warnings about shared administration seem unrealistic in view of the extensive overlay of statutory and nonstatutory controls. Certainly it is extravagant and hyperbolic for the D.C. Circuit to suggest that legislative vetoes put us on the road to congressional tyranny. If the courts are serious about "untangling" the rights and powers of the three branches, they have their work cut out.

Shall they prohibit the president from making substantive legislation through executive orders and proclamations? Will courts resurrect the 1935 rule requiring Congress to delegate legislative power with clear standards? This would be a revolution in itself. Should we consider placing all independent commissions under the executive departments, thereby tidying up the system of three branches? This has been tried more than once, without success, and for good reason. Can we no longer tolerate adjudication and "quasi-legislation" by the agencies? Should we eliminate "legislative courts" (established under Congress' Article I powers)? For that matter, is it time to ask the courts to pull back from their own involvement in legislation and administration?

It is too glib for courts to tell Congress that if it disagrees with what the president and the agencies are doing, it should act through the regular legislative process. The regular process is subject to a president's veto, creating the need for a two-thirds majority in each house to override the president. Without the legislative veto, Congress is placed in the dilemma of delegating authority by a majority vote and then needing a two-thirds majority to recapture control. That is why both branches agreed on the legislative veto for reorganization authority.

The legislative veto in the War Powers Resolution of 1973 was meant to extricate Congress from the situation it found itself in under President Nixon: able to attract a majority vote in each house to deny funding for the Vietnam war, but unable to secure a two-thirds vote when Nixon vetoed these restrictions. Critics of the legislative veto have not addressed this problem.

Nor is it enough to advise Congress that legislative vetoes would be unnecessary it if would only delegate with precise standards and clear policy.

Congress has no doubt used the legislative veto to sidestep difficult questions of national policy; it can be a convenient and irresponsible substitute for making legislative decisions. But the veto allows Congress to review specific proposals under circumstances that no one could foresee when the authority was first delegated.

For many issues facing government today, the legislative veto is practical, appropriate and constitutional. Striking it down is not a step to be taken lightly.●

PRESIDENT REAGAN'S NEW STANDARD FOR DISCRIMINATION

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. RANGEL. Mr. Speaker, I rise today to express my complete agreement with an editorial published in the June 23 edition of the New York Times. It was captioned "Reagan's 'Truth' on Blacks," and was written by Carl McCall, commissioner of the New York State Division of Human Rights.

Although many articles have been written about the Reagan administration's dismal civil rights record, none have been as eloquent as Mr. McCall's. I commend Mr. McCall for his concise description of the executive branch's new definition of discrimination.

Blacks and other minorities find it very difficult to have faith in a President who ignores the reality of institutional racism. We live in a time when minorities, as identifiable groups, still do not enjoy the same opportunities as majority Americans. They receive lower average incomes, they suffer a higher rate of unemployment, and they still do not have access to most businesses and professional firms.

And yet the President, through the Justice Department, is attempting to rewrite civil rights enforcement standards. Minority groups are supposedly no longer targets of discrimination; only unlucky individuals now experience unequal treatment. I do not buy this argument, and neither do the people trying to survive the reality of Reaganomics.

The McCall article articulated this reality much better than any I have read. It is included for the RECORD.

REAGAN'S "TRUTH" ON BLACKS

(By H. Carl McCall)

President Reagan says he could "have perfect confidence with black voters . . . if we could get the truth to them." He faces a monumental task because his Administration's "truth" is that blacks are not discriminated against. Whatever vestiges of discrimination may remain, in his view, are

aimed at individuals—singly, alone, presumably at random. Thus, he reiterated his conviction that wherever "any individual's constitutional rights are being unjustly denied" the Governement must restore them "at point of bayonet if necessary."

This focus upon individual rights echoes the legal contention the Justice Department raised in seeking yet another Federal ruling on the legality of a Detroit police department affirmative-action plan (twice upheld in Federal court). The department insists that "the right to be free of unlawful racial discrimination belongs to individuals not groups." Under this Administration, the Government will press only individual job bias cases, seeking back pay or other relief for single "identifiable victims" of discrimination reather than relief for "affected classes" of workers.

Mr. Reagan's "truth" defies logic and history. Actually, the individuals are discriminated against because of membership in and identification with a group—whether that identification involves race, creed, gender, sexual preference, age, physical handicap.

He would have the minority community believe that voting rights have been denied a random collection of individuals who happen to be black or Hispanic; that disproportionate inclusion in the ranks of the poor and exclusion from the employed labor force have nothing to do with personal discrimination; that strategies to rectify well-documented group disparities in income, job opportunity, education, occupational level or promotion are unjust and uncontstitutional; that Great Society antipoverty and other programs harmed minority members and women. In short, the President would have minority members believe disentitlement is as beneficial to the free-enterprise system as deregulation. Of course, his thinking arises from an iron-clad insistence that individuals win or lose on their own, unhampered by handicaps or obstacles imposed by group membership and identification.

While civil rights officials take the view that certain groups are and have been discriminated against, Mr. Reagan has chosen enforcement, compliance and oversight officials who share his special "truth" about civil rights. The most recent example was his nomination of three members of the Civil Rights Commission. While the commission is an advisory and oversight (not an enforcement) body and any President may choose members of his own Administration, still the possible appointments diminish the commission's independence and further signal Administration attitudes and priorities on civil rights enforcement.

Two nominees' comments indicate what may be expected. John H. Bunzel, a senior research fellow at the Hoover Institution, has been quoted: "Should individual rights give way to group rights in the demand for equal rights?" Morris B. Abram, former president of Brandeis University, says preferential treatment based on racial distinctions "has corroded the liberal body politic." Indeed, it has—but it has been preferential treatment given to white males. Such treatment is documented by every statistical profile on income comparison, job and educational opportunities, unemployment casualties, occupational status, wage and salary and benefit levels, housing availability, and health care. Who ends up on the short end of such statistics? Not random individuals but minority members.

In a discrimination-free, pluralistic society, data profiles would tend toward equality of opportunity and representation in accord with population ratios, all other things being equal. Affirmative-action programs, with their goals and timetables, are concrete, reliable measures of progress toward the democratic goal of equality and no preferential treatment.

Mr. Bunzel's question might be answered this way: Should equal rights be reinterpreted as individual rights as long as group discrimination persists? By rejecting affirmative action in the name of individual rights, rewriting regulations for Federal contractors and actively pursuing reversal of the Supreme Court decision that approved voluntary affirmative action, the Administration has disheartened private-sector employers who are trying sincerely to develop a racially and sexually pluralistic work-force. Such employers view their own efforts not as expressions of preferential treatment or reverse discrimination but as moral and productive recruitment and management tools.

Thus, President Reagan's "truth" on civil rights is hard to sell to employers of good will and enlightened self-interest, just as it is hard to sell to the minority community—because it is not a truth.●

EDUCATION OF THE HANDICAPPED ACT AMENDMENTS OF 1984

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. MURPHY. Mr. Speaker, today, I am introducing the Education of the Handicapped Act Amendments of 1984, a bill which will reauthorize these programs through fiscal year 1987.

As my colleagues may know, the discretionary programs funded under this act provide grants to State and local education agencies, other public agencies, private nonprofit organizations and institutions of higher education, to support a variety of research, training, and model project activities. They are a critical supplement to the direct services provided to handicapped children under Public Law 94-142, the Education for All Handicapped Children Act. These discretionary programs were originally slated to expire on September 30, 1983, but were automatically extended for 1 additional year by the General Education Provisions Act (GEPA).

Under part A of the act, the bill proposes to reestablish the National Advisory Committee on the Education of Handicapped Children. This body, consisting of at least five parents of handicapped children, would review the administration and operation of the act as well as other legislation affecting handicapped children and make recommendations to the Secretary of Education for the improvement of such programs.

Also, this legislation expands the "evaluation" section of the act to require that the Secretary of Education obtain specific data from the States on a regular basis, conduct several evaluation studies and provide this information to Congress in the annual report. It is hoped that these new provisions will provide Congress with more complete data on the impact of this important legislation.

Under part C, the bill broadens the responsibilities of the regional resource centers by requiring that they provide information to all State education agencies within their region and assist in the improvement of information dissemination to and training activities for professionals and parents of handicapped children.

In addition, this part authorizes a limited number of regional programs to provide technical assistance to State and local education agencies in the provision of educational services to deaf-blind children. It also provides for two new grants, one for the provision of educational and preliminary transitional services to schoolage deaf-blind children and the other to provide transitional programs from educational to other social services for deaf-blind youth when they reach 22 years of age.

This legislation also expands the currently existing State implementation grant program under early childhood projects to enable States to receive a grant to plan, develop, or implement a comprehensive delivery system for handicapped children from birth to 5 years. Research has shown that providing early intervention services to handicapped children reduces the number of these children who need special education and other costly remedial services in later years. Further, if early intervention is not provided, secondary handicaps such as emotional problems can add to the cost of later remediation of a child's primary handicapping condition.

In an attempt to improve educational and related services to the secondary and postsecondary age handicapped student, the bill authorizes a model demonstration authority to determine exemplary practices which may be replicated across the country. Particular emphasis has been placed on improving current programs for secondary age students and providing transitional programs for these students as they prepare to exit the educational system.

Under part D of the act, the bill continues current personnel training efforts and includes a provision requiring a separate grant competition for private nonprofit organizations to enable them to provide training and information to parents of handicapped children and volunteeers so that they may participate more effectively with professionals in meeting the needs of handicapped children. It is intended that these grants reach parents of mi-

nority populations who are traditionally underrepresented.

In the research section, part E of the act, new language has been added which focuses on the development of new and improved techniques for teaching handicapped children.

Lastly, since the Secretary of Education has the authority to fund research and demonstration projects for the learning disabled under section 624 and this section is not currently funded, part G of the act has been repealed.

Mr. Speaker, this is an important measure—one which will greatly improve the educational and related services available to handicapped children and youth of all ages. It is a response to both the current and future needs of this population.

I am pleased to have the support of the distinguished chairman of the full Education and Labor Committee, CARL PERKINS, as well as my majority colleagues on the Select Education Subcommittee, GEORGE MILLER, MARIO BIAGGI, PAUL SIMON, JOSEPH GAYDOS, PAT WILLIAMS, and BALTASAR CORRADA, for this legislation and urge its careful consideration by the Congress.●

LETTER FROM THE LEAGUE OF UNITED LATIN AMERICAN CITIZENS REGARDING CENTRAL AMERICA

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. MINETA. Mr. Speaker, I am inserting into the RECORD a letter I received from Arnoldo S. Torres, the national executive director for the League of United Latin American Citizens (LULAC) expressing his views on U.S. policy in Central America. LULAC is the Nation's oldest and largest Hispanic Organization and I believe that the administration as well as Congress should consider their views as we develop our policies relating to Central America. Thank you.

LEAGUE OF UNITED LATIN AMERICAN CITIZENS,
June 3, 1983.

Hon. NORMAN MINETA,
Rayburn House Office Building,
Washington, D.C.

DEAR CONGRESSMAN MINETA: As the days pass, the inevitable trajectory of our present Central American policy becomes ever more evident and ever more foreboding. The Administration has chosen to become militarily involved in no win situations in El Salvador and Nicaragua: Congress has accepted that choice: we are involved. It has been apparent throughout that the objectives of this policy are to forcibly suppress the opposition to the government/military ruling body in El Salvador and to subvert the revolutionary government of Nicaragua in the most expeditious manner possible. The question in Congress has been at what speed to continue along a path which invariably will lead us to direct intervention or failure. Unfortunately, the question has not been one of redefining objectives or methods, or of looking for intelligent alternatives. As time goes on, the feasibility of such alternatives diminishes.

In February of this year U.S. Army Sargeant Jay T. Stanley was injured by rebel fire in El Salvador and, tragically, on May 25 the deputy Commander of U.S. military advisors in El Salvador, Navy Lt. Commander Albert A. Schaufelberger, was killed. The fires of the supporters and opponents of the Administration's policy are being fueled by this tragedy. As time goes on emotions, commitments, and complications will be deepened and our alternatives will become increasingly fewer, narrower, and more dramatic. Now is the time for thoughtful and deliberate decision-making, not for the withdrawal from controversy which we have witnessed on the part of all but a handful of members of Congress such as yourself, for fear of the President's finger being pointed at them. The decision regarding U.S. direct intervention, U.S. flexibility and support for positive change and development in Central America, or U.S. withdrawal from the region is being made in favor of the Administration's inflexible policy by a non-active Democratic alternative and by Congress' lack of resolve.

Although Hispanics will be the first on the front-line carrying out this unrealistic and mistaken policy, and although we will be the targets of the frustration of an American people involved in an unwinable war against Latinos, all Americans will pay the price. Our involvement has already been denounced by the United Nations and individual countries such as Brazil, Spain, Panama, and others. We are presently breaking international law, our own charters and treaties, and, as is increasingly apparent, the Boland Amendment in our activities against Nicaragua. Further involvement will mean further isolation from our allies and participation in an unpopular and unwinable war.

It is the shared obligation of the decisionmakers in Congress and the Administration to see that international and our own laws are obeyed, that peaceful coexistence with our neighbors is sought and maintained, and that the lives of American citizens are protected. As those obligations are increasingly violated and as the number of deaths of Americans in Central America increases, we must ask, who in Congress or the Administration wishes to bear responsibility for failing to meet their shared obligations? That failure means further military involvement: the finger being pointed will be that of war.

Our continued military approach is exacerbating the problems and death tolls in Central America, and we are approaching the ultimate decision of present policy: will we see it through (when we are forced to acknowledge that the military of El Salvador and the "contras" cannot do it alone), or will we realize that our attempts to intervene in El Salvador and Nicaragua are unrealistic, and accept failure? When the day of that decision comes, Congress and the administration will have failed to have met their shared responsibility. When that day comes and when decisionmakers say that we are already too involved to back away, let it not be said that they did not know what we were getting into. What the President and Congress are getting us into is very clear.

Respectfully,

ARNOLDO S. TORRES,
LULAC National Executive Director.●

SPEECH TO SUPPORTERS OF ISRAEL BY REPRESENTATIVE DON SUNDQUIST

HON. CONNIE MACK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. MACK. Mr. Speaker, I recently had the pleasure of reading a copy of an address delivered by my good friend and colleague, Representative DON SUNDQUIST of Tennessee, to a gathering of some of Israel's strongest supporters in DON'S hometown of Memphis. The speech includes a cogent analysis of the current situation in the Middle East and a particularly enlighting description of the strategic value of Israel, which is too often overlooked.

I commend this speech to my colleagues and would like to insert a copy at this point in order for others to benefit from it:

It is a privilege and an honor to be with you this evening and to share this podium with Ralph Nurnburger. I can honestly say that AI-PAC does an outstanding job of keeping the Congress informed of the issues of importance to Israel and the American Jewish Community. I commend you, Ralph, and the organization you represent.

Let me start by saying that as a freshman Member of Congress I have strongly supported this country's commitment to the State of Israel. I have also joined both the "Congressional Call to Conscience Vigil" for Soviet Jews and the 98th Congressional Class for Soviet Jewry to draw attention to the oppressed condition of Jews in the Soviet Union. And I pledge to you tonight that I will continue to do everything I can within the Congress to further their goals.

I recently participated in some of the ceremonies surrounding the dedication of a site for a new museum to be erected in Washington as a memorial to the Holocaust.

To my mind, the Holocaust is the most tragic and troubling episode in the entire history of mankind. In recent weeks, it has been recalled many times overall in Washington. It was recalled in ceremonies; in personal visits by survivors to Representatives in Congress: by music, by art, by photographs; and films and exhibits.

We who were not victims of the Holocaust will not and cannot ever truly comprehend the tragedy it represents.

I should say now, that never before has the need been so great for the strongest American commitment to, and support for a strong and secure Israel. Never before, has the need been so great for America, to rise up and challenge the continued persecution of Jews in the Soviet Union.

As each of you know, the past few months have been very trying times for Israel and for Israel's friends in America. The end of the fighting in Lebanon, and the Reagan peace plan, have failed to halt the constant stream of denunciation of Israel's actions. They have not diminished the activities of those enemies of Israel, who seek to have the U.S. punish the Jewish homeland—when in fact, Israel's victory for the U.S., and for all Americans working to advance the cause of world peace. Just consider what Israel accomplished to help America, and to

improve chances of a real peace in the Middle East.

First, Israel helped improve regional stability by cleaning out the PLO terrorists who threatened not only Israel, but who trained terrorists from around the world. Second, Israel created the opportunity to bring stability to Lebanon by reducing Soviet influence in the Middle East, and improving American influence there.

These are positive accomplishments.

To his credit, President Reagan, early in his term moved quickly in offering his proposal for peace in the Middle East. I disagreed with some of the specifics of the President's plans, but I regarded the plan, as I think most Americans did, as a good base from which to start negotiations. Regrettably, there has been little movement toward that goal.

The Reagan plan was specifically aimed at involving Jordan's King Hussein in the peace process. But efforts, continues to resist direct negotiations with Israel. I personally believe that Hussein is the key to any progress toward a real peace. Until he moves favorably, it looks as if there is little hope for improvement in the current stalemate.

There are some now, who say America should be putting pressure on Israel by withholding U.S. military aid and economic assistance. This type of action would be a tragic mistake. In fact, it is the strength of the U.S.-Israeli relationship that has moved the peace process along so far. And future progress depends on the continued strength of this relationship. I think it is apparent that cuts in assistance would destroy it, and threaten vital American interests in the Middle East. Israel is among the most important strategic allies we have. It is the only country in the area where we could land American military aircraft tomorrow regardless of the circumstances. It is the only country in the area with air and ground defenses, capable of protecting American equipment from Soviet attack. It is the only country in the area with democratic traditions like our own, the only stable and reliable ally in the area. Pressure Jordan? Yes! Pressure Israel? No! King Hussein must be made to see the importance of joining in the peace process. There is no doubt in my mind that is the path to a real peace in the Mid-East.

Related to this, the administration has mentioned before Congress, the possibility of selling several dozen F-5G fighter aircraft to Jordan. I have opposed the idea since the first time I heard it, and I still oppose the plan. In fact, I have signed a bipartisan letter to the President, along with half the Members of Congress, pointing out to the President that Jordan has consistently been a serious obstacle to American efforts to bring peace to the area by rejecting the Camp David approach, and last September flatly rejecting President Reagan's new initiative. To sell advanced weaponry to such a stubborn opponent of U.S. peace efforts would be ludicrous. This sentiment is widespread on Capitol Hill. In fact, the Senate Foreign Relations Committee, in a recent mark-up for the authorization for aid to Israel, not only added $165 million more than was requested—but also added an amendment that basically said that if King Hussein won't come to the negotiating table, then he can forget about gaining any weapons. On the House side, the Foreign Affairs Committee has added $225 million more during the authorization mark-up. I think the mood of Congress is obvious!

I also want to mention a resolution that I just signed on to this past week. This resolution, H. Res. 66, expresses the sense of the House that the U.S. should proceed, without further delay, with the sale and delivery of F-16 aircraft to Israel.

U.S. intelligence has knowledge that the Soviet Union has moved very quickly to rebuild the military strength Syria lost in the conflict in Lebanon. In fact, the Soviets have increased Syria's military power and effectiveness by making available to Syrian forces the deadly surface-to-air missile known as the Sam-5. This new weapon introduces a dangerous new element into the strained military situation in the Mid-East, an element which threatens not only Israel, but also poses a threat to U.S. forces in the area. The Sam-5 has a far greater range than the older Soviet surface-to-air missile it replaces. The Sam-5 directly threatens Israeli forces within Israel's boundaries, and threatens U.S. naval units in the Mediterranean and even some U.S. bases in Turkey. It would be a grave mistake to further deny Israel the 75 F-16 fighter aircraft promised one year ago.

Finally, I want to reemphasize my strong support for aid to Israel and share with you some comments by my good friend and colleague, Senator Rudy Boshwitz. As a matter of fact, an editorial article on his study appeared in the International Jewish News, and I later inserted it into the CONGRESSIONAL RECORD. The title of the article was "American Aid to Israel—the Bargain Behind the Bluster." It stated that the U.S. lays out in foreign aid to Israel a sum which amounts to about 4 percent of what the U.S. lays out to Great Britain, France, Italy and West Germany. Also, Israel pays back upwards of one-half of the American aid it gets while NATO pays back nothing. But I think the most convincing statement is what America gets for the aid it sends to Israel. It gets the latest intelligence information on the latest, most advanced Soviet weaponry. Israel, not NATO, is supplying the U.S. with this informaiton. Israel, not NATO, is keeping the Soviet Union out of the Middle East. In addition, Israel is no drain on American trade.

All in all, American aid to Israel is a real bargain! Israel doesn't take much; what it does take it either spends in America or pays back to America in trade. And in return for its aid to Israel, America gets an ally which not only talks but acts to keep the Soviets out of the Middle East and also keep democracy alive in that area.

In conclusion, I want to reaffirm to you my commitment to the State of Israel and tell you that I will do all I can to protect and represent your interests in Congress.

Thank you again for this opportunity.●

THE CONTINUED REVITALIZATION OF THE BRONX

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. GARCIA. Mr. Speaker, despite public perceptions to the contrary, the south Bronx is making strides to improve living conditions for its residents. The South Bronx Development Corp. is developing a series of new single-family homes, as I have pointed out to the membership in previous remarks. These homes have been built with families of moderate income in mind. The city of New York has given the land in an effort to see this unique project become a success.

There are over a dozen other groups which are involved in revitalizing the south Bronx. The clergy has been particularly active, as evidenced by Father Louis Gigante and the Southeast Bronx Community Organization. People are beginning to be drawn back to the area, in the belief that the Bronx can again be revitalized into the growing, healthy neighborhood it is capable of being.

I am proud to bring to this body's attention that even such publications as the Economist are beginning to note our efforts. As such, I am entering into the RECORD an article from the Economist regarding the efforts cited above.

[From the Economist, May 14, 1983]

BRONX CHEER

Six years ago President Carter visited New York's devastated, burnt out south Bronx. Now, on the very spot in Charlotte Street where he promised renewal and new hopes, there is an astonishing sight: new single-family ranch-houses more typical of the suburbs than of New York City. In time they will be surrounded by white picket fences. In all there are to be 90 of them, built without benefit of subsidy and designed for families of moderate income: $20,000-30,000 a year. The price, just under $50,000 apiece, is possible because these are factory houses, manufactured in Pennsylvania and assembled in only four days on the site.

The houses are the creation of Mr. Ed Logue, who ran redevelopment in Boston and, for a time, in New York and who has great faith in owner-occupation. He is now the head of the South Bronx Development Organization, a city agency which receives federal, state and some foundation money; the city gave the land. Its responsibilities also include job training and commercial development. It has already built, and sold, 150 terrace houses on another site.

But there are a dozen other groups involved in revitalising the south Bronx. Not all are convinced that ranch-houses are the right solution for the area. These small houses, they fear, will be an invitation to crime (even though Charlotte Street will be patrolled by the intriguingly named Mid-Bronx Desperados Community Housing Corporation). Others complain that the money should have been spent to provide housing for the poor and that it is a bad use of the land.

Land, however, is what the Bronx has most of: vacant plots left when the city had to demolish old five- and six-story blocks of flats that had been vandalised or fired. There are plenty of these left, too, with their blackened walls and boarded windows.

But the Bronx is full of surprises. The north Bronx, which fought back the tide of deterioration, can be positively elegant in Riverdale and Pelham Parkway. There are splendid parks and many educational and cultural institutions, as well as the Bronx Zoo.

Even in the south Bronx there is the Longwood historic district, where the Pratt Institute Centre for Community and Envi-

ronmental Development in Brooklyn is striving to preserve and rehabilitate handsome, solid old houses suitable for flats. Nearby Father Louis Gigante and his Southeast Bronx Community Organisation have rehabilitated houses and built new ones. The clergy is strongly represented in many of the community organisations.

Mr. David Rockefeller's New York Partnership has built nothing yet, but it has $52m in federal grants and over $200m in private lending commitments should it wish to aid the Bronx. Then there is so-called sweat equity. This involves small groups of families, usually no more than seven, acquiring a large property in bad condition and doing the unskilled work themselves, with help in some cases from the Consumer-Farmer Foundation (it began as a farmers' milk co-operative). The city and federal government pay for more skilled work. Not many buildings are suitable for such "homesteading" and with the present decline in government help, fewer aspiring householders attempt it.

The Bronx was originally one of New York's first suburbs a bedroom community for European immigrants, especially the Irish and Jews. But after the second world war their children left for suburbs farther out. In their place came poorer people, blacks and more recently hispanics. There also came rent control. Property owners began to neglect maintenance; the banks refused to invest in the Bronx. Owners wanting to get rid of their unprofitable properties sought tenants who were on welfare (oddly rent control does not apply when the government is paying the bill) and the disreputable ones who would drive other tenants out. Services were neglected. Sometimes people burned their homes in the hope that they would begin better ones; often landlords applied the torch for the insurance money. Expressways were driven through the Bronx, weakening communities. Crime flourished and people started leaving. The population is now just over 1m, compared with an earlier 1.5m. In some districts it fell by two thirds.

Now people are beginning to come back, drawn by their churches and old associations and a hope that the Bronx can be rescued, and driven by the shortage of housing in other parts of New York. Crime is not much worse that it is elsewhere, except for murders (the criminal classes killing each other, the police say cheerfully). The police station known as Fort Apache in the film is now christened the little house on the prairie.

But people trying to save the Bronx have their doubts. They fear that the continuing deterioration is growing faster than the improvements, which they see as a drop in the bucket. Worst of all is the evaporation of federal funds. Unless congress takes a strong line, there will be no new subsidies for builders of flats for the people with low incomes; poor people will have to pay a higher share of their incomes for rent; and even their subsidies may be replaced by housing vouchers, now known more elegantly as housing certificates.

This system, which may suit some smaller communities where there is a good supply of housing, is a recipe for deprivation in a city like New York where the vacancy rate is only 2% for the city as a whole. It is zero for members of racial minorities and poor people with large families.

The Bronx, with its excellent quick communications with Manhattan, Connecticut and New Jersey, will surely be redeveloped someday, but the people who live there now are unlikely to benefit. At least that is the fear of Mr. Ron Schiffman of the Pratt Centre.●

AID TO GUATEMALA: VIOLATING HUMAN RIGHTS LAWS (PART II)

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. GEJDENSON. Mr. Speaker, on Thursday, June 23, 1983, I had the first part of an article entitled "Aid to Guatemala: Violating Human Rights Laws" inserted into the RECORD. Today I wish to have the second half printed. The article is as follows:

CHANGES AND THEIR IMPLICATIONS UNDER RIOS MONTT

(By Bruce P. Cameron and Christopher Ringwold)

The Reagan administration returned to the issue of multilateral aid for Guatemala after General Efrain Rios Montt displaced Garcia in the coup of March, 1982. Stephen Bosworth, deputy assistant secretary of state for inter-American affairs appeared before the House Subcommittee on International Development Institutions on August 5, 1982. The position of the State Department, as elaborated by Bosworth, was that Guatemala's new government had departed from Garcia's consistent pattern of gross human rights violations.

"Thus with regard to the specific legal formulation which governs the U.S. voice and vote in the multilateral banks," Bosworth testified, "it is our very strong conclusion, Mr. Chairman, that while serious human rights problems remain in Guatemala, that Guatemala cannot be considered by any standard of measurement to be a country in which there is a consistent pattern of gross violations of human rights."

"We are therefore . . . of the belief that Guatemala . . . should have normal access to the multilateral development banks. . . ."

Changes had in fact occurred in Guatemala following the coup. Political assassination in the cities ceased in the first few months. Police agencies responsible for such activities in Guatemala City and other cities were disbanded. In some cases, police officers and other violators were temporarily imprisoned. In short, although politically motivated kidnappings and disappearances have increased in recent months, in August of 1982 the kind of human rights violations which had attracted the most attention in the international community had ceased.

The other side of the story, however, was that human rights violations in the countryside were on the increase. On January 3, 1983 the Washington Post reported that ". . . the systematic scorched-earth counter-insurgency campaign begun in November 1981 by the ex-President's brother, then Army chief of staff Benedicto Lucas Garcia, continued and intensified through the summer."

And, on October 11, 1982, Amnesty International presented its own conclusions:

"Guatemalan forces massacred more than 2,600 Indians and peasant farmers in a new counter-insurgency program launched after General Efrain Rios Montt came to power in March this year . . . Military and newly formed civil defense units destroyed entire villages, tortured and mutilated local people and carried out mass executions in at least 112 separate incidents between March and July . . . reports coming in show the pattern has continued in more recent months."

As elaborated by Bosworth during the August hearing, the State Department's position on violations in the Guatemalan countryside was threefold. Bosworth claimed initially that any increase in violence in the countryside was the responsibility of the guerrillas; and then that human rights violations by the army or associated agencies were "occurring in contravention of publicly stated, strongly stated doctrines and policies of the government." Bosworth finally noted that the Guatemalan Government had "changed" its pattern of activities in the countryside since the coup.

But the evidence does not support assertions of the Rios Montt government's innocence. After an October, 1982 visit to Guatemala, the Americas Watch reported: "The armed forces are responsible for most of the killings, disappearances and massacres committed in Guatemala." And, on December 28, 1982, the Baltimore Sun charged, "There is no evidence that the guerrillas systematically burned villages and massacred people as the army claims."

What was happening, in fact, was that the army was attacking villages disguised as subversives. A delegation representing four major American church groups visited Guatemala in December, 1982. The delegation discovered:

"There are army 'undercover' operations whereby the army attempts to persuade the peasants that the groups which have attacked their villages are really 'subversives.' To effect this, non-uniformed soldiers or soldiers dressed in olive green uniforms like those used by the guerrillas (rather than the usual army camouflage uniforms) actually carry out the destructive raids. There is also evidence that the guerrillas sometimes operate disguised as army personnel. It seems generally accepted by the rural people that a peasant can in fact easily distinguish official army personnel by use of motorized vehicles, language, regular army footwear, camouflage uniforms, haircut style, and personal acquaintances. The peasants say, 'We know who is who.'"

It is believed that the Guatemalan armed forces commonly employ a cruel new version of the bait-and-switch routine. Disguised as guerrillas, the army will attack a village, only to return later in official uniform to provide food, shelter and medical care.

In its written rules of engagement, the army almost spells out such tactics. "Subversion should be combatted using its own methods and tactics," the rules state. "A disinformation plan should always be in execution."

This sort of instruction goes to men such as Gustavo Adolfo Mendez, Commander of Huehuetenango, who told Washington Post reporter Christopher Dickey: "After seven months of fighting from Chimaltenago to Quice, we knew that all the population was subversive."

The Guatemalan army's rules of engagement are also known to men such as the foot soldier on patrol in a remote mountain area who told a foreign correspondent; ". . . there are so many of [the guerrillas]. Very few are armed. But we have to kill them." (Source: Amnesty International.)

GOVERNMENT RESPONSIBILITY

No one has denied that there was an epidemic of violence in rural Guatemala during the summer of 1982, and credible evidence indicates that the armed forces rather than the guerrillas were mainly responsible. Yet the case could still be made that these killings were performed by errant troops and services, operating outside the government's purview and contrary to its directions. Deputy assistant secretary Bosworth did make such claims.

We agree with many observers that the rural massacres flowed directly from the policies of the Rios Montt government. The Americas Watch delegation, referring to Rios Montt's policy of "guns or beans," summarized the situation in this way.

"[The Guatemalan government] asserts that it offers the people of Guatemala fusiles o frejoles—guns or beans. No one is permitted to remain neutral. Those who do not aid the government—by forming civil defense patrols, or providing information on the whereabouts of guerrillas—may not be allowed to live."

Admittedly, it may not be possible to prove that the highest levels of the Rios Montt government ordered the killings. But, it is important to remember that governments are subject to sanctions under U.S. human rights law if they conduct or endorse by act or omission a consistent pattern of gross violations.

At the very least, the Rios Montt regime endorsed the human rights abuses of its armed forces by omission, or failure to restrain them.

According to our information. Rios Montt acknowledged to State Department officials that there were systematic massacres of noncombatants in the countryside, but did not act in the spring of 1982 to stop his soldiers from their rounds of slaughter. Furthermore, at the time of Bosworth's testimony, no officer or soldiers had been detained or brought to trial for committing human rights violations. The new government had in fact granted amnesty to those who had been guilty of murder, rape and torture during the course of any counter-insurgency effort under either the past or present regime. Although the U.S. executive branch told Congress that the Guatemalan government was taking action to stop gross violations by its own agents, no evidence or concrete assurances were offered.

The Rios Montt government, it must be concluded, was failing to control those responsible for human rights violations in the Guatemalan countryside.

Clearly, the State Department acted against all the facts when Bosworth testified on August 5 that Guatemala "cannot be considered by any standard of measurement to be a country in which there is a consistent pattern of gross violations of human rights." By that time, at least twenty-six hundred noncombatants had been killed by the army and allied forces. The State Department's February 1983 human rights reports undermines fatally the judgments made by Bosworth in August.

"In recent months it has become clearer both that the army has increased its control over areas formerly dominated by the guerrillas, and that its forces have begun (emphasis added) to pay greater attention to the importance of proper treatment of the civilian population. Although there continued to be credible reports of human rights abuses by some military units, the overall conduct of the armed forces had improved by late in the year."

It was also clear that in the summer and the fall, the government was not taking action to stop the killings. The weight of evidence, although circumstantial, suggests that in fact the massacres resulted from deliberate policy. According to U.S. human rights law, the Reagan Administration should have upheld sanctions against the government of Guatemala during 1982.

Instead Bosworth was sent to testify that Guatemala was no longer a gross and consistent violator.

THE JANUARY 1983 DECISION: ARMS SALES TO GUATEMALA

On January 6, the State Department announced it had offered to sell $6.1 million in military spare parts to Guatemala. Using the same standard applied to the Southern Cone countries in June 1981, there was by this time doubt as to whether Guatemala was a consistent and gross violator. During the summer and fall of 1982, the Guatemalan army engaged in a compaign of terror so massive and sophisticated that by the late fall, the population in the guerrillas' stronghold was subdued. Abuses and violations continued, but the level of severity and the scope of the violations seems to have decreased beginning in mid-October.

Using the twisted standard of June 1982 (the Southern Cone precedent) the Administration could have made a finding that there was no longer a "consistent pattern." But only because the "consistent pattern" of the previous summer and fall had achieved the objectives of the Guatemalan government.

IMPLICATIONS FOR FUTURE ACTION: GUATEMALA

The record is clear. This Administration does not respect the general human rights laws which were adopted by Congress. Guatemala was the final test of the willingness of the Administration to respect the laws.

Congress cannot trust the Administration to be truthful on human rights in Guatemala. Further, this Administration has demonstrated unequivocally that it seeks, in fact that it is eager for military involvement in the name of anti-communism. That failed approach is already clear in El Salvador. For a little more than a year, the general human rights law combined with congressional pressure were enough to hold the Administration in check. That is no longer true. While the Guatemalan government has declined the sale of spare parts, the Administration is proposing for Fiscal Year 1984 ten million dollars in military credits. If Congress is serious about its human rights concerns and if it wishes to avoid a Salvador type situation in Guatemala, it must in our judgment adopt a complete and total ban on all military aid and sales.

STRENGTHENING THE HUMAN RIGHTS LAWS

Under the Carter Administration, the State Department did not to the best of our knowledge use the ambiguity of the law to avoid applying sanctions in pursuing human rights objectives. Most particularly, the Carter Administration often used its vote in the multilateral development banks to promote specific improvements in the human rights performance of recipient governments.

Its method was the perfect blend of public and private diplomacy. The vote was public, but the specific improvements it proposed were secret. A diplomatic demarche setting out concerns would be relayed by the Embassy to the government in question.

Whether the Carter Administration was acting by law or policy the public never knew. But it was acting. The Reagan Administration has used every loophole, every ambiguity in U.S. human rights law to avoid applying sanctions to promote human rights. And in the case of Guatemala, we see that it stretched the ambiguity of the law way beyond the breaking point.

One remedy would be to drop the word "consistent" from all of the general human rights laws (previously cited). This would insure that the human rights laws do have some teeth and would provide a better standard of measurement against which U.S. embassies and the State Department would be required to promote human rights in accordance with the law. The change would also make it much more difficult for the executive branch, in egregious cases such as Guatemala and Chile, to provide assistance except for economic aid which directly benefits needy people.

It is a reform, not a revolution, in U.S. human rights law, but a badly needed one.●

POPE JOHN PAUL'S TRIP TO POLAND—AN EVENT OF GREAT IMPORTANCE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, June 22, 1983

● Mr. BIAGGI. Mr. Speaker, as the world reflects on Pope John Paul's visit to his homeland, Poland, one is struck by the enormous significance and symbolic importance of the event. Pope John Paul, while accomplishing the religious objectives of his pilgrimage, achieved far more with his messages of freedom which has fueled hope in the hearts of millions of oppressed Poles.

The message rang clear throughout the visit. Characterized by the word "suffering," the Pope made constant references to the conditions in Poland caused by martial law. In front of the most sacred Black Madonna in Czestochowa the message was especially appropriate. The Holy Father spoke of freedom while commemorating the 600th anniversary of the madonna, the symbol of Polish independence. The Pope's later meetings with Solidarity leader Lech Walesa reinforced the message and it too had tremendous symbolic impact to the people of Poland. The Pope's very insistence that he be able to meet with Walesa demonstrated to the world his commitment to freedom in his homeland for as no other Walesa has come to represent the hope of liberation for Poland.

Yet the Pope's visit was not merely one of abstract symbolism. In his message of freedom he conveyed his empathy for the peculiar sufferings of the Polish people and his understanding that change will not come overnight. He delivered more than just an exposition of ideals. It was a message to the people of Poland that the world knows of their suffering and is working to alleviate it.

Life has changed dramatically in Poland in the 4 years since the Pope last visited his homeland. Four years ago the yoke of martial law was not upon the people of Poland. His first visit was a triumph—it brought great hope for reforms and expanded liberties. His visit helped to provide the basis for Solidarity. Yet in the 4 years the liberties were crushed and hopes dashed by the imposition of martial law. Yet judging from the crowds on the papal visit in 1983 the spirit has yet to be broken.

The Pope while avoiding direct criticism of the Polish Government he made his opposition clear. He criticized the disregard for civil rights. He encouraged the lifting of martial law. He called for an honoring of the promises of social reform which were made to Solidarity in 1980. The Pope made demands on the Polish people as well. He called for faith and hope but not arms. Pope John Paul expressed his belief that a "victory through effort and the cross, a victory achieved through defeats is part of the Christian program of life and of the life of the nation likewise."

Optimism is the aftermath of the Pope's visit—optimism based on favorable signals that an end to martial law may be in sight. Pope John Paul, the symbol of freedom and hope comes to a land troubled in spirit—strangled by oppression and tries to instill hope. The Pope has once again touched the hearts of people—this time the people so close to his heart—his fellow Poles. Let us hope that his journey serves as a catalyst in the processes which will allow freedom to return to Poland.

While Pope John Paul has left Poland in the physical sense—he remains with the people in spirit and Poland finds itself at a pivotal point in history as an editorial in today's Christian Science Monitor states:

Poland is once again at a watershed of sorts. On the face of it it may seem that the Pope's visit to his homeland and the massive outpouring of popular support for him have solidified an intractable political stalemate. Yet the reverse could prove to be the case. The controlled nature of the mass demonstrations and the Pontiff's two meetings with General Jaruzelski may actually strengthen the regime's efforts to reach some sort of national understanding however tenuous and to get the country working again. Harbingers of possible progress are official hints in Warsaw of lifting martial law next month and talk in Western capitals of lifting sanctions on Poland and resuming aid if martial law is in fact ended.●

MONEY MARKET ADVISORY BOARD

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. ADDABBO. Mr. Speaker, on occasion I bring to the attention of the House remarks by the former Assistant Director for Planning and Budget of the Interior Department, Irving Zuckerman, a distinguished economist whose point of view brings this murky subject into focus for even those of us who find economics incomprehensible. Mr. Zuckerman has recently written another essay on the question of interest rates and the effect upon the international economic recovery opportunities. I believe the Members of the House would find this article instructive and I submit the essay to be inserted into the RECORD.

The text follows:

MONEY MARKET ADVISORY BOARD

(By Irving Zuckerman [1])

My tax accountant is once again alarmed about the outlook for interest rates that may affect his clients, some of whom are still teetering on the edge. His concern has been intensified by the foreign debt complications, and the Central American situation. "Just when I began to feel some comfort that interest rates are bound to continue downward, signs appear toward a 'temporary' rise in interest rates with possible effect on recovery. And then there is the $8 billion considered for IMF. Is sustained recovery being jeopardized?," he asked.

Me: That is a broad question, so let's try to take one item at a time, starting with the more recent. Central American countries have had very high interest rates all along, and we recently had a chance in the U.S. to see how high interest rates can disrupt even a strong economy, no less a weak economy.

Him: What are the interest rates in El Salvador then, for example?

Me: I do not recall seeing mention of the interest rates in El Salvador, or those in any of the defaulting countries. But based on experience in the U.S. it might well be that we cannot hope to help any country where interest rates are a major problem, no matter how much U.S. taxpayer money is poured in.

Him: I hope that the $8 billion does not represent a first installment on the $500 billion total loaned abroad by U.S. banks mentioned in news items. By the way, wasn't much of the $500 billion loaned abroad when there was urgent need in the U.S. for liquidity and when we were being urged to save more?

Me: I recall a hearing in the summer of 1981 chaired by Congressman St Germain where Congressman Reuss, Chairman of the Joint Economic Committee, asked Volcker about this, and Volcker said it didn't matter since money comes in and money goes abroad.

Him: But the higher interest rate abroad meant much higher risk, so that it wasn't a better deal even considering the somewhat higher interest rate abroad than in the U.S., so I wonder at . . .

Me: I also recall a Wall Street Journal item late in 1981 quoting the senior executive of a bank heavily into foreign loans where he said, "We take full responsibility for our credit portfolio. We are not asking anyone to support it with taxpayer dollars and we don't claim there isn't a threat to world stability. But we're prepared to take the consequences of our action." I made a note of that at the time the item appeared on page 10 of the December 21, 1981 issue. In the same news item another banker referred to other bankers who prefer to deal with "authoritarian" governments.

Him: Could it be that is the reason why the U.S. so often finds itself supporting questionable interests in other countries? I favor an independent Federal Reserve Board. But it seems we are not organized to defend ourselves economically.

Me: We do seem to need a mechanism to protect national interest, while allowing private pursuits to operate less short-sightedly. So, besides the Fed there is need for a tripartite 'Money Market Advisory Board' on which there could be represented all the components of the money-market. We need timely fact-finding and that involves all the components early.

Him: I recall an editorial headed "Money Mystery" which deal with what caused sudden changes in the money-supply, which the Federal Reserve tries to use to fight inflation. More recently, there was a $7 billion change in one week that was a "mystery". In actual practice, it turns out that Congress does not seem to be able to handle those kinds of problems for political reasons. So, perhaps a money market board could be exactly what is missing. What details do you have in mind?

Me: The independent of the Federal Reserve would be maintained; but on the money market board the Federal Reserve would speak only for the banks—the lenders—the money-supply side of the table.

Him: And who would speak for the borrowers—the money-demand side of the table? We now have little or no participation of that kind at some of the more important decision-points. And I have industrial borrowers in mind in particular.

Me: That is a major point. The non-financial corporations would have representation on the money market board, and would have an opportunity to choose such a representative.

Him: But part of the money-supply in the money market is foreign, and part of the money demand is also foreign. This can be important. Higher interest rates in the U.S. and foreign instabilities bring added foreign money into the U.S. that goes into circulation. Then the Federal Reserve sees higher money supply and ups the interest rate to curb the domestic money supply; and that higher interest rate brings still more foreign money into the U.S. circulation which then causes the Federal Reserve etc. etc. Isn't that . . .

Me: Possibly, but in general we have been playing 'blind man's bluff' in quite a few ways. Well, in the money market board, foreign money would be represented on the supply side of the table, and foreign borrowing would be represented by a different man on the demand side of the table.

Him: And governments borrow lots of money too—federal, state and local governments—so they would be represented on the demand-side of the table?

[1] Economic consultant. Formerly Assistant Director for Planning and Budget, Interior Department.

Me: Consumer credit would have a representative on the demand-side of the table.

Him: I can see that choosing a chairman for a money market board could be tough.

Me: Considering that all the representatives are in economic conflict, with the federal government itself being a party at interest, I naturally look to the judiciary for an independent life-tenured public interest chairman whose actions need to be objective in defending free economy system.

Him: But banks are not the only lenders, so the supply-side of the table seems incomplete.

Me: The description is simplified, of course. I do have in mind substantially complete data for the money and credit providers on the supply-side of the table, and substantially complete data on the money and credit demand-side of the table.

Me: I see that you are sensitive to customary deficiency of data and representation when vital public policies are being determined. Let's say the money market board comes together, now what? It seems like a kind of accounting job in detail, so perhaps CPAs . . .

I would expect the open board to receive requests from Congress, the President, etc. And the board would be in a position to provide the necessary many-sided information, probably including supply and requirements tables.

When all the details of practice are fully developed, it should be possible to have theories that conform to the realities. And it should also be possible to develop more realistic problem-prevention so as to be able to follow a safe course. Gambling in the dark cannot be considered conservative. With all the money market components participating, it should be possible to avoid the one-sided approaches that throw the economic system out of balance. With the third side of the table representing public interest in protecting the free economy system, I would expect the outlook to be substantially improved.

I can see that my clients would be better off now if we had had a money market board, but how about such problems as smoke-stack industries which we now see?

Since the smoke-stack industries are cyclical, they are exceptionally hard-hit by economic slumps. It is short-sighted for cyclical industries to finance heavily with long-term debt. In fact, I would hope that a money market board would be free to take the long-view of industry-finance into account for the sake of economic stability. I think there is excessive inducement for debt-financing.

So you expect the smoke-stack industries to come back with general economic recovery. Some of my clients would be glad to see that. But what about the huge federal deficits?

In former years federal deficits were considered to be stimulative, so it might well turn out that a substantial part of the present deficit problem might turn out to be cyclical. Any federal deficit is a means of buying time in which to make underlying economic adjustments including methods of financing. As lawyers like to say, "We can't have our cake and eat it too."

Would it be beneficial for El Salvador to set up a money market board?

Any country should be able to make more effective use of its financial resources with such a tripartite board. In the case of El Salvador, a more effective domestic economy is urgent to enable U.S. assistance to have more result with savings to the U.S. taxpayers.●

WOMEN'S PENSION EQUITY TIME FOR CONGRESS TO ACT

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. ROYBAL. Mr. Speaker, on Tuesday, June 14, 1983, the Select Committee on Aging, of which I am chairman, conducted a hearing reviewing the inequities that women presently face under our Nation's private pension system. The difficulties enumerated by public witnesses, national women's groups and pension experts, present a persuasive case that the Congress should act with dispatch to redress these problems and to better assure the retirement income security of older women—the fastest growing group entering poverty in the Nation.

Today the number of women entering the work force is increasing daily. More women are heading households, a substantial number remain in the home to rear children, while still others are pursuing a range of careers from professionals to assembly line workers. In whatever role women may find themselves there is a need which must be fulfilled for each. That is that women need the assurance of a financially secure retirement after their productive working years end.

The inequities that face women under our Nation's private pension system are in some ways not dissimilar to those problems which women have faced throughout our history. The ability to obtain and enforce legal rights, to be treated fairly, to have equity in fact as well as in law, have come slowly to women in our society. Examples abound, from the founding of the Nation it took some 143 years for women to gain the right to vote. Many women could not enter into a contract or own property in their own behalf for over a century.

The problems are of some immediacy. Based on the most recent statistics of the Current Population Survey (CPS) of the Census Bureau, over 43 million or 42.8 percent of the labor force is composed of women. Only about 9 million or 21 percent of these women are covered under a pension plan of an employer. On average, the amount of pension benefits a woman receives is smaller than the amount received by men. An early study conducted by the Social Security Administration in 1970 indicated that the median annual private pension for women was $970 and $2,080 for men. Recent microsimulation studies conducted by Brandeis University suggest that these same disparities obtain in the present. Or, as noted by Lou Harris in his testimony before our committee, women age 65 or older receive less than men of a similar age stating that, "the median income for these women, who make up 55 percent of all our senior citizens, is a miserable $4,747 a year, compared with almost double that amount $8,173 for men of the same age." Harris further noted that the problem most frequently cited by both men and women was a lack of adequate financial resources.

In 1974, the Congress passed the Employee Retirement Income Security Act (ERISA) to protect workers covered by pension and welfare benefit programs offered by their employers and employee organizations. This law was enacted to protect the millions of American workers who look forward to and will rely on their pensions to support them in retirement. While passage of this law represented a tremendous step in securing pensions for our workers, it is clear that the next step is at hand, that the inequities against women permitted under present law must be removed.

The Economic Equity Act, introduced by Representative PAT SCHROEDER (H.R. 2090) and the Private Pension Reform Act (H.R. 2100) introduced by Representative GERALDINE FERRARO of our committee represent the principal legislative thrust to remove these inequities. A woman's retirement income security is no less important than a man's and it is time for then Congress to do more to honor this theorem.

In his state of the Union address, President Reagan said "Our commitment to fairness means that we must assure legal and economic equity for women * * * we will also take action to remedy inequities in pensions." I was disheartened last week to hear that certain senior advisers and members of the President's Cabinet had advised the President to resist legislation improving retirement savings for spouses, to resist legislation outlawing discrimination in insurance products, including pension plans, and to forestall submitting pension equity legislation involving women until the Supreme Court rules on the Norris case. It is this type of advice within the administration that lends credence to the "gender gap" to which the polls have alluded in recent months. It is my hope that the Congress and the administration will join in a bipartisan effort to insure pension equity for women.

I call upon the Congress to act decisively and to act now. Older women are entering poverty at an alarming rate. The Congress must assure that women obtain pension equity now. To not do so will mean to consign upon women as individuals and as a group inequities which will lead to their destitution in old age.●

THE FLEDGLING SCIENCE LOBBY

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 28, 1983

● Mr. BROWN of California. Mr. Speaker, I wish to call my colleagues' attention to a relatively new organization, the National Coalition for Science and Technology (NCST). This is a nonpartisan group of scientists, educators, businesspeople, and engineers. It is composed of both individual and institutional members.

What all these people have in common is that they are concerned about the recent, alarming trends in science education, scientific research, and industrial productivity in America. Through this coalition, they are seeking positive action to help the United States retain its leadership in these critical areas.

Organized late in 1982, NCST already has been involved in fighting the Office of Management and Budget's proposed changes in rules governing the activities of Government contractors and grantees. Next month, the group will be testifying before Congress on the subject of antitrust laws affecting joint R&D ventures.

In October, the coalition plans to hold a national conference on legislation affecting the use of animals in laboratory experiments. Then, in November, they are holding the first in a series of regional forums on trends in science education.

I am pleased to serve on the advisory board of the National Coalition for Science and Technology, which Congressional Quarterly magazine recently dubbed the "Fledgling science lobby." This is an energetic group which is working very hard to address many important and complex issues which will help to shape the future of our society.

Our colleague, CLAUDINE SCHNEIDER, recently joined me on the NCST board of advisers. Senators PAUL TSONGAS and WARREN RUDMAN also serve on the advisory board, along with a number of distinguished individuals from industry and academia.

Mr. Speaker, we know that scientists and engineers historically have been reluctant to enter the political arena. The research community may well be the last important sector of our economy to organize itself to participate in the political process. Ironically, the research community may be in the best position to give advice to Congress on these matters. While science cannot provide all the answers—and I sometimes think we expect it to—scientists are well placed to delineate the limits and the potential for science to contribute to society and to help formulate public policy.

The formation of the National Coalition for Science and Technology appears to be a promising first step towards reversing this situation.

Last week, the Boston Globe ran an excellent article about this organization and its energetic chairman, Don Stein. I insert the article for the RECORD and urge my colleagues to review it.

[From the Boston Globe, June 13, 1983]

NEW HIGH-TECH LOBBY UNITES SCIENCE, BUSINESS

(By Davis Bushnell)

Although the science and business communities have rarely been symbiotic, a new group in Washington, The National Coalition for Science and Technology (NCST), is attempting to forge a relationship between the two that will have considerable impact on Congress.

Science groups worried about Reagan Administration cutbacks are increasingly demonstrating their political mettle. Last year, for example, a group of space scientists employed by universities persuaded Congress to restore $3.2 million to the basic research budgets of The National Aeronautics and Space Administration. And six months ago, the American Physical Society, representing 33,000 physicists, opened a Washington office.

But no lobbying organization of late has gambled on bringing together scientists and business persons—those from a high-technology sector—for the purpose of becoming a respected pressure group on Capitol Hill.

Early organizational efforts have confirmed the hesitancy of business to take part in the NCST venture, said Donald G. Stein, chairman of NCST's executive committee, adding that, as of last week, there were only 10 corporate supporters. Since the group was formed last fall, it has attracted 500 individual members.

"Even though I'm aware of the differences between scientists and business people, I'm surprised by the reluctance of industry to help us get going," said the 44-year-old Stein, a professor of psychology and director of the brain research laboratory at Clark University at Worcester.

"Business people," said Stein, "have told us, 'We have our own associations. Why should we help a group of scientists get involved in the (political) process when we have our own mechanisms?' It's hard for us to convince them that we have a common goal. Business needs us—for the people were training in universities—and we need business. The challenge is becoming credible, given, so far, our limited resources."

NCST, which began operating out of The National Education Association building in March, has set its sights on enlisting the support of from "60 to 100 companies" by the end of the year, Stein said. An infusion of $60,000 during this period, he said, would be sufficient to "support membership mailings." Individual dues are $30 and $15 (students), and corporate fees, based on company size, range from $250 to $5,000.

Among the 10 corporate members are Wang Laboratories of Lowell, Motorola Corp. and Purdue-Fredrick Co. of Norwalk, Conn. In the coming months, a comprehensive corporate solicitation program will be implemented by a Washington fund-raising and public relations firm, Stein said.

Businesses will be solicited for both memberships and categorical grants, he explained. The Norton Co., the large Worcester abrasives manufacturer, has already pledged funds for a Nov. 18 symposium in Worcester on trends and science education and their implications for society and business. The forum will be co-sponsored by Clark and Worcester Polytechnic Institute.

Support of science and education is one of NCST's initial goals, Stein said. "We want to offer a broad-based support for all scientific areas—including civilian use of space, health research and international cooperation and exchange—that have tremendous spin-offs for the long-term interest of the country. Defense is important, but these other interests are worth defending, too."

The "broad-based" is an adjective used often by Stein, who spearheaded the formation of NCST, following his experience in 1980-1981 as a congressional fellow in science and engineering. "As a fellow," he said, "I saw individual groups testify, Group A would say, 'Give us the money, we're on the frontier.' Another group would say the same thing, and so on. This pits one group against the other, which is bad."

NCST is therefore trying to do something no other group has attempted. That is, he said, "To bring together all scientific constituencies—from astronautics and astrophysics to zoology."

While corporate support generally still constitutes NCST's major problem. US Sen. Paul E. Tsongas (D-Mass.), an NCST advisory board member is convinced that business will come around. "If this isn't a right time for such an organization, I don't know what time is," Tsongas said.●

SENATE—*Wednesday, June 29, 1983*

(Legislative day of Monday, June 27, 1983)

The Senate met at 8:45 a.m., on the expiration of the recess, and was called to order by Hon. JOHN H. CHAFEE, a Senator from the State of Rhode Island.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Omnipotent, Eternal God, this is a place of power. Where there is power, there is pressure. Where there is pressure, there is friction. Where there is friction, there is heat. Under such pressure the Senators serve, added to which is personal tension between conscience and demands of public and private interests and political destiny. And always there is the tyranny of the urgency. In the vortex of all this the leadership works. Dear God, bless our leaders. Grant them special wisdom, strength, and patience.

Father in Heaven, in the midst of the stress, grant Senators Thy peace. Make them wise as they face choices that are rarely either/or, all right or all wrong, all good or all bad. Give them wisdom and sensitivity and the courage to act as conscience dictates and peace in their hearts once the decisive moment is over. May this recess be family time as well as work. We pray in the name of the Prince of Peace. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., June 29, 1983.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JOHN H. CHAFEE, a Senator from the State of Rhode Island, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. CHAFEE thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

SENATE SCHEDULE

Mr. BAKER. Mr. President, perhaps this is the last day of session before we go out for the July Fourth recess. However, in order to accomplish that, we have a vote at 10 a.m. on the tax cap bill. The leadership on this side proposes to take up and dispose of the agriculture appropriations bill. There is at least one conference report which I understand will be available to the Senate today. That is the HUD appropriations bill, which must be dealt with, and other conference reports if they arrive here.

What that means is that we are going to have to work very hard and very fast if we get out today. The adjournment resolution which has been passed by this body, and I believe not yet passed by the House of Representatives, provides for our adjournment over until July 11 beginning today, tomorrow, or Friday. I hope it is today.

Mr. President, I have no further need for my time under the standing order.

RECOGNITION OF THE ACTING MINORITY LEADER

The ACTING PRESIDENT pro tempore. The acting minority leader is recognized.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the time of the minority leader be reserved for later in the day.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE PRELUDE TO A GREAT CAREER

Mr. BYRD. Mr. President, only weeks ago, Senator JENNINGS RANDOLPH announced that he would not seek reelection to the Senate when his current term expires next year. Senator RANDOLPH and I have represented West Virginia together in this Chamber for nearly a quarter century. Since his election to the House of Representatives in 1932, Senator RANDOLPH has been a familiar figure in Washington, and has made thousands of friends over the years. I know that I speak for those thousands and for our many Senate colleagues in expressing my regrets that Senator RANDOLPH'S long Senate tenure is coming to an end.

Appropriately after so many years of public service, Senator RANDOLPH'S admirers are holding special events in his honor. Likewise, friends and associates are sharing with one another their warm memories and anecdotes of Senator RANDOLPH'S outstanding career. All of the banquets, awards, and the stories are further tributes to the influence that Senator RANDOLPH has borne on the lives of so many people in so many walks of life. Indeed, Senator RANDOLPH should take real satisfaction from the sincere gratitude and appreciation that, again and again, are being expressed toward him for the many acts of kindness and helpfulness that he has rendered throughout his life.

Senator RANDOLPH'S public biography is well known to most people. But the current issue of West Virginia's own Goldenseal magazine carries a candid and enlightening first-person account of Senator RANDOLPH'S memories of his early personal and family life. The Goldenseal article includes several nuggets that would interest Senator RANDOLPH'S friends and colleagues, such as the story of how he came to be named "Jennings."

Mr. President, to share that commendable account with a wider audience, I request that the article, "Jennings Randolph—'Always Remember the Man and Woman By the Wayside of the Road,'" from the 1983 summer issue of Goldenseal magazine, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

JENNINGS RANDOLPH—ALWAYS REMEMBER THE MAN AND WOMAN BY THE WAYSIDE OF THE ROAD

(By Michael Kline and Gene Ochsendorf)

Jennings Randolph announced this spring that he would not seek reelection to the U.S. Senate in 1984, thus signaling the end of a long and distinguished political career. Randolph first entered Congress as a young Representative 50 years ago, coming to Washington following the Roosevelt landslide in the 1932 election, and he has served in the House and Senate for most of the time since then. For generations he has been a living legend in West Virginia, yet his high offices have not isolated him from his constituency. Throughout his years of government service he has remained approachable.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Senator Randolph's accessibility to us in particular grew out of his authorship of legislation and lifelong support of programs benefiting disabled people. When the Randolph County Sheltered Workshop found itself suddenly without facilities last year, the Senator jumped in and helped the Workshop get reestablished in new quarters. He then showed up at the opening of the new plant to celebrate with the participants. It was in this context that we became acquainted, since co-author Gene Ochsendorf is the director of the Workshop.

Although Randolph's name has been a fixture in the news for decades, there's been very little written in the way of solid biography of the man. We suspected that he had a remarkable story to tell. When we suggested doing an interview for Goldenseal, he responded cheerfully that no one had ever asked before and that he would be delighted to cooperate.

(So it was that we met at his birthplace in Salem on a snowy evening in February. For a couple of hours he entertained old hometown friends—E. J. (Jean) Lowther and wife Mary Ann, Ed and Sylvia Davis, and Everett and Elizabeth Pearcy—with tales and songs. Then we dashed off to see the Salem-Wesleyan basketball game. We left there about 9:00 and crept back to Elkins over icy roads with the Senator talking steadily the whole way. In Elkins we enjoyed a midnight snack at a local restaurant, where Randolph engaged a young waitress in a lengthy discussion about voter responsibility. As the authors and photographer—all young enough to be Randolph's grandsons—wilted like tired flowers, the Senator went on being animated, energetic, and lucid.

(The conversation resumed early next morning in Randolph's apartment at the Tygart Hotel, and continued right up to his 11:10 AM flight time at the Elkins airport with tales of his pioneering in American aviation. As we watched in near exhaustion, the 80-year-old Senator departed with a blithe smile and warm farewell. In Washington that afternoon he faced a rigorous schedule of hearings and public appearances, and he went off to meet those responsibilities like a youngster to a basketball scrimmage. After nearly 20 hours of exposure to his boundless energy, we began to understand how he has accomplished so much.

(The Senator's political career is already well-known, and we've concentrated on Jennings Randolph's early life, taking his story up to the point when he drove off to Washington with his new bride to take up his seat in the House of Representatives. Here is his account of how it all began.)

Jennings Randolph. I grew up in a town where Main Street was something, you know, people stopped and talked. I never knew what it was to ride to school; you always walked. The little town is not too much different from what it was then. We don't have the glass plants, and oil and gas that made it such a busy place back in those years, but it still looks pretty much the same.

My grandfather Jesse Randolph was the first mayor of Salem. In fact, on his first day of becoming mayor he had to fine himself. There was an ordinance that if your horse got out of the road and up on the sidewalk—the sidewalk in those days was mostly timbers up on stilts—there was a fine of a dollar or two. So the first fine my grandfather imposed was on himself for his horse getting up out of the road and onto the sidewalk.

My grandfather was a very colorful man, loved by everyone. He had a little white goatee, and everyone called him Uncle Jesse. He was the man that Salem looked to and he never let them down. He was a member of the State Legislature, director of one of the banks, involved in various businesses, and was a farmer. He taught me how to ride a horse, pitch hay, and milk a cow. He was very close to me.

Jesse Randolph was also the principal founder of the college, and head of its incorporators. When the college was first supposed to open the building wasn't finished, even though they had already announced that registration was to take place. Grandpa took all of the merchandise out of his general store and put it in lots and barns elsewhere. Then a sign went up in front of that store—Salem College. It was very important to him—always, he'd say, you must keep your word. So even though the building wasn't completed, the college opened. That was his feeling about everything, that your word must be your bond.

He used to have a garden in front of his house which upset his wife, Mary Frances, a little. She thought there shouldn't be a garden in front of the house—pole beans and whatnot. One day she said, "Grandpa, why do you have a garden out front? Why can't you have a lawn?" "Well," he said, "gotta have something to eat."

And every morning he had apple pie for breakfast. Never changed it. I can remember one morning he came in the kitchen and my mother said, "Grandpa, have a little breakfast with us." It was about 7:30, sister and I were getting ready to go off to school. He said, "Idell, I appreciate that, you know I do, but I always make it a rule to eat in the morning." Well, you see, he ate at 6:30 every morning, so he was telling the truth.

Grandpa and Grandma were married under a tree at Quiet Dell. When the ceremony was completed she got on the horse behind him and rode to Salem, same horse. I remember seeing that same tree where they were married in later years. They're in the little cemetery of our church along with my father and mother. We have all of our family there.

My father, Ernest Randolph, was a very fine lawyer. He had an office in Clarksburg in the Goff Building. He and Edward Law, who was known as Jay, had offices side by side. They were exactly the same height, weight, and everything. When they left this county to go to the university in Morgantown they roomed together. In order to save money then decided to buy one suit together. They called it their courting suit.

My mother, Idell, was a Bingman. Jim and Medina were her parents. Jim, her father, was a timberman and used to ride the logs down the Tygart River from up in the Elkins area. He rode the logs down into what's now the Tygart Lake. He used to tell me about jumping from one log to another. Grandma and Grandpa Bingman lived right behind us in Salem and I used to sit and watch him and work with him. He could take a piece of wood and make anything.

My mother and father were married in the chapel of the college, October 22, 1896. I remember later my mother telling me, she said, "I said to Papa, now who are we going to invite?"

"Why," he said, "we're gonna put it in the paper and invite everyone." So they invited everyone. Theodore L. Gardiner, the president of the college, performed the ceremony. I still have his record of marrying Idell Bingman and Ernest Randolph in his own handwriting.

My sister, Ernestine, came along first. By the way, she is 83 years of age now and very active. This morning I saw her on the floor of her living room in the apartment next to where I live in Washington doing her exercise. Doing them well, I might add.

Speaking of Ernestine, I remember once riding my grandfather's horse down the hill back of our house. I was about eight, nine years old. My sister was on behind me, I was in the saddle. The horse began to canter just a little. My sister was slipping and she had her arms around me and started sliding off. Apparently the saddle wasn't tight enough and so we both went to the ground. My foot was in the stirrup and had the horse moved along I wouldn't be here tonight. However, the horse stopped in its tracks, which horses don't always do when there is an accident, and I was able to get out of the stirrup. I can still hear my sister crying, "Oh, my gosh, what have I done!" I remember that experience so well, and I've loved horses ever since.

Walt Strother, the doctor who brought me into this world, always rode a horse. He kept his medicines in the saddlebags and would come any time of night. He would get off his horse, pull the reins up over the horn of the saddle, tap the horse on the rear end, and the horse would travel around the corner to Mathias Williams' livery barn while Dr. Strother would go on up to his office.

When I had just been born, my father was with William Jennings Bryan[1]—they were very close friends. Mr. Bryan said, "Have you named this boy?"

"No," my father replied.

"Then why don't you give him part of my name as a good Democrat?"

So that's the way I got my name, Jennings Randolph, from William Jennings Bryan.

I have many fond memories of growing up in this house on Main Street. Paul Bumgardner, who lived next door, and I would sleep with a cord strung between the houses and tied to our big toes. This was so we could awaken one another when the Ringling Brothers Circus was coming from Parkersburg to Clarksburg. You see, this was the main line of the B&O railroad and we would go down and stand along the tracks and watch the circus train pass. Mr. Coyne, who was an Irishman, would always let us know when it was coming through. He was the telegraph operator and had all of the schedules. We were maybe eight, 10 years of age.

Above the tracks on the hill was the town's water tank. I used to tell my father and mother that if I could get a long pole and climb the hill, which I often did, then climb the tank and hold out that pole, I believed I could touch the sky.

Those were rough and ready days. This was oil and gas country. My father was mayor of Salem and was against legalized drinking. Others wanted to establish open saloons and came one night to burn the house down. We used to have a railing around the porch roof and my father stood there with a pistol and told them that the first man that moved would get it right through the middle of his eyes. The same thing happened at the college. They threatened to burn it and Theodore L. Gardiner,

[1] Bryan, the great populist politician, was a three-time presidential candidate at the turn of the century. He served as Woodrow Wilson's secretary of state from 1913 to 1915.

the college president, stayed in the belfry all night with his shotgun.

My first introduction to politics was not a good one. I was about seven or eight years old. Some of us kids were playing in the hayloft of Gus Traugh's livery stable when we heard voices below. We looked down and there was a Salem man, whose name I won't use, paying off people who had voted in the election. it was shocking, and very sad, but that was the picture. I went home and talked to my father and grandfather about it. That was my introduction and not a good one.

Then in 1912 my father took me to the 1912 Democratic Convention. I was 10 years old and we boarded the train here and went through to Baltimore. That was the last convention, Republican or Democratic, held in Baltimore. I can remember the bunting and the bands as I sat on my father's knee. Papa was a believer in Woodrow Wilson and thought he should receive the nomination. Others in our delegation were for Champ Clark, the Speaker of the House, from Missouri. Woodrow Wilson was then the governor of New Jersey. He told William Jennings Bryan over the phone that he would accept the nomination provided that it was not necessary to have the votes from Tammany Hall [2] then under Boss Murphy's control. Finally, Wilson won out. So I got started early.

At that time in life, though, politics couldn't compare to baseball. I remember riding the train all night to Washington, D.C. I didn't go to the Capitol or the White House, I went to see Ty Cobb play baseball. He was the man, a sports hero I looked up to. He could run the bases, he could hit, he could field. In those days baseball cards came with Rumford Baking Powder and I had all the women of the town saving cards for me. When I got off the train there I walked out to my Aunt Mae Townson's house—she was the daughter of Jesse Randolph—and had breakfast. Then I walked to Griffith Stadium—that's the old Griffith Stadium—where the Washington Senators were playing the Detroit Tigers that day. So I got to see Ty Cobb. Another time Branch Rickey came to our house for dinner. He was here speaking at the college as part of our lecture series. I sat there with my eyes wide open listening to everything Branch Rickey said. I think my intense interest in sports, eventually leading to my becoming sports editor of the Clarksburg Telegram, was due to these events.

We only went to public school up to the third grade. Then we went to the training school at Salem College Academy. Salem Academy was part of Salem College's teaching program and so we had practice teachers all through the Academy. These practice teachers were very dedicated. Sarah Barnes, Mabel West, I remember then all. I used to study by the fireplace standing up. I would enjoy warming my backside, turning back and forth. It was in the springtime of my life. Sweeter than springtime.

Salem had several glass plants at that time. We had over 500 Belgian people expert at hand blowing glass. Some of these Belgian people were active leaders—Oscar Andre, the counsel for the college, for instance. Those plants are closed now, but you can still see some of the buildings.

[2] Tammany Hall was the corrupt New York City Democratic machine, best known for producing the notorious "Boss Tweed" in the late 19th century. Tammany was under the control of Charles Francis Murphy in Wilson's day.

The old road coming into Salem was narrow and going over Tunnel Hill from the west was quite a climb. If you made it in high gear you'd tell your friends about it. George Trainer had the first automobile in Salem. It was a Winton. I remember my uncle had the first small car. It was a Bush. It had no doors, you just stepped in. I can see it going down the street. Even though there were cars, in those days you didn't go out for a date, you came to stay. I can remember so well when my sister Ernestine had a boyfriend come to the house. Ten o'clock was the time for the young man to leave. At 10:00 father would call down and say, "Ernestine it's 10:00." Then, if the young man still didn't go, he would take his shoe and begin pounding the floor by his bed.

As I grew older I worked at various jobs around Salem. I kept a filling station open all day long on Sunday. My mother would bring my lunch down. I worked in a clothing store, Davis Men's Furnishings, and I worked at the planing mill owned by Evander Randolph. I also worked with my father. He was an oil and gas producer, president of the Randolph Oil and Gas Company. I still have a copy of the stock in my drawer, but it's worthless today. He drilled many dry holes in the hollers around Salem.

My father was also a cattle buyer, shipper. He didn't raise the cattle—he'd buy them in the spring or summer for shipping to Baltimore and Jersey City. He kept a little book in which he wrote the day of the transaction and the price at which he had agreed to take them up. We would drive the cattle in, try to keep plenty of water in them so they would weigh well, and then we'd load them, usually on a Friday evening, to be sold on the open market. These were beef cattle, very finest we had in the hills, and lambs also. Very seldom did we ship any hogs. There were loading pens at Wolf Summit, Bristol, West Union, Pennsboro, and of course Salem.

In 1920, when I was graduated from the Academy, my mother gave me no suit of clothes, or shirt, or tie; she gave me a Bible. On the flyleaf in her own handwriting she had my name, just Jennings, and then she had written these words—"Each for the other and both for God," sighed Idell. I've never found the source. We've had researchers work for years on it at the Congressional Library and elsewhere. That was her graduation gift to me and I still have it.

I was very active during my college years at Salem. I was a member of the staff on the Quill Club. That was the college yearbook, the Green and White. I remember singing in the Glee Club with my white pants and blue jacket. And although you wouldn't know it by looking at me now, I was very active in sports. I was a member of the varsity track, tennis, and basketball teams. Basketball was very different in those days. Today with fast breaks it's really speeded up. Back then there was only one person on the team that shot the fouls. I was that person. I used to practice two or three hours at a time. I would shoot like this, underhanded from below the waist. In 1923 I shot 19 consecutive fouls against West Virginia Wesleyan and we won by one point.

One night in 1923 I was called before the college board of trustees and didn't know what was happening. Charles A. F. Randolph was president of the board at that time. They came in and said I was to be a trustee. I remember saying, "You mean a student representative?" "No," they said, "a full-fledged trustee to take your father's place." So that was how I came on.

Recently when I came to attend a meeting of the trustees a man called across the street and said, "Jennings, I want to see you a moment. You were a trustee of this college for 50 years. Now I see you listed in the paper as Trustee Emeritus. What in the world is the meaning of that word, 'emeritus'?" I said, "It just means I'm still hanging around."

While I was in college I worked for the Clarksburg Telegram as a writer and sports editor. Then it was published on weekdays and Sunday. I would drive back and forth from Salem to Clarksburg in a little two-door Ford. It was a narrow, twisting, mostly dirt road in those days. After graduation I worked there as a regular reporter for approximately a year. At the same time I also wrote magazine articles for publications such as McNaught's Monthly.

Following my work with the Telegram I went to Charleston to work for Phil Conley on the West Virgina Review, eventually becoming associate editor. It was a wonderful magazine featuring West Virginia writers, poets, and articles. Tremendous man, Phil Conley—he worked me to death, didn't pay me too much, but it was a great experience. I'd come in from these trips all over the state and then address Rotary, Lions, Kiwanis, women's groups, whatever, about West Virginia and its history. I would sell ads, take subscriptions, do everything, then go back to my room and write stories until one or two in the morning.

I had a room at 1215 Lee Street in Charleston. Hardly wide enough for me to get in and a little bed hardly wide enough to sleep in. Eight or nine of us boys lived there and ate down the street at Mrs. Plunkett's Boarding House. Doesn't that sound like a boarding house? Plunk-it. I said one time, she's serving good meals but she's trying to marry off her daughter! I don't remember the daughter's name. She was slim, tall, had a long reach.

I was in Spencer writing about a Mr. Heck who had struck oil and become a millionaire overnight. While eating lunch at the McKowan Hotel I had a phone call from Elkins. It was a member of the Davis and Elkins College Athletic Committee asking if I could come that weekend and talk with them about possible employment as athletic director and member of the teaching staff. The president of Davis and Elkins College at that time was Dr. James Allen. His son, James Allen, Jr., was a student of mine and later became commissioner of education of the United States. Anyway, when I first came to Elkins I stayed with Jeff Whetsell and his wife Mig.

As athletic director I immediately began booking big, prestigious schools. The guarantees weren't good at first, but we needed the exposure. We defeated West Virginia University in its opening football game, 6-0. The following week we traveled to Annapolis where we defeated one of the best Navy teams ever, 2-0. It was a great story—no substitutions. Sixteen players in uniform and 11 men played the whole 60 minutes. It was a tremendous upset recognized all over the country. After the game a representative of the Baltimore Sun was in the dressing room and he suggested that we go to a vaudeville theater, the Gaiety Burlesque, to celebrate our victory. So I telephoned the Gaiety Burlesque and told the manager who I was and that I was calling from Annapolis where the Davis and Elkins football team

had just upset Navy 2-0. He says, "You say you beat Navy?" I said, "Yes, and we'd like to have, if we could, a reduced rate tonight, perhaps some special seating." "Why," he said, "We'll give you two full rows! Won't cost you a penny! Some of the leading women of the cast will come down and kiss the players on the cheek!" It wasn't always that good. One time we played the University of Delaware and all we had was enough money to buy a couple of bags of apples to eat.

In 1931 I took the basketball team to the west coast on the longest tour ever taken in this country. We drove out of Elkins in two little cars during the holiday season so as not to miss school. We even took our books. To cut down on expenses we only took six players. Our first game was with Valparaiso University, then the University of Kansas, University of Denver, University of Nevada, Brigham Young University, and so on. We played St. Mary's in Oakland and then went to San Francisco where we were scheduled to play San Jose College. But we had run out of money. We were staying in the Golden Gate Hotel which was second or third class at that time. It's a fleabag now, but whenever I'm in San Francisco I go back there. So I called the only person I knew who would help us—Hallie Davis Elkins.[3] The team was called the Senators or the Scarlet Hurricane, but when I called her I said, "Mrs. Elkins, your team is winning these games—it's great for the college!" The story was being carried of how the Scarlet Hurricane was finishing the games sometimes with only four players on the floor. And the next day we were moving on to Los Angeles to play Occidental and Pomona.

"Mr. Randolph," she interrupted, "how much do you need?"

When I told her we needed $200 she said she would telegraph $250 immediately. So I called the team together and told them Mrs. Elkins had come to our rescue. They cheered and that night we ate steak. We hadn't had much to eat along the way. She was a wonderful supporter of our college.

Michael Kline. Was it in Elkins, then, that you met your wife, Mary?

JR. No, I met her when I was at Salem College. Not in Salem—I was a tennis player and I went to Keyser representing Salem College at Potomac State. They were redoing some of the dormitories and they placed some of us that were there for this state collegiate tournament in homes. Edged right along the college property on State Street was the home of Frank Babb and his wife Gertrude. I remember when I went to the house, why, here the door was opened by a girl about 14 years old in pigtails, and that was Mary. I told her who I was and went in. I stayed there, I guess, maybe two, three nights in the Babb residence. They were Swiss people, both sides. Gertrude was a Scherr, Mary's grandfather Scherr ran for governor of West Virginia.[4] Her uncle was in the State Senate, and her aunt worked as society editor on the Charleston Gazette.

Later, Mary went to Beaver College near Philadelphia and we kept in touch. After I was at Davis and Elkins College she would come to Elkins and bring children to the West Virginia Children's Home for placement when she worked with the welfare department. She was known as the "Welfare Lady" and would go way back up in the mountains of Pendleton County.

I'll tell you a true story. I remember reading it in her diary. She went into the Smoke Hole area. There was a family, I won't tell the name, but the husband left and there was a very large number of children. Well, the report went in and they told Mary about it. So she drove up in her car. Many times she'd drive that Ford and have to put on her swimsuit and swim the river to get over. She went up this hill to a hut and here was this woman standing with her feet apart wearing a long apron ("not too clean," Mary had put in her diary). "Well," she said—and she was a little nervous about it—"Mrs. So-and-so, let me talk with you. How many children do you have?"

She replied, "Well, Welfare Lady, I've had three once, two twiced, and one just lots of times." That meant she had triplets once, and twins twice, and then one kid lots of times. Mary looked around and realized she had 12 children there. The husband had just left, pulled up stakes. She took care of all of them.

She also used to ride the narrow gauge railroad that ran from Hendricks up to Harmon. And the conductor, who was her friend, would hold the train and wait for her to go get a child, you know. People on the train would say, "What's wrong, why are we delaying?" He'd say, "We've just got to check the engine a little." Mary said she'd heard him say that so often.

We were married February 18, 1933, in the Babb's living room in front of the fireplace. Jean Lowther was best man and Reverend George B. Shaw traveled from Salem to marry us. It was a beautiful day even though it was February. I remember looking outside and there was Tom Pownall, who is now the chairman and chief officer of Martin-Marietta, tying cans on the back of our little Ford. And I can still hear Mr. Babb, who was a very stern man, calling, "Tom, stop that!" That was Mary's little two-door Ford, we had to sell my car for debts during the campaign.

So Mary and I drove it on to Washington, D.C. We got there about 5:30 or 6:00 and stayed at the Willard Hotel. It was a Sabbath afternoon and I told Mary that first thing Monday morning I was going up to the Riggs Bank. The Riggs Bank then was just one bank, now it has branches all over the world. The man in charge of the bank in those days was Robert Fleming. No office, he just sat behind a desk. You swung open a little door and went in. I said, "Mr. Fleming, I would like to borrow $1,000 for six months, nine months, or a year, and I'll be able to reduce it. But, I said, "there is one catch. I don't have any collateral." He laughed and said, "You were elected for two years. I'm not gonna let you out of town without paying." That's the way I borrowed my first money.

At that time if you came to Washington for the inauguration and stayed in a hotel your check was not accepted, you paid cash. The financial institutions of this country were closing down, so they didn't accept checks, didn't know if they'd be good.

MK. Do you think the country was on the verge of revolution when FDR came in?

JR. Well I think I would like to speak of it this way. We had FDR on the Democratic ticket, and Mr. Hoover on the Republican ticket. Very few people remember that right alongside the Democratic and Republican tickets was another ticket, the Communist ticket, with a candidate for president of the United States. The country was in dire distress. Those were the days when in the upper tier of Michigan, for example, there were 2,000 farms foreclosed in one week. The deputy sheriffs didn't want to move in, they knew the farmers. The farmers had their guns.

I'll tell you a story—I think I want to tell this now. The later part of March 1933, the President kept calling members of Congress to the White House in little groups. I was one of seven that were invited on a certain evening. It was 8:00. It was a cold, drizzly, rainy night. We were taken to the second floor of the White House, a wood fire was burning. The President sat behind a large desk and as we walked by we each shook his hand. There were chairs in front of his desk for us. We began to talk about bills that we were working on, legislation and so forth, the country's condition and how we must have faith and we'd turn it around. There was one member of our group, a very fine member of Congress he proved himself to be, who said, "Mr. President, may I say something that may sound critical?"

The President said, "Oh, yes, go ahead."

He said, "You know I'm for your program, all these parts of it, but I think you're trying to do too much too quickly. The people can't absorb it and I'm afraid it might fail, at least in part because of that."

Well, the President never smiled and he never frowned, I can still remember as I see his face, he just kept on talking about whatever was being discussed prior to that. But about five minutes later, he took the glasses from his nose, put them down, and he sort of leaned into the desk and looked at all of us. He didn't designate the one man. He said, "But gentleman," as if we'd just been talking about it the very minute before, "do you understand that we must act now? The reason we must act now is because if we do not act now, perhaps just a little later, we may not be given the opportunity."

That's what he said. Act now, we wouldn't even have the opportunity later. That was the seriousness of our country and its condition. So you know how serious he felt the situation was, and we felt it. That's quite a story, isn't it?

Gene Ochsendorf. Is there anything in your life you would do differently?

JR. Well, not really differently, but I would rather have seen my father go to Congress than myself. That is one true statement I make. He ran twice and lost. The district was heavily Republican at that time. I was about 14 and campaigned everywhere with him. He worked very hard for me in 1930, but he died in December 1931, before I was elected in '32. Over the years I received hundreds of letters from my father. He wrote in a bold hand and always signed them. "Pop." At the end of the letter, regardless of what he was writing about, he put some philosophy. I still have one at the Senate office that's in a frame with his picture. It says, "Always remember the man and woman by the wayside of the road."

That was his philosophy.

---

[3] Hallie Davis Elkins was the daughter of Senator Henry Gassaway Davis, the wife of Senator Stephen B. Elkins, and mother of Senator Davis Elkins—supposedly the only woman in the country's history ever so related to three U.S. senators.

[4] The 1908 Republican convention deadlocked between candidates Charles W. Swisher and Arnold P. Scherr. William E. Glasscock was finally chosen as a compromise nominee, and later elected governor.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask that the Chair now place the Senate in morning business, pursuant to the order previously entered.

The ACTING PRESIDENT pro tempore. The Senate is now in morning business.

TIMES MAKES GREAT CASE FOR NUCLEAR FREEZE BUT MISSES THE RIGHT CONCLUSION

Mr. PROXMIRE. Mr. President, in a lead editorial Monday, the New York Times declared that the nuclear forces of the United States and the Soviet Union are "essentially in balance, asymmetrical but equivalent." The editorial goes on to say that this represents a good time and a good basis for negotiations that would aim to change the forces on both sides over a 10- to 20-year period so that we would replace multiwarhead missiles with one-warhead types.

It seems to this Senator that the rough equivalence of the two sides represents a powerful argument for a nuclear freeze, followed by matching, verified reductions on both sides; not moving the arms race into a new mode—even though a more stable mode—but stopping it and then mutually reducing the terribly destructive arsenals possessed by both powers.

Incidentally, the Times remarks on the fascinating difference between the two—"roughly equivalent" nuclear forces. It points out:

> The Russians have based more than 5,000 warheads on land, fewer than 2,000 aboard submarines. American deployments are the reverse: about 2,000 on land, 5,000 at sea. The Soviet advantage in land missile throw-weight is also offset by America's lead in bombers and cruise missiles and the warheads they carry:

This suggests to me that while the two sides may have equivalent nuclear destructive power, the edge right now definitely lies not with the Soviets but with the United States because our sea- and air-based missiles are so much less vulnerable than the Russian's stationary, fixed, land-based missiles.

The pertinent facts that the Times editorial adduces would far more properly grace an editorial calling for a nuclear freeze than the plea to shift the arms race into a less threatening gear.

Mr. President, I ask unanimous consent that the editorial to which I have referred, from the Monday, June 27, issue of the New York Times, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MISSILE TRUTHS

To follow the arms control debate, just forget about the brawl over the testimony of Kenneth Adelman, the new head of the disarmament agency. His dutiful report that the MX missile would be bargained away only in the unlikely event that Moscow dismantled *all* its heavy missiles was neither news nor an Adelman opinion. As others have now made clear, he was conveying an agreed policy statement that combined two earlier declarations.

President Reagan had made it very clear that he wants to acquire at least 100 MX missiles to confront the larger and more threatening Soviet land missiles; that he might build *more* MX's if the Soviets refuse to reduce their heaviest missiles from 600 to 210; and that he would give up MX only if both nations shift completely from multi-warhead to single-warhead land missiles.

The senators who greeted this reiteration by claiming they were deceived into financing the MX as a "bargaining chip" deceived themselves. The bargaining, if there is to be any, will be up, not down.

But truth is not the same as wisdom. What has been wrong from the beginning with the American negotiating proposals is that they are not negotiable. Except for the potential vulnerability of America's land-based missiles, the strategic forces of the superpowers are essentially in balance, asymmetrical but equivalent.

The United States has been right to say that it can deal unthreateningly with the vulnerability problem. But the Reagan team keeps invoking vulnerability to demand vastly disproportionate Soviet reductions. The American proposals would require completely rebuilding Soviet forces in exchange for just a few American cutbacks.

The Russians have based more than 5,000 warheads on land, fewer than 2,000 aboard submarines. American deployments are the reverse: about 2,000 on land, 5,000 at sea. The Soviet advantage in land-missile throw-weight is also offset by America's lead in bombers and cruise missiles and the warheads they carry. Yet Mr. Reagan would exclude this advantage from current negotiation.

Mr. Reagan proposes that both sides cut back to about 1,200 missiles and 5,000 warheads, with no more than 2,500 warheads on land. That means the Soviet Union would have to dismantle half its 2,350 missiles, including two-thirds of the heaviest ones. America's 1,600 missiles would be reduced only 25 percent, mainly with the already begun replacement of obsolescent Poseidons by Trident submarines.

The more reasonable objective would be a massive restructuring of both sides' forces, over 10 to 20 years, by replacing aging multi-warhead missiles with one-warhead types. It would take years to negotiate such a treaty, but the principle is easily proclaimed.

That principle, and continued observance of SALT II restraints, can also be the objective of members of Congress who want to use their MX votes as "bargaining chips" with the Administration. They should be traded for a major improvement in America's arms control offer.

REVIEWING THE STATE DEPARTMENT'S HUMAN RIGHTS REPORT

Mr. PROXMIRE. Mr. President, the Department of State's Report on Human Rights Practices for 1982 has evoked strong criticism, with opponents charging that rightwing dictatorships were treated with kid gloves. One review, put together by Americans Watch, Helsinki Watch, and the Lawyers Committee for International Human Rights, maintains that the State Department's report is filled with "serious distortions." Concerning Chile, for example, they are that the State Department omits or blurs that Government's human rights violation record in order to make it more neatly fit the Reagan administration's ideological needs.

The State Department claims that human rights improved in Chile during 1982. In fact, the review argues, "the situation deteriorated markedly in 1982." Arbitrary arrests increased, political murders remained unchecked, and mass detentions doubled from 1981 statistics.

I welcome this healthy critique of the State Department's report and its effort to accurately and plainly paint the degredation of human rights throughout the world.

Nonetheless, the most accurate report in the world, which criticizes every last abuse, will do little good until we rid ourselves of the smell of hypocricy. Unless we try to provide a more perfect model, illustrating our Nation's love affair with human rights, our critique of human rights violations will go unheeded. One way to strengthen our case is to swiftly ratify the Genocide Convention, putting the United States clearly on record as opposing mass murder.

Today, we are not entirely free to promote human rights throughout the world, having gagged ourselves by refusing to ratify the Genocide Convention. Our voice is muffled, if not silenced, by the obstinance of the Senate. The Soviet Union delights in every day that we let this treaty sit unratified; the rest of the world looks at us with wonder.

Mr. President, Norman Thomas once said he would rather America lose its face than lose its soul. Giving consent to the Genocide Convention forces no choice between the two. Ratification is right morally speaking; it is right geopolitically speaking; and I will continue speaking for the treaty, daily, until it is finally ratified.

MARCIA GAMBREL

Mr. THURMOND. Mr. President, I want to take just a moment to commend a young woman who has done an outstanding job working in the Senate Republican cloakroom, Miss Marcia Gambrel.

Miss Gambrel leaves her job today to begin work on the congressional liaison staff of Transportation Secretary Elizabeth Dole. I know my colleagues who have worked closely with Marcia over the last 2½ years join me in wishing her well in her new job.

I first became associated with Miss Gambrel when she became a page under my sponsorship in 1974. I am proud to say that she was one of the first female pages in the Senate and performed her duties in that job with the same dedication and ability she

demonstrated in her position in the cloakroom.

A graduate of Furman University in Greenville, S.C., where she grew up, Marcia rose quickly through the ranks in the cloakroom to become a senior assistant.

I want to extend my congratulations to her on the appointment to Secretary Dole's staff and offer my best wishes for continued success in the future. Good luck, Marcia, and thank you for a job well done.

CONCERNING SENATE AGRICULTURE COMMITTEE ACTION TO FREEZE TARGET PRICES FOR 1984-85 AT 1983 LEVELS

Mr. ZORINSKY. Mr. President, accepting a freeze on target prices in exchange for only a vague export promotion scheme financed with funds cut from farm price support payments is not my idea of how to help the Nation's farmers.

Farmers are tired of hearing about grandiose schemes to promote exports, especially when the administration has failed to take other steps that could boost exports without sacrificing price support payments.

In the 1981 farm bill Congress authorized "such sums as are necessary" for carrying out an export expansion program. Not only are we going in circles—rubberstamping something we authorized 2 years ago—but we are doing it at the expense of the farmer. We are proposing to take millions out of the pocket of the farmer to fund a program that is already authorized in the interest of expanding agricultural exports—the export credit revolving fund.

It is an insult to farmers' intelligence to ask them to give up income assured under the 1981 farm bill in favor of an export trade promotion program.

The administration's proposed freeze would eliminate the minimal increases in target prices approved when Congress enacted the 4-year farm bill in 1981.

For example, under the existing program, the corn target price would increase 17 cents in 1984, to $3.03 per bushel, and 15 cents more in 1985. For wheat, the increase would be 15 cents in 1984, to $4.45 per bushel, and 20 cents in 1985.

Congress acted correctly 2 years ago when it voted to provide farmers this protection from inflation. To break faith with them now, in midstream, is grossly unfair.

Nineteen organizations are on record in opposition to the target price freeze as follows:

National Farmers Organization.
National Association of Wheat Growers.
National Grange.
National Milk Producers Federation.
Grain Sorghum Producers Association.
National Peanut Growers Association.
National Association of Farmer-Elected Committeemen.
Cooperative League of the United States.
National Rural Electric Cooperative Association.
Women Involved in Farm Economics (WIFE).
Mid-Continent Farmers Association.
Central Exchange Farm Cooperatives (CENEX).
Communicating for Agriculture.
American Agricultural Movement.
National Rice Growers Association.
Hawaiian Sugar Planters Association.
Southwest Peanut Growers Association.
Northeast Area Agricultural Association.
National Farmers Union.

I submit that deficiency payments are a more direct way to put money into farmers' pockets. We are saying we are going to increase exports. I think the farmers have had it up to their ears with we are going to increase exports.

We have created agricultural sectors within the embassies. We have appointed special agricultural officers. We have a blended credit program, and now we are going to take more money away from the farmer and even give him a better export program.

What the farmer does not need is the kind of export programs we have been giving him thus far. And I think they would rather have the deficiency payments than to finance an export program by taking the money out of their pockets, creating a bigger export market for them so they can earn money based on how they have earned money up to now on the promises of increased exports.

I also object to the committee being forced to act on the administration's proposal without any detailed knowledge of the wheat and feed grain programs for 1984. Without these program details, we are unable to even guess what effect the committee's decisions will have on farmers. In particular, I am troubled by the suggestion that the Agriculture Department may substantially reduce price support loan levels for 1984. This means that the market price floor will sink, and I strongly believe that the impact of such a policy change should have been measured before the committee action to cut farm income by freezing target prices.

The compromise adopted by the committee would direct that $600 million of the savings from the $3.9 billion target price freeze would be placed in the export credit revolving fund to finance future sales, along with future loan repayments. Simply providing more export money to USDA does not assure that it will be spent. The Agriculture Department is currently sitting on $750 million—as stated in their wheat outlook and situation report—provided by Congress to use in the blended credit program. Further, we understand that credit programs are under review at OMB, and it appears that the blended credit program will not be used to develop markets, but solely to respond to competition from the European Community.

It does no good to take target price payments from farmers and pile them on USDA for export credit initiatives that will not be undertaken. Although, $5.15 billion has been allocated for agricultural export programs by the administration in fiscal year 1983, exports this year are projected to drop by 10 percent to $35.6 billion. The decline will be both in volume and value, with wheat accounting for three-fourths of the 9-million-ton drop in sales. Wheat exports may be down 8 percent in 1983-84, following a 14-percent drop last season. The U.S. share of the world wheat market is projected to drop below 40 percent for the first time since 1971-72.

With this background, how can it be said that the Senate Agriculture Committee's compromise will generate the income that farmers need from the marketplace? I think it is clear that $300 million a year in export financing cannot turn the tide for exports, and it will not put the money back in the pockets of farmers that is lost by the target price freeze and a possible drop in loan rates. The committee's compromise will reduce net farm income in 1984 and 1985.

The deficiency payment loss to farmers in 1984 and 1985 will come off the top of what would be their net profit. I am not against export financing, but I think we are fooling ourselves if we believe that this bill is going to both save money and help farmers in fiscal year 1984.

Further, I am distressed that this step represents a breaking of faith with farmers who counted on the 1981 Agriculture Act for setting a policy which they could count on.

When the 1981 farm bill was handled on the floor of the Senate, nearly 50 amendments were considered. Many of them were adopted by voice vote or with a recorded vote.

Many of those amendments, the related debates and countermoves centered on the level of loan rates to be established on the major commodities over a 4-year period and the target price levels to become applicable to grains, cotton, and rice.

Some of my colleagues who were most active in pressing for the administration's views in these subject areas were successful in forcing the adoption of loan rate minimums and the applicable target prices by substantial margins in the recorded votes.

You will recall that we were uncertain of our ability to cope with inflation at that time, and it is my clear recollection that the administration and some of the leaders in the majority party in the Senate insisted on abandoning any reference to the cost

of production or parity in establishing these important price support levels. They insisted on naming specific amounts for each of the annual programs.

Regardless of whether we wish to be reminded of our responsibility, I think it important that we acknowledge now that when that 1981 bill became law, we assured the American farmer that he could make long-term plans based on its provisions.

Senators will also recall, I am sure, that farmers, as well as other borrowers, were faced with interest rates ranging from 15 to 20 percent at that time. Many of the debts assumed in 1981 and 1982 are still to be repaid—the interest rates have not been lowered on those loans.

Even when we think now of new loans at interest rates somewhat reduced from the highs of 2 and 3 years ago, it is apparent they are already beginning to rise again.

So what are we doing in this bill—we are simply breaking faith with the producers of the major commodities, grains, cotton and rice, on a commitment we made to them in this Senate less than 2 years ago. For my part, I want to be certain of some exemption from that label.

I do not like for our Government to welch on its commitments. As a matter of fact, we would not do so in the conduct of foreign affairs with other nations. We would not do it to the insurance industry or the banking industry and get away with it. I hope those who have been most active in shaping this bill will be just as forceful and persistent in explaining their actions to the American farmer. Furthermore, I hope that Members of the Senate realize they are taking an unprecedented action in dealing with farmers and ranchers of this country.

Another area of concern should be clearly identified for those who may choose to vote for this package. Since the administration, which must announce and administer our programs for at least another 2 years, has refused to use the full authority extended by the Congress to expand exports of farm commodities, it is only fair to assume that any pretext of committing more funds to the expansion of exports set forth in this bill will probably be properly labeled a sham after it is subject to certain policy decisions in the executive branch.

The Senate is urged to turn back this bill. It was a mistake for our committee to comply with the wishes of the Director of OMB. The savings are not sufficient to warrant this legislation.

THE VOCABULARY OF ARMS CONTROL PART IV—SPACE TECHNOLOGY AND RELATED AGENCIES

Mr. PRESSLER. Mr. President, as the debate deepens on the critical issue of arms control, a 1980 version of "alphabet soup" nomenclature is coming into widespread use. As part of a continuing effort to familiarize readers with this important language, at this time, I am submitting to the RECORD part four of my series entitled "The Vocabulary of Arms Control." Part 4, like part 3, concentrates on vocabulary associated with space technology. Unlike part three, this section deals with specific weapons systems and the Government agencies that control these systems, as well as other key miscellaneous terms.

I have received inquiries from the general public expressing an interest in obtaining a complete set of the assembled terms. This serves as additional proof that the citizens of this country, our constituents, have a keen interest in arms control, and the debate surrounding it. We must redouble our efforts in this area as a whole, and most importantly in the field of space armaments. We now have a fleeting opportunity to demilitarize space and keep it that way, thus avoiding an exponential expansion of the race to militarily dominate the heavens as well as our Earth. It is my hope that this glossary of the terms that are used daily in the arms control debate will facilitate new progress and understanding on this issue. The time to act to control proliferation of space weaponry is now. Let us try to avoid becoming an improvished plant straing to support a myriad of orbiting "Star Wars" devices. Let us try to negotiate a verifiable international agreement banning antisatellite weapons as a first step toward banning all space weapons.

I wish to express my thanks to Marcia S. Smith and Susan E. Crowe of the Congressional Research Service, and Michael Marlow who is interning on my staff this summer, for their assistance in compling definitions of these terms.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

VOCABULARY OF ARMS CONTROL

AFSATCOM: An acronym for Air Force Satellite Communication system. AFSATCOM consists of transponders placed on other communications satellites, such as FLTSATCOM.

Air Force Space Division (AFSD): A division of AFSC with responsibility for performing R&D on space systems.

Air Force Systems Command (AFSC): AFSC has overall responsibility for research, development, testing and evaluation for all new Air Force programs (i.e. airplanes, satellite systems, computer systems). AFSC is located at Andrews Air Force Base, Maryland.

Antisatellite System: Any system whose primary mission is to destroy the operational capability of satellites, if not the satellites themselves, including ground-, air-, and space-based systems based on conventional technology such as homing vehicles or advanced technology such as lasers and particle beams.

Ariane Launch Vehicle: An expendable launch vehicle developed by ESA and launched from the Kourou launch site in French Guiana, South America.

Arms Control and Disarmament Agency (ACDA): ACDA is an executive agency that advises the administration on arms control issues. It also monitors arms control agreements, mainly between the United States and the Soviet Union, and develops the technology used for monitoring arms control agreements.

Centaur: A cryogenic high energy upper stage produced by General Dynamics. Centaur has been used for many years with the Atlas expendable launch vehicle; it is now being reconfigured for use with the space shuttle.

Chair Heritage: A Navy particle beam research program conducted at Lawrence Livermore Laboratory in California. The program was transferred to DARPA in 1979.

CINCNORAD: An acronym for Commander-in-Chief of the North American Aerospace Defense Command; currently General James Hartinger.

Consolidated Space Operations Center (CSOC): A facility under construction by the Air Force near NORAD in Colorado Springs, Colorado to serve as a satellite control facility for military spacecraft (in addition to the existing facility at Sunnyvale, California).

Cryogenic Infrared Radiance Instrumentation Sensor (CIRRIS): Tested on the fourth shuttle mission, CIRRIS was a barrel-shaped cryogenically cooled infrared sensor developed by the Air Force Geophysical Laboratory and Utah State University. Details of the system are classified, but according to the trade press, data from CIRRIS was to be used in designing sensors for reconnaissance satellites.

Defense Advanced Research Projects Agency (DARPA): DARPA is charged with the task of developing new ideas, projects or systems for any branch of the military. It presents the ideas to a specific branch or office which then decides whether or not to pursue them. DARPA only performs creative research, it does not procure systems.

Defense Satellite Communications System (DSCS): A system of communications satellites in geostationary orbit utilized by the Department of Defense. DSCS II and DSCS III satellites are currently in use; the latter is an upgraded system which has been hardened.

European Space Agency: A group of eleven European countries (Belgium, Denmark, France, Federal Republic of Germany, Ireland, Italy, Netherlands, Spain, Sweden, Switzerland, and the United Kingdom) which develops spacecraft and launch vehicles. Formed in 1975 as the merger as the European Launch Development Organization and the European Space Research Organization, ESA also has two associate members (Austria and Norway) and a technicla agreement of cooperation with Canada.

Expendable Launch Vehicles: Launch vehicles which cannot be reused. This category includes all launch vehicles which currently exist with the single exception of the space shuttle.

Feature Identification and Location Experiment (FILE): Another OSTA-1 experiment which tested methods to discriminate between water, bare ground, vegetation, snow, or clouds in order to collect only wanted data.

FLTSATCOM: An acronym for Fleet Satellite Communications, a Navy communication satellite system using geostationary satellites.

Fractional Orbital Bombardment System (FOBS): A long-range ICBM system tested by the Soviet Union from 1967 to 1971 which would have flown on a trajectory to the United States over the South Pole rather than the North Pole, thus avoiding the Ballistic Missile Early Warning System. The missile would almost have gone into orbit for part of that time so is often discussed in terms of space weapons. No tests have been made since 1971 and opinion is divided in the West as to whether the system was abandoned or is operational and therefore requires no further tests.

Ground-based Electro-Optical Deep Space Surveillance System (GEODSS): A system of ground-based sensors which will eventually be emplaced at five locations around the globe (three locations—New Mexico, Hawaii, and Korea—are currently operational) for tracking small objects in high orbits.

Heflex Bioengineering Test (HBT): An OSTA-1 experiment for determining the relationship between plant growth and moisture content in the space environment.

High Energy Upper Stage (HEUS): A generic term for upper stages using high energy fuels such as liquid hydrogen/oxygen, which can place heavier payloads into high orbits than upper stages such as IUS.

Inertial Upper Stage (IUS): A solid-fuel upper stage used for taking payloads from the relatively low orbits directly accessible by the space shuttle or certain expendable launch vehicles to higher orbits (such as geostationary orbit).

Integrated Operational Nuclear Detection System (IONDS): Sensors which will be carried on some NAVSTAR satellites to provide data on nuclear detonations.

International Solar Polar Mission: Originally, a mission to send two spacecraft (one provided by the United States, the other by the European Space Agency) to study the polar regions of the Sun. In 1981, the United States withdrew from its agreement to provide one of the spacecraft, although it will launch and track the European spacecraft.

LANDSAT: An acronym for Land Satellite. NASA has launched four LANDSAT spacecraft since 1972 for remote sensing of the Earth from space. Data are collected on, for example, crops, pollution, and geological formations (which can indicate likely locations for oil deposits).

Large Optics Demonstration Experiment (LODE): Another part of the U.S. space-laser triad program, concerned with development of the optics for the laser system.

Measurement of Air Pollution from Satellites (MAPS): An OSTA-1 experiment which measured the distribution of carbon monoxide in the troposphere.

MILSTAR: An advanced military communications satellite system now in development to provide secure communications in times of crisis through the use of hardened satellites capable of operating at both extremely high and extremely low frequencies.

Miniature Homing Vehicle: A device planned for use in the U.S. antisatellite program for impacting (and thereby destroying) enemy satellites. The MHV would be launched from an F-15 aircraft using a SRAM.

Multispectral Infrared Radiometer (SMIRR): One of the experiments on the OSTA-1 payload on STS-2 which measured solar reflectance of mineral-bearing rock formations.

NAVSTAR Global Positioning System (GPS): A planned system of 18 navigation satellites which will provide three-dimentional (latitude, longitude, altitude) data to both military and civil users; the Transit navigation satellite system currently in use is only capable of providing two-dimensional (latitude and longitude) data. Six GPS satellites are now in orbit for test purposes.

Night and Day Optical Survey of Lightning Storms (NOSL): An OSTA-1 experiment involving visual observations of lightning storms.

North American Aerospace Defense Command (NORAD): Located in Colorado Springs, Colorado, NORAD is a joint U.S.-Canadian organization which has responsibility for North America's early warning system. Both space (satellite) and ground (radar) data feed into the early-warning system.

Ocean Color Experiment (OCE): An OSTA-1 experiment concerned with the mapping of algae concentrations.

Orbital Flight Tests (OFT): The first four shuttle flights were referred to as OFTs and were designed to test shuttle capabilities and systems. All OFTs were carried out by orbiter 102 (the Columbia), were launched from NASA's Kennedy Space Center at Cape Canaveral, and landed at Edwards Air Force Base, California (except for STS-3 which landed at White Sands, N.M. due to weather conditions.)

Project Alpha: One part of the U.S. space-laser triad program for developing space lasers. Alpha concerns development of the laser itself.

Project Objective Memorandum (POM): Used by the military in budget formulation, a POM can apply to any program in any branch of the service with a system element number assigned to it. For any such program, the military projects the services and monies needed over five fiscal years in order to achieve the goals of the program.

Radioisotope Thermal Generator: An energy source which generates electricity through the natural decay of plutonium-238; often used on spacecraft which will journey too far from the Sun to use solar panels or which are designed to operate for very long periods of time.

Remote Manipulator System (RMS): The RMS, built by Canada, is referred to as the "arm" and is attached to the shuttle and used to deploy and retrieve satellites. It was tested on the second shuttle flight and has been used on subsequent missions.

SAMRO: A planned French military reconnaissance satellite which would be adapted from the French Spot remote sensing satellite. The French have indefinitely postponed the project at this time due to budget austerity.

Short Range Attack Missile (SRAM): A SRAM is a missile which can only travel a short distance (about 100 miles) and is designed primarily to knock out the early warning radars of an enemy although it will also be used in the U.S. antisatellite program to launch the miniature homing vehicle from an F-15 aircraft.

Shuttle Imaging Radar (SIR-A): One of seven experiments on the OSTA-1 payload aboard the second shuttle flight which tested techniques for mapping geological structures important in oil and gas exploration. It used a synthetic aperture radar.

Sipapu: Also called White House, Sipapu was the Army's particle beam research program centered at Los Alamos Scientific Laboratory in New Mexico. In 1980, Sipapu was transferred to DARPA.

Space and Missile Systems Organization (SAMSO): SAMSO no longer exists. In 1979, it was split into two offices, the Ballistic Missiles Office at Norton Air Force Base in San Bernadino, California and the Air Force Space Division in Los Angeles. Both offices now report to the Air Force Systems Command and perform the research, development, testing and evaluation functions for ballistic missile and space systems.

Space Transportation System (STS): Often used synonymously with the term space shuttle, STS initially would have involved a fully reusable space shuttle, units such as Spacelab which are carried in the shuttle cargo bay, and a variety of reusable and expendable upper stages taking payloads into higher orbits. However, NASA budget constraints caused the scope of STS to diminish to the partially reusable system used today, units that fit into it, and a variety of expendable upper stages.

Talon Gold: The remaining part of the U.S. space-laser triad program, concerned with development of pointing and tracking capabilities for the laser system.

The Second U.N. Conference on the Exploration and Peaceful Uses of Outer Space (UNISPACE 82): Held from August 9-21, 1982 in Vienna, UNISPACE convened to stimulate the growth of space activities and demonstrate the relationship between space activities and the socio-economic advancement of the world, especially the less developed countries. Issues debated at UNISPACE '82 included the militarization of space, technology transfer, access to geostationary orbit, direct broadcast satellites, and remote sensing. Ninety-four countries participated.

Tracking and Data Relay Satellite System (TDRSS): A system leased by NASA from Space Communications, Co., TDRSS will consist of three communications satellites in geosynchronous orbit (one as an in-orbit spare) when it becomes fully operational. The first satellite was launched by the shuttle in 1983, but was placed into the wrong orbit by the inertial upper stage. NASA is now trying to correct the orbit. When operational, TDRSS will monitor low Earth-orbital spacecraft and relay voice and data transmissions to a ground station in New Mexico. This system will allow NASA to close 9 of its 13 existing ground stations.

U.N. Committee on the Peaceful Uses of Outer Space (COPUOS): The United Nations body which is in charge of U.N. debate over outer space activities and programs. COPUOS developed five U.N. treaties governing outer space exploration and uses of which four are in force. COPUOS is serviced by the Outer Space Affairs Division at the United Nations.

Very Large Scale Integration (VLSI): VLSI refers to a type of microelectronic technology that permits an order of magnitude decrease in computer size, weight, power consumption, and failure rates, plus a hundred-fold improvement in processing capacity.

CENTRAL AMERICA

Mr. SASSER. Mr. President, today, I announce my support of a bipartisan effort to establish a comprehensive national policy regarding Central America. Specifically, I am cosponsoring legislation introduced by Senator JACKSON and Senator MATHIAS designed to create a presidentially appointed commission with membership from both political parties—a nonpartisan commission—which will examine the situation in this important region of the world and make recommendations to the Nation regarding future American policy. This commission would be similar to the commissions which studied the issues of social security and the MX missile.

Mr. President, there is a growing concern throughout the country that the policies of the Reagan administration could lead this Nation into an overreaction to events in Central America. Yet, we must never lose sight of the fact that this region is strategically vital to the security of the United States.

In my considered judgment we must not allow the spread of Cuban and Soviet influence in the region. That much is clear, but the solution to the problems of Central America cannot be found through the barrel of a gun. The history of the region, indeed the history of Vietnam, teaches us that we must not attempt military solutions to regional economic and social problems. It is time to call for a halt in hostilities and for a beginning to negotiations for peace. For example, the United States should endorse the suggestions by the Contadora group—the countries of Mexico, Colombia, Venezuela, and Panama—to promote regional negotiations.

No one wants war in Central America. So, our efforts must be directed at a cooling of tensions. We must guard against the prospect that rising hostilities could lead to a broader American involvement in the region.

We must not allow American involvement to reach the point of no return. Just this past week, the administration sent 120 Green Berets into Honduras to train soldiers of the El Salvador Army. We are constructing an airfield in Honduras which could accommodate American Air Force transports, and the administration is requesting approval of a second airfield, with additional ones under consideration. The Cubans and the Soviets are embarking on a similar buildup in the neighboring country of Nicaragua.

Many observers in the Pentagon itself have indicated that the actions and counteractions by the superpowers in Central America are not all that dissimilar to the tragic actions in Southeast Asia 20 years ago. We must not allow Central America to become another Vietnam. Clearly the geography, the people, and the culture of Central America are substantially different than Southeast Asia. Yet, we are reacting to the crisis in Central America in much the same manner as this Nation reacted to events in Vietnam two decades ago.

The bipartisan commission suggested by Senate Resolution 158 would make a report to the Nation within the next 6 months. I am confident that it will find that the problems of Central America can only be solved with a long-term policy aimed at reducing the effects of poverty, poor education, and a lack of regional industrial infrastructure. Likewise, our policy must be directed at promoting a stronger regional democratic center and a growing middle class to reduce the leftist and rightist political and military competition. I am under no illusion concerning the Central America Commission. Such a commission cannot, alone, answer all the complex problems of U.S. involvement in Central America. But as other commissions have demonstrated, it could help bring focus to the problem and provide a less politically charged forum for future policy considerations. So, for that reason, I am supporting this bipartisan effort.

Mr. President, the first American soldier to die in Vietnam was a young man from Livingston, Tenn. No Tennessean should die in Central America when peaceful, negotiated solutions can still be found.

THE FREEDOMS AND PRIVILEGES OF U.S. CITIZENS

Mr. JACKSON. Mr. President, recently an excellent article by Samuel F. Pryor has come to my attention. In this commentary, which appeared in the Maui News, Mr. Pryor reflects on the freedoms and privileges we share as U.S. citizens.

Mr. Pryor is well-known throughout the world for his prominence in the aviation industry and for great humanitarian service to his fellow men. Among his many accomplishments, Mr. Pryor has served our Nation in two World Wars, has served as a consultant to the Department of State, has been recognized for his contributions to the Narcotic Enforcement Officers Association and is retired from Pan American Airways, Inc. where he was vice president and assistant to the president.

I am pleased to have this opportunity to present this commentary to the Members of Congress for publication in the CONGRESSIONAL RECORD. I think it is well worth taking a moment to read this fine article. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Maui (Hawaii) News, May 1983]

ABILITY TO MEET DANGER HAS MADE OUR NATION GREAT

(By Samuel F. Pryor)

Pondering over the ruins of ancient civilizations in Asia and Africa, some of which have been buried well over 2,000 years, has caused me to wonder about ourselves.

Each of these cities, in its proper time stood at the peak of achievement and accomplishment. Each asserted its influence throughout the then known world. Each was the leader of its time.

How much time do we have and how wisely are we using it?

As Arnold Toynbee has documented in the case of civilization after civilization, complete destruction comes from within. Egypt, Babylon, Crete, Greece, Assyria—and in our own hemisphere, the Mayas and the Incas—were not destroyed from without. In each and every case the civilization had begun its self-destruction from within.

When the final test came, these great, cultural, once-healthy systems found themselves spiritually sick and helpless. They could not defend themselves, because they had already lost faith in themselves.

Here within our own United States of America there are those who attack our system of government.

Time Present: We must lead with the other great powers seeking a permanent peace for our world. I will bring no prophecies of a third World War. If I did, I am morally certain that what I would have to prophesy would be the end of world civilization. The next war will have no bands, or parades, no flags and no romance. Humanity is now at the crossroads.

Time Future: We in the United States can look back through the long vista of human history and we can see that now—today—the whole course of human freedom is in the greatest danger mankind has ever known. We are face to face with the cruelest, most deceitful enemies we have ever faced. We are doing everything possible to make them friends, but they have dedicated themselves to burying us as well as our way of life.

We must maintain our material strength which unfortunately is the only kind of strength these adversaries respect. We also have hope in that we are blessed with a spiritual strength, not possessed by our adversaries, for they have no God, no Christ, no Mohammed, no Abraham.

This is the period in the life of an individual, in the life of a nation, and, for that matter, in the life of a whole civilization when things are happening with incredible speed. Events are piling upon events with such rapidity that time itself has become foreshortened. Predictions about the future are almost meaningless.

The present tensions over the Middle East, Cambodia, Vietnam, Laos and Thailand and other potential trouble spots all over our globe cannot be exaggerated. These trouble spots are no longer a great distance—today the flying time to the Middle East is a matter of only a few hours.

We people living here in the United States have a great blessing over the way of living under any other form of government. In our Declaration of Independence we have one privilege not mentioned in the declarations of any new country obtaining independence around the world—"the pursuit of happiness."

You hear much about freedom and equality, but what greater privilege in life is there

than to pursue—happiness—not just for yourself but for other people because by doing this you will bring happiness to your own self and to those about you.

Paradoxically, while realizing that we must be constantly alert to enemies who know no God, we must at the same time continue to follow the dangerous path of peace which our President is doing.

We must then ask ourselves whether our minds and hearts have the ability to match the speed of sound with understanding and love for our fellow man—not just in our own town, not just in our county or state or country, but around the world. This is the kind of progress our enemies fear most.

It is fraught with danger, but being able to meet danger is what has made our country great. In facing danger we in our country have another blessing that our adversaries have not—faith. During the war in England a stone was unearthed after a bombing. It had this inscription on it: "Fear knocked on the door—faith answered—and there was nobody there."

It is our solemn obligation to walk this dangerous path of peace in faith and friendship in fulfillment of our mission on Earth. Our lives and our civilization are not in danger from animals, birds, fish, plants or insects—the only danger to our world is from us, humans.

BILL MILLER

Mr. GOLDWATER. Mr. President, yesterday, a little after noon, the remains of William Miller was laid to rest in Arlington Cemetery.

Bill Miller lived the kind of life that I think God intended all men to live, and that is, in the best service of his country, his family, and himself. During the many, many years that I knew him, I never knew him to do a dishonest thing, nor have a dishonest thought. He was attentive and loyal to his beautiful wife and children. He was loyal and dutiful to his country. In fact, whenever questions came up involving his country or his State, or where he lived, the country came first.

We are not going to see many Bill Millers around in the future because the whole system of our Government, our way of life, and the way of living in this country has changed. I hope I am wrong in this because our country and the world could use more of him.

It is with great regret that I notice this passing day, but I realize that the great majority of Members of this Senate never knew Bill Miller and, at the best, heard of him by name. We will all who knew and loved him, miss him, and our condolences go to his sweet wife and her wonderful family.

DR. WALTER D. SMITH RETIRES AS PRESIDENT OF FRANCIS MARION COLLEGE IN FLORENCE, S.C.

Mr. THURMOND. Mr. President, on June 30, 1983, Dr. Walter D. Smith will be retiring as president of Francis Marion College in Florence, S.C. In 1970, Dr. Smith was appointed the first president of the newly created 4-year college. During his 13 years as president, he has helped shape the future of the college and has left for his successor a healthy, growing institution which has provided quality education for the citizens of our State.

A native of Harriman, Tenn., Dr. Smith received his B.A. degree from Lincoln Memorial University and his M.A. and Ph. D. degrees from the University of Michigan. While serving as a Navy officer during World War II, his travels took him to Australia, where he met his future wife, Rhondda.

From 1950 to 1959, he taught psychology at Florida State University. In 1959, he became dean of the college and professor at Winthrop College in South Carolina. He subsequently was appointed as vice president for academic affairs at Winthrop and served in that position from 1966 to 1968. In 1968, he became president of Salisbury State College in Maryland.

When he returned to South Carolina in 1970 to assume the presidency of Francis Marion College, Dr. Smith brought with him many talents—organizational expertise, fiscal responsibility, ability to lead and work with people, and an untiring sense of humor. With these talents, he has built Francis Marion College into a strong institution with a student body of 2,900, a physical plant valued at $28 million, and an annual operating budget of over $8 million.

Dr. Smith has worked in the field of education for more than 30 years, and was recently honored for his efforts in education and other activities. In May, Winthrop College awarded him an honorary doctor of humane letters. Just last week, the Pee Dee Area Boy Scouts in South Carolina honored him as a distinguished citizen.

We know that Dr. Smith will continue to be active in shaping the lives of young people as he enters yet another phase in his career. We thank him and recognize his accomplishments thus far and wish for him and his lovely wife Rhondda much happiness and success in the days to come.

Mr. President, I ask that a recent article by Tenney Griffin about Dr. Smith which appeared in the Florence Morning News be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Florence (S.C.) Morning News, May 22, 1983]

FOR DOUG SMITH, FMC PRESENTED A CHALLENGE

(By Jenny Griffin)

She remembers the first date. He was in Sidney on two weeks leave from his PT boat squadron which had been on patrol off New Guinea.

There was a party that night, and too many PT boat commanders took on too much Australian punch. He spent most of the night making sure his fellow officers got back to the base and that their dates were properly taken care of.

They saw each other several times during the two weeks. Then he went back to the war. That was in 1944.

Two years later she came to the States to visit a sister in Indiana. He invited her to come visit him in Harriman, Tenn. He met her in Knoxville and they rode the bus to Harriman.

Then she explained she could only stay for a couple of days. Her visa was about to expire. If they were married, there would be no problem in her staying in the States, he told her. They were.

If you poke around long enough in the James A. Rogers Library at Francis Marion College, you'll find a portrait of Walter Douglas Smith. It is stuck in an out-of-the-way place on the second floor, behind locked doors, in the Arundel Room.

It is standard operating procedure for college presidents to have their portraits done. But the Francis Marion College president didn't especially like the idea. The picture was stashed for a couple of years in an anteroom off his office. Only a few months ago did it go up in that remote area of the library.

The story of Rhondda and Doug Smith's romance, and marriage, tells you something about the man. He is doggedly determined to go after what he wants. And he usually gets it.

Taking care of his buddies and their dates at that bash in Sidney tells you something, too. He's concerned for people. He never loses a friend.

The portrait? The man doesn't like the limelight. He is content to let others take the credit.

Doug Smith came to Florence in 1970 to build a college in a cotton field. He was 51 then and president of Salisbury State College in Maryland. He had it made. Why would he give up the security of an ongoing, long-established college in a lovely community to take on something as tenuous as the then dream of Francis Marion College?

"Why at 51, I was still a young man," Smith countered. "Imagine. It was the idea of starting a new college. How many people get to do that, to be on the ground floor, to do the planning. It was some challenge."

Born in Harriman, Tenn., Smith is the son of a machinist. He worked his way through school, because he had to and because he knew how. Two years were spent in a steel mill in McDonald, Ohio.

As a young man, it was apparent he always knew where he was going. He is ambitious and that's a trait which appealed to Rhondda.

His success in Florence is apparent. Francis Marion College, the college Smith built in the cotton field, is firmly rooted in South Carolina's scheme of higher education.

That includes a physical plant valued at $28 million, 2,900 students and an annual operating budget of $8.5 million. Doug Smith started it from scratch.

He was able to do it because he had the community's support. He coupled that with boundless energy, a capacity for detail without losing his perspective and dogged determination.

Boundless energy and dogged determination? Doug Smith never gives that impression. Actually, the opposite. He is one of those who gets so much accomplished without it appearing so.

There's no president's dining room at the college. The Francis Marion president goes

through the cafeteria line with the students. He finds a place and uses the lunch hour to visit with students and his campus buddies.

He loves a practical joke. That's why his friends go to great lengths to pull them on him. Once on a visit to his wife's home in Australia he got a telegram from Florence. It informed he had been fired by the college board.

If Dr. Smith has any problems as a college president and administrator, it is that he is such an open book. Because of that, he might be misconceived. But he knows how to save the last card to play last.

The key to any successful administrator is the people which surround him. Smith has a capacity for picking good people and then letting them do their jobs.

But he is a terrible golfer. So bad in fact, that years ago he gave it up. Now he piddles in his garden, which this year is thus far only a half-dozen tomato plants.

He labels himself a "cultural idiot" when it comes to music. His taste runs to Loretta Lynn. Obviously, there's nothing wrong with that, but he also understands the importance of the fine arts in the college program.

Smith understands, too, that the college is its faculty and library. Everything else is secondary.

And he knows how to care for the taxpayers' money. Jack Benny is one of his nicknames. His colleagues don't call him cheap. Parsimonious is the word they use.

Smith is winding it down now. He retires next month. And next month he'll be honored as Florence's distinguished citizen of the year. He didn't like the idea, but he had no choice.

Turn-about is fair play because for all these years he has been program chairman for the affair.

He and Rhondda have their own home now. She's delighted, delighted to be out of "public housing," as she calls it.

At the college, they are in the process of remodeling the old Wallace home to be used by the new president as his home. That was the last item on Doug Smith's building program list. That tells you something about the man, too.

Mr. BAKER. Mr. President, since I see no other Senator seeking recognition at this moment, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. WALLOP). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

TAX RATE EQUITY ACT OF 1983

The PRESIDING OFFICER. The clerk will state the pending business.

The legislative clerk read as follows:

A bill (H.R. 1183) to amend the Internal Revenue Code of 1954 to limit to $700 the maximum reduction in individual income tax, and so forth.

The Senate resumed consideration of H.R. 1183.

The PRESIDING OFFICER. The time between now and 10 a.m. is under the control of the majority and minority leaders or their designees.

Mr. BAKER. Mr. President, the distinguished Senator from Kansas (Mr. DOLE) will be the manager on this side. He was so designated yesterday and I so designate him today. He is on his way to the Chamber, however, and I have no need for time, nor do I have a request at this moment for time.

Therefore, I yield the floor and reserve my time.

Mr. BYRD. Mr. President, I designate the control of the time as I did yesterday on this side of the aisle to Mr. BRADLEY.

Mr. BRADLEY. Mr. President, I yield 5 minutes to the Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, as I walked into the Chamber today I was asked by members of the media as to why a battle was being made in connection with this issue, particularly in view of the fact that all published reports have indicated that the other side of the aisle is going to vote en bloc against it and, therefore, will defeat the amendment.

I think that it is important that the issue be made because, in my opinion, it highlights the whole question of fairness and equity, and probably not in many a year has the administration of our Government, the leadership of our Government, been as unfair and inequitable as has been evidenced by their tax policies.

A lot of people talk about balancing the budget, but the facts are that we would have balanced the budget by 1986 and have had a surplus in 1986 and 1987 if we had not passed all of the tax reductions. It was argued whether we should or should not have done that, and I was one of those who voted for that tax reduction package regrettably, I might say in retrospect.

Having said that, I think we should see who really gained from that tax reduction bill. We are well aware of the fact, at the present time, that in the month of April the Government paid out more in refunds than it took in taxes received. We are well aware of the fact that I think it was in the month of March there was something like $24 billion in tax refunds to corporations and $12 billion in tax payments.

As we look at the tax laws that have been enacted in the last 2 years, we come to the inescapable conclusion that it has been tax relief and tax reduction for the rich and very little consideration for the poor and middle-class Americans.

In the first tax reduction bill, if you had $100,000 in earnings, you received 11 times as much of a reduction as a person who earned one-fifth as much as you. So the proportion was distorted.

And under this tax proposal, the tax reduction that is to take place as of July 1, those earning $20,000 will receive about one-thirteenth as much in tax reduction as those earning $100,000, five times greater in income.

So again we find further evidence of the unfairness and inequity of the administration. The President talks about no new taxes. That means no new taxes for his friends, the rich, because it is indeed the fact that we have added under his leadership a 5-cents-a-gallon tax on gasoline, we have doubled the cigarette tax, we have tripled the telephone tax, we have cut back on the right of people to deduct their medical expenses as well as their casualty losses, and now the President talks about standby taxes. And what are those? These are further evidence of the unfairness of the administration because what he is proposing in the way of standby taxes are 12-cents-a-gallon tax on gasoline and a 5-percent surcharge on income taxes.

But the facts are the 5-percent income tax is based upon income tax laws that are already distorted.

Since 1950 to 1980 and 1982, there has been tremendous distortion of where the tax revenues of this country come from. In 1950, 50 percent of the tax revenues of this country came from corporations. In 1980 or 1982, and I forget the specific year, about 26 percent of the total revenues of this country came from corporations.

What kind of equity is it when in the tax reduction bill of 1981 people who have tremendous estates will not be called upon to pay any taxes at all except in the case of three-tenths of 1 percent of all of the estates of this country? What kind of fairness when we make it possible for corporations who expend their dollars to get back in tax reduction, tax relief, and tax refunds more than the dollars that they spend?

The Government actually winds up subsidizing, when you take into acount all of the special tax gimmicks that have been put into the law. We call them investment tax credits. We call them accelerated depreciation. We call them intangible drilling writeoffs. We call them energy credits. We call them R&D credits. We call them industrial revenue bonds. We call them any one of a host of other names. But when all is said and done the best tax lawyers in this country will tell you that if you are a corporate executive and you are still paying any corporate taxes you should be replaced. The situation is so

bad that 16 conservative Republican Senators just about a year and a half ago wrote a letter to the President of the United States and said: "Mr. President, we did not realize that by 1985 50 percent of the corporations of this country will not be paying any taxes."

What kind of fairness, what kind of justification can there be when a company earns $1.8 billion and gets $145 million in a tax refund? And that company is not distinguishable from any others. There are corporations upon corporations upon corporations who pay no taxes but make very substantial profits.

Whether you agree with this amendment or not, the whole issue has to do with the question of fairness and all that this amendment does is it says that those who are moderate income earners and those who are poor should get their tax relief and that those who do not need that tax relief should get the same amount, the $720, but not 1 cent more.

Mr. President, without losing my right to the floor, I am prepared to yield to the Senator from New Mexico with the understanding that it will be on the time of the Senator from Kansas.

Mr. DOMENICI. I thank the Senator from Ohio.

Mr. President, the New York Times called the cap of the third year of the tax cut "doubtful economics and rotten policy." The Washington Post says it is a "gesture, not a reform." The El Paso Times which has a healthy circulation in my State called it a "double strike at the President's economic program."

A careful analysis of the bill makes it obvious to me that this is the wrong thing to do at the wrong time. It is unfair to two-wage earning, working couples, small businessmen, farmers, and the unemployed. These are the wrong people to deny the full benefit of the third year of the tax cut because they already bear a large portion of the tax burden and they are the key to economic recovery. It is the wrong time because, as President Reagan says, "America is on the mend."

I will not list all the reasons why capping the third-year tax cut at $700 would be a mistake. There are three reasons which stand out for me. This bill would hinder economic recovery. It would be unfair to 1 in 10 American taxpayers, and it would break our promise to the American people for a 3-year tax cut.

We are all concerned about economic recovery. This bill hits the consumer at exactly the wrong time, just as he is making up his mind to increase spending for cars and houses and durable goods. This bill only raises $1 billion in fiscal year 1983 and $6.2 billion in fiscal year 1984, but it raises those amounts much too early in our subpar economic recovery, and it raises them from the upper-middle income consumers most likely to purchase the big ticket items which mean jobs. As a rough rule of thumb, $30 billion of fiscal stimulus translates into 300,000 jobs. If we pass this bill, it will cost approximately 60,000 jobs.

Most Americans have yet to get a real tax cut after taking inflation and social security tax increases into account. Beginning Friday, that will no longer be true, unless we pass this bill. In that case, we will give an average tax increase of $654 to 8 million returns representing 14.6 million taxpayers. Couples with incomes as low as $37,200 would be affected; so would single taxpayers with $29,800 of income and heads of households with $32,000. These are the taxpayers who already run up against the steepest part of our marginal tax rates and who are hit each year with the increased maximum covered wage under our social security tax along with the rate increases which affect all workers. Why should we single them out?

Mr. President, I ask unanimous consent to have printed in the RECORD table 1.

There being no objection, the table was ordered printed in the RECORD, as follows:

TABLE 1.—INCOME LEVELS AFFECTED BY CAP

Type of returns	Gross income	
	Nonitemizers	Itemizers
Single returns	$29,800	$35,714
Joint returns:		
1-earner:		
No dependents	37,200	43,896
2 dependents	39,200	46,494
2-earner:		
No dependents	38,351	45,676
2 dependents	40,412	48,378
Head-of-household:		
1 dependent	32,000	38,571
2 dependents	33,000	39,870

Mr. DOMENICI. These taxpayers are singled out because of the misguided notion that the tax reductions legislated under the Economic Recovery Tax Act of 1981 were unfair to those with lower incomes. Nothing could be further from the truth. The 3-year tax cut was an across-the-board tax cut. It cut tax liability proportionally in every income class. The average reduction for all taxpayers equaled 24 percent. All income classes had nearly the same reduction with the exception of those below $10,000 who got a 29-percent reduction and those with incomes in excess of $200,000 who only got an 18-percent cut. Clearly, there is no justification for this bill on that basis.

Mr. President, I ask unanimous consent to have printed in the RECORD tables 2 and 3.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 2—PERCENTAGE OF TAX REDUCTION FROM LEGISLATED INCOME TAX CHANGES [1] 1982 INCOME LEVEL

[Dollars in millions]

Expanded income [2]	1981 liability	1984 liability	Percentage reduction
Below $10,000	$6,685	$4,733	29.2
$10,000 to $20,000	39,897	30,356	23.9
$20,000 to $30,000	59,198	44,429	24.9
$30,000 to $40,000	56,976	42,482	25.4
$40,000 to $50,000	38,875	28,909	25.6
$50,000 to $75,000	41,964	31,453	25.0
$75,000 to $100,000	16,960	12,932	23.8
$100,000 to $200,000	28,321	22,374	21.0
$200,000 and over	31,008	25,312	18.4
Total	319,882	242,979	24.0

[1] Assuming only the income tax changes affecting individuals from the Economic Recovery Tax Act of 1981 and the Tax Equity and Fiscal Responsibility Act of 1982.

[2] Expanded income equals adjusted gross income plus excluded capital gains and other tax preferences less investment interest expense to the extent of investment income.

TABLE 3—PERCENTAGE OF ERTA TAX CUTS TAKEN AWAY BY TEFRA AND A $700 CAP, 1982 INCOME LEVEL

[Dollars in millions]

Expanded income [1]	ERTA [2]	TEFRA [3]		$700 cap	
		Amount	Percent	Amount	Percent
Below $10,000	−$1,961	+$9	0.5		
$10,000 to $20,000	−9,787	+246	2.5		
$20,000 to $30,000	−15,188	+419	2.8	+$19	0.1
$30,000 to $40,000	−14,807	+313	2.1	+100	.7
$40,000 to $50,000	−10,199	+233	2.3	+475	4.7
$50,000 to $75,000	−10,815	+304	2.8	+1,544	14.3
$75,000 to $100,000	−4,209	+181	4.3	+912	21.7
$100,000 to $200,000	−6,289	+342	5.4	+1,600	25.4
$200,000 and over	−6,182	+486	7.9	+635	10.3
Total	−79,437	+2,534	3.2	+5,287	6.7

[1] Expanded income equals adjusted gross income plus excluded capital gains and other tax preferences less investment interest expense to the extent of investment income.

[2] Economic Recovery Tax Act of 1981, including the 3-year tax rate reduction with the 50 percent top rate and alternative minimum tax, the two-earner deduction, the expanded child care credit, and the charitable deduction for nonitemizers.

[3] Tax Equity and Fiscal Responsibility Act of 1982, including the new minimum tax, further limitation of the medical expense and casualty loss deductions, and expanded taxation of unemployment compensation.

Source: Senate Budget Committee, June 28, 1983.

Mr. DOMENICI. The tax cuts for the last 2 years have been fair. However, the proposal to cap the third year which we are debating today is riddled with unfairness.

The proposed cap on the July 1 tax cut is a working couple's tax increase, not just for this year but for every year. In effect we are taxing the married woman who goes to work to maintain the family's standard of living. Just 2 years ago we recognized that our Tax Code was penalizing working spouses for wanting to stay ahead of inflation. This legislation would erase the gains we made in eliminating this unfair tax burden on working couples.

Recently, the Secretary of the Treasury provided examples of the kind of people who would be forced to pay more taxes under the tax cap. He uses the estimated 1984 average wages for the professions mentioned.

A married couple consisting of a police officer who earns $23,260 and a registered nurse earning $20,960 would have received a tax reduction in 1984 of $917 if they did not itemize their deductions. Instead, the cap would

result in a loss of $197. This is just for the first year. I urge you to remember that this is a permanent tax increase that will be felt year after year.

A secretary earning $13,950 married to a chemical engineer earning $36,120 would jointly have a 1984 tax reduction of $1,179 if the couple did not itemize deductions. This cap would cost them $459.

From the above examples it is obvious that the cap reimposes the marriage penalty and I do not think that is good policy.

Another related point which should be emphasized is that the cap would drive a tremendous wedge between tax brackets faced by middle-income taxpayers. For example, at the $35,200 income level on a joint return schedule, the marginal rate will change from 28 to 37 percent—an increase of 9 points. A roughly comparable rate increase under the proposal would occur at the individual schedule at the $28,800 income level, where the marginal rate would rise by 8 points from 30 to 38 percent. We are not talking about bracket creep, we are talking about tax rates running rampant.

A cap would be unfair to the small businessman and the farmer. The businessmen I have talked to in New Mexico have made plans for expansion and most importantly to increase their payrolls by creating some new jobs in anticipation of the third year of the tax cut. Most small businesses pay income taxes as individuals and they are counting on the third year of the tax cut.

As important as all of these reasons are to this debate, Congress must recognize that it would be a fundamental breach of faith with the American people if we pass this measure. On July 22, 1981, this body voted 89 to 11 to pass the Finance Committee bill which became the Economic Recovery Tax Act, and we passed the conference report 67 to 8. After these overwhelming bipartisan votes, are we really prepared to turn around and tell 1 out of every 10 Americans that we did not mean it after all?

Mr. President, I believe that these reasons are compelling and I urge my colleagues to vote against this bill.

I thank the distinguished Senator from Ohio for yielding, and I yield the floor.

Mr. DOLE. Mr. President, I understand there are a number of Senators who would like to speak, but they would all like to speak at 5 until 10, and I just suggest if they have any desires to be heard on this nonissue, they had better rush over here because I plan to speak at 5 of 10, and I assume the Senator from New Jersey wants to speak about that time.

I have not heard anything new on this matter this morning. It is the same old broken record. The Democrats talk about fairness and equity and then vote against it.

I just suggest, as I said last evening, if I pay more taxes and there is a tax cut, I ought to get a bigger tax cut. If there is a tax increase, you probably are going to pay more taxes if you are in a higher bracket.

So this is a last-ditch effort. I do not quarrel with my colleagues for disagreeing with the policy. It is 100-percent politics. I think everybody understands it.

We did not lose a single Republican on the House side on the vote there, and I hope we do not lose a single Republican on the Senate side on this vote.

It is an effort, a last-ditch effort, to undermine the Reagan program, and we are going to have lots of opportunities to really vote. If you want to soak the rich there will be some chances later on. But I think in the Wall Street Journal this morning there was a little notation to the effect that if you took all the income from all the people in the 50 percent and above bracket you would only get $12 billion. So if you took it all—and that would run the Government, I think it said, 8 days, and I will put that little notation in the RECORD later—all this discussion about the rich, and the rich has never been defined by the other side, just somebody out there, whoever it might be is rich, and whoever they represent is not rich and, therefore, it is good policy and good politics.

Mr. President, I know of no other requests for time on this side at this moment.

Mr. BYRD. Mr President, will the Senator from New Jersey yield to me?

The PRESIDING OFFICER. The minority leader is recognized.

Mr. BYRD. Mr. President, 3 years ago the President of the United States called the leadership of both Houses up to the White House. That was in 1981, and from his 3-by-5 cards he argued his position in support of the Kemp-Roth tax cut.

I suggested to the President that though he thought he was right in that he felt that interest rates would drop significantly and quickly, that he thought he was right in saying that the budget would be balanced by 1984, and obviously he was sincere in his beliefs, there were some of us who did not believe that the rates would significantly and quickly drop on the passage of this program. There were some of us who did not believe that the budget deficits would be done away with and we would have a balanced budget by 1984. We could not see how increasing the Pentagon budget so much and so quickly, plus the $750 billion drain on the Treasury resulting from this kind of tax cut, 3 years of cuts in succession, many of us could not see how we could have a balanced budget by 1984.

I suggested, therefore, to the President that he tie the third year of the tax cut to the performance of the economy and the trend of deficits. He was not willing to do that.

The tax cut went into effect. We have heard it said that the rich got their benefits the first year, yet those who say that are also defending the very high income taxpayers today. If the high income 5 or 10 percent of the taxpayers received their benefits in the first year then why should they continue to receive such benefits as will accrue to them if this bill is not passed?

So we find the defenders of those persons who are the high-income taxpayers of this country and who say, "Well, they got theirs the first year," are the same opponents of this bill and are not willing to concede that those same high-income people are going to get their benefits again this year.

The Government will have to go out and borrow money, $6 billion, to make it possible for those high-income taxpayers to receive the amounts that were on the charts in the rear of the Senate Chamber yesterday, which indicated that those with an income of $100,000 will receive a tax cut this year of $2,448.

Here we are arguing for a bill that is fair, a bill that is fair to all taxpayers.

The President's economic program was referred to by Vice President BUSH when he ran for President as voodoo economics. Well, the administration is still at it. They call a tax cut a "tax increase." If that is not voodoo economics, I do not know what voodoo economics would be. A tax cut is a tax cut is a tax cut is a tax cut, and, if this bill were to pass, this tax cut will go to every taxpayer, and those persons whose incomes are above a certain level, $46,000, $47,000, $50,000, will still receive a tax cut of $720 or in that range. That is a tax cut, c-u-t, tax cut. Those persons with incomes below $50,000, will get their full 10 percent, which will still be less than the $720 that the rich will get.

So I say to you today that the issue is fairness and that is right. I said many times in the past to my colleagues you will lose on this but you are going to be right, and we came out here on the floor. We lost and we lost and we lost, and we lost because we were outnumbered, but we were right and the bill before us today is right. That is why we are pressing forward on this bill today.

For those who say, "Why do you press for a bill that you know will be vetoed?" Well, any bill can be vetoed. Congress from time to time passes bills that are vetoed. Nevertheless, that should not keep Congress from attempting to do what is right, and it is

right, Mr. President, that we enact this bill.

It will reduce the deficit by $6 billion. It will inject the element of fairness into the tax cut. Nine out of every 10 taxpayers in the country will receive their full 10 percent cut. Mr. President, as far as West Virginia is concerned, only 2.9 percent of the households earn over $50,000.

So I say to my colleagues, this is fair. It will help produce the revenues in the amount of $6 billion, which is half what the budget, which was recently passed by the Senate, calls for. That will leave only $6 billion to be raised to carry out the budget mandate.

Mr. President, the right way to vote is to vote for this bill. I hope that my colleagues, on this side of the aisle, at least, will vote for this bill.

Mr. BRADLEY. Mr. President, I yield 5 minutes to the Senator from Arkansas.

Mr. BUMPERS. I thank the Senator from New Jersey.

Mr. President, the question is, What are we going to do about the deficit? Everybody in this Chamber remembers that in 1980 the President declared the national debt a national disgrace. He explained how the national debt of a trillion dollars would equal a stack of $1,000 bills, 67 miles high. Naturally, there was a loud roar of disapproval and moans across this country. However, because of the policies of this administration, that stack of $1,000 bills is going to become 134 miles high in the period of 5 or 6 years.

What is the President's solution? First, do not cut defense spending. Second, do not raise taxes. Instead, he has proposed to reduce social programs by $18 billion. The budget which we recently passed actually has a cut in entitlements, the first one in modern times.

Yet even if we eliminated social programs, rather than cutting them by $18 billion, we would still have a budget deficit twice as great as any we have ever had in the history of this country prior to Ronald Reagan becoming President. For all appearances, he is perfectly pleased with a $220 billion debt.

Is this cap fair? If you believe that it is unfair for people making $100,000 a year to get tax benefits 15 times greater than people making $20,000 a year, then the tax cap is fair.

Even Senators are being asked to participate in this, because even U.S. Senators, with the probable salary increase—which I opposed—and without honoraria, will have to give up between $400 and $500. I do not think that is going to hurt anyone in this Chamber, and I do not think it is going to hurt anybody else in the country in that income category.

Not long ago, Mark Shields wrote a story in the Washington Post, which I think is really appropriate to our current situation. He described Bobby Kennedy's visit to Creighton University in 1968, when he was running for President. He told a rather hostile student body what he wanted to do as President. He praised some social programs—medicaid, the Legal Services Corporation, and so forth. Finally, a hostile student asked who would pay for them. Senator Kennedy looked right at him and said, "You are." That is the kind of courage and forthrightness that somebody in this country ought to be exercising.

What is the President saying to the American people? Is he telling them that you are going to have to pay for this $2 trillion debt?

Is he telling them that they will have to pay for these staggering deficits? Not only is he not calling on the American people to pay for these deficits, he is pandering to their shortsightedness as no other President has. It is that great shortsightedness that produced the tax bill in the first place. It is that shortsightedness that has produced these staggering deficits. Now we assume some cosmic event is going to save this Nation, as though some cosmic event is going to reduce these deficits, as though some cosmic event is going to stabilize our economy and we are going to all live happily ever after. In truth, the most precious heritage we have, our children, are the ones who are going to suffer.

Is it not amazing when the shortsightedness of this country becomes so great that we are willing to sacrifice and mortgage the most precious thing we own, our children, mortgage their future, insuring that they will not have the kind of society you and I have enjoyed?

If you do not want that to happen, if you want to at least show your children and the Nation that your heart is in the right place and that you really are concerned about doing something, you will vote for this bill.

I thank the Senator for yielding.

Mr. THURMOND. Mr. President, the economic recovery is well underway. Inflation is less than 4 percent and interest rates are down from their previous high of 21 percent. Now is not the time to be increasing the burden on our taxpayers.

Mr. President, there have been assertions that the third-year tax cut is a rich man's tax cut. This is simply not the case. The third-year tax cut primarily benefits the hard-working middle class. Because of bracket creep caused by inflation, social security tax increases, State tax increases, and the $98 billion tax increase of last August, the third-year tax cut is the first relief for the middle class. The third-year tax cut reduces middle-income taxpayers' marginal rates by 10 percent; top bracket taxpayers received their tax break last year when the maximum marginal rate was reduced from 70 percent to 50 percent. The tax cut will not affect taxpayers earning income above $55,300 for singles and $109,400 for joint filers. The third-year tax cut is clearly a middle-class tax relief measure.

The tax cap proposal would hurt not only individual taxpayers, but small businesses as well. Most small businesses do not operate in the corporate form, but instead conduct their businesses as a partnership, sole proprietorship, or subchapter S corporation, and are therefore taxed as individuals. To impose such a tax on small businesses which suffered so much during the recession is foolish.

Mr. President, I do not wish to minimize the problem of growing Federal deficits. Indeed, massive Government borrowing could cause interest rates to rise as the competition for capital intensifies further into the economic recovery. The crux of the debate is not so much about whether we trim the deficits—everyone agrees that burgeoning Federal deficits are a threat to the recovery—but rather whether we do the necessary surgery on the budget or on the taxpayers. Instead of cutting Government spending to reduce our debts, the big spenders who have dominated Congress for decades want to add back billions that have been trimmed from social-welfare programs under President Reagan, cap the tax cut, and continue business as usual with the burden on the taxpayers. The American people are tired of "tax solutions" to our budgetary problems, and well they should be. Mr. President, the answer to our current fiscal problems lies in cutting Government spending, and not in increasing taxes. In this way, economic health will be restored to our Nation, without burdening our taxpayers, who are entitled to their first real relief.

Mr. President, the proposed cap on the tax cut should be defeated not only because it will threaten our economic recovery, but because it is not fair. It is a serious mistake to view taxation as a means of rewarding one class of taxpayers or punishing another class. From the standpoint of fairness, good tax policy, and sound economic policy, tax reductions should be of a uniform proportion in relation to taxes paid, rather than being arbitrarily limited according to income. A uniform percentage cut for all taxpayers is both fair and wise.

I would like to reiterate that we all share a common goal—reducing Federal deficits. But balancing the budget on the backs of the taxpayers and small businesses is the surest prescription for economic disaster. Our economic recovery can best be sustained by reducing the burden on the taxpayers, reducing Government spending, and balancing the budget.

Thus, I agree with President Reagan that the third installment should go into effect July 1. Capping the third installment would hurt middle-income taxpayers and small businesses, threaten our reviving economy, and promote unfair, unwise tax policy.

I would urge my colleagues to join me in defeating this move to cap the tax cut.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, how much time remains on each side?

The PRESIDING OFFICER. Twenty minutes on the side of the Senator from Kansas and 8 minutes on the side of the Senator from New Jersey.

Mr. DOLE. Mr. President, I think there may be a request for limited time on our side.

Mr. President, I would like to put something into the RECORD at this point. We have heard a lot of talk about fairness and equity on the other side of the aisle. I think we ought to know who voted for this tax cut in 1981. The vote was 89 to 11.

Mr. President, I ask unanimous consent that the rollcall vote No. 239 legislative, on July 29, 1981, be printed in the RECORD at this point.

There being no objection, the vote was ordered to be printed in the RECORD, as follows:

Rollcall vote on committee substitute containing the 25-percent tax rate reduction as part of Economic Recovery Tax Act (July 29, 1981.)

[Rollcall Vote No. 239 Leg.]

Mr. DOLE. Second, we ought to know who voted for TEFRA, which was tax reform. You talk about going after loopholes and going after upper income. That, I think, should be a matter of some interest because not a single one who has spoken about fairness, equity, balance and all these things could find it in their heart to vote for a tough tax bill.

Mr. President, that vote is interesting from a standpoint that with all this talk, all the rhetoric and all the other propaganda we are now hearing about the 10 percent this and 10 percent that, not a single vote came from the other side. We passed that bill by a vote of 50 to 47. That was a $100 billion tax bill which closed a lot of loopholes and let a lot of upper-income people under a minimum tax. It did a lot of things that some people talk about but we did not have many votes.

Mr. President, I ask unanimous consent that rollcall vote No. 257 legislative, dated July 22, 1982, be printed in the RECORD at this point.

There being no objection, the vote was ordered to be printed in the RECORD, as follows:

Rollcall vote on Senate version of the Tax Equity and Fiscal Responsibility Act (July 22, 1982).

[Rollcall Vote No. 257 Leg.]

NOT VOTING—1

Chiles

Mr. DOLE. The most recent case of fairness and equity was the effort by my distinguished colleague, Senator LONG from Louisiana, to repeal withholding on interest and dividend income. We talk about how we have to go out there and go after these rich people. My colleagues on the other side would not even agree that we could withhold taxes on interest and dividend income which is costing an estimated $4 billion a year. And they are only talking about $6 billion in the tax cut.

Mr. President, I ask unanimous consent that rollcall vote No. 154 legislative, dated June 16, 1983, be printed in the RECORD at this point.

There being no objection, the vote was ordered to be printed in the RECORD, as follows:

Rollcall vote on LONG motion to table that would assure repeal of interest and dividend withholding without additional compliance measures.

[Rollcall Vote No. 154 Leg.]

NOT VOTING—3

Cranston	Inouye	Sasser

Mr. DOLE. Again I will say that there are about five of my colleagues on the Democratic side who did not support the position of the distinguished Senator from Louisiana, Senator LONG.

The record ought to be made so that when historians check this great debate, which may take a few years, and look back on what really happened, where all the rhetoric was and where the performance was, they will be able to match it up.

We get all these great statements from the Senator from Arkansas about reform, equity and fairness, but I do not find him voting for it. So I think the record ought to be made. The point is that we are going to need a lot of fairness and equity later on, about 73 billion dollars' worth if the budget resolution is addressed. I am not suggesting it will be, but that is a rather large order. Those who voted for the budget resolution voted for more taxes. Then we have to determine whether or not they really mean it or whether they are going to continue to try to take away some part of the President's tax reduction program.

It is the view of this Senator that before we start taking away and increasing taxes for the working people of this country we ought to close the loopholes and have better compliance. What we are doing today is just saying, "Well, we are going to raise taxes on working couples, farmers, small business people, and others who make a little more money than others."

We can do a lot of that or we can address the real problem in some of the tax legislation that may come to the floor this year, next year, whenever it is.

Again, I do not quarrel with the efforts to politicize this matter, and I think it has been fairly well politicized. But in any event, I would hope that when the vote is taken it will be unanimous.

Again I will point out that not a single Republican House Member supported this effort. It is fairly transparent it is being pushed by organized labor. They see it as a way to somehow go after people who do not belong to organized labor.

Again, there are a lot of other areas that we want to address that would take care of some of the concerns that are now being expressed on the other side.

Mr. President, I reserve the remainder of my time.

Mr. BRADLEY. Mr. President, I yield myself 4 minutes.

The first thing to say about this bill is that it is in no way a tax increase. Everyone this July will get a tax cut. For 90 percent of the American people, they will get their full tax cut. For 10 percent of the American people, that tax cut will be limited to $720 per couple.

Mr. President, it is astounding to me, and I think somewhat preposterous, for the other side to argue that, somehow or other, this is a bill that is aimed at the middle class. Since when have the top 10 percent of the population been defined as the middle class? This is a bill that preserves the tax cut in full for 90 percent of the American people. Only the top 10 percent have a tax cut that is limited to $720.

Second point: Mr. President, this is a policy that is consistent with what we have tried to do on this floor over the last 3 years. In 1981, the top rate dropped from 70 to 50, benefiting primarily upper income individuals. On the floor of the Senate during the debate on that tax bill, I proposed an amendment that would have skewed the rest of the tax cut so that it would benefit primarily people under $50,000—upper income taken care of with the drop from 70 to 50 percent on unearned income; now, middle income under $50,000 taken care of by a skewing of the rates. That was rejected overwhelmingly by the votes on the other side.

In 1982, I proposed another amendment that would have given the bulk of the tax benefits to middle-income people under $50,000. That was rejected overwhelmingly on the other side.

So, to come to the Senate today and argue that because we are limiting the tax cut to the top 10 percent of the population is somehow against the middle class, in my view, is preposterous.

Mr. President, the majority leader and many other distinguished Senators have, on many occasions, come before us and said that many things would be nice to do but we simply cannot afford them. It might be nice if we could give everyone a 50-percent tax cut. The fact of the matter is we cannot afford it. We are facing deficits that will add $1 trillion to the national debt in the next 5 years. I think there is no mystery about how these deficits were created. They have been created in the last 3 years by both tax policy and spending policy. To argue that only spending causes deficits but tax policy does not is like arguing that only one blade of the scissors cuts the paper; both are responsible, Mr. President.

What have we done? We have, indeed, cut spending, which I voted for and supported, about $150 billion, in the nondefense area. Then we have proceeded in the defense area to increase spending by equivalent amounts. So we are about net. No net reduction in nondefense spending—not because we refused to cut nondefense spending, but because we increased defense spending.

Then we proceeded to give away the source of funds for the Government with the gigantic tax cut in 1981, thereby yielding these gigantic deficits.

Mr. President, there is no real prospect that we are going to dramatically cut the deficits in the next year. I hope we are going to make progress, but there is no real certainty of that. In the President's budget that he sent to the Congress, he said that unless the deficits were dropped to 2.5 percent of GNP—they are 5 percent of GNP now—he would propose standby taxes that would be a surcharge that would affect low-income people as well as upper income people; regressive energy taxes that would affect lower income people, middle-income people, and upper income people; and also some loophole closings that would, indeed, hit the workingman very, very hard.

Mr. President, we can continue to give everyone a tax cut but limit it for upper income taxpayers, or we can stay on the borrowing and spending spree that we have been on in the last 2 years.

In short, with this bill, we can give everyone a Ford, a Chevy or a Chrysler—a small one—or we can go into debt further so that a few people can have a Cadillac.

Mr. President, I think the choice is clear.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, I yield 2 minutes to the distinguished Senator from Virginia (Mr. TRIBLE).

The PRESIDING OFFICER. The Senator from Virginia.

Mr. TRIBLE. I thank the Senator for yielding.

Mr. President, it is difficult to conceive of an action which would have more adverse consequences than enactment of a cap on the third year of the tax cut. The sharp increase in taxes proposed by this bill would retard economic recovery, enshrine inequity in our Tax Code, and hit hardest those who now bear the heaviest burden—middle-class Americans, particularly two-income families, small

businessmen, and family farmers. And it will not reduce the deficit.

Each report issued from the Government suggests that recovery is underway. I do not believe it is sensible to attack either the incentives to economic productivity or tax away the additional money to fuel consumer spending that this Congress enacted in 1981. These acts would jeopardize the recovery which our Nation so badly needs.

The rewards of economic recovery have been hard won. All of us appreciate the pain and distress that our Nation has suffered. To take action that would jeopardize the recovery is not only bad economic policy; it demonstrates a callous insensitivity to human problems.

Moreover, the tax cap would introduce vast inequities into the system. Under the provisions of this legislation, a married couple with income of $35,200 would face a marginal tax rate that increased from 28 to 37 percent. In other words, a two-income family in which one member earned $17,200 and another earned $18,000 would have their marginal tax rate increased by 9 percent. That is an increase of more than 25 percent in marginal tax rates. By what standard can this possibly be judged tax equity?

The same unfairness applies to a single taxpayer who earns $28,800. Those men and women would face marginal tax rate increases of 8 percent.

This unfairness is the most curious fact about the tax cut cap. If the proponents of tax increases were interested in taxing the rich, as they claim, they could have simply increased the top tax rate. Or they could add a surtax on the income of those in the highest tax bracket. But they did neither. Nor can this tax increase be justified on "ability to pay;" were that the case, the principle would call for a tax increase borne by all taxpayers in direct proportion to their increase.

Rather, I suggest the $700 tax cap is simply an arbitrary figure. The most significant consequences of the cap will be to reimpose the marriage penalty—taxing women who work to maintain their standard of living—and to distort middle-income tax brackets.

I want to raise two additional concerns that transcend the specific provisions of the bill. This bill does virtually nothing to reduce the Federal deficit. The estimates suggest that this bill will raise $6 billion in 1984. That $6 billion is less than one-seventh of the $42 billion increase in Federal spending assumed in the budget resolution for 1984. Six billion dollars is only 3 percent of the budget deficit estimated for fiscal year 1984. Characterizing this legislation as a deficit reduction measure is as misleading as an editorial in Pravda.

In addition, I believe it is essential for the Senate to say no to the continuing erosion of tax relief for our citizens. In 1981, we took a decisive and necessary step by reducing tax rates by 25 percent. Since then, Congress has enacted a major new tax increase (TEFRA), increased social security payroll taxes, and increased the gasoline excise tax. Today, we should assert that reducing taxes was the right step, and that the continual erosion of tax relief will be stopped.

Mr. President, history shows very eloquently that for every $1 we send to Washington as taxpayers, the Federal Government spends $1.50. For these and other reasons, I urge my colleagues to oppose the cap on the third year of the tax cut.

I yield back the remainder of my time.

Mr. LEVIN. Mr. President, I rise in support of H.R. 1183, the Tax Rate Equity Act which will put approximately a $700 cap on the third year of the Reagan tax cut. This legislation makes sense in terms of equity, and it makes sense in terms of budgetary concerns. Only in the realm of Orwellian "doublespeak" which the President has chosen to employ in debating this issue can it be seen as otherwise. Only if you accept that "equity" means "inequity," and "limiting a tax cut" means a "tax increase," does the President's reasoning make any sense.

What are the basic issues here? They are whether revenue should be increased in order to reduce the deficit, and whether it should be done in a way that corrects some of the inequities enacted in 1981. The Tax Rate Equity Act addresses both of these issues in a meaningful way. In the fiscal year 1983-88 timeframe, this legislation would reduce the deficit by almost $40 billion. To put this in perspective, the provision on withholding on interest and dividends, which the administration advocated in part as a deficit reduction matter, would have raised a little more than $14 billion over the same period.

Our country is facing huge deficits in the coming years, even if unemployment drops several percentage points below current levels. It is not enough to say that "the economy will grow its way out of them." According to the Senate Budget Committee, the deficit for fiscal year 1988 will still be $268 billion even if the unemployment rate dropped to 6 percent.

This legislation would not close that gap entirely, nor need it be closed entirely to have a fiscal plan which is consistent with sustained economic growth. But the gap must be reduced if Federal borrowing is not to crowd out private borrowing and drive up interest rates in the years to come. This legislation is an important step in defusing the fiscal time bomb which the administration has set, and which threatens to explode in the form of higher interest rates and renewed surges in unemployment.

But in addition to being fiscally responsible, this legislation is also fair. Barely 1 percent of the taxpayers making less than $30,000 will be affected by it, and almost 90 percent of the taxpayers making over $50,000 a year are affected by the cap. For the average family of four making $46,000, or less this legislation will not reduce their tax cut one bit. If the goal is to increase revenues in accord with someone's ability to pay, then this legislation offers a reasonable path for obtaining that objective.

It is because of the intrinsically reasonable approach embodied in this bill that I believe that the President has done a disservice in describing it as an attack on the middle class. By taking this rancorous approach, he has foregone the opportunity of using this proposal as a reasonable middle ground for achieving significant deficit reduction. Instead, Reagan sticks to his programs, which requires 22 percent of the households making less than $10,000 a year to bear 41 percent of the benefit cuts which have been enacted as part of the Reagan program since 1981, but does not ask the wealthiest taxpayers to accept a cap of $700 on their new tax cut due in July.

Such a position stands logic and the English language on its head. So, too, calling a gain in after-tax income of $720 for a family of four "a tax increase" turns the common meaning of words inside out. The fact that the only attacks which have been made on this proposal have been grounded on illogic and distortions perhaps speaks more eloquently than can anything else as to its wisdom and reasonableness.

Mr. MATTINGLY. Mr. President, I rise to oppose the proposal to cap the July 1 income tax cut at $700.

Mr. President, this ill-timed and ill-conceived proposal is just the beginning; it is just the first of many proposals that I predict will be floated out before this Senate in the coming months as we get closer to the 1984 elections. The various proponents of these so-called revenue proposals will attempt to disguise them with all sorts of catch phrases. We will be told we need these tax increases to reduce the deficit, to put people back to work, to help the poor.

Well, no one is fooled by such rhetoric. This proposal before us today to cap the third year of the 1981 tax cut is purely political. It is a blatant partisan ploy, thought up by the Speaker of the House as a 1984 campaign issue. And too many of my colleagues on the other side of the aisle have swallowed Speaker O'NEILL's political panacea. This tax cap is snake oil, my friends, and it will not sell. The American

public is not as gullible as those on the other side of the aisle think they are.

Mr. President, this proposal should not float and it will not float. It hardly made it to the Senate from the House. Even the chairman of the House Ways and Means Committee publicly held his nose in voting this proposal out of committee.

The minority party here in the Senate and the majority party in the House think they have a political issue here for 1984. They think that by denying a tax cut to the middle-income working people of our country, the small business operators, the family farmers, and the two-paycheck families across America, those people are going to turn around and say thank you at the polls in November 1984. All I can say, Mr. President, is that some days the Democrats just hand it to us.

Mr. President, capping the third year of the tax cut at $700 is nothing more than a disguised tax increase on the backs of middle-income Americans. It is an attempt to divert public attention from the real reason we have record budget deficits: Congress refuses to control spending. In fact, this tax increase will not go to reducing deficits. It will go to pay for the record spending levels contained in the budget resolution. I find it very interesting how many Members of this body never worry about deficits until they need justification to raise taxes.

But more importantly, this proposal comes at the worst time possible. Economists of both the liberal and conservative persuasion are in almost complete agreement that a tax increase at the beginning of an economic recovery is the worst medicine possible to insure the healthy continuation of that recovery. Just when personal income is on the rise, just when consumer confidence is increasing, just when savings and investment are gaining momentum, the big spenders, the proponents of big government come before us with a proposal to rob the working people of this country of their recovering paychecks, savings accounts, and struggling business income.

Mr. President, this proposal is not only unfair and unsound, it is stupid economics. I urge my colleagues to join me in opposing this measure.

Mr. BIDEN. Mr. President, the American people are fed up with our tax system. Who can blame them? Federal taxes have come to symbolize unfairness, special privilege, and deception. The Tax Code has been crammed full of tax breaks of benefit to limited groups of people, while the middle-income family is left to bear the brunt of financing the Federal Government. The Tax Code is now so riddled with loopholes that it cannot perform its chief function of raising sufficient revenue to finance the Federal Government.

The fact is that middle-income Americans carry a disproportionate share of the burden of keeping this country going. There are certain people within our society who pay little or nothing and who should be paying a great deal more. The system just is not fair.

The proposal we are considering here today helps, but does not solve that basic problem. A tax cap is a stopgap measure, designed to raise revenue to lower Federal deficits, and do it in a way that will restore a modicum of fairness to our tax system.

No matter what the decision on the tax cap, we in Congress must address the fairness issue head on in the weeks and months ahead. We can do that with a proposal of Senator BRADLEY's that I am cosponsoring. It is called the Fair Tax Act. When adopted, this measure will restructure the individual and corporate income tax in America. It will greatly simplify the Tax Code, while at the same time raising more equitably the revenue needed for essential Federal services. It will encourage economic growth by removing current roadblocks to savings and investment. The Fair Tax Act will lower tax rates. About 80 percent of the taxpayers will pay an income tax rate of 14 percent. No one will pay more than 30 percent. It will also eliminate most exclusions, deductions and credits, except some of those most commonly used.

Would you not be willing to trade your present income tax rate for 14 percent? Most likely the reason you are paying more now is that you are paying taxes for someone else.

Mr. President, the debasing of our tax system did not occur overnight. It has been going on for decades. But in recent years the trend has accelerated. In 1973, the revenue lost through special deductions, exclusions, and credits was about $65 billion. By 1982, the revenue loss had grown fourfold to $250 billion, more than the total Federal revenues of $231 billion collected in 1973.

Clearly, in the 1970's, Congress was busy granting special tax incentives and subsidies. While these significantly reduced tax revenue, they were not tax reductions for most Americans. These were tax reductions for the few, for the privileged, for the special interests. During that time, I introduced several pieces of legislation aimed at slowing this trend. And I worked on the Senate floor with many of my colleagues for the same purpose. But we were seldom successful against the powerful interest fighting to retain their privileges.

The practice of granting tax privileges continued into the 1980's. By 1984, it is estimated that revenue losses will have risen to $327 billion. Of that amount, over $30 billion has been added in the two major tax bills adopted in 1981 and 1982.

The 1981 tax bill—the Economic Recovery Tax Act of 1981—combined general tax reductions with special interest provisions. Altogether, the 1981 bill will reduce Federal revenues by over $1.1 trillion between its enactment and fiscal year 1988. That bill decreased the equity of the Tax Code by providing relatively larger tax reductions to wealthier taxpayers and by adopting still more special tax breaks. It is true that some of the revenue loss was recouped in 1982—about $255 billion of it. But many of the provisions of the 1982 law were also grossly unfair.

The ironic result of all of these years of amending the Tax Code is that we have dramatically reduced the revenue to finance the Government, while at the same time increasing the tax burden on the average taxpayer. Thus the unfairness of the Tax Code has multiplied over the years.

Today some of us propose to take a first small step toward fairness. It is proposed to put a cap on the maximum tax reduction available to taxpayers from the third year of the tax cuts enacted by the Economic Recovery Tax Act of 1981. This will provide additional revenues desperately needed to reduce the multibillion-dollar deficits that have resulted from the Reagan economic program of the past 2½ half years. This cap will raise about $6 billion in fiscal year 1984—a large sum of money, but only a small part of the deficits that threaten to exceed $200 billion. The cap will increase those revenues by limiting the tax reduction that will go to those taxpayers who benefited most from the initial tax reductions in 1981. Under this proposal, 90 percent of all taxpayers would receive the scheduled July 1 tax cut in full. And every taxpayer would receive some further tax reduction on July 1. But no taxpayer would receive more than $720.

No one likes raising revenues. But I believe we must adopt this tax cap proposal to raise some additional revenue in the fairest possible way. If we do not do that, high Federal deficits will inexorably force up interest rates, endangering the recovery and forcing up unemployment.

In reaching a decision on the tax cap, it is necessary to consider the alternatives that might be adopted instead. Under the budget resolution recently adopted by Congress, about $12 billion in new revenues must be raised to help reduce deficits. And certainly no one can argue that we must not take action to reduce our $200 billion deficit. The $700 tax cap will provide about $6 billion of the $12 billion in new revenue that must be raised.

The most likely alternative would be that proposed by President Reagan—

to tax employees for a part of the premium paid by their employer for health insurance, just as though it were income paid directly to the employees. The President estimated in his budget that this would raise $2 billion in new revenue. His proposal would increase taxes for families with incomes under $50,000 by more than the tax cap we are considering today. This proposal could add up to $400 in new taxes for thousands of Delawareans who work in all our businesses from the Du Pont Co. to the smallest business. And this proposal would provide only $2 billion of the $12 billion we must raise. What other proposals might be adopted? The mere question is frightening. But if last year's tax increase bill is any guide, they would be much more repressive on middle-income families than this $700 cap. This is, without question, the fairest, least repressive way to raise the revenue that we must raise.

But what then, Mr. President? After we act on this proposal—whether it becomes law or not—what are we going to do then? Are we going to say: "We tried to make the tax laws fairer. We did what we could." And then turn to other matters.

We must not do that, Mr. President. We must stop this piecemeal approach to our tax laws. We must adopt a comprehensive reworking of the Tax Code. We should do this by adopting the Fair Tax Act that Senator BRADLEY and I and others just introduced.

The outlines of that proposal are as simple as they are fair. The basic individual rate would be 14 percent. About 80 percent of all taxpayers would pay that 14-percent rate. The remaining 20 percent would pay an additional marginal rate. That rate would be an additional 12 percent on income above $25,000 for single returns and $40,000 for joint returns—for a marginal rate of 26 percent. That marginal rate rises to 30 percent on adjusted gross income above $37,500 on single returns or $65,000 on joint returns.

There would be an increase in the personal exemption from $1,000 to $1,600 for taxpayers and spouses—$1,800 for a single head of household. The standard deduction would be increased from $2,300, to $3,000 for single returns and from $3,400 to $6,000 for joint returns.

Most itemized deductions, credits, and exclusions, except those generally available to most taxpayers, would be repealed. Among those retained will be the $1,000 exemptions for dependents, the elderly and the blind; deductions for home mortgage interest, charitable contributions, State and local income and real property taxes, payments to IRA's and Keogh plans and employees business expenses; exclusion of veterans benefits, social security benefits for low- and moderate-income persons and interest on general obligation bonds. The personal exemptions and itemized deductions will apply only against the 14-percent rate.

For corporations, there will be a single rate of 30 percent. Most existing tax deductions, credit, and exemptions that tend to distort investment decision would repealed.

Mr. President, over the years our tax system has grown in haphazard ways. Some originally well-intended provisions of the Tax Code achieve no real public purpose. The jerry-built structure of business taxation probably impedes rational business decisions and thus slows our economy, fosters inflation, and provides unintended and economically unproductive tax breaks to some. While some individuals have been able to turn the tax laws to their advantage to escape taxation, the vast majority of our citizens find themselves overburdened with taxes.

We can start the move toward a fairer tax system here today by adopting the $700 tax cap. But then we must finish the job by adopting a total overhaul of the Tax Code like that proposed in the Fair Tax Act. Only in that way can we restore the faith the American people once had that the burdens of Government are fairly distributed.

Mr. KASTEN. Mr. President, there is an old saying that the only things certain in life are death and taxes. If we pass this bill to cap the 10-percent tax cut at $700, then this saying is as true today as it was years ago.

Mr. President, there is an old saying that the only things certain in life are death and taxes. Today, we are facing yet another proposed tax increase. If we pass the legislation before us now—H.R. 1183—we will undermine any progress that has been made in the past 3 years in the name of tax relief.

In 1980, President Reagan and I—as well as many of my Republican colleagues in the Senate—pledged to work for economic recovery. And, in our first year in office, we passed the Economic Recovery Tax Act of 1981. The critical elements of this tax act—the Reagan-Kemp-Roth 25-percent tax rate reduction and indexing of tax rates—would restore the incentives to work, save, invest, and produce our way to economic recovery. More importantly, the tax cut would get tax rates down, and keep them down.

Since passage of the 1981 tax cuts, Congress has voted consistently to raise spending and taxes—actions that have delayed the economic recovery. At long last, however, we are on our way to economic recovery. The administration predicts that economic growth for the second quarter of this year will be 6.6 percent. This is the highest growth rate in 2 years, and it is expected that growth for the year will also be much greater than originally projected. This improvement in economic growth is due primarily to the anticipated third—and final—10 percent installment of the tax cut. The last thing we need to do now is adopt tax increases that would kill the economic recovery before it really gets going.

With the 1982 bill—the Tax Equity and Fiscal Responsibility Act—the gas tax, the social security tax increases, and the $73 billion tax increase called for in this year's budget, we have raised taxes to the point that there will be no tax relief for the working American. In fact, the remaining 1984 tax cut will only equal $3 billion out of the $130 billion called for in the Economic Recovery Tax Act of 1981. In other words, since the 1981 tax cut, Congress had increased the taxes due in 1984 alone by $127 billion. After 1984 there will be a tax increase over and above the 1981 tax cut. It is as if we never passed one in the first place.

And with this bill, some of my colleagues would even like to take the remaining $3 billion tax cut away from working Americans. They say that their plan to impose a $700 cap on the tax cut will "soak the rich," but this is wrong. Several facts make this obvious:

The "rich" already benefit from the 1981 tax act provision that drops the maximum taxable rate from 70 to 50 percent. The "Fairness Democrats" have taken no action to change this.

Approximately half of all taxpayers affected by the $700 cap are those with less than $50,000 in annual income.

Taxes for millions of married working couples—two income earner households—will increase. Nearly half of the tax returns affected and the revenue gained with the cap will come from these working couples.

Four out of five families in the $35,000-and-up income class have at least two earners. Millions of taxpayers will be affected by the cap simply because both the husband and wife work.

Nearly 2.5 million small businesses—including 350,000 family farms—are taxed at the individual tax rates, and would face a tax increase under the $700 cap.

Instead of soaking the rich, it turns out that the cap will drown the middle class. This does not bother the "Fairness Democrats," who have neglected the fact that last year's installment of the tax cut resulted in an $8 billion increase in revenues from taxpayers in the top income tax bracket. This—as we tax cut supporters have always argued—was caused by a shift in resources away from useless and nonproductive tax shelters. An effort to take away any or all of the final installment of the tax cut will only reverse this trend.

The "Fairness Democrats" argue for this tax cap as a way to reduce the

deficits. But deficits are not caused by undertaxed working Americans. Tax revenues will be about 19 percent of GNP this year—practically the same level as in the 1970's. Government spending, however, has grown from less than 21 percent of GNP in the 1970's to about 25 percent this year. Clearly, the deficits are caused by a rapid growth in spending, not a drop in revenues to the Treasury.

In fact, despite last year's $100 billion tax increase, the budget deficits have doubled. Clearly this is not the right course to take. We have tried to balance the budget with tax increases in the past, and all we have to show for it is more spending, less savings and investment, and less economic productivity.

Mr. President, this Friday—July 1—the third and final 10-percent tax cut will go into effect.

We have raised taxes enough since the 1981 tax cut. Passage of this bill—to cap the tax cut at $700—would be the worst mistake we could make. It is time to hold the line on revenues, and take a long look at the spending side of the budget. We were elected to get taxes down and keep them down. This bill makes our promise for recovery a lie. I will not go back on my promise to the American people, and I urge my colleagues to join me in voting against this bill.

THE TAX RATE EQUITY ACT

Mr. BAUCUS. Mr. President, I want to speak in support of H.R. 1183, the Tax Rate Equity Act. Let me explain why.

This is not a vote on taxes—it is a vote on deficits.

This vote is a vote for or against a fair way to reduce the Federal deficit, and thereby, to preserve the economic recovery.

The Federal deficit will top $200 billion this year.

And next year, and the year after that.

At the rate we are going, the Federal Government will pile up more debt during the next 6 years than it accumulated during the first 207 years of this Nation's history.

The national debt will double in less than a decade.

The Federal deficit is growing at a rate of $1,000 per person per year.

All this adds up to one conclusion. The deficit is so huge, so enormous, that it threatens the life of the economic recovery.

The Federal Treasury is borrowing so much money to finance the debt that it threatens to squeeze out private borrowing. It is that borrowing that is needed to encourage additional business investment and economic growth.

Unless Federal borrowing is reduced, interest rates will rise. And the result? At best another period of stagnant economic performance. At worst, a return to the disastrous economic recession that has plagued Americans in the last 2 years.

As economist Leonard Silk said, "[T]hat is the worry that hangs over capital markets and holds up long-term interest rates."

Yesterday's rosy economic forecasts could turn pale unless we reverse the course of the Federal deficit.

THE TAX CAP

Several months ago I spoke before the Senate about ways to reduce the deficit. I said we must take a series of steps that, all together, would demonstrate Congress commitment to reducing the deficits.

By taking these steady, reasonable actions to reduce the Federal deficit, I argued, Congress would send a signal that we are serious about cutting the Federal deficit.

Deficit reductions, as we all know, depend largely on spending reductions and they also depend on some revenue increases. But no matter what we do, I will not support a measure that is not fair.

It would be unfair to repeal this year's scheduled tax cut. That tax cut mainly benefits lower- and middle-income taxpayers. What is more, it provides an important extra boost to recovery.

It would be unfair to repeal indexing. Indexing makes sense. It forces Congress to make clear public decisions about taxes. And it prevents bracket creep from creating an invisible middle-class tax increase.

The fairest way to increase revenue is to enact the tax cap. A $700 tax cap would permit couples earning adjusted gross incomes of up to about $47,000 or its equivalent for single taxpayers to receive their full, scheduled, 10 percent tax cut. This accounts for 90 percent of the Nation's taxpayers.

Couples earning more would receive a flat $700 cut. This way, a $700 cap would give everyone a tax cut, but concentrate the cut on the middle- and lower-income taxpayers who need it most and are most likely to stimulate economic recovery.

The tax cap is far fairer than the President's proposed "contingency tax plan." That plan includes two tax increases—a 5 percent surtax and an oil tax.

Each would affect middle-income taxpayers much more than the tax cap would. For example, taxpayers earning under $40,000 would pay 52 percent of the surtax, 75 percent of the oil tax, but only 2.9 percent of the tax cap.

I believe the tax cap is the fairest way to raise the revenue we must raise to reduce deficits. I urge my colleagues to support this measure.

Mr. WEICKER. Mr. President, I intend to vote against this proposal, recognizing what has already been accomplished vis-a-vis the Federal budget and what can be accomplished in the future.

In April, Mr. President, a group of moderate Republicans and I undertook an effort to reduce the massive deficits proposed by the White House. With the passage of the conference report on the first concurrent budget resolution, 75 percent of our objective was realized with the revenue targets, domestic spending, and defense reductions included in that measure. Through the subsequent reconciliation process we may achieve close to 100 percent of our goal. This was not something that was achieved by confrontation with the Senate leadership. This was not the product of political exercises such as this one engineered by the Democrats. It was accomplished through accommodation and compromise among Senate Republicans. I for one am proud of what has been done and want to continue the process by which these matters can be worked out within the Republican Party.

Mr. FORD. Mr. President, I rise today in support of the Tax Rate Equity Act of 1983, to put a $720 limit on the July 1 tax reduction.

I support this because first of all, it will restore a measure of fairness to our tax system and second, because it will restore some sanity to our fiscal policy.

In 1981, when the administration first made its proposals for the 1981 tax cut to Congress, all kinds of wild promises were made about the effects this tax cut would have, the tax relief it would give to middle-class Americans and the prosperity it would create in the country. Two years have passed and it is clear that nothing of the sort has occurred or will occur.

The administration promised that a tax cut based on supply-side economics would encourage the savings so necessary to finance productive investment. However, since that time, individual savings have stayed about the same and, in fact, the net U.S. savings rate, taking into account Government deficits, in 1982 was the lowest since 1949.

The administration promised that a large tax reduction of this sort would cause upper income people to abandon tax shelters. Instead, we have seen a 15-percent increase in 1982 in the use of tax shelters and, because of the very generous benefits we have given in accelerated cost recovery and investment tax credits, we are likely to see a 20-percent increase in tax shelter activity this year.

The administration promised the tax cut would lead to high employment and create work incentives that would drive this economy to prosperity. But instead 11 million Americans are out of work. The administration is at it again making all kinds of assertions

about the impact a $720 tax cap would have on the economy.

One thing the administration is saying that is true, is that the first two stages of the 1981 tax cut did not really cut taxes for most Americans; this third stage is where middle-income Americans will receive real tax reduction.

The 1981 tax cut for most Americans did not represent a real reduction in taxes after taking into account inflation-induced bracket creep and social security tax increases. That is why it is very important that we go ahead with this July 1 tax cut for the 90 percent of Americans who did not really receive anything under the Kemp/Roth program.

After taking into account bracket creep and social security tax increases, the net effect of the Reagan administration tax changes has been to increase the taxes of persons with incomes under $10,000 per year by 24 percent. Those making under $50,000 have stayed just about even. But those with incomes between $100,000 and $200,000 per year have gotten a net 14 percent tax cut, and those with incomes over $200,000 enjoy a tax reduction of approximately 17 percent.

The result has been to make the tax system less fair; to increase the relative burdens of the middle- and low-income taxpayers and to decrease the tax burdens of upper income individuals. This effect at the Federal level has been reinforced at the State level as our cutbacks in Federal programs have forced new fiscal pressures on the States, to which they have responded with new taxes that are often more regressive than even the Reagan tax program. The result has been to impose further burdens on low-income Americans to finance the tax cuts given wealthy Americans in the first 2 years of the Reagan administration.

We can change this. We can make this tax system fair by putting a cap on the July 1 tax cut. Not to penalize those 10 percent of American taxpayers who will be affected by the $720 cap, but to put a limit on the amount they receive so that it does not greatly exceed the tax cut of the other 90 percent of Americans; to limit the tax cut to a level that this Nation can afford.

A $720 tax cap will raise approximately $22 billion over the next 3 years. While that alone will not put a dent in the unprecedentedly large budget deficits this administration has brought on, it will be a beginning and most importantly, it will allow us the political leverage to make further reductions on the spending side of the budget.

Opponents of the tax cap say cut taxes further; cut taxes to the point where we have $300 billion deficits because only then will Congress cut Government spending. That argument has no basis. President Reagan's own Council of Economic Advisers has produced research that shows the tax increases are more likely to restrain spending than tax cuts. Data collected by the Council of Economic Advisers shows that each dollar of new revenue generated has nearly a 2-for-1 effect in reducing budget deficits. For each dollar of revenue raised, Congress historically has restrained spending on transfer payments, grants and aids, and other social programs by 90 cents. This result is reinforced by a provision in this bill that requires any revenue raised by the tax cap to be accompanied by a dollar-for-dollar reduction in outlays in fiscal year 1984.

Some people say what we are doing is useless. The tax cap will not pass the Senate, and even if it does, the President will veto it and then there is no hope in obtaining the two-thirds majority in Congress necessary to override the veto. The President will use the White House Public Relations Office to get a false message to the American people, that the tax cap will impose more burdens on the middle class, that it will retard the economic recovery from the Reagan depression. But sometimes it is necessary to do what is right, what makes sense and what is best for the Nation.

Two years ago when we debated the 1981 tax bill in the Senate, amendments were offered to condition the third stage of the tax cut on the health of the economy. All of those amendments were rejected.

But what if Congress had not approved the third phase of the tax cut and instead of the cap we are debating now, we were debating whether to cut tax rates another 10 percent on July 1.

We would look at the relative shift in tax burdens over the last 2 years, the thousands of dollars of tax reduction the wealthy have already received and the increased burdens on middle and low income taxpayers.

We would look at unprecedented $200 billion deficits throughout this decade. And we would do what is sensible—we would at least target those tax deductions on that part of the taxpaying public that deserved tax relief and who would use the tax savings to create economic stimulus in a depressed economy. We would use our senses to realize that it does not make the slightest bit of sense to give up even more revenue to give even greater tax reduction to the wealthiest Americans.

What does President Reagan offer as an alternative? In 1986, he proposes a $5 excise tax on energy and a surtax on individual and corporate income. As an alternative to raising money in this fair, efficient, sensible way he proposes further taxes on low- and middle-income Americans. Further regressive taxes to finance the 1981 tax bill that gave most of its benefits to upper income Americans.

Mr. President, for the 90 percent of the American taxpayers who did not receive relief in 1981, we should go ahead with the third stage, 10 percent tax cut. In the name of fiscal sanity, and tax fairness, we should limit that cut to $720 per year.

Mr. SPECTER. Mr. President, no vote is harder than a vote for taxes. But today, in my judgment, that is an absolute necessity if the Senate is to demonstrate responsibility on the fiscal year 1984 deficit and the mounting national debt.

My father, who would have liked to have had the obligation to pay more income taxes, frequently quoted Will Rogers' statement: "It's a great country, but you can't live in it for nothing."

Most people, aided and abetted by Congress whose principal and traditional goal is popularity and reelection, would like to live in it as cheaply as possible.

But, let us return to basic basics. The most important part of the platform of President Reagan and other candidates, myself included, in 1980 was to strive for a balanced budget in order to live within our means. The oft-repeated campaign slogan had the ring of a constitutional amendment if not a divine commandment: "a government like any citizen should live within its means." That clarion call for a balanced budget mandates a vote today for taxes.

For decades the debate has raged as to whether the United States of America can have both guns and butter. Today, some take a giant step backward by insisting that we can have both guns and butter without paying for either.

While the debate proceeds on the virtues of supply side economics, none disagrees that the giant Federal deficit is an anathema, on moral grounds in saddling future generations with our debt, and on practical grounds in retarding economic recovery. In discussing the issues of increased taxes versus increased deficits in my travels through Pennsylvania, I have frequently been told that high interest rates are driving numerous businesses into bankruptcy, resulting in losses of tens of thousands of jobs. It is obviously irrelevant what the tax rate may be when there are no profits or earnings. That situation leads to the inevitable conclusion that it is preferable to reduce the deficit than to reduce taxes.

In considering the full tax cut scheduled for July 1, 1983, it should be remembered that when Kemp-Roth was enacted in 1981, it was projected that there would be a balanced budget by fiscal year 1984. That, as we know, is far from the case with estimates on the budget deficit for fiscal year 1984 running as high as $200 billion.

My vote today is consistent with my position on this issue in the 3 years it has been the subject of national debate and congressional consideration. During the 1980 campaign, I did not endorse the Kemp-Roth bill, but instead urged that we take tax cuts 1 year at a time. In 1981, I was among the 4 out of a total of 53 Republican Senators who did not cosponsor the Kemp-Roth bill. In 1982 I voted to defer the 10-percent tax cut scheduled to take effect on July 1, 1982.

In evaluating this issue, it must be remembered that the 97th Congress enacted very substantial tax cuts. The maximum tax on personal income was reduced from 70 percent to 50 percent. The tax on capital gains was reduced from 28 to 20 percent. The first two installments of the Kemp-Roth bill took effect with the 5-percent cut on July 1, 1981, and an additional 10-percent cut on July 1, 1982. This cap would leave a substantial tax reduction in effect as of July 1, 1983.

Notwithstanding these reasons, this is a hard vote to cast. I do not like to oppose the President who has the principal responsibility for guiding our national economic recovery, especially in the context of the good job which he has been doing. Nor do I like casting a futile vote because it is plain there will not be the two-thirds vote in both Houses to override the projected veto even if this cap passes in the Senate.

In addition, I know this is an unpopular vote. The expressions of sentiments by my constituents are overwhelmingly in favor of the full tax cut. But the long-range vitality of our economy and the welfare of our country, in my judgment, require that we take no additional steps to increase the national debt which exceeds $1.3 trillion and the projected fiscal year 1984 deficit which will approximate $200 billion.

Mr. GRASSLEY. Mr. President, today, we are considering a measure to limit the third year of the tax cut. I oppose this initiative for the following reasons: First, it hurts middle and upper middle income salaried couples; second, it creates further confusion in tax policy; and third, it is likely to result in compliance problems.

Of the 8.1 million taxpayers affected by this legislation, approximately one-half of these individuals earn less than $50,000 annually. Generally, they are two-earner married couples whose combined income places them in a higher tax bracket. This is the very group Congress attempted to assist in 1981 by passing a provision to limit some of the negative effect of the marriage penalty. The marriage penalty is a direct result of the progressive rate structure, it causes two unmarried taxpayers earning $17,000 each to be taxed at a much lower rate, even when their tax liabilities are totaled, than their married counterparts who file a joint return on their combined income of $34,000. To cap the tax cut for two-earner married couples will increase the taxes of a group Congress sought just 2 years ago to assist. Not only is this inconsistent, it is unfair in my view. Two wage earners is an economic necessity for many families. Two-earner families already shoulder the burden of a higher tax rate as a result of the progressive rate structure, to me there is little justification for denying them their tax cut.

As a member of the Committee on Finance and chairman of the Subcommittee on Oversight of the IRS, many witnesses have testified that certaintly is desperately needed in tax policy.

They argue persuasively that the rate of tax changes must be slowed if practitioners are to understand the law and provide their clients with sound advise. The velocity of tax changes has left the ordinary citizen virtually unable to comply with the law. Since the Economic Recovery Tax Act was enacted in 1981, we have enacted a miscellaneous tax bill, the Tax Equity and Fiscal Responsibility Act, the Surface Transportation Assistance Act (the gas tax), the Payment in Kind Tax Act and the social security compromise package including many tax provisions. Not only can an argument be made that Americans are overtaxed, they are also overwhelmed by the pace of change in the Internal Revenue Code. Since 1981, taxpayers have had the certainty of a three-phase tax cut to be completed this Friday. To upset their tax planning and expectations with some last-minute tinkering is an imprudent action which I cannot support.

This so-called tax reform also creates a 9-percent jump in the progressive rate structure. At $35,000 the marginal rate will jump from 28 to 37 percent. This cliff will remain a permanent feature of our rate structure causing greater problems as more individual taxpayers receive merit and pay increases. As chairman of the Subcommittee on Oversight of the IRS, creating a 9 percentage point cliff in the rate structure concerns me greatly. A 9-percent increase in an individual's tax rate will stimulate noncompliance. It will encourage previously law-abiding taxpayers to shelter or underreport their income. On the Finance Committee, we have been considering painful alternatives to increase compliance. Often these alternatives involve imposing extra paperwork on innocent individuals and accumulating vast amounts of information about taxpayers to verify compliance.

These compliance measures are unpopular and raise serious concerns about an individual's right to privacy. Consequently, I become extremely concerned when my colleagues take an action which invites massive tax avoidance.

This proposal also offends my sense of equity. Half of the tax returns facing an increase are filed by those earning less than $50,000 annually. Families in that bracket do not consider themselves rich if one spouse needed to go back to work to help finance their children's college education and to pay the home mortgage. Furthermore, small businesses filing as subchapter S corporations and farm partnerships are taxed at individual rates, and will be affected by this tax increase at a time when they desperately need capital after a long and painful recession. The rich received their tax cut when the top rate was dropped from 70 to 50 percent and their capital gains rate dropped from 28 to 20 percent. Members of this body seem to have a difficult time understanding that wage earners can easily have an income of $50,000 annually if both spouses work. These families are not sustaining themselves by clipping bond coupons and watching their stock portfolios pay dividends. They are working hard to make ends meet. Because of wage withholding their compliance rate hovers around 99 percent. Unlike their truly wealthy counterparts who live off of their interest and dividend income (a group the Senate recently decided to reward for their noncompliance), these individuals need tax relief. This bill does not affect the rich who live on their investments, it hurts the middle and upper middle class who need their tax reduction. For that reason, I plan to vote against this bill and urge my colleagues to do the same.

Mr. PERCY. Mr. President, as we debate this proposal to place a cap on the individual income tax cut scheduled for July 1, I feel it is important for all of us to clarify this issue and examine exactly why we were to have this cut in the first place.

In 1980, the people of this country spoke. They awarded the Presidency to Ronald Reagan. In doing so they implicitly affirmed his program, and that of his party, for fiscal policy.

A major part of that program was—and still is—a commitment to responsible Government. Reasonable cuts in Government spending have been part of that commitment. Decentralization of the massive Federal Government apparatus has been part of that commitment. And perhaps the most important part of that commitment—one which was specifically approved by the voters of the United States—was the reduction of the Federal taxation burden.

There is no question that the people of this country bear a very heavy load of taxes. Of course, in return we receive all the benefits of being citizens of this great Nation.

But is it correct that the average taxpayer, if he or she were to pay every penny owed the Government in taxes starting January 1, would not finish paying those taxes until May 2? In 1960, this socalled tax-freedom day fell on April 18. In 1950, it fell on April 4; in 1940 on March 9. In 1983, the average worker worked over 4 months just to pay his taxes.

Incidentally, in 1981, before the present tax program went into effect, tax-freedom day fell on May 7. Thus, 2 years later, the average taxpayer has 5 more days' wages—a full week's pay—to himself. The tax cut which we debate today has been instrumental in bringing this about.

I am not in favor of capping the personal tax cut at $720. Nor can I accept the argument that this is a tax cut just for the rich. It is not and the figures bear this out.

The Treasury estimates that 72 percent of the 1984 share of the tax cut would go to those making under $50,000, a group which will, however, pay only 66 percent of the tax burden in 1984. Conversely, only 28 percent of the 1984 tax cut share will go to those making over $50,000. This wealthier group will however contribute 34 percent of Federal tax revenues next year.

It is not the super-rich, therefore, who will be benefiting the most from this tax cut. It is the middle-income taxpayer and two-earner families with incomes in the $20,000 to $50,000 range.

This so-called fairness issue argument is one which has been leveled at the entire tax program of the past 2½ years. But, in fact, the fairness argument is an unfair argument.

The tax program has been successful in reducing the tax burden this year. According to the Tax Foundation, which also tracks tax-freedom day, the average per capita tax burden is 4.1 percent lower in 1983 than it was in 1982. Moreover, some evidence indicates that tax revenues were up last year from those taxpayers in the highest brackets, offsetting the loss in revenues due to tax cuts, and indicating that the cuts served their purpose by encouraging new investment which fuels the economy. I have written the Secretary of the Treasury requesting that this information be verified by the Department.

The most unfair policy, in fact, would be to cap the tax cut. The middle-income families of this country need a full tax cut. They deserve it. Taxes increased by over $100 million in each of the years between 1946 and 1981. This steady growth in the tax burden has stifled individual initiative and hurt productivity, the two engines which run our economy.

The tax cut—along with the tax indexing scheduled for 1985—are the core of the tax relief program for the middle class which was started in 1980. By altering that cut, or indexing, we in the Congress would not only be cheating this all-important group, but we would be going against what was overwhelmingly approved by the electorate.

Moreover, I believe that the full tax cut will be extremely helpful to the economy as it continues to emerge from the recession. What the economy needs right now—more than anything else—is a burst of consumer spending. By letting people keep more of their income, we help to insure that more of this money will be spent in the stores of our country, driving down inventories and giving a critical boost to the entire business cycle.

What the debate over tax capping boils down to is a very basic argument about how the Government should meet its obligations. It boils down to an argument over philosophy and Government responsibility.

Do we propose to be responsible or irresponsible? The budget needs to be balanced. Members on both sides of the aisle agree on that. But do we balance the budget by increasing the tax burden—or, in this case, refusing to decrease it—on an already heavily taxed populace? Or do we reduce deficits by cutting spending, by reducing unneeded outlays, by looking carefully to see where waste can be excised from the budget?

Mr. President, there is no doubt in my mind that the latter course is our only reasonable alternative. We can cap the tax cut or repeal indexing or freeze the much-needed estate tax reforms in a short-sighted attempt to balance the budget.

But the deficit is a symptom of a disease. And tax reduction is not its cause. Rather, its cause is the excessive Government spending which has become a habit with Members of the Congress, the keepers of the public trust. It is a terrible habit, and we are going to have to break it at some point if we are to avoid a permanently crippled economy.

Unless we do break the spending habit, no matter how much success is achieved in blocking these essential tax reductions, we are just going to find ourselves back in the same boat at some time in the near future. In the meantime, a chance for constructive tax relief will have been missed.

We should keep the tax cut in July, and it should stay at 10 percent across-the-board as was originally passed by this House in 1981. Instead of capping the tax cut, let us work instead to cap taxes.

TAX CUT CAP AND FAIRNESS

Mr. DOLE. Mr. President, as we conclude debate on H.R. 1183, the so-called $700 cap on the third year tax cut, I think it is important that we clarify some matters for the record.

In debate yesterday, the allegation was made, time and time again, that this legislation is a way to achieve fairness—that the tax rate cuts passed in 1981 were unfair in some way and that the best we can do to insure equity is to take away part of the third year to reduce benefits to so-called upper income taxpayers. This is wrong on several counts, and we ought to consider why.

RELATION TO TAX BURDEN

First, we should recall a point that was made many, many times during the debate on the 1981 tax bill. The point of across-the-board rates cuts was, and is, to reduce taxes in proportion to the tax burden. Everyone's taxes are reduced by the same percentage—so of course those who pay more tax, in dollar terms, also get more of a tax cut—in dollar terms. But that is because they were paying more taxes to begin with. We have heard from many speakers in this debate that the tax cut cap would affect only the top 10 percent of taxpayers. What we do not hear is that that top 10 percent pays nearly 40 percent of the income tax burden. If we want to talk about fairness, we ought to consider how the tax burden is distributed.

WHO IS AFFECTED

Mr. President, we also have to consider who is really affected by the $700 cap. Most of the proponents of this bill, and many in the press, have resorted to the shorthand of saying that the cap only affects taxpayers with $50,000 or more in income. That is just plain not so. The cap would increase taxes for about 4 million returns filed by taxpayers with less than $50,000 in income. That is about 48 percent of the returns that would experience higher taxes under the cap proposal. For a single taxpayer who does not itemize, the cap would start increasing taxes at $29,800 in income. For singles who do itemize, the increase would begin at $35,714. For couples filing joint returns, with no dependents, and who do not itemize, higher taxes start to take effect at $37,200 in income. If they do itemize, the effect begins at $43,896. Finally, nonitemizing couples with two dependents would be affected beginning at $39,200, those who do itemize at $46,949.

So this is not a tax on the rich. It is not a fair or reasonable way to go about taxing the rich, even if it were more carefully targeted. There are many better ways to achieve tax equity than enacting permanent distortions in the tax rate tables just to try to deceive taxpayers into believing the result is more fair. Remember, this $700 cap is not a one-shot deal. It is not a temporary tax increase for 1984. It is a permanent tax increase—a permanent rise in marginal tax rates, which many of us thought we had agreed should be reduced further.

REAL EQUITY

Mr. President, the Senator from Kansas made this point yesterday, and it is worth making again. We have plenty of opportunities in this body to vote for real tax equity, and for having a real impact on the well-to-do who may not pay their fair share of tax. We had the opportunity last year, and if the budget resolution is carried out, we will likely have the opportunity again this year. The way to get equity is not to raise marginal rates. Marginal rates in the upper income brackets do not mean that the rich pay more in taxes. The wealthy taxpayer knows how to shelter his or her income, to use the many deductions, credits, exemptions, and exclusions that Congress has generously provided over the years to bring that income down into a lower bracket. That is why talking about taxable income and the marginal rates applied to that income does not tell you what you want to know about the tax burden.

It makes no sense to raise tax rates, even for the select group targeted by proponents of this bill—including 2.4 million small businesses and 350,000 family farms—when special tax breaks go unexamined and $100 billion is being lost in the compliance gap. Last year in TEFRA, pursuant to a reconciliation mandate, we raised nearly $100 billion through tax equity measures. Not a single Democrat in the Senate voted for that measure, and only 11 voted for the final conference report. The other side of the aisle must have thought it was unfair to cut off the modified coinsurance loophole that enabled large insurance companies to escape billions in taxes. They must have thought it unfair to restrict foreign tax credits used by multinational oil companies. They must have thought it was unfair to limit the amount of money the wealthy can put away tax-free in pension plans and lend back to themselves, or to limit the safe-harbor leasing provisions that helped big businesses trade tax benefits with each other. Or perhaps they knew it was fair, but they thought the people were not watching. They know everyone is watching the tax cut cap debate. It is easy to say you are for raising someone else's taxes. But the real test comes when we look at the special breaks that may escape the public's notice at times, but that are the real key to tax reform, tax equity, tax fairness, and a more economically productive tax system overall.

We may have to raise revenues this year, and we will need bipartisan support. This is the time to put aside all the rhetoric about the tax rate cuts, and focus on the real problems of the tax system and the deficit. We should plot a course toward continued lowering of tax rates, in conjunction with base-broadening and compliance measures that make better use of the system. We need to plot a course toward lower spending at the same time, and to make sure that the goals are linked together. That is what would be really fair. That is what would really benefit the American people and the American economy. Let us put this matter aside and get on with it.

Mr. President, let me commend the distinguished Senator from New Jersey, because if anybody on the Senate floor has credibility on this issue, it is the Senator from New Jersey. He was the one member of the Senate Finance Committee that voted against the 1980 Tax Act—ERTA, it was called. I say that he, to his credit, voted for the conference report on TEFRA, along with 10 other Democratic Members. I want to keep the record clear.

I think beyond that, there are a number of reasons to believe that this is a political effort. It seems to this Senator that the matter should be laid to rest, then we can go back and see where we can address some of the concerns expressed by the Senator from New Jersey, the Senator from Arkansas, the Senator from West Virginia, the minority leader, and others. If they are concerned about loopholes and concerned about inequities in the Tax Code that favor certain economic levels, these areas should be addressed. But I again repeat that this is not the place. I hope that we will so indicate at 10 o'clock.

Mr. President, what is the time remaining?

The PRESIDING OFFICER. The Senator from New Jersey has 2 minutes and 24 seconds; the Senator from Kansas has 8 minutes and 25 seconds.

Mr. DOLE. Are there any other requests?

I yield 2 minutes to the Senator from Montana.

Mr. MELCHER. I thank my friend from Kansas for yielding me 2 minutes.

The distinguished chairman of the Committee on Finance, I presume, will take the last 5 minutes. In that time, he will say because we did something 2 years-plus ago, which I voted for, to set in motion a series of tax cuts, even though we got a $200 billion deficit and even though we are going to have to raise some new taxes, we ought to let this one alone.

It would be nice to know what those new taxes are going to be, because we will be back on the floor of this Chamber within 60 to 90 days voting on new taxes.

The rub of that comes that there are some people with this present tax cut who will receive up to $4,400 in tax relief, and what we seek to do is to avoid piling more taxes on the middle- and low-income people. We seek to do that with this cap. But if we fail—and I can count the votes—and I judge we will fail, then that means proposed new taxes. I am afraid, as is so often the case, those new additional taxes, in whatever form, will be on the middle- and low-income people. That is why we have tried to make this adjustment now, to make that pain less burdensome on the taxpayer and to provide $6 billion in additional revenues by adjusting those people who are going to receive $1,000, $2,000, $3,000, $4,000, up to $4,400 in tax relief by the scheduled tax cut that is due July 1.

The PRESIDING OFFICER. The time of the Senator has expired. Who yields time?

Mr. BRADLEY. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from New Jersey has 2 minutes and 19 seconds.

Mr. BRADLEY. I yield 1 minute to the Senator from Georgia.

Mr. NUNN. I thank my friend from New Jersey.

Mr. President, I would like to ask the ranking minority member of the Senate Budget Committee several other questions so that I can better understand the result of the language contained in section 4 of this bill which mandates that the revenue savings from the tax cap be matched by dollar-for-dollar spending cuts in fiscal year 1984. Is it possible to achieve the dollar-for-dollar spending offsets promised in section 4?

Mr. CHILES. Yes, I believe we are likely to achieve those spending reductions to match this $6.2 billion of tax changes. Our 1984 reconciliation instruction require $4.1 billion reduction in outlays in 1984 for entitlement programs. Our limit for defense spending is below the current policy baseline by $0.8 billion in 1984. That leaves just $1.3 billion in domestic outlays which we have to achieve by spending restraint. I can assure my friend and colleague that with the threat of Presidential vetoes, the actual appropriations are likely to be at least that much below the budget resolution ceilings. While I would like to see some of these increases enacted, I think we have to look at the political realities we face. So in summary, it is fair to say that we are most likely to be able to achieve over $6 billion of spending reductions.

Mr. NUNN. Will it be possible to achieve the spending reductions in the out-years? Is this not a downpayment on a 3-year plan for deficit reduction?

Mr. CHILES. The Senator from Georgia is correct. We reconcile $89 billion in direct deficit reduction over the 3 years 1984 to 1986. In 1985, we reconcile $5.3 billion of entitlement outlay reductions, plus we have $12.4 billion in defense outlay savings. So that is $17.7 billion, plus any domestic appropriations. That pits our spending

cuts $10.5 billion above the $7.1 billion in revenues raised by the tax cap.

In 1986, the spending reductions are even greater. Reconciled entitlement savings are $6.9 billion, defense outlays are $15 billion below baseline, so we save $21.9 billion plus any savings in domestic appropriations. That spending reduction figure is $14.3 billion above the taxes raised in this bill; in fact, it is almost three times as large. So once again I can assure my colleague that if we hold to the plans in the budget resolution, and treat this tax cap as a downpayment on deficit reduction, we will more than achieve the dollar-for-dollar balance.

Mr. NUNN. What would happen to the deficits if we fail to take these actions on taxes and spending?

Mr. CHILES. As I mentioned earlier, we reconcile $89 billion in direct deficit reduction over the 3 years 1984 to 1986. We have further savings through domestic spending restraint and lower interest costs, that brings our total deficits $110 billion below the CBO baseline. We are $13 billion below in 1984, $28 billion in 1985 and $69 billion below in 1986. Both taxes and spending share in this deficit reduction. In fact, the overall spending contribution to reducing the structural deficit is almost twice as great as the revenue share. From 1983 to 1988, our budget resolution reduces spending as a percent of gross national product by 2.1 percent. The tax burden only goes up by 1.2 percent of GNP. So this is a fair package, and we must take action on both the tax and spending side to bring the deficits down.

Mr. NUNN. I thank the Senator.

The PRESIDING OFFICER. The 1 minute yielded the Senator has expired.

Mr. DOLE. Mr. President, I yield 2 minutes to the Senator from Minnesota.

The PRESIDING OFFICER. The Senator from Minnesota is recognized.

Mr. DURENBERGER. Mr. President, I want to share with my colleagues the reasons I oppose capping the third year of the tax cut.

We hear a lot of talk about capping the third year of the tax cut because we must insure fairness in the tax system. We are told that we will demonstrate our commitment to fairness by such a vote.

But that talk of fairness misses the mark on the real fairness issue that the American people are complaining about. The fairness message they are sending us is simple—close those loopholes and limit those tax expenditures that permit high-income individuals to reduce their taxable income dramatically.

If we cap the third year of the tax cut at $700 we will affect the highest income taxpayers. But half of those people we will affect are those with incomes below $50,000. A single person earning $32,500 who does not itemize deductions will lose $108. That is not a wealthy individual by any means. In fact, it is probably an individual who has been unable to buy a home because of inflation and high interest rates. That is a person who is likely to save the $108 for a down payment on a home.

In addition, half of the people we would affect with a cap are two-earner families. Again, we are not talking about just wealthy people. We are talking about those who earn, for example, $20,000 and $30,000 with two kids in college. These are the same people we provided tax relief in ERTA through the two-earner married couple deduction, and now we would be reversing ourselves and taking tax relief away. These are also the people we have just hit with a substantial increase in social security taxes that will take effect in 1984.

Capping the third year will also skew the marginal rates dramatically for middle-income taxpayers. At present the marginal rate on each extra dollar of income over $35,200 on a joint return is 33 percent, up from 28 percent for the dollars just under $35,200. Under the cap proposal the marginal rate would jump to 37 percent, a whopping 9 percent increase instead of 5 percent.

Capping the third year is not the right medicine for the economy, either. We need individual savings to provide the wherewithal for the added investment that will continue our road to economic recovery. Higher income taxpayers, those we would affect by capping the third year, save a much larger proportion of their after-tax dollars. Those with after-tax incomes over $50,000 save 64 percent of these post-tax dollars while those with after-tax income of $10,000 not surprisingly save only 12 percent. A survey by the National Federation of Independent Businesses found that 70 percent of new business enterprises obtain their seed money from personal savings.

Mr. President, what should we in Congress be doing to bring more deficits under control? The tax cap bill we are voting on today is not the answer. Instead, we must return fairness to the Tax Code by making a systematic review of all the tax expenditures. Astonishingly, tax expenditures—credits, deductions, and exemption—approximately equal the revenue that does come in from our taxes. Some of these expenditures are gross loopholes; some of them help us meet important public policy goals. But we must reexamine each of them to assess whether they contribute or detract from the fairness of our tax system.

While we review these tax expenditures we must be equally vigilant in reducing the complexity of the code. An estimated $60 billion per year is spent in complying with the code. Much of this burden falls on middle-income taxpayers who need assistance in preparing their returns because of the complexity and yet do not have the tax shelters that more than compensate for the money spent in complying.

Last, but certainly not least in importance, Congress must make the tough decisions on spending. Broadening the tax base will bring in additional revenue, but the revenue will not be sufficient if Federal spending, as a percent of GNP, keeps increasing. We have looked carefully at needs-based programs, but we have not looked carefully enough at the rest of the budget. That examination must be made if we are to reach our goal of fairness.

Mr. President, some say we should cap the third year of the tax cut for fairness. I say that avoids the real fairness issue. We must look to a broadened tax base, one that closes loopholes that benefit the wealthy. Until we do the fairness issue will remain.

Closing loopholes is not an easy task, as the TEFRA experience showed only too clearly. But I urge my colleagues to reject this bill and get down to the real business of fairness. It will be an excrutiating experience politically as we tackle a myriad of vested interests. But that will restore faith in our tax system, not what we are asked to do today.

Mr. DOLE. Mr. President, I intended to yield—we have 4 minutes remaining—as soon as the distinguished majority leader comes to the floor the remainder of the time on this side. I understand Senator BRADLEY has 1 minute. Then at 10 o'clock we will vote on whether or not we want to raise taxes. We will see how many want to raise taxes. That is what it is all about—whether we are going to have a tax increase or not.

You say people who pay more taxes should not have a tax cut; you ought to raise their taxes.

That is what it is all about. I would hope that the people understand what is about to happen. We are about to raise taxes for some people because they happen to make a little more money than other people.

We are going to have a lot of chances to tighten up the loopholes in tax reform later on this year. I hope that those who want to raise taxes—I am not going to explain next year in the campaign that the Democrats only wanted to raise taxes on the rich. As far as I am concerned, they want to raise everybody's taxes. I hope this is the message that comes through.

I am still awaiting the majority leader.

I yield the remainder of my time to the distinguished majority leader.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, let me say, first of all, that I am advised the Senator from Alaska is very anxious to try to obtain the Senate's consideration of the confirmation of Langhorne A. Motley, of Alaska, to be an Assistant Secretary of State.

I would propose that at 1 minute until 10 we temporarily lay aside this matter and go into executive session for the purpose of considering that nominee only.

May I inquire of the minority leader if he would be agreeable to that?

Mr. BYRD. Yes; I will be agreeable to that. It has been cleared on this side.

Mr. BAKER. I thank the minority leader.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER (Mr. MURKOWSKI). The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Senator from Kansas for yielding, and I will stop at 2 minutes of 10, if the Chair will remind me.

Mr. President, I will vote against the bill. I am not prepared to say there is no merit to the contention made by my colleagues on the other side of the aisle.

I am persuaded, Mr. President, and persuaded absolutely, that on June 29, 1983, 2 days before the third installment of the tax adjustment goes into effect, we would ill serve the interests of the people of the United States by tinkering with the only long-range tax plan we have had in this Government since I have been in the Senate, and that is now 17 years.

I recall so clearly when the President first made his proposal for a gradual 3-year adjustment of the tax structure of this Government. I was more enthusiastic about some aspects of it perhaps than I was others, but the one factor that stood out in my mind and convinced me absolutely that the President was on the right track and deserved the support of the majority of the Congress, and particularly of the Senate, was because of the certainty that that plan provided over a period of time, the certainty so that industry and commerce might plan ahead, so that they might invest, so that they might produce new jobs.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. BAKER. Mr. President, this would be a poor time, indeed, to change that plan which has served us so well and which will continue to do so in the future.

The PRESIDING OFFICER. The Senator from New Jersey has 1 minute remaining.

Mr. BRADLEY. Mr. President, I yield 30 seconds to the Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Arkansas is recognized.

Mr. BUMPERS. Mr. President, I want to respond to a statement the Senator from Kansas made earlier that I voted against the so-called tax reform package last year, and I did indeed. I did it because of its regressive features—airline excise taxes, telephone excise taxes, and so forth. I admire him and I applaud——

The PRESIDING OFFICER. The Senator's 30 seconds have expired.

Mr. BUMPERS. Withdraw the last statement that I admire him. [Laughter.]

Mr. BRADLEY addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey has 30 seconds.

Mr. BRADLEY. The issue that we are voting on is whether the top 10 percent of the population, the top 10 percent of the taxpayers only will limit their tax cut so that we can reduce the budget deficit $38 billion over the next 5 years. That is the issue before the Senate.

The PRESIDING OFFICER. The time of the Senator has expired.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I now ask unanimous consent that the Senate go into executive session for the purpose of considering the nomination of Langhorne A. Motley, of Alaska, for a period of not to exceed 1 minute, and then return to legislative session and resume consideration of the pending measure.

The PRESIDING OFFICER. Is there objection?

The Chair hears none, and it is so ordered.

The Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

DEPARTMENT OF STATE

The bill clerk read the nomination of Langhorne A. Motley, of Alaska, to be an Assistant Secretary of State.

Mr. STEVENS. Mr. President, today the Senate will act upon one of the most important confirmations that has faced this body in quite some time. Langhorne Anthony Motley, Ambassador to Brazil, has been selected by the President to be the Assistant Secretary of State for Inter-American Affairs at the Department of State. Senate approval of Ambassador Motley's nomination will further symbolize President Reagan's commitment to achieve a steady foreign policy in Central and Latin America.

I say with a great deal of pride that Ambassador Motley has been a close personal friend of mine over the years. He has proven over and over again that he is a successful, diligent, and talented worker. He is innovative yet sensitive in his approach to problem solving. Clearly, he has demonstrated his effective, pragmatic approach during his tenure as the U.S. Ambassador to Brazil. Ambassador Motley's approach created an atmosphere for the future establishment of a cordial relationship between the United States and Brazil. By being in touch with the people of Brazil, top government officials, and truly understanding the culture, Ambassador Motley performed an excellent service for our country.

In addition to the accomplishments Ambassador Motley has achieved during his tenure in Brazil, his personal, business, and public service background make him the prime candidate for the position of Assistant Secretary for Inter-American Affairs. First, Tony spent the first 16 years of his life growing up in Brazil. He is fluent in Portuguese and Spanish, and he understands the culture of Central and South America. Second, Tony has been a successful businessman. While in Alaska, he built a highly successful real estate firm. Third, Tony has served in public office as commissioner for commerce and economic development for the State of Alaska. Fourth, during the consideration of the Alaska lands bill, the driving force behind the Citizens for the Management of Alaska Lands was the director, Tony Motley.

Looking back over the record, it is abundantly clear that Ambassador Motley is an effective, well-qualified team player. The work he has executed in the past has won the respect of Members of the House and Senate as well as those in the administration.

The President of the United States could not have made a more appropriate selection for the position of Assistant Secretary of State for Inter-American Affairs. It is imperative that the United States continue a path of steady and confident foreign policy in Central America. Tony has proven time and again his ability to appropriately and accurately represent the administration's policies on issues of state.

I urge the Senate to swiftly confirm Ambassador Motley for this critical position.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to the nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

There being no objection, the Senate resumed the consideration of legislative business.

TAX RATE EQUITY ACT OF 1983

The Senate continued with the consideration of H.R. 1183.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time and was read the third time.

Mr. DOLE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

(During the call of the roll Mr. PRESSLER assumed the chair.)

The result was announced—yeas 45, nays 55, as follows:

[Rollcall Vote No. 174 Leg.]

YEAS—45

Baucus	Exon	Melcher
Bentsen	Ford	Metzenbaum
Biden	Glenn	Mitchell
Bingaman	Hart	Moynihan
Bradley	Heinz	Nunn
Bumpers	Hollings	Pell
Burdick	Huddleston	Proxmire
Byrd	Inouye	Pryor
Chiles	Jackson	Randolph
Cohen	Kennedy	Riegle
Cranston	Lautenberg	Sarbanes
DeConcini	Leahy	Sasser
Dixon	Levin	Specter
Dodd	Long	Stennis
Eagleton	Matsunaga	Tsongas

NAYS—55

Abdnor	Hatch	Percy
Andrews	Hatfield	Pressler
Armstrong	Hawkins	Quayle
Baker	Hecht	Roth
Boren	Heflin	Rudman
Boschwitz	Helms	Simpson
Chafee	Humphrey	Stafford
Cochran	Jepsen	Stevens
D'Amato	Johnston	Symms
Danforth	Kassebaum	Thurmond
Denton	Kasten	Tower
Dole	Laxalt	Trible
Domenici	Lugar	Wallop
Durenberger	Mathias	Warner
East	Mattingly	Weicker
Garn	McClure	Wilson
Goldwater	Murkowski	Zorinsky
Gorton	Nickles	
Grassley	Packwood	

So the bill (H.R. 1183) was not passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the bill was rejected.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I congratulate the distinguished chairman of the Finance Committee, the manager of the bill, for presenting this matter in the brief time in which he has, and allowing the Senate to express its will.

I also commend the minority leader for allowing us to schedule the consideration of this measure.

ORDER OF PROCEDURE—AGRICULTURE APPROPRIATIONS

Mr. BAKER. Speaking of scheduling, we have a couple of other matters that are available now which we ought to turn to. One is the agricultural appropriations bill which I want to take up and I want to finish today. The other is a conference report on HUD appropriations.

May I inquire of the minority leader if he is in position at this time to consider a unanimous-consent agreement limiting the time for debate and providing a time for final passage on the agricultural appropriations bill?

Mr. BYRD. Mr. President, I thank the majority leader for scheduling the tax cut cap bill. He gave that assurance to me several weeks ago, and I thank him for that.

As to the agricultural appropriations bill, I do not believe——

The PRESIDING OFFICER. The Senate will be in order. The majority leader and Democratic leader cannot be heard. Conversations will please cease. Conversations in the galleries will please cease.

Mr. BYRD. I thank the Chair. The Chair is doing exactly what the rule says; the rule says the Chair should secure order and maintain order in the Chamber and in the galleries without a point of order being made on the floor. It is the responsibility of the Chair and I thank the Chair.

As to the agricultural appropriations bill, I do not think there is any objection to taking it up——

Mr. HEFLIN. Yes, I would have an objection to bringing it up without a clearly defined time agreement.

Mr. BYRD. I did not know about that, I must say to my friend.

Mr. BAKER. I did not hear the Senator from Alabama. Will the Senator repeat what he had to say?

Mr. HEFLIN. I think we would have to know at this time the amendments that will be brought up. I am agreeable to a time agreement. If we can agree on a time agreement with stipulations of limitations on amendments then I would have no objection, and I do not believe anybody on this side would have any objections.

It is my understanding that in the absence of a time agreement the majority leader intends to bring it up anyway, and I will have to object at this time. If you have a time agreement I will have no objection.

Mr. BYRD. Mr. President, I would suggest that the majority leader try to work out a time agreement.

Mr. BAKER. Let me say to my friend from Alabama that he catches me by surprise on the matter of objecting to going to the bill. It had been my plan to get the bill laid down and made the pending business and then continue to negotiate on a time agreement we have been circulating for 2 days now. I think the chances are good that we can get this agreement, and the chances are good we can finish this bill in a fairly short period of time. But I hope the Senator will not put us to the trouble of deciding whether or not we have to vote on a motion to proceed.

Mr. HEFLIN. I suggest we try to get a time agreement. If we get a time agreement than there will be no objection.

Mr. ZORINSKY. Mr. President, will the Senator yield?

Mr. BAKER. If I have the floor. The minority leader has the floor.

Mr. BYRD. I reluctantly yield.

Mr. ZORINSKY. If we can preclude any amendments being offered to this appropriations bill that have anything to do with freezing or doing away with target prices I think that would alleviate a great deal of concern and I think both of my colleagues on the Agriculture Committee would be happy then to proceed on the basis of the way the majority leader outlined.

Mr. METZENBAUM. Mr. President, if the majority leader will yield for a point——

Mr. BYRD. Mr. President, I still have the floor.

Mr. METZENBAUM. I am sorry, I ask the minority leader to yield.

Mr. BYRD. I yield.

Mr. METZENBAUM. I have no objection from my standpoint of proceeding to the agricultural appropriations bill. But to ask for a unanimous-consent agreement on a number of amendments, the Senator from Ohio would like to know what the costs of those amendments will be prior to his agreeing to any unanimous-consent request.

Mr. BAKER. Mr. President, I have to confess I was speaking to an aide here and my attention was distracted.

Mr. METZENBAUM. I have no objection to proceeding to the agricultural appropriations bill, but until I know the exact cost of each of those amendments being proposed, I would not be agreeable to a unanimous-consent agreement in connection with those amendments.

Mr. BYRD. Mr. President, I yield the floor.

Mr. BAKER. I thank the Senator.

Mr. President, I am going to suggest the absence of a quorum and for 5 minutes or thereabouts I am going to try to negotiate away the concerns ex-

pressed by the three Senators who have risen to express them.

But, you know, there is nothing more important and essential to the leadership of the Senate than being able to schedule, particularly appropriation bills. What I am about to say is not said in rancor or bitterness, but is simply a matter of fact.

If we cannot negotiate away those concerns, I am going to move to the consideration of this measure. I intend to ask the Senate to stay and deal with this appropriations bill before we go out.

Once again, I do not mean to sound harsh, but I do mean to exert the leadership that I believe the Senate expects me to do in trying to see that we get through these appropriation bills.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have been trying for some time now to work on a two-page time agreement. I should know that any time a time agreement is on two pages it will not work. This one has not worked. But I still have hopes that we can negotiate a limitation on amendments that may be offered to the bill and a limitation on time in which those amendments and the bill can be debated. For the moment, I think the only thing I can clear is an agreement that we can lay the bill down and that no target pricing amendment would be in order.

Mr. President, I will state that request for the consideration of the minority leader and other Senators who are interested.

Mr. President, I ask unanimous consent that the Senate now turn to the consideration of H.R. 3223 and that no amendment dealing with target prices be in order.

Mr. BYRD. Mr. President, reserving the right to object.

Mr. President, I will have to have a few minutes.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

Mr. BAKER. Mr. President, there is a unanimous-consent request pending, is there not?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. Let me restate it just so everybody understands, since there has been some interval between the time it was made and the time the Chair will put it to the Senate.

The request was that the Senate now proceed to the consideration of H.R. 3223, which is the agriculture appropriations bill, and that no amendment dealing with target pricing be in order to that bill.

Mr. BYRD. Mr. President, reserving the right to object, and I will not object, we have rather carefully covered our side of the aisle and we find no objection to this particular request.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I think we are a little better off than I thought. I withdraw the request now pending.

The essence of the request I am about to put now is the original request except to delete the time limitations. I will put the request now, Mr. President.

AGRICULTURE APPROPRIATIONS, 1984

UNANIMOUS CONSENT AGREEMENT

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of H.R. 3223, the agriculture appropriations bill, and that it be considered under the following agreement; 2 hours of debate on the bill to be equally divided between the Senator from Mississippi (Mr. COCHRAN) and the Senator from Missouri (Mr. EAGLETON) or their designees, 30 minutes on the following amendments, and only the following amendments will be in order:

First, a Levin amendment dealing with elderly feeding, 1979 State claims, $875,000;

Second, a Zorinsky amendment providing equitable payments for storage under farmer-held reserve program wheat and feed grains;

Third, a Trible/Warner amendment adding $4.5 million to the VPI School (Agriculture Research Service buildings and construction);

Fourth, a Humphrey amendment to earmark ACP funds for forest fire and forest management access roads $216,000, and $265,000 for forestry tree stand improvement, including fuel wood utilization;

Fifth, a Helms amendment striking dates of FNS programs—food stamps, WIC, and child nutrition;

Sixth, a Mattingly amendment to require $5 million of CCC funds to be used for export promotions activities;

Seventh, a Melcher amendment to earmark animal research funds for cancer;

Eighth, a Baucus amendment to prohibit funds to be used for sod busting;

Ninth, a Moynihan amendment to insure specific amounts for direct loans in the act are consistent with those in the first budget resolution for fiscal year 1984;

Tenth, a Cochran technical amendment;

Eleventh, an Andrews amendment directing the Department of Agriculture in connection with all commodities, particularly cotton, under the PIK program to carry out their original commitment to the producers;

Twelfth, a Melcher amendment relating to funding of special problems in conservation;

Thirteenth, a Boschwitz amendment dealing with increasing Public Law 480 funding by $100 million.

Ten minutes on any debatable motion, appeal, or point of order, if submitted to the Senate; that the agreement be in the usual form with respect to the division of controlled time.

Provided, further, that the committee amendment on page 49, lines 8 through 12, be modified to read as follows:

": *Provided*, That section 184 of the Omnibus Budget Reconciliation Act of 1982 (96 Stat. 785), is amended by inserting before the period at the end of paragraph (b) the following: ', or for the first three months of the fiscal year ending September 30, 1984' "

Provided, further, that all committee amendments, including the modified committee amendment, be considered as having been agreed to and be considered as original text for the purpose of further amendment, and that no point of order be considered as having been waived by virtue of this agreement.

Mr. BYRD. Mr. President, reserving the right to object, does the majority leader intend by this request that no other amendments will be in order, including second-degree amendments?

Mr. BAKER. Yes.

Mr. President, that is my intention; and the agreement as I stated it, I believe, was that "only the following amendments will be in order."

I amend the request so that it will be "only the following amendments and no other amendments shall be in order."

Mr. METZENBAUM. Mr. President, I object.

Mr. BAKER. Does the Senator reserve the right or does he object?

Mr. METZENBAUM. For the purpose of discussion, I will reserve the right to object, indicating that I intend to object.

It is my understanding that the unanimous-consent request was to be made with no limit on debate.

Mr. BAKER. There is no limitation on debate.

I am sorry. The Senator is absolutely correct, Mr. President.

I delete from the request those provisions dealing with time. The remainder of the request as respects the limitation of amendments that are in order will continue.

Mr. METZENBAUM. Mr. President, I appreciate the modification made by the majority leader.

I should like to ask for a clarification, and I do not intend to object. I am not clear as to the purpose of the language having to do with the budget that is to be found in the latter part of the unanimous-consent request. I do not understand the significance of that.

Mr. COCHRAN. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. COCHRAN. This is a provision that modifies a committee amendment that was inserted in the bill during the markup in full committee. It related to the food stamp program in Puerto Rico. The committee funded this program for a complete year.

At the request of the chairman of the Committee on Agriculture, Mr. HELMS, Senator DOLE, who is chairman of the Nutrition Subcommittee of the Agriculture Committee, recommended that that be modified to limit the applicability to only 3 months of the fiscal year, until the legislative committee has a chance to review the food stamp program in Puerto Rico.

That is the purpose of that being included in the unanimous-consent request, and that is the import of the amendment.

Mr. METZENBAUM. The manager of the bill represents that this language is not a broad based carved out of the terms and provisions of the Budget Act that we just passed?

Mr. COCHRAN. Not at all. As a matter of fact, it is completely consistent with the budget resolution that has been passed.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the Senator from Ohio, and I especially thank the minority leader, the Senator from North Carolina, and the two managers.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 3223) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1984, and for other purposes.

COMMITTEE AMENDMENTS

The committee amendments considered to have been agreed to and considered as original text for the purpose of further amendment, are as follows:

On page 3, after line 14, insert the following:

"For necessary expenses for liaison with the Congress on legislative matters, $477,000".

On page 3, line 23, strike "$6,930,000", and insert "$7,092,000";

On page 4, strike line 10, through and including line 12;

On page 6, line 5, strike "$34,777,000", and insert "$44,313,000";

On page 6, line 17, strike "$470,470,000", and insert "$482,995,000";

On page 7, line 5, after "research:", insert the following: *Provided further,* That of the appropriations hereunder not less than $10,000,000 shall be available to carry into effect the provisions of section 1418 of Public Law 97-98:

On page 8, line 6, after "Ohio", insert the following: *Provided further,* That none of the funds appropriated in this Act shall be used to terminate or reduce Federal involvement in research programs conducted at Belle Glade, Lake Alfred, or Fort Pierce, Florida.

On page 8, line 19, strike "24,625,000", and insert "$23,277,000";

On page 9, line 3, strike "$5,000,000", and insert "$6,149,000";

On page 10, line 15, strike "$23,914,000", and insert "$24,884,000";

On page 10, line 17, strike "$10,000,000", and insert "$21,500,000";

On page 10, line 18, after "expenses", insert the following: "$5,760,000 for the support of animal health and disease programs authorized by section 1433 of Public Law 95-113, including administrative expenses;"

On page 10, line 25, after "1978", insert the following: "$1,000,000 for rangeland research grants as authorized by subtitle M of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended, including administrative expenses;"

On page 11, line 5, after "97-98", insert "to remain available until expended";

On page 11, line 12, strike "$233,575,000", and insert "$252,805,000";

On page 12, line 9, after the sum, insert "payments for carrying out the provisions of the Renewable Resources Extension Act of 1978, $4,000,000";

On page 12, line 14, after "Institute", insert "under section 1444 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (Public Law 95-113), as amended";

On page 12, line 17, strike "$326,829,000", and insert "$330,829,000";

On page 14, line 3, strike "$277,552,000", and insert "$251,453,000";

On page 17, line 12, strike "$43,841,000", and insert "$45,024,000";

On page 18, line 14, strike "$53,903,000", and insert "$55,598,000";

On page 19, line 20, strike "$1,522,000", and insert "$1,500,000";

On page 25, line 16, strike "$238,937,000", and insert "$228,987,000";

On page 25, line 22, strike "$120,000,000", and insert "$100,000,000";

On page 26, line 21, strike "and", through and including the sum on line 24, and insert "$2,127,000";

On page 27, line 11, strike "$3,397,000,000", and insert "$3,361,000,000";

On page 27, line 11, strike "then", and insert "than";

On page 54, line 24, strike "$24,855,000", and insert "$26,645,000";

On page 55, line 1, strike "and not", through and including line 2;

On page 61, after line 16, insert the following:

SEC. 624. Provisions of law prohibiting or restricting the employment of aliens shall not apply to employment for the purpose of providing specialized expertise in tropical soils management and conservation under the appropriations for the Soil Conservation Service.

SEC. 625. None of the funds appropriated by this or any other Act may be used to relocate the Hawaii State office of the Farmers Home Administration from Hilo, Hawaii, to Honolulu, Hawaii.

Mr. COCHRAN. Mr. President, this appropriations bill provides funding for most of the activities of the Department of Agriculture. Funding is provided for research, conservation, nutrition, rural development and lending, commodity price and income stabilization, and a wide array of other services and programs administered by the USDA. The bill also provides funds for the Food and Drug Administration (FDA) and the Commodity Futures Trading Commission (CFTC), and places a limitation on the administrative expenses of the Farm Credit Administration (FCA).

Agriculture is America's largest industry and employer. Well over 20 million Americans are at work in some phase of our Nation's great agricultural complex. Each individual American is affected daily by the efforts of our farmers who produce food and fiber, as well as by the activities of related industries which process, transport, and market products domestically and around the world. The vital importance of agriculture is abundantly clear. Yet, American farmers are faced with depressed market prices, ever-increasing production costs, and high interest rates—factors which make it very difficult, if not impossible, for many farmers to secure necessary credit and to make a reasonable profit for themselves and their families. Simultaneously, the country is faced with an overabundance of certain commodities—a situation which continues to threaten the health of the farm economy. The challenge to the Federal Government is to adequately address these problems, while promoting further economic recovery. The committee believes the recommendations contained in the bill will address the current problems in the agricultural sector, but at the same time promote the economic recovery that we are seeing on the farm and around the country.

Mr. President, our bill recommendation of $31.7 billion in new budget authority is below the 1983 level by some $6.2 billion. It is also below the administration's 1984 budget request by $67.4 million.

We have concurred with the House in providing partial year funding for child nutrition, WIC, and food stamps (child nutrition—August 15, 1984; WIC—July 10, 1984; food stamps—September 6, 1984).

Last year, we funded these programs for the entire year at a level in excess of the administration's request. This year, I must point out, the administration submitted with its budget request a request for legislation to reduce the costs of these programs. The legislative committees with jurisdiction over this subject matter have not yet acted on that requested legislation, but there is time in this legislative year for action, if the committee chooses to act.

For that reason, we are putting in the bill the requested level of funding, but we are pointing out that unless legislative changes are made by Congress, that funding will be inadequate to fully support those programs for the entire fiscal year.

This year's budget request from the President assumed savings in these programs that will not be realized unless some legislative changes are made by the authorizing—Agriculture—committee. If these changes are made, we feel that there is time enough to institute these changes and possibly eliminate the need for a supplemental appropriation for these programs.

As the bill points out, the child nutrition program would run out of money on August 15, 1984, the WIC program by July 10, 1984, and the food stamp program by September 6, 1984.

So what we are saying is that we are by this recommendation calling attention to the fact that while we are putting in the bill the amount of money requested by the administration it is not going to be sufficient to fully fund these programs in absence of legislative changes in those programs.

If changes are not made, we are strongly urging the administration to submit in a timely fashion to Congress a request for a supplemental appropriation so that these programs will be fully funded and persons will not be summarily cut off the programs and denied benefits because of an inadequacy of funding.

If the changes are not made by the legislative committee in these programs we anticipate that an additional $1.3 billion will be needed to fund these programs for the full fiscal year.

Mr. President, at this point I ask unanimous consent to have printed in the RECORD the highlights of the bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HIGHLIGHTS OF FISCAL YEAR 1984 AGRICULTURE APPROPRIATIONS BILL, JUNE 23, 1984

Title I—Agricultural Programs: $12,078,848,000.

A. Research and Extension: ARS, $482,995,000; CSRS $252,805,000; and Extension $336,340,000.

Includes $10,000,000 for post-graduate fellowships to address shortage of scientists, educators, technical representatives, etc., in both public and private sector.

Went along with House on funding of Hatch act; Smith-Lever; Cooperative forestry (McIntire-Stennis); and Payments to 1890 Colleges and Tuskegee Institute by providing slight increases.

B. Ag. Research Service (ARS) Buildings & Facilities: $23,227,000; ($23.2 million over budget); ($1.4 million less than House).

$12.050 million for Old West Vet. School.

$5.5 million for Children's Nutrition Research Center at Baylor.

$4.0 Forage Seed Center.

$.827 million Soil Tilth Center.

$.850 million Metabolism and Radiation Research Lab.

(Struck from House bill—$4.5 million for Va-Md. Vet. School and $+.800 for Plant Stress lab—Texas.)

C. Animal and Plant Health Inspection Service (APHIS): $253,839,000; ($26.7 million over budget); ($26.1 million less than House)

Restored several special interest items to 1983 & House levels.

Difference is the brucellosis cut: Senate: $60 million; House: $81.4 million; Budget: $50.6 million; 1983: $83.4 million.

D. Federal Crop Insurance Corporation (FCIC): $353,870,000; ($120. million less than budget); ($30 million less than the House).

E. Commodity Credit Corporation (CCC) $9,673,636,000. Went with House ($500 million less than Budget).

April update of budget, prepared by OMB reduces estimated outlays in fiscal year 1984 by $2.5 billion. Based on this revised estimate, the need for restoration of capital impairment in fiscal year 1984 appears to be overstated in budget request. But because of uncertainties over cost of PIK, we went along with reduction of $500 million.

Title II—Rural Development Assistance: $3,427,312,000.

Generally, we did not go along with requested reduction in Farmers Home and Rural Electrification, and restored most programs to 1983 levels.

A. Farmer programs.

1. Ownership loans: $713,000,000.

Insured ($33 million over Budget); ($27.1 million less than House).

Guaranteed (same as House and Budget).

2. Operating loans: $1,910,000,000.

Insured (same as Budget and House at $1.8 billion)

Guaranteed (raised from $50 million to $100 million)

Economic Emergency (House put in $600 million, if authorized). We deleted, but indicated we would reconsider if program is authorized.

3. Housing loans: Continue to support low-income housing loans, and moderate-income programs to lesser extent.

Provided $73 million authorization for rural rental assistance for 7,000 existing rental units under Rural Rental Insurance Loan Fund. Also, provided $62 million in new rental units to receive rental assistance.

4. Industrial Development loans: Provided total of $300 million, earmarking $75 million for alcohol fuels.

Water and sewer facility loans—provided $270 million. This is traditional level of funding. This program had substantial increases in fiscal year 1983 in Jobs bill and in pending supplemental.

Water and sewer grants—went with budget request of $90 million, $35 million less than House. $150 million was added in Jobs bill for 1983.

5. Grant programs: Increased all programs to at least House levels, with exception of mutual and self-help housing. This program we increased $7.5 million over House for a total of $12.5 million. There was no budget request.

B. Rural Electrification Administration (REA):

Insured electric and telephone loans—we went along with House and 1983 levels, but are over the budget by $525 million.

Guaranteed electric and telephone loans—we went along with budget request. We have been advised that minimum level for 1983 will not be met due to the significant slowdown in construction of electric generating plants and related transmission lines and to general economic factors in rural America.

Reimbursement for interest and other loses—This is a new account in house bill, and is to restore revolving fund to a sound financial basis. We went along with House.

C. Conservation: $817,622,000.

Generally, we rejected Administration's cuts of some $173.7 million. In the Soil Conservation (SCS), all technical assistance programs were increased to last year's levels. Also, earmarked $2 million for special areas conservation (technical assistance) authorized in the Farm Bill, but never before funded.

Agricultural Stabilization and Conservation Service (ASCS): We rejected budget request to combine Agricultural Conservation Program (ACP); Forestry Incentives Program (FIP); Water Bank and fund at $56 million level. We added back $163.5 million.

ACP, $190.0 million.

FIP, $12.5 million.

Water Bank, $10.0 million.

We also included $7 million for emergency conservation program. Usually, this program has sufficient carryover funds, but they have been depleted because of floods, etc.

Title III—Domestic Food Programs: $13,816,671,000.

Again, the House funded the following programs at the budget levels but for less than a full year. We concurred.

(a) Child Nutrition: $3.013 billion level to August 15, 1984.

(b) WIC: $1.060 billion to July 10, 1984.

(c) Food Stamps: $10.9 billion level to September 6, 1984.

The Administration has again premised its request on savings to be realized from legislative changes. We chose to give the Senate Committee on Agriculture, Nutrition, and Forestry a chance to make some changes.

Food Stamps for Puerto Rico: $825 million.

We have included bill language to allow Puerto Rico to continue the same type of "cashout" program it currently operates. Reconciliation would discontinue this effective October 1, 1984.

Special Milk: The appropriating of $11.9 million plus a carryover of funds, will provide the authorized level (per Reconciliation).

Food Donation: We rejected proposed transfer of elderly feeding program to Department of Health and Human Services and recommended $119 million which will fully fund current services. We also went with budget and House in providing $50 million for needy families.

Title IV—International Programs: $1,143,233,000.

Foreign Agricultural Service: The House cut $1.5 million on the assumption that strength of U.S. dollar overseas will increase FAS' purchasing power. Because of uncertainty in world economy, we went with the budget request of $85.2 million.

P.L. 480: Went along with budget and House and provided:

$402 million for title I and III (credit sales); $650 million for title II (commodities for distribution abroad); and $1,052 million, total.

Title V—Related Agencies:

Food and Drug Administration: $419,094,000.

(a) In case we don't prevail in Supplemental Conference on FDA $5 million emergency contingency fund, we have added in this bill, which is the increase over the House for salaries and expenses.

(b) We concurred with House in providing funding for facilities at National Center for Toxicological Research in Arkansas.

Commodity Futures Trading Commission (CFTC): $26,645,000.

Our $2 million increase over budget and House is for automated data processing (ADP) support and legislatively mandated studies. An amended budget request is pending at OMB.

Mr. COCHRAN. Mr. President, I thank my good friend, the distinguished Senator from Missouri, TOM EAGLETON, who is the ranking minority member of the subcommittee, for his very helpful assistance in the preparation of the bill by the subcommittee and the guidance of it through the markup and through full committee.

I also wish to compliment all of the members of the Appropriations Committee for assisting in the preparation of the bill and the valuable input into the process that each of them has made.

Mr. President, I yield the floor.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to 22 U.S.C. 276(h)-276(k), as amended, appoints the following Senators as members of the Senate Delegation to the Mexico-United States Interparliamentary Group during the First Session of the 98th Congress to be held in Puebla, Mexico, on July 7-10, 1983: the Senator from Georgia (Mr. MATTINGLY), the Senator from West Virginia (Mr. RANDOLPH), the Senator from New Mexico (Mr. BINGAMAN), and the Senator from Florida (Mrs. HAWKINS).

MESSAGE FROM THE HOUSE

Mr. BAKER. Mr. President, will the manager permit me to interrupt for a minute so we may receive a message from the House of Representatives?

Mr. COCHRAN. Yes.

Mr. BAKER. Mr. President, I yield for that purpose.

The PRESIDING OFFICER. The Senate will receive a message from the House of Representatives.

MESSAGES FROM THE HOUSE

At 11:22 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its clerks, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3133) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 6, 10, 13, 35, 40, 43, 47, and 58 to the bill, and agrees thereto; and it recedes from its disagreement to the amendments of the Senate numbered 1, 25, 26, 32, 33, 34, 53, and 59 to the bill, and agrees thereto, each with an amendment, in which it requests the concurrence of the Senate.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2637. An act to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia; and

H.R. 3190. An act to establish an improved program for extra long staple cotton.

ENROLLED JOINT RESOLUTION SIGNED

The message further announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 96. Joint resolution to designate August 1, 1983, as "Helsinki Human Rights Day."

Mr. BAKER. Mr. President, this is the first of the conference reports on one of the regular appropriations bills to reach the Senate. The House of

Representatives acted on this measure this morning.

I wish to present it to the Senate as soon as possible. I then suggest if the managers are agreeable that as soon as we can obtain clearance on both sides we temporarily lay aside this measure, I hope only for a matter of minutes, so that we can adopt that conference report and get on with the business at hand. Will that be agreeable with the manager?

Mr. COCHRAN. Mr. President, if the majority leader will yield, I have no objection to that and am happy to accommodate the leader in that way.

Mr. EAGLETON. No objection.

Mr. BAKER. I thank the Senator.

Mr. President, then we will proceed with the clearance process and Members will understand we may turn to the HUD appropriations conference report then in the next few moments. I do not know whether there will be a rollcall vote or not, but there might be.

I thank the Members for yielding.

AGRICULTURE APPROPRIATIONS, 1984

The Senate resumed consideration of H.R. 3223.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. EAGLETON. Mr. President, the agriculture, rural development and related agencies appropriations bill as reported by the full committee provides for total budget authority in fiscal year 1984 of about $31.7 billion. This represents a reduction of $6.2 billion from fiscal year 1983 and $67.4 million below the President's budget request.

The committee has taken several significant actions which I believe should be brought to my colleagues' attention. We have restored significant reductions the President had proposed in programs that are highly important to the farmers of our Nation.

The science and education activities of USDA were slated for almost a $48 million reduction. These programs have been the key to the productivity increases of our farmers and have made the U.S. agricultural system the envy of the world. We cannot afford to allow them to wither on the vine. They must receive the support necessary to keep them not only viable but vibrant. The action of the committee restores the President's proposed reductions and allows for a modest growth, particularly in the research programs.

Mr. President, I am gratified that the committee bill includes a modest increase in the cooperative research program in the Department of Agriculture from its present funding level of $17 million to the full budget request of $21.5 million. In my view, this program has amply demonstrated an ability to focus research on emerging issues, especially "new generation" applications and technology. Frankly, I wish it had been possible to provide an even greater increase in order for this program to achieve its full potential.

In fact, Senator DANFORTH and I, along with Senators BRADLEY, CHAFEE, KENNEDY, MOYNIHAN and PELL have introduced legislation which would increase the authorization for the competitive grants program by an additional $15 million. It is my hope that in future years we will be able to build substantially on this program to further the very necessary basic research work of the State agricultural experimentation stations, colleges and universities, and other research institutions.

I am particularly pleased that the committee bill provides $10 million for USDA's graduate fellowship program. As the committee report to accompany this bill points out, a 1980 U.S. Department of Agriculture study projects the overall, average, annual demand for college graduates in the food and agricultural sciences will exceed the available supply by almost 15 percent. An even greater shortage of individuals with advanced preparation for necessary research endeavors is expected throughout the decade. The $10 million funding level in this bill for the cooperative graduate fellowship program is expected to support approximately 650 to 700 masters and doctoral students and is, in my view, absolutely essential to insure a continuing supply of capable young researchers in the research laboratories of our universities, experiment stations, and other centers of agricultural science. The national commitment to recruit and train young scientists, in agricultural and, indeed, all aspects of science must be long term and stable, and I hope that this $10 million funding level is the first step in providing the kind of continuity necessary to prevent erosion of research and its underlying manpower.

All of the technological advances our research and extension programs provide farmers will be for naught, however, if we allow the productive capacity of our Nation's farmland to decline. Soil erosion continues to be a critical problem throughout America. The President's budget proposed slashing the conservation cost-share programs of the Agricultural Stabilization and Conservation Service and would have sharply reduced support for the Soil Conservation Service. I am pleased that the committee has seen fit to restore these vital programs. We have provided funds for the special areas conservation program authorized in the 1981 farm bill. This program, when finally in place, will allow highly erodible land, like that in the north central and northwestern part of my own State, to be targeted for special assistance and an intensive effort to bring the unacceptably high levels of erosion in these areas under control. Targeting under the current programs will not accomplish what this new program can.

Mr. President, as my colleagues well know, the needs of rural America extend much farther than the farm gate. The incidence of substandard housing continues to be more than three times as high in rural regions as in urban areas. Essential community facilities, such as health care facilities, are often less than adequate or are lacking altogether. Income levels in rural areas continue to average only 80 percent of urban income, and the lack of job opportunities continues to plague the rural economy.

The committee has taken very prudent action to maintain the rural housing programs of the Farmers Home Administration at about the current funding levels. In so doing, we have rejected the termination of these programs proposed by the President. We have likewise continued the guaranteed industrial development loan program which was established to preserve and create new job opportunities in rural areas. Unfortunately for those who would benefit from this program, the Reagan administration has continued to do everything in its power to see to it that industrial loan guarantees are few and far between. And we have restored the direct loan levels of the rural electrification and telephone programs so that they will be no less than the current levels.

A major portion of this bill is comprised of funding for the Federal nutrition programs, food stamps, the child nutrition programs, the elderly feeding program and the special supplemental feeding program for women, infants and children (WIC). The President had proposed legislative changes in the food stamp and child nutrition programs which have not yet been acted upon, and he had proposed a funding level for WIC for the full year which would have resulted in several hundred thousand participants being removed from the program. The bill now before the Senate does not provide full-year funding for these programs. It was the judgment of the committee that time still exists for the authorizing committee to take action on the proposed legislation. However, should no legislative changes be made, we will expect the administration to amend its budget request to reflect the total funding needs of these programs.

It is important to point out that the committee has added bill language that directs that the average participation level in the WIC program is to be no less than 2.8 million participants. It should be crystal clear to the States who administer this program that by adding this language we are making a commitment that funding to maintain

at least this level of participation throughout the whole of fiscal year 1984 will be forthcoming. It is also the intent of this language to prohibit any deferral action which would result in average participation dropping below the 2.8 million level. Certainly any action by the administration, including deferral of funds, which would result in average participation dropping below the 2.8 million level would not be in compliance with the provision.

Finally, Mr. President, I believe the bill before us does a good job of funding the needs of agriculture, rural development, and the nutrition programs upon which millions of Americans depend.

I commend the job that was done by the chairman of the subcommittee, Senator COCHRAN, and his very able staff working with him, and I urge my colleagues to support this legislation.

Mr. President, I yield the floor.

Mr. COCHRAN. Mr. President, I have not received any notice from any Members on this side who wish to engage in general debate of the bill. I do know there are one or two Senators who wish to place a colloquy in the RECORD to clarify some of the provisions of the bill. I hope those who do want to insert material in the RECORD will come to the floor and do that at this time so that we can then move on into the discussion of any amendments that will be taken up.

We have 13 amendments that were identified in the order under which the bill is being considered.

We can complete work on this bill in very short order, in timely fashion, I think, if those who want to present their amendments will come to the floor and call them up. There are a few here which I think the managers of the bill will be able to accept. Others, unfortunately, we are going to have to resist and will require record votes, in my judgment.

In order to accommodate the schedules of those Senators who would like to see the Senate get out fairly early today, if those who do have amendments would cooperate and come to the floor and present them at this time we could move forward and wrap up the bill.

AMENDMENT NO. 1439

Mr. ZORINSKY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Nebraska (Mr. ZORINSKY), for himself, Mr. ANDREWS, Mr. BOREN, Mr. BURDICK, Mr. EXON, and Mr. MELCHER proposes an amendment numbered 1439.

Mr. ZORINSKY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 62, after line 2, insert a new section as follows:

"SEC. 626. None of the funds provided by this Act may be used to conduct a producer reserve program for wheat and feed grains, or a payment-in-kind land diversion program, under which the Commodity Credit Corporation, in making payments to producers for storage of a commodity by the producer, provides payment for such storage in an area at rates that are less than the rates at which the Corporation provides payment for the storage of the commodity in commercial storage facilities in the area.".

Mr. COCHRAN. Mr. President, will the Senator yield for a moment?

Mr. ZORINSKY. Yes.

Mr. COCHRAN. Mr. President, I am advised the Senator from Ohio (Mr. METZENBAUM) wanted to be on the floor to hear the discussion of this amendment. He is over at the Energy Committee right now. I have just advised staff of his request and asked that he be notified, because I did advise him that he would be notified, he would have an opportunity to be here. I hope the Senator will understand if we put in a quorum call until he can get here and be here for the full discussion of the bill that that is the reason for it.

Mr. ZORINSKY. Will I not then lose my place in the order of the amendments, Mr. President?

Mr. COCHRAN. We would not want the Senator to do that. I do see the Senators from Virginia here who have an amendment. Perhaps the thing to do would be to set aside the Senator's amendment and then get to this one which will be accepted, I think. It will not require much time, and by that time the Senator from Ohio will be here.

Mr. ZORINSKY. With the understanding that I introduced my amendment because the Senator called for amendments to be introduced——

Mr. COCHRAN. That is right. I thought the Senator from Ohio could get here in very short order. I am told he will be here very soon.

Mr. WARNER. Mr. President, if the manager will yield, I just left the committee. Mr. METZENBAUM is there, and he is available. We will take no more than a few minutes.

Mr. COCHRAN. If that is all right, then, I ask unanimous consent that the amendment offered by the Senator from Nebraska (Mr. ZORINSKY) be temporarily set aside.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. WARNER. Mr. President, will the Senator yield? My distinguished colleague and I have an amendment to offer. I now yield to my colleague to present it.

AMENDMENT NO. 1440

(Purpose: To provide funds for construction of Phase III of the Virginia-Maryland Regional college of Veterinary Medicine)

Mr. TRIBLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Virginia (Mr. TRIBLE), for himself, Mr. WARNER, Mr. MATHIAS, and Mr. SARBANES proposes an amendment numbered 1440.

Mr. TRIBLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 8, line 19, strike out "$23,227,000" and insert in lieu thereof "$27,727,000, of which $4,500,000 shall be available only for the construction of Phase III of the Virginia-Maryland Regional College of Veterinary Medicine".

Mr. TRIBLE. Mr. President, on behalf of myself and Senators WARNER, MATHIAS, and SARBANES, I offer an amendment to provide $4.5 million for the construction of the teaching hospital facility at the Virginia-Maryland Regional College of Veterinary Medicine at Blacksburg, Va. The House of Representatives has approved an identical appropriation for this purpose.

In past years, Agriculture Committees and Appropriations Committees from both Houses have indicated their commitment to quality veterinary care across the Nation, particularly through the development of regional schools of veterinary medicine. This year, for example, both committees provided over $12 million for the regional veterinary medicine school in Nebraska, the Old West School, in recognition of the important role that agricultural vet schools play in providing our Nation with an adequate source of large animal and agricultural veterinarians. This amendment fulfills this commitment by allowing completion of a facility that serves both Virginia and Maryland.

As originally conceived, the college was to be built and funded by a mix of Federal, State, and local dollars. In 1978, Congress provided $1.25 million for staffing and equipping a clinical facility—phase I; construction of the whole was made possible through a matching appropriation of $1.25 million by the Virginia General Assembly and the raising of $700,000 in private contributions.

Phase II, a teaching research and administrative building, will be completed this month employing $8 million from the Commonwealth of Virginia.

Phase III involves the construction of a teaching hospital and this facility is essential to maintaining the accredi-

tation of this fine veterinary school. To date VPI has raised $3.5 million from private sources. This $4.5 million appropriation by the Federal Government for the establishment of the veterinary hospital—and further funding by the Commonwealth of Virginia—will permit the phase III teaching hospital to become a reality.

There are only 10 veterinary schools in the country. It would be a serious blow to agriculture in the Middle-Atlantic States if VPI was unable to complete this important veterinary program, especially in light of the extensive commitment the Federal Government, Virginia and Maryland, and private individuals have already made.

I hope, Mr. Chairman, that you will accept this amendment, and I urge my colleagues to support it.

Thank you.

I have discussed this amendment with the Senators managing this bill, and I believe it will be accepted by them.

I yield to my distinguished colleague from Virginia, Senator WARNER.

Mr. WARNER. Mr. President, it is a privilege to join with my distinguished colleague and other Members of this body who represent States contiguous to Virginia, who will be beneficiaries of this new Virginia-Maryland Regional College of Veterinary Medicine to be principally located at Virginia Polytechnic Institute in Blacksburg, Va.

Mr. President, I have been engaged in agriculture for some 25 years now and have watched in my State and other States the growing need for persons skilled in the profession of veterinary medicine. There is indeed a shortage. In our area of Maryland-Virginia and the bordering States of West Virginia, Kentucky, and Tennessee, there has been an absence of needed educational facilities.

A program has now been put together to establish an institution which will serve this geographic region of America. We are proceeding with it at the present time, and at this point we would like to request of the managers of the bill their acquiescence in this amendment which will enable the Federal Governement to participate with the State of Virginia and, indeed, private funding to bring this concept to fruition.

Mr. President, the Congress has, in the past, expressed an interest in the availability of quality veterinary medical care, and particularly in the development of regional schools of veterinary medicine. In 1978, the Congress provided $1.25 million for the establishment of the Virginia-Maryland Regional College of Veterinary Medicine at Virginia Polytechnic Institute and State University. This grant was matched by a $1.25 million appropriation from the Virginia General Assembly and the raising of $700,000 in private contributions. These funds were used for staffing and equipping an interim clinical facility (phase 1).

Using an additional $8 million in funds from the Commonwealth of Virginia, completed an instruction, research, and administration building (phase II).

The university is now ready to begin phase III of the project—the construction of the teaching hospital that will be necessary for accreditation. VPI has made a commitment to raising an additional $8 million in non-State funds to match the $8 million in State funds used for phase II. The university has raised $3.5 million so far in private funds for this project. The House included $4.5 million to complete the non-State match to the full $8 million.

Mr. President, our amendment will only bring the Senate the amount appropriated for into conformity with this purpose on the House version.

Mr. President, at this time I yield to the distinguished manager of the bill.

Mr. TRIBLE. Before the Senator makes his statement, I would at this point encourage the managers of the bill to accept this amendment and I urge my colleagues to support it, as well.

Mr. COCHRAN. Mr. President, we understand that the Veterinary Medical College will serve as a regional college for the area of Virginia and Maryland. There has been a substantial contribution to this project from private sources. Some $3.5 million has been raised in private funds for the construction of this teaching hospital. We understand that that amount is insufficient to permit contracting for construction, and time is running out on the provisional accreditation under which the college is operating.

This is a project which has been reviewed by Congress in the past and there was some funding made available for earlier phases of the development of this school of veterinary medicine.

This is the final phase, we understand, phase III, a teaching hospital, and without this amendment we are told the teaching hospital simply could not be built and the accreditation of the School of Veterinary Medicine would be in jeopardy.

Because, of that, Mr. President, we are recommending that the amendment be agreed to, and I congratulate the Senators for bringing this matter to the attention of the Senate and the committee.

Mr. EAGLETON. Mr. President, the distinguished junior Senator from Virginia (Mr. TRIBLE) brought this amendment to my attention a little while ago, and lest this amendment become a precedent for Federal funding of a whole array of veterinary institutions across the country, every one of them worthy in their own right but not necessarily the obligation of the Federal Government, could I ask the distinguished junior Senator from Virginia if he would read into the RECORD what has been the participation, the financial participation, during these three phases of the construction of this hospital. By participation I mean what the Federal Government has put in in each phase, if any; what the State of Virginia has put in out of public funds, if any; and what private sources have contributed to it.

The purpose of my inquiry is if the figures are as expected they would be, it would tell State *Y*, State *X*, and State *Z* that they have got to put up a very substantial amount of State money and raise a very significant amount of private money if they are ever going to expect any consideration from Uncle Sam. Can the Senator answer the question?

Mr. TRIBLE. Mr. President, will the Senator yield?

Mr. EAGLETON. Yes.

Mr. TRIBLE. I thank my colleague and friend for that question and I am happy to respond.

As originally conceived, the college was to be built and funded by a mix of Federal, State, and local dollars. This college is to be built in three phases. Phase I and II are now in being, and these dollars would go toward the completion of phase III.

The total funding for all three phases would be $27.2 million. Of that sum, the Commonwealth of Virginia would provide $17.25 million, private sources another $4.2 million, and the Federal Government is being asked to provide in total $5.75 million.

So, as my colleagues can see, of the total funding in excess of $27 million, the overwhelming share of those dollars comes from the State of Virginia and from private sources.

Mr. EAGLETON. I thank my colleague. That is precisely the information I desire. It does show, as he has just pointed out, that the overwhelming source of these funds is both State and private, with the Federal share being, in comparison, rather modest.

Based on that information, I have no objection.

Mr. WARNER. Mr. President, I wish to join with my colleague in thanking the distinguished managers of this bill and other members of the committee for providing their support for this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Virginia (Mr. TRIBLE).

The amendment (No. 1440) was agreed to.

Mr. TRIBLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. COCHRAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, as I indicated earlier, we have the first of the conference reports on the regular appropriation bills here in the Senate, having been acted on this morning by the House of Representatives.

Could I inquire of the minority leader if he is prepared at this time for me to ask the Senate to proceed to the consideration of that conference report?

Mr. BYRD. Yes.

Mr. BAKER. Mr. President, I ask the Senator further if he anticipates the need for a yea-and-nay vote.

Mr. BYRD. I do.

Mr. BAKER. Mr. President, could we have a very short time limitation? I am told there is no need for any debate, actually.

Mr. BYRD. That is my understanding.

HUD-INDEPENDENT AGENCIES APPROPRIATIONS, 1984—CONFERENCE REPORT

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now temporarily lay aside the pending measure and proceed to the consideration of the conference report on H.R. 3133, the HUD appropriation bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The report will be stated by title.

The bill clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3133) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1984, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings on the RECORD of June 23, 1983.)

Mr. BAKER. Mr. President, I ask unanimous consent that there be a time limitation of 1 minute for debate to be equally divided.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Will the Senator yield?

Mr. BAKER. Yes.

Mr. BYRD. Mr. President, on behalf of another Senator, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GARN. Mr. President, I am pleased to report that the conference agreement on the first of the regular appropriations bills—the HUD-independent agencies bill—was completed on June 23, and that the resulting bill is acceptable to the administration. On the day of the conference, the conferees received a letter from Mr. Stockman stating that he would recommend the bill be signed if the conferees satisfactorily addressed four issues:

The number of incremental housing units, including any reserve that might be established, must not exceed 100,000 units.

The sale prohibition on section 202 mortgages must be eliminated.

The funding levels for EPA should be no higher than those contained in the Senate bill.

The VA job training program and mortgage assistance program, which are both new unauthorized programs, must be eliminated.

Each of these issues were, indeed, resolved to the administration's satisfaction in conference.

One further point worth noting is that both Chairman BOLAND and I believed we should take the position in conference of stripping out those provisions in the bill which represent funding for new programs that are not yet authorized. In the past, both the House and the Senate committees have rightfully made the point that we should not appropriate money until we know what the composition of the program is. As chairman of the HUD authorizing committee, I am particularly sensitive to this issue and believe that the conferees on H.R. 3133 did the proper thing.

Mr. President, I would just like to complement the distinguished chairman of the House subcommittee, Mr. BOLAND, for his outstanding work on this bill. His great understanding of the issues and his willingness to discuss each of the amendments on the basis of its merit invariably results in a conference report that reflects the best elements of both bills.

I would be remiss if I did not mention the dedication and diligence of the distinguished ranking member (Mr. HUDDLESTON) in bringing this matter to such a speedy and successful conclusion.

Mr. President, I would like to briefly outline some of the more important agreements contained in the conference report.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

HOUSING PROGRAMS

ANNUAL CONTRIBUTIONS FOR ASSISTED HOUSING

The conference agreed to a limitation for annual contract authority of $636,336,000 and $9,912,928,000 of budget authority with the following provisions: 2,500 units for Indian housing; 5,000 units of new public housing construction; 35,000 units of regular section 8; 5,000 units of moderate rehabilitation; and 14,000 units of new/substantial rehabilitation for elderly and handicapped housing.

The conferees agreed that the section 8 contracts associated with the elderly and handicapped housing program should have the first priority on deobligations and that in the event that deobligations are insufficient to fund these section 202 units, additional resources will be made available as necessary.

The conferees established a reserve fund of $1,500,000,000 in budget authority and $100,000,000 in annual contract authority. These funds will not be available until January 1, 1984. The conferees have set aside these funds pending the enactment of a housing authorization bill in this session. The conferees intend that these funds be used to provide up to an additional 38,500 incremental units, and that no more than a total of 100,000 incremental units be provided during fiscal year 1984.

HOUSING PAYMENT CERTIFICATES

The conferees agreed to delete funding for the housing payment certificates program because it is a new program that is not presently authorized.

PAYMENTS FOR OPERATION OF LOW-INCOME HOUSING PROJECTS

The conferees agreed to the appropriation of $1,362,200,000 for payments for operation of low-income housing projects. This is the same as the Senate recommendation. The conferees intend that the Department provide public housing authorities with 100 percent of the performance funding system requirements in fiscal year 1984.

HOUSING COUNSELING ASSISTANCE

The conferees recommended the appropriation of $3,500,000 for housing counseling assistance.

The conferees noted that a recent HUD review of housing counseling casts some doubt on the effectiveness of the program. Two of the concerns raised by the HUD review were the qualifications of housing counselors and the lack of data on the effectiveness of the various approaches used by different counseling agencies. Therefore, the conferees directed that: First, the department undertake a study to determine the most effective counseling procedures and training requirements for counselors; second, such a study should be funded through the Secretary's discretionary fund; and third, a report should be submitted to the Committees on Appropriations no later than April 2, 1984.

FEDERAL HOUSING ADMINISTRATION FUND

The conferees agreed to a limitation of $50,900,000,000 for FHA gross mortgage and loan insurance commitments. This is the same as the Senate recom-

mendation. The conferees further adopted the Senate position to authorize the Department to pay debt collection contractor fees from the amounts collected by such contractors.

HOUSING FOR THE ELDERLY OR HANDICAPPED

The conferees noted serious reservations concerning the Department's policy relative to the sale of section 202 housing for the elderly or handicapped project mortgages. The conferees directed the Department to prepare a report on the proposed sales agreements. The conferees indicated that this report shall be submitted no later than October 1, 1983, and urged the Department not to proceed with this sale of mortgages without approval of the Committees on Appropriations.

GUARANTEES OF MORTGAGE-BACKED SECURITIES

The conferees established a limitation of $68,250,000,000 on commitments for guarantees of mortgage-backed securities as proposed by the Senate.

COMMUNITY PLANNING AND DEVELOPMENT

The conferees recommended the appropriation of $3,468,000,000 for community development grants.

The conference agreement provides funding for an estimated 2,500 Indian housing units under the assisted housing account, instead of under the Secretary's discretionary fund. The conferees agree to the following specific allocations within the $68,200,000: +$9,000,000 for Indian water and sewer projects; +$2,000,000 for a neighborhood development demonstration; and +$1,000,000 for technical assistance to small communities under the urban development action grant program.

The conferees agreed to the recommendation of the Senate which provides that any unit of local government which was classified as a metropolitan city in fiscal year 1983 will be so classified in fiscal year 1984 for the community development grant program.

RENTAL REHABILITATION GRANTS

The conferees agreed to delete funding for rental rehabilitation grants to carry out the rehabilitation of residential rental properties. It was deleted because this is a new program that is not presently authorized.

POLICY DEVELOPMENT AND RESEARCH

RESEARCH AND TECHNOLOGY

The conferees recommended the appropriation of $19,000,000 for research and technology.

The conferees further agreed to the allocation of $4,000,000 under research and technology for a study of the modernization needs of the existing public housing stock. This is the same as the Senate recommendation.

The committee of conference is in agreement that the remaining $15,000,000 under research and technology may be allocated at the discretion of the Secretary.

MANAGEMENT AND ADMINISTRATION

The conferees recommended $572,064,000 for salaries and expenses. This is the amount recommended by the Senate.

The conferees have agreed to the addition of $950,000 to the salaries and expenses account for the Housing Assistance Council as proposed by the Senate. The conferees agree that the contract should be administered through the Office of the Assistant Secretary for Housing.

TITLE II—INDEPENDENT AGENCIES

CONSUMER PRODUCT SAFETY COMMISSION

The conferees recommended the appropriation of $35,000,000 for salaries and expenses as proposed by the Senate. The conferees strongly support the targeting and evaluation of information and education activities. The conferees stated that CPSC should limit such activities to a maximum of three campaigns without the approval of the Committees on Appropriations, and total resources devoted to information and education activities should not exceed the historical share of seven percent of the CPSC budget.

ENVIRONMENTAL PROTECTION AGENCY

SALARIES AND EXPENSES

The conferees recommended the appropriation of $574,900,000 for salaries and expenses as proposed by the Senate. The conferees adopted the position that the new Administrator should be provided with a budget that will enable him to carry out the program that he desires.

The conferees indicated that the Administrator should place emphasis on enforcement activities in allocating funds for salaries and expenses and abatement, control and compliance above the amounts specifically allocated in the January 1983 budget request and by the conference committee. The conferees directed the Administrator to submit a plan to Congress within 60 days for allocating increased resources for enforcement purposes.

A detailed description of the specific changes to the January budget request is contained in the statement of the managers.

RESEARCH AND DEVELOPMENT

The conferees recommended the appropriation of $142,700,000 as proposed by the Senate. A detailed description of the specific changes to the January budget request is contained in the statement of the managers.

ABATEMENT, CONTROL, AND COMPLIANCE

The conferees recommended the appropriation of $393,900,000 as proposed by the Senate.

The conferees agreed to delete the specific bill language which earmarked $5,000,000 for the clean lakes program and $5,000,000 for the Chesapeake Bay program. Instead, the statement of the managers directs EPA to fund the clean lakes program at $5,000,000 and the Chesapeake Bay program at $4,000,000. The $4,000,000 for the bay program is to be used for State matching grants to implement the strategies identified in the Chesapeake Bay study. The conferees requested that the Administrator submit a long-term plan for the implementation of the strategies contained in the Chesapeake Bay study. This plan should identify the total expected Federal funds and the funding schedule needed to implement the strategies.

HAZARDOUS SUBSTANCE RESPONSE TRUST FUND

The conferees recommended the appropriation of $410,000,000 as proposed by the Senate. The conferees further recommended the limitation of Superfund administrative expenses to $64,000,000. The conferees agreed to provide, through transfer from the Superfund, $5,000,000 to the Department of Health and Human Services on October 1, 1983.

CONSTRUCTION GRANTS

The conferees recommended the appropriation of $2,430,000,000 as proposed by the Senate.

The conferees directed EPA to submit funding recommendations for combined sewer overflow projects to the Committees on Appropriations for approval. In evaluating these recommendations, the committees will consider only those project segments which can be fully funded and which will provide significant near-term water quality and public health improvements.

FEDERAL EMERGENCY MANAGEMENT AGENCY

The conferees recommended $121,110,000 for salaries and expenses; $169,176,000 for State and local assistance; and $146,308,000 for emergency planning and assistance. Within the above amounts, the conferees recommended: $168,960,000 for civil defense; provided $1,000,000 above the budget for fire prevention and control activities; and $5,000,000 above the House for training and education.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The conferees adopted the Senate proposal to split NASA's R&D account into "Research and Development" and "Space Flight, Control and Data Communications". The conferees further agreed to limit the lease or acquisition of new computers for the numerical aerodynamic simulator to no more than one mainframe computer during fiscal year 1984. The conference agreement also calls for NASA to seek the committees approval before it commits the additional $50 million provided for orbiter and engine spares.

NATIONAL SCIENCE FOUNDATION

The conference agreement provides a total of $1,320,300,000 for NSF. This is $228,100,000 or 21 percent above the fiscal year 1983 level. Within this

amount, the conferees provided $75 million for science education activities—the level proposed by the Senate. The conference report earmarks $34,000,000 of the science education funds for materials development activities. The conferees also received assurance that the Foundation would fund an additional 500 grants in fiscal year 1984. With this assurance, the conferees deleted Senate bill language that would mandate such a policy. The conferees also deleted the specific earmarking of 3 percent of funds appropriated under research and related activities for faculty at non-Ph.D. granting institutions.

The conference agreement also provides for a new account, as proposed by the Senate, for the U.S. Antarctic program.

DEPARTMENT OF THE TREASURY

The conference agreement contains $4,566,700,000 for general revenue sharing. The House deferred consideration of this item during its action on the bill.

VETERANS' ADMINISTRATION

The conferees agreed to delete $150,000,000 added by the Senate for the veterans emergency job training program. Consistent with actions taken elsewhere, the conferees deleted this item because it is a new program that is not presently authorized. The conferees have taken this action without prejudice and will wait until enactment of authorizing legislation before funding is considered. The conferees also noted that the funds in the readjustment benefits appropriations are for entitlement programs. If funded, the veterans emergency job training program would be provided for in a separate account.

In medical care, the conference agreement restored the $5,539,000 reduction taken by the Senate in medical equipment (Object Class 31). The conferees agreed, however, with the language contained in the Senate report directing the VA to restore the former balance between additional equipment and replacement equipment. In this respect, the conferees direct the VA to apply no less then $120,000,000 of the amount provided for the purchase of replacement equipment.

The conferees were also in agreement with the concerns expressed in the Senate report about the need to establish an operating plan for the medical care account. The conferees directed the VA to submit an operating plan that will serve as the basis for future reprograming requests no later than November 1, 1983.

In the major construction account, the conference agreement deleted the $5,300,000 requested for the 60-bed nursing home care at Providence, R.I. In taking this action, the conferees deferred the funding for this project until a later time. The conferees noted that this facility is the lowest priority of the seven nursing home care projects contained in the budget request. The conferees also noted that the VA's revalidation team did not identify an immediate need for the Providence facility and recommended deferring the project.

The conferees included the requested $14,700,000 for the 120 bed-nursing home care project at San Francisco. However, the conferees directed the VA not to proceed with the multistory parking garage part of the project until a report on the subject is prepared and submitted to the Committees on Appropriations. The report should outline alternative parking arrangements, including the use of land currently under the jurisdiction of the Department of the Interior. The VA was directed not to proceed to implement any of the parking alternatives without the prior approval of the Committees on Appropriations.

The conference agreement also contained two Senate provisions addressing problems in the administration of the construction program and modified a House provision on the advanced planning funds so that the VA's planning flexibility would not be reduced.

Mr. HUDDLESTON. Mr. President, as the ranking member on the HUD-Independent Agencies Appropriations Subcommittee, I am pleased to support the conference report on H.R. 3133, the Department of Housing and Urban Development-independent agencies appropriation bill, 1984.

As the chairman of the subcommittee (Mr. GARN) noted, the conference version of the bill carries $55.789 billion in budget authority. This is $6.2 billion over the estimates for fiscal 1984 but only $1.57 billion more than the fiscal 1983 bill. Furthermore, the bill is within the 1984 budget resolution and, I understand, acceptable to the administration.

Under the assisted housing program, we have recommended 61,500 incremental units—14,000 units in section 202 housing for the elderly and handicapped, 2,500 units for Indian housing, 35,000 units of section 8 existing housing, 5,000 units of moderate rehabilitation, and 5,000 new public housing units. Some $1.5 billion is set aside in a reserve fund to accommodate future authorizations, or other program needs, with the understanding that not more than 38,500 additional units will result from the release of these funds. Also included is $1.55 billion for public housing modernization.

The bill includes $1.362 billion for operating subsidies for public housing projects in addition to the estimated carry-over of $149 million. HUD is directed to use the current performance funding system formula to distribute the funds, and to fund the formula at 100 percent of requirements.

For FHA gross mortgage and loan insurance commitments, the recommendation is $50.9 billion, and for the Government National Mortgage Association (GNMA) mortgage-backed securities (MBS) program, the recommendation is $68.250 billion. Both limitations, though higher than requested, are important to a sustained housing recovery.

The community development block grant (CDBG) program will be funded at $3.468 billion under the conference agreement. Entities which were considered entitlement areas in fiscal 1983 but were scheduled to lose entitlement status in fiscal 1984 because of population loss or central city dedesignation will be protected in fiscal 1984 by bill language. Under the Secretary's Discretionary Fund, $2 million is earmarked for a neighborhood development demonstration program and $1 million for increased technical assistance to small communities in connection with the urban development action grant (UDAG) program. While UDAG has worked extremely well in metropolitan areas, a much smaller proportion of small cities have applied for funds. The technical assistance funding is designed to help these smaller communities prepare applications and utilize the program more fully.

The conference committee agreed to earmark funding for the Housing Assistance Council (HAC) which has done so much for rural areas such as eastern Kentucky. For fiscal 1984, the amount is $950,000, and it is to come from the salaries and expenses account.

For the Consumer Product Safety Commission, the agreement includes $35 million, the same as the Senate amount.

The conferees agreed to $3.998 billion for the Environmental Protection Agency, the same as the Senate amount. This represents a $168 million increase over the original budget request for the Agency's operating programs. Within that amount is an additional $5 million in R&D funding to accelerate the development of limestone injection multistage burner technology; an additional $1 million for lake quality maintenance and improvement; $1 million for support of industry research in drinking water; and $1.5 million for the national crop loss assessment study.

The Hazardous Substance Response Trust Fund or Superfund will receive $410 million under the conference agreement—$200 million more than in fiscal 1983. This should allow EPA to move ahead on hazardous waste cleanup.

For the wastewater construction grant program, the agreement contains $2.430 billion of which $30 million would be used for combined sewer

overflow project segments which can be fully funded and which will provide significant near-term quality and public health improvements.

The agreement for the Federal Emergency Management Agency is $436 million. This includes $4.3 million for fire prevention and control activities.

For the National Aeronautics and Space Administration, the conferees agreed to $5.8 billion. This includes $50 million for orbiter and engine spares for the space shuttle; $5 million for technology utilization; and $1 million for the solid state observations program in order to accelerate the development of the multispectral linear array for remote sensing activity.

For the National Science Foundation, the conferees recommended $1.320 billion. This includes $1.24 billion for research and $75 million for science and engineering education.

Revenue-sharing is funded at $4.566 billion, the current level, as proposed by the Senate. The House had deferred consideration pending extension of the authorization.

For veterans compensation and pensions, the recommendation is $13.8 billion. Readjustment benefits are funded at $1.3 billion. The $150 million added by the Senate for the new veterans' job training program has been deferred without prejudice because this is a new program and final action on the authorization is yet to come. The medical care account stands at $8 billion, and the medical and prosthetic research account at $162.3 million which includes $6 million more than the request for geriatic research.

Mr. President, we had a good conference and we have a good conference report. We have, however, deferred without prejudice a number of items for which there is no final authorization, and we have adjusted the figures for the Environmental Protection Agency without a full justification of the request or a full explanation of policy goals. Both of these situations will have to be addressed at a later time. In the interim, I urge adoption of the conference report.

FUNDING FOR JOB TRAINING LEGISLATION FOR VETERANS

Mr. SIMPSON. Mr. President, I would like to make a brief inquiry with regard to the language of the joint explanatory statement on amendment No. 50 to H.R. 3133, which deleted Senate language earmarking $150 million for a veterans' emergency job training program. Legislation establishing such a program passed the Senate by voice vote on June 15, 1983, and a companion measure had earlier passed the House, on June 7, 1983, by a vote of 407 to 10.

The basis for the conferee's action taken in amendment No. 50 is set forth in the joint explanatory statement, as follows:

The conferees agreed to delete funding for the veterans' emergency job-training program because it is a new program that is not presently authorized. The conferees have taken this action without prejudice and will wait until enactment of authorizing legislation before funding is considered.

I certainly understand the conferees' concerns about appropriating funds for a program that has not yet been authorized, in light of the many uncertainties inherent in the various stages of the legislative process with regard to any authorizing legislation.

I would note that I share the view of the conferees, as stated in the joint explanatory statement, that funding for the veterans' emergency job training program should be provided in an account other than the readjustment benefits account (subfunction 702 of function 700, veterans' benefits and services) which contains appropriations exclusively for entitlement programs. The Veterans' Affairs Committee rejected the entitlement approach, and the companion House measure similarly takes an authorization-of-appropriations approach, so that I would be inclined to agree with the conferees that an appropriation for this program to the readjustment benefits account might not be an accurate reflection of congressional intent with regard to funding, and might inject unnecessary confusion into the funding issue. However, I strongly support the enactment of this emergency jobs measure for veterans and therefore wish to insure that it will be funded.

I would ask the distinguished chairman of the HUD and Independent Agencies Appropriations Subcommittee what specifically his intentions would be with regard to funding for this veterans' job-training program, assuming that the differences between the House and Senate versions of the authorizing legislation are resolved and the measure is enacted before the August recess.

Mr. GARN. I would indicate to the distinguished chairman of the Veterans' Affairs Committee that it is my expectation that an appropriate level of fiscal year 1984 funding for the veterans' emergency job training program of which he speaks will be included in the first available appropriations measure after final enactment of the authorizing legislation. At present, the most likely appropriations vehicle for this funding appears to be the fiscal year 1984 continuing resolution, which may be expected to be ready for Senate floor action sometime in mid-September.

Mr. SIMPSON. I do appreciate the Senator's commitment to seeking prompt funding for this important program. As the Senator is aware, the Senate program would take effect on October 1, 1983, so moving expeditiously to fund and implement it is of great importance. I would ask the distinguished chairman of the full Appropriations Committee, the Senator from Oregon, whether he anticipates any obstacle to obtaining funding along the lines indicated by the Senator from Utah.

Mr. HATFIELD. Let me assure the good Senator from Wyoming that I am aware of no such obstacle. I would just add to that a note of appreciation to him for his sensitivity to the concerns of the Appropriations Committee in formulating this legislation. It is always a pleasure to work with him.

Mr. SIMPSON. I thank the Senators for those assurances. I do strongly believe that the approach taken in this legislation is a responsible and highly cost-effective one. Although the differences between the House and Senate bills are not yet resolved, it is clear that the final legislative product will be framed as an emergency measure with only short-term costs, but with a lasting benefit—namely, the prospect of permanent and productive employment—to those of our Nation's veterans who have been hardest hit by the present economic recession and accompanying unemployment crisis. The Senators' support for this important and timely measure is indeed greatly appreciated.

VETERANS' ADMINISTRATION

Mr. CRANSTON. Mr. President, as ranking minority member of the Veterans' Affairs Committee, I would like to discuss with the distinguished chairman of the Appropriations Subcommittee on HUD-Independent Agencies two items relating to the Veterans' Administration in connection with the conference report on H.R. 3133.

The first item is the issue of fiscal year 1984 funding for a veterans' emergency job training program. Both Houses have passed legislation—H.R. 2355/S. 1033—to establish this program and both the House and the Senate versions contain provisions that would authorize appropriations of $150 million for it in fiscal year 1984. In an effort to help insure that this badly needed program is put into operation as quickly as possible, I, joined by the chairman of the Veterans' Affairs Committee (Mr. SIMPSON), wrote you and the ranking minority member of the Appropriations Subcommittee (Mr. HUDDLESTON) on June 8, 1983, to urge that during your committee's consideration of H.R. 3133, $150 million be added—with the availability of the funds made contingent upon the enactment of the authorizing legislation.

During the committee's June 14 markup, the distinguished Senator from Arizona (Mr. DECONCINI), a member of both the Veterans' Affairs and Appropriations Committees, proposed adding the $150 million with such a contingency proviso. His amendment was agreed to by the com-

mittee and included in the Senate-passed bill.

During the conference on the bill, however, it is my understanding that Office of Management and Budget Director Stockman objected to the inclusion of this funding along with three other items before the conferees, indicating that each of those items needed to be dropped if the bill was to be acceptable to the administration. It is also my understanding that the veterans' emergency job training add-on was one of six appropriations for new programs without authorization that were before the conferees and that, in order to protect the bill, the conferees decided to drop all of the items I have just described.

In view of these circumstances, I would like to ask the Senator from Utah (Mr. GARN) if he agrees that the decision to delete the $150 million item was not a specific rejection by the conferees of funding for this program. Rather, as I understand it, the decision made was part of the package decision I have just described and funding for a veterans' job program was not addressed on its merits.

Mr. GARN. That is correct. I do not believe the conferees decided that this program, when authorized, should not be funded.

Mr. CRANSTON. Mr. President, it would certainly be my intention to seek funding for this program at the next opportunity after it is authorized, which now appears to be in the continuing resolution for fiscal year 1984. If appropriations were made for the program in the continuing resolution, funds would be available for it to begin operations this October 1.

I have discussed the matter with the Senator from Arizona (Mr. DECONCINI), and he has assured me of his intention to propose an amendment, if necessary, to add $150 million for this program when the committee considers the continuing resolution.

I would also note that the Veterans' Affairs Committees of the House and the Senate are right now working to resolve the differences in the House and Senate versions of the veterans' emergency job training legislation. I expect final action next month.

Moreover, there have been indications that the President will not veto that bill.

In view of the great likelihood that the authorizing legislation will be enacted and funding provided for the program by October, would the Senator agree that the VA and Department of Labor should now begin taking all steps necessary—including such matters as developing the interagency arrangements necessary to insure that VA and Labor Department activities to carry out the program will mesh smoothly, preparing regulations and directives and other programmatic guidance for field personnel, planning for the training of program personnel, and developing computer and other support activities—to gear up for putting the program into operation in October?

Mr. GARN. I do agree. It seems very likely that this program will be authorized and funded by October 1. Thus, the executive branch, in anticipation of the enactment of the authorizing law and the appropriations, should begin now to take steps to prepare for the implementation of the program in October.

Mr. CRANSTON. I thank the Senator very much.

Mr. President, the second item pertains to VA construction funding for a nursing home and parking structure at the San Francisco VA Medical Center. The Appropriations Subcommittee chairman will recall the colloquy—printed on pages 16494 to 16497 of the RECORD for June 21—that he, the very able ranking minority member of the Appropriations Committee (Mr. STENNIS), and I had on this subject shortly before initial Senate passage of this appropriations measure.

I am very grateful to the Senator and the other conferees for their action providing funding for the parking facility component of this project, as well as for the nursing home, in general accordance with our colloquy.

I note that, as contemplated in our June 21 colloquy, the Joint Explanatory Statement of the Committee of Conference requires a VA "report on the subject" of the parking facility. In this regard, I would like to ask the Senator whether in his view that report should cover all four of the points we discussed in our previous colloquy?

Mr. GARN. Yes, it should, Mr. President.

I would add that I hope that the VA and the Department of the Interior will promptly explore the possibilities for an alternative parking arrangement so that the VA will be able to submit its report to the Appropriations Committees within 2 months after the date of the enactment of the pending measure.

Mr. CRANSTON. Again, Mr. President, I thank the Senator for his cooperation with me on these and so many other matters. I also want to express my deep appreciation to subcommittee professional staff member Wallace Berger for his close cooperation with the Veterans' Affairs Committee staff assisting me.

Mr. HEINZ. Mr. President, I would like to thank my colleague, Senator GARN, chairman of the Banking, Housing, and Urban Affairs Committee as well as the Appropriations Subcommittee on HUD-Independent Agencies, for setting aside $2 million in H.R. 3133 for a program of neighborhood development demonstration grants. This is a program of great promise which will help to encourage self-helf activities and public-private partnerships in the Nation's distressed communities.

Mr. GARN. I thank the Senator. I share with my distinguished colleague his appreciation of the need for greater self-reliance and private sector investment in community development activities. It is my expectation that this demonstration program will help to show how these objectives can be realized. I commend Senator HEINZ for his initiative in developing the program.

Mr. HEINZ. To emphasize one point, I would like Senator GARN to clarify my understanding that HUD enjoys authority to move ahead with the program in fiscal 1984 on the basis of its existing technical assistance mission under the Secretary's discretionary fund. The appropriation of $2 million is not contingent upon passage of authorizing legislation. Is that correct?

Mr. GARN. That is correct. HUD enjoys existing authority to undertake this program within the Secretary's discretionary fund and the committee has indicated that it wishes HUD to move ahead. After passage of the authorizing legislation, additional funds can be appropriated for the program in the future. For now, however, HUD has been given a mandate to proceed with this activity through the discretionary fund.

Senator HEINZ. I thank the Senator for the clarification.

Mr. DECONCINI. Mr. President, I intend to oppose adoption of the conference report on H.R. 3133, the HUD-independent agencies appropriation bill for fiscal year 1984, because it fails to include $150 million to fund an emergency veterans' jobs training program. The desires of a majority of the Members of Congress on this issue were patently obvious. Yet their wishes were ignored by the conferees on the pending measure.

Let me review for my colleagues the strong, bipartisan support which exists for an emergency veterans' jobs training bill. First, the first concurrent budget resolution for fiscal year 1984, House Concurrent Resolution 91, as originally passed by the Senate, made provision for $150 million for a jobs' training bill specifically targeted on veterans. And the conference report, as adopted by both Houses of Congress, holds $150 million in reserve pending enactment of authorizing legislation. Second, the Senate Veterans' Affairs' Committee, on which I sit, unanimously ordered reported the Veterans' Emergency Job Training Act, S. 1033, on May 11 and the full Senate passed this measure by voice vote as H.R. 2355 on June 15. Third, the House signaled its overwhelming support by passing the Emergency Vietnam Veterans' Jobs Training Act

of 1983 on June 7 by a vote of 407 to 10. Could the intent of Congress for an emergency employment measure for veterans be more clear?

Now let me proceed to review the action taken by the Senate Appropriations Committee. Prior to subcommittee markup of the HUD-independent agencies appropriations bill for fiscal year 1984, the distinguished chairman and ranking minority member of the Senate Veterans' Affairs Committee, Senators SIMPSON and CRANSTON, cosigned a letter to Senators GARN and HUDDLESTON requesting that $150 million be included in H.R. 3133 for the purpose of funding an emergency veterans jobs training bill. I also wrote to the chairman and ranking minority member of the subcommittee underscoring my support for funding for this program and indicated that I planned to offer an amendment during full committee consideration of H.R. 3133 if funds were not made available by the subcommittee. Since funds were not included by the subcommittee, I offered an amendment to add $150 million for an emergency veterans' jobs training program during the full Appropriations Committee markup of H.R. 3133 on June 14. My amendment was adopted by a vote of 15 to 7. It is important to note that the margin of victory was not insignificant. It was more than 2 to 1.

In light of the overwhelming congressional support for an emergency jobs bill for veterans, why did the Senate conferees recede to the House and not include funding for this program? The answer is short. His name is David Stockman.

Prior to the conference on H.R. 3133, Mr. Stockman wrote to Senator GARN indicating that four provisions included in either the House- or Senate-passed versions were unacceptable to the administration, including the Senate provision providing funding for employment training for veterans. And the conferees caved in to administration pressure without even debating the merits of the jobs training provision. Is the Appropriations Committee the pawn of the executive branch or does it not have an obligation to represent and protect the views of its members? If the conferees had attempted to protect the interest of its members, they would, at the very least, have debated and voted on funding for the jobs training provision.

Despite Mr. Stockman's arguments to the contrary, unemployment among veterans remains a serious problem. In this Senator's view, it is a national disgrace. The most recent Department of Labor statistics show that in every age category, veteran unemployment is higher than in the same age category for nonveterans. And the jobs of additional thousands of older veterans have been lost to new technologies. More alarming still is the fact that unemployment among our service-connected disabled veterans has been estimated to be as high as 50 percent. In light of these facts, there is little doubt that a jobs training bill for veterans is fully justified. That is clearly the view of the majority of Members of Congress and funding for such a program should have been included in the pending measure.

I am bitterly disappointed by the action of the conferees and intend to offer an amendment to the first available appropriations measure to provide funding for this vitally needed program.

Mr. DOMENICI. Mr. President, I rise in support of the conference agreement accompanying H.R. 3133, the HUD-independent agencies appropriation bill for fiscal year 1984.

I commend my distinguished colleagues, Senators GARN and HATFIELD, and the members of the Appropriations Committee for their expeditious action on the first fiscal year 1984 appropriation bill.

Mr. President, I ask unanimous consent that two tables showing the relationship of the conference agreement accompanying H.R. 3133, the HUD-independent agencies appropriation bill for fiscal year 1984, together with possible later requirements, to the congressional spending and credit budgets and the President's budget request be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. DOMENICI. I would like to advise my colleagues of a revision to past Budget Committee crosswalk practices under the recently adopted first budget resolution.

Several new programs targeted to recession relief were included in the first budget resolution as reserve items because they were not yet enacted into law.

Under the first budget resolution, funding for these programs is reserved from allocation to committees until authorizing legislation is enacted.

One of the reserve programs, the emergency veterans' job training program, is under the jurisdiction of the HUD Appropriations Subcommittee.

This program is not scored as a possible later requirement for funding by the HUD Subcommittee in the spending table I am submitting for the RECORD because the funding is not reflected in the current crosswalk allocation.

If the emergency veterans' job training bill is enacted, the amount reserved for this program will be allocated to the Appropriations Committee. At the same time, the budget resolution spending ceilings will be adjusted.

EXHIBIT 1

HUD-INDEPENDENT AGENCIES SUBCOMMITTEE, SPENDING TOTALS

[In billions of dollars]

	Fiscal year 1984	
	Budget authority	Outlays
Oulays from prior-year budget authority and other actions completed		[1] 23.0
H.R. 3133, conference agreement	55.8	34.9

Conference agreement	2.2	65.8	68.2

Mr. BAKER. Mr. President, does the minority leader have any need for the remaining time? Is he prepared to yield it back?

Mr. BYRD. I am prepared to vote now.

Mr. BAKER. Mr. President, I yield back any time remaining on this side.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the conference report. The yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. BAKER. I announce that the Senator from Illinois (Mr. PERCY), the Senator from Alaska (Mr. STEVENS), and the Senator from Idaho (Mr. SYMMS) are necessarily absent.

On this vote, the Senator from Alaska (Mr. STEVENS) is paired with the Senator from Idaho (Mr. SYMMS). If present and voting, the Senator

from Alaska would vote "yea" and the Senator from Idaho would vote "nay."

Mr. CRANSTON. I announce that the Senator from South Carolina (Mr. HOLLINGS) is necessarily absent.

The PRESIDING OFFICER (Mr. KASTEN). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 79, nays 17, as follows:

[Rollcall Vote No. 175 Leg.]

YEAS—79

Abdnor	Goldwater	Mitchell

So the conference report was agreed to.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, there are amendments in disagreement, are there not?

The PRESIDING OFFICER. There are amendments in disagreement.

Mr. BAKER. I ask unanimous consent that the amendments in disagreement be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendments in disagreement.

The assistant legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 1 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken and inserted by said amendment, and insert:

The amount of contracts for annual contributions, not otherwise provided for, as authorized by section 5 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and heretofore approved in appropriation Acts, is increased by $636,336,000: *Provided,* That the budget authority obligated under such contracts shall be increased above amounts heretofore provided in appropriation Acts by $9,912,928,000: *Provided further,* That of the budget authority provided herein, $389,550,000 shall be for assistance in financing the development or acquisition cost of public housing for Indian families, $1,550,000,000 shall be for the modernization of existing public housing projects pursuant to section 14 of the United States Housing Act of 1937, as amended (42 U.S.C. 1437l), of which $35,000,000 shall be for the modernization of 1,000 vacant uninhabitable public housing units, pursuant to section 14 of the United States Housing Act of 1937, as amended, other than section 14(f) of such Act, and, $1,500,000,000 shall be deferred and shall not become available until January 1, 1984: *Provided further,* That the first $1,926,400,000 of budget authority recaptured and becoming available for obligation in fiscal year 1984 shall only be made available for assistance to projects developed for the elderly or handicapped under section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q): *Provided further,* That any balances of authorities made available prior to the enactment of this Act which are or become available for obligation in fiscal year 1984, shall be added to and merged with the authority approved herein, and such merged amounts shall be made subject only to terms and conditions of law applicable to authorizations becoming available in fiscal year 1984: *Provided further,* That none of the merged amounts available for obligation in 1984 shall be subject to the provisions of section 5(c) (2) and (3) and the fourth sentence of section 5(c)(1) of the United States Housing Act of 1937, as amended (42 U.S.C. 1437c), and section 213(d) of the Housing and Community Development Act of 1974, as amended (42 U.S.C. 1439).

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 26 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: ": *Provided further,* That for performance of specific activities in accordance with section 104(i) of Public Law 96-510, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, $5,000,000 shall be made available to the Department of Health and Human Services on October 1, 1983, to be derived by transfer from the Hazardous Substance Response Trust Fund".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 26 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: "$2,400,000,000, to remain available until expended, and for projects under section 201(n)(2), subject to the approval of the Committees on Appropriations, $30,000,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 32 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: ", to be deposited into the Consumer Information Center Fund: *Provided,* That the revenues and collections deposited into the fund shall be available for necessary expenses, other than administrative expenses, of Consumer Information Center activities in the aggregate amount of $6,500,000. Administrative expenses of the Consumer Information Center in fiscal year 1984 shall not exceed $1,449,000. Revenues and collections accruing to this fund during fiscal year 1984 in excess of $7,949,000 shall remain in the fund and shall not be available for expenditure except as authorized in appropriation Acts".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 33 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken and inserted by said amendment, and insert:

For necessary expenses, not otherwise provided for, including research, development, operations, services, minor construction, maintenance, repair, rehabilitation and modification of real and personal property; purchase, hire, maintenance, and operation of other than administrative aircraft, necessary for the conduct and support of aeronautical and space research and development activities of the National Aeronautics and Space Administration; including not to exceed (1) $427,400,000 for space transportation capability development; (2) $14,000,000 for a space station; (3) $165,600,000 for space telescope development; (4) $17,000,000 for Numerical Aerodynamic Simulation; without the approval of the Committees on Appropriations; $2,011,900,000, to remain available until September 30, 1985.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 34 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

Space Flight, Control and Data Communications

For necessary expenses, not otherwise provided for; in support of space flight, spacecraft control and communications activities of the National Aeronautics and Space Administration, including operations, production, services, minor construction, maintenance, repair, rehabilitation, and modification of real and personal property; tracking and data relay satellite services as authorized by law; purchase, hire, maintenance and operation of other than administrative aircraft; and including not to exceed (1) $1,500,000,000 for space shuttle production and capability development; (2) $1,570,600,000 for space transportation operations; (3) $50,000,000 for expendable launch vehicles; and (4) not more nor less than $44,000,00 shall be obligated for space communications operations and maintenance and support associated with the tracking and data relay satellite system, excluding amounts to be obligated for award fees earned on the contract; without the approval of the Committees on Appropriations; $3,791,600,000, to remain available until September 30, 1985: *Provided,* That up to 5 per centum of the amount appropriated for "Research and Development" or "Space Flight, Control and Data Communications" may be transferred between such accounts with the approval of Committees on Appropriations.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 53 to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken and inserted by said amendment, and insert: "*Provid-*

ed, That, except for advance planning of projects funded through the advance planning fund, none of these funds shall be used for any project which has not been considered and approved by the Congress in the budgetary process: *Provided further*, That $15,000,000 of the advance planning funds provided in this Act for medical projects shall only be available for the advance planning of those projects proposed in fiscal year 1983 and prior years: *Provided further*, That funds provided in the appropriation 'Construction, Major Projects' for fiscal year 1984, for each approved project shall be obligated (1) by the awarding of a working drawings contract by September 30, 1984 and (2) by the awarding of a construction contract by September 30, 1985: *Provided further*, That the Administrator shall promptly report in writing to the Comptroller General and to the Committees on Appropriations any approved major construction project in which obligations are not incurred within the time limitations established above; and the Comptroller General shall review the report in accordance with the procedures established by section 1015 of the Impoundment Control Act of 1974 (Title X of Public Law 93-344): *Provided further*, That no funds from any other account may be obligated for constructing, altering, extending, or improving a project which was approved in the budget process and funded in this account until one year after final acceptance of the project by the Veterans Administration."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 59 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: "to site-related travel performed in connection with the Comprehensive Environmental Response, Compensation, and Liability Act of 1980."

Mr. BAKER. Mr. President, I move that the Senate concur in the House amendments.

The motion was agreed to.

AGRICULTURE APPROPRIATIONS, 1984

The Senate resumed consideration of H.R. 3223.

AMENDMENT NO. 1439

Mr. BAKER. Mr. President, will the agriculture appropriations bill automatically recur now as the pending business?

The PRESIDING OFFICER. The Senator is correct.

The Senate will come to order.

The Zorinsky amendment on the agriculture appropriations bill is pending.

The Senator from Nebraska is recognized.

Mr. ZORINSKY. Mr. President, I introduced a bill on March 17, 1983, to amend the Commodity Credit Corporation Act to require the Commodity Credit Corporation to pay the same rates to farmers eligible for storage payments as those paid to the operators of commercial storage facilities on grain owned by the Commodity Credit Corporation.

Joining me in cosponsoring this bill, S. 841 were Senators ANDREWS, BOREN, BURDICK, EXON, and MELCHER.

This amendment to the agriculture appropriations bill, H.R. 3223, has the same objectives as S. 841, which amended the Commodity Credit Corporation Charter Act.

The amendment would simply prohibit any funds appropriated in this bill to be available for payment of grain storage in an area determined by the Secretary of Agriculture at rates that are less than the rates at which the CCC provides payment for the storage of grain in commercial storage facilities in the area.

There is an obvious inequality in the present system where the Secretary sets the farmer rate nationally and negotiates commercial rates which vary widely throughout the country.

The present inequity has been called to my attention by a highly respected member of the Nebraska Legislature, Mr. Loran Schmit, former chairman of the Agriculture Committee, who has written to me as follows:

DEAR SENATOR ZORINSKY: I am once again writing to you to ask your help to correct what I believe is a serious injustice to Nebraska farmers. At the present time any Nebraska farmer who stores grain in his facilities on his farm receives a storage payment of 26.5 cents per bushel. The same grain stored in a commercial facility in David City receives a storage payment of 29.1 cents per bushel and beginning July 1st will be paid at the rate of 32.4 cents.

The difference in the on farm storage rate versus the commercial storage rate represents a loss of millions of dollars to an already financially strapped agricultural economy. I do not believe the elevators should be paid any less for storage services but that farmers should be paid an equal amount. I believe that at a time when the federal government is writing three year guarantee storage construction contracts that farmers would be willing to build additional grain storage even without government loans or a three year guarantee as in the commercial program.

I would appreciate it very much if you would use your considerable influence with the Department of Agriculture to raise the storage rate for on farm storage to the equivalent of commercial storage.

With every best wish,

Sincerely,

LORAN SCHMIT,
State Senator.

Mr. President, in a letter received from an assistant to the Administrator of the Agricultural Stabilization and Conservation Service in regard to this matter, I was informed that the grain storage rates are negotiated between CCC and commercial storage facilities but the farmer has to accept a fixed rate. Further, commercial storage rates have been increasing in the last few years especially in newly constructed facilities. Therefore, the commercial rate of 32.4 cents per bushel is a very conservative estimate of the storage rates on a Nebraska State average basis.

In the letter to Secretary Block last year, I asked the specific question as to the justification for a difference of 5.9 cents per bushel on stored grain between the farm and commercial facilities and whether there was some problem with agricultural statutes that should be corrected. I indicated that if there is need for correction, I would like to have his recommendation.

The Secretary's response confirmed the fact that a discrepancy does exist and that in some instances the rate paid per bushel may be as high as 50 cents depending on the type of grain stored and the elevator location. His response also indicated that farmer-owned grain stored in a commercial facility is only entitled to the 26.5 cent per bushel rate even though the rate paid on CCC-owned grain is higher. This is one of the most disturbing aspects of the present grain storage situation. When CCC is paying storage to a commercial grain elevator operator, a higher rate is paid as compared to the rate at which the farmer is reimbursed for his grain stored in the same elevator. This means that during the time farmers are required to pay storage on grain under loan to CCC, the farmer has to make up the difference.

I believe that Senator Schmit and other Nebraska farmers I have heard from have good cause to ask for equal rates for farm-stored grain and commercially stored grain.

The farmer is accountable for keeping stored grain under loan to CCC in condition as is the commercial facility accountable for keeping grain in condition. I can ascertain no good reason for the differential. Therefore, Mr. President, not having received a satisfactory response from Secretary of Agriculture John Block, I am offering this amendment to straighten out the inequity.

I ask that my colleagues support this amendment which attempts to correct an injustice which has only further eroded the farmer's position in our economy today.

There will be those who say that there is an additional cost to this type of an amendment. To those people, Mr. President, I say that the verbiage in this amendment merely indicates that the Secretary of Agriculture shall pay no less to the farmer than what he pays as the commercial rate to storage facilities in that area. It does not set a high price; it does not set a low price; it does not set a medium price. It leaves it to the discretion of the Secretary of Agriculture, which means there are two options. The first alternative is to reduce the commercial storage rate to meet and equalize the farmer's storage rate, which in essence means there is no additional cost.

The second alternative, obviously, is to raise the farmer's storage rate to

the commercial storage rate, which means an additional outlay of dollars.

Certainly a possibility does exist for an additional outlay, and a possibility exists for no additional moneys.

Even a third possibility exists—the fact that we have a payment-in-kind program, which is intended to take the surplus out of the pipeline, which the USDA currently says is working. It must be working because they are now thinking of paying farmers to grow grain and use that grain to pay farmers not to grow grain to comply with the PIK program. So certainly the PIK program will then create a lesser storage amount, which in turn could even decrease the amount of storage payments the Federal Government and the taxpayers of this Nation would be responsible for.

Mr. President, I ask my colleagues to support this amendment. It attempts to create justice in an area which has consistently had an inequality and an inequity to the farmers with respect to their storage.

Mr. COCHRAN. Mr. President, the Members of the Senate may remember that last year when the agricultural appropriations bill was before us, the distinguished Senator from Nebraska offered this amendment to that bill, and it was defeated on a narrow vote, just a 2-vote margin.

The arguments that were made last year are appropriate this year also—namely, that the amendment, in effect, is legislating a change in the farmer-held grain reserve program. It would be more appropriate for legislation to be taken up by the Agriculture Committee and Congress as part of a reform of the grain reserve program.

In addition, Mr. President, last year this amendment was estimated by the Department of Agriculture to add about $45 million to the cost of the program that is administered by the Commodity Credit Corporation. This year, however, the Department estimates the cost to be between $125 million and $175 million. These are added expenses that the Department estimates would be incurred if this amendment is agreed to. It is because of this additional cost that we must strongly oppose the amendment and urge the Senate to reject it.

One thing should be pointed out about why payments to those who use commercial warehouses are higher than to those who are storing grain on the farm. Under the law, warehousemen must be bonded. They must comply with a set of regulations imposed upon them for safety and health reasons. This set of regulations does not apply on the farm. There is no necessity for a bond. So the expense of a commercial warehouse operation is considerably higher than that incurred by a person who has on-farm storage facilities. That is the reason why the payments to those who have on-farm storage are much lower than those who utilize a commercial warehouse facility.

Another point should be made, Mr. President. We are seeing the farm community plagued by the burden of surplus production on the farm. By increasing the payments made to farmers for on-farm storage, we write into the law a new incentive which will encourge the farmers to plant more and put more in the grain reserve. At the same time, we have an acreage reduction program seeking to take out of production millions of acres of land to help reduce the surplus. Mr. President, if this happens, a mixed signal would be given. It is an inconsistent policy. For that reason, we think the Senate would be well advised to vote in opposition to the amendment. I hope that the Members will carefully consider this vote.

We are trying hard to keep the levels of spending in this legislation within the President's budget request. The cost of this amendment would be a major addition to the cost of the bill.

There may be some instances on certain farms where there is justification for increased payments. I am not as familiar as I probably should be with specific situations in Nebraska and some of the other grain growing areas of the country where there is a good deal of on-farm storage. But we do know what the projected costs are. We do know that it would be an inconsistent action by the Government which would result in increased production and more grain going into storage.

We hope the Senate will reject the amendment.

Mr. METZENBAUM. Mr. President, I appreciate the motivation of my good friend from Nebraska in offering this amendment. I know of his concern for those who store grain in Nebraska, and I share that concern, because I have a number of farmers in Ohio who have a similar problem.

I think the matter has been ably addressed by the distinguished manager of the bill, who has made it clear that this matter should be handled not as a floor amendment but in the Agriculture Committee, proponents and opponents heard, the administration heard.

There is no way to explain this measure except to say that it will bust the budget. I am told that the U.S. Department of Agriculture has used figures showing that it will cost $125 to $175 million.

I should like the attention of the distinguished manager of the bill at this point.

I hope the Senator will confirm this if I am correct; and if I am incorrect, I will be prepared to acknowledge that fact publicly. I am told by Bill Lesher, Assistant Secretary for Economics in the U.S. Department of Agriculture, that the amendment before us will cost not $125 million to $175 million but will cost $200 million to $300 million.

I think that is a relevant fact, because it is bad enough at $125 million to $175 million. It is far worse at $200 million to $300 million.

What we are faced with here is an amendment that probably has some merit. When it had a price tag of $45 million, I supported it, when it was brought to the floor of the Senate by my good friend from Nebraska in the past. But I think things have changed. They have changed to the extent that we have seen that many people in this country have to share the burden of trying to balance the budget.

The unemployed workers of my State and of many other States throughout this Nation whose unemployment benefits have expired are sharing that burden, under very difficult and onerous circumstances.

Those who are on medicare have seen the necessity of cutbacks, $400 million provided hopefully out of the providers in the budget resolution. Those who are on medicaid have seen cutbacks which have already been put into place.

Those who are on social security know of the impact that they must bear in the lesser receipts and the additional restrictions that have been placed upon them.

As a matter of fact, it is not difficult to recognize that it was only a few weeks ago that we defeated an amendment that is in the same financial category of approximately a little bit higher, $400 million, that was offered by the distinguished Senator from Montana (Senator BAUCUS) to add $400 million for medicare.

Then throughout the Nation we find that peoples' homes are being foreclosed upon. The door is being slammed in their face on their own properties. They are losing their homes, and an effort was made on the HUD appropriations bill to provide foreclosure relief. But this Congress in its wisdom or lack of wisdom, depending on your point of view, refused to provide that foreclosure relief.

Day in and day out in the Budget Committee, in the Appropriations Committee, in every single effort around this body we find a need to provide some restraint and with all due respect there is no Member of this Senate who has been more aggressive and more effective in indicating that he is not for increased spending and that he wants cutbacks, and in this instance I think it becomes a sort of an exception, and I can understand that, but if we are to bear the burden, if we are to share the burden, then each of us has to accept part of that responsibility and I think bringing a floor amendment here that if Mr. Lesher is right will cost $200 to $300 million and if Senator COCHRAN's figures are right

will cost $125 to $175 million, in either event I think we cannot afford the luxury of this amendment.

In all fairness, let us look at the merits of the subject because there is a distinction between those who commercially store grain and those who do so in their own storage facility.

The commercials have to pay bonding costs, they have to pay insurance, they must have a uniform grain storage, they must have a net worth requirement, and there are other business aspects of the commercial stores that do not apply with respect to the farmer who stores his grain on his own premises.

I am not going to argue that there is not some merit to paying on an equal basis, but the fact is that we cannot afford to do so. I am not arguing either as to the fact that farmers in this country need relief. But there are a limited number of farmers who would be benefited by this and if we are to provide additional relief for the farmers of this Nation, which I am prepared to support, then we should do so across the board.

I think this amendment represents a kind of an extravagance that in these days of budget constraint I do not believe we can afford. Therefore, I hope that the amendment is defeated.

Mr. ZORINSKY. Mr. President, I wish to reply to my distinguished colleague from Ohio with respect to some of the comments made which differentiate the prerequisites required by a commercial warehouse as opposed to a farmer's needs in storage.

I reemphasize that this differential even occurs when the farmer's grain is stored in the commercial warehouse. When the CCC is paying storage to a commercial grain elevator operator, they pay him a higher rate as compared to the rate at which a farmer is reimbursed for the farmer's grain stored in the same elevator.

In other words, I guess I could best explain that by how would you like to live in the same house with a neighbor and he be paying $50 a month less, in the same home that has the same cost for insurance, the same air-conditioning cost, the same heating cost and you are paying more than he is?

So, forgetting the differentiality of geographical location of a storage facility, the farmer gets the short end even in the same geographic facility.

I also wish to point out to my friend from Ohio that in his State specifically there occurs one of the highest differentials for storage of any State in the Union. In my own the average is 4 cents differential per bushel on corn, 4½ cents on wheat. In Ohio, the differential is 12.3 cents per bushel on corn and 11.7 cents per bushel on wheat. That is the differential between that paid to a farmer's stored grain and that paid for grain stored in a commercial warehouse.

So there are these differentials and it is even sometimes in the same facility, in the same commercial facility.

I would just like to say a word or two about cost. I have only been in the U.S. Senate for 6 years and 6 months and I find that there are three types of lies in this Congress, the regular lie, the damn lie, and statistics.

Now statistics coming from USDA have shown themselves to be a little less than reliable on many occasions. As a matter of fact, statistics coming from the Government have shown themselves to be a little something less than reliable on many occasions.

A week ago Dr. Lesher, whom my esteemed colleague from Ohio referred to, in a meeting, in a markup with the U.S. Senate Agriculture Committee, was asked how much the agricultural program cost, at which time he indicated $21 billion. The news media wrote and have been recorded, and this was the acknowledged gospel fact, that the agricultural program cost $21 billion.

Then I asked a question that many in the room know the answer to but rarely ask the question and that is, does that include the loan support price program in agriculture and he said yes; and I said, does that include the amount of money farmers pay back on these loans, and he said no.

Then eventually we got to the bottom line that possible $8 billion or $9 billion are paid back by the farmers. So the $21 billion could then be reduced possibly to $11 billion or $12 billion.

I know $10 billion is not much money in this Hall and does not seem to impress many people in the congressional branch of Government, but $10 billion still is money, and on many occasions I have heard people in this hall use it as a very valid argument for breaking budgets.

So the point I am trying to make is the fact that the farmers of America have taken a bum rap on costs. Everybody thinks we have a giveaway program to the farmer on a loan support price. There is a difference between a food stamp dollar outlay, which is also in the Agriculture Department, and a loan support price dollar outlay. A loan support price dollar is repaid with interest or the farmer forfeits the crop. A dollar outlay in the food stamp program is a nonrecoverable dollar. That dollar will not be repaid to the Federal Government.

So continually I see farmers and agriculture lumped in as a tremendous cost to the taxpayers of this Nation while receiving no credit for the amounts of money that are paid back. The reason they do not is that when the money is paid back by the farmers of America on a loan support price loan the money is paid back to the Treasury of the United States of America rather than to the Department of Agriculture. So since it does not come back to the Department our USDA, including Dr. Herb Lesher, continually uses all dollars appropriated as being spent as outlays and any moneys paid back by the farmers of America are not accrued and credited to the USDA because they go back into the general Treasury of the United States.

It so happens that there is a flag with stars and stripes on it that also flies over the building of the Treasury Department, the same as it does over the U.S. Department of Agriculture, and I guess the point I make is the money does come back to the U.S. Government and to the taxpayers who fund that Government. That is why I continually am saddened to hear knowledgeable colleagues of mine continue to quote inflated numbers, facetious numbers. We can find numbers in this Chamber to justify anything you want to present here, and I know each one of us knows how to do it.

So I think the time has come when agriculture should and would be considered a tremendous asset of this country. You can go to the halls of libraries and read the decline of every nation and empire has begun when the nation could no longer feed itself. You do not have to worry about unemployment checks when people cannot produce enough food to feed a nation because you no longer have a nation, and you have tyrannical conditions existing, revolutionary conditions existing. You do not have to worry about the Soviet Union, throwweight and how many nuclear weapons they have. You concern yourself with your own people when you cannot produce enough food to feed your own people.

That is why, to me, I think the farmers and agriculture are a sacred part of the evolution of the United States of America, and those people who are worried about unemployment and those people who are worried about long lines of people waiting for jobs, let me say here and now that those lines will begin to disappear when the farmers of America have sufficient incentive and motivation and ability to maintain a profit in producing agriculture.

William Jennings Bryan once said you can "burn down your cities and leave your farms and your cities will spring back as if by magic. But destroy your farms and grass will grow in the streets of every city in the country."

So I beg this Senate Chamber and my colleagues to rectify an inequity, an injustice that currently occurs, and it does not have to be done at a greater outlay of money. It can be done through a reduction of money paid to cooperatives, to commercial warehouses and bringing up the amount of money that farmers are paid to equalize the same.

Thank you, Mr. President. I yield the floor.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I rise in support of the amendment offered by my colleague from Nebraska. I am a cosponsor of that amendment. I will be brief and then possibly we can go to a vote.

I listened to the debate with keen interest and, as with so many of the issues that come before us, there are two trains of thought, two considerations that should be given. In the first place, I would hope we would dismiss as not reliable the varying estimates up to $260 million that the U.S. Department of Agriculture has estimated as the cost of this program. Previously we have found out that if there is one thing that is reliable it is the fact that the projections and estimates by the U.S. Department of Agriculture are not reliable. So if that is a reliable fact, then let us dismiss that.

Let me simply summarize by saying that this is not a budget-buster, and when we take on something like this as a budget-buster after all of the items that we walked down to that well and vote on time after time after time, it makes it almost laughable to consider that this amendment is a budget-buster.

Last, let me tell you it is not the commercial storage people who are going broke today. It is the family sized farmer. Why is that so? Well, the family sized farmers are increasingly becoming involved in the storage business. The PIK program itself has made them more and more in the storage business. What we are simply asking for in this amendment is that there be more fairness between the rates that are paid to a commercial storage facility and those paid to the farmer, and as my colleague from Nebraska has said, it might well be that if that cost could be adjusted over a period of time, and I must emphasize it will take a period of time because there certainly are contracts in existence now that could not and should not be violated, but certainly this is not a budget-busting amendment. We are simply saying that at a time when the American farmer is being asked to store more and more of his products for our food reserve, that we give him more consideration and more fair consideration than he has received in the past.

Why is it that the American farmer is required to store more and more at this time? Well, it is simply the fact that the American farmer because of a whole series of Government actions, and I will not bother to enumerate them at this time, because if I do I suspect I would border on getting into partisan political considerations with regard to who is for the American family sized farmer and who is not politically, and that is not the message I want to emphasize; but I am simply saying that during the last few years, because of the actions of the Federal Government over which the family sized farmer has had little, if any, control, he has found himself depreciated in his ability to sell his products in the international marketplace.

Indeed, if you look at the dramatic reduction in the sales of our grain just to the Soviet Union, which has been duplicated around the world, you will quickly see why the farmer is required to store more and more and more.

The amendment offered by Senator ZORINSKY is simply one that says, "Let's be fair in the future, even though we have not been in the past, regarding the differential that is paid to farmers to store these products on the farm as opposed to the higher, and in many cases the unnecessarily higher, price that is paid to the commercial storage operator."

I urge the adoption of the amendment. I yield the floor.

Mr. ZORINSKY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. METZENBAUM. Mr. President, at an earlier point in the debate there seemed to be some question as to the actual cost of this amendment. I at that time indicated that I had been informed by the Assistant Secretary for Economics of the Department of Agriculture that the cost would be in the area of $200 million to $300 million. Because I felt that it was very relevant to this debate, I also at the same time requested the manager of the bill to seek confirmation of that figure.

I wonder whether or not he has had an opportunity to speak directly with the Department of Agriculture.

Mr. COCHRAN. Mr. President, if the Senator will yield, I have, as a matter of fact, been in touch with Bill Lesher at the Department of Agriculture, the official the Senator identified. He confirms the figures that were noted by the Senator from Ohio. This amendment would cost a minimum of $200 million and maybe as much as a little over $300 million.

So, this information is contrary to that provided to the managers of the bill this morning by the budget office of the Department of Agriculture that the cost of the amendment would range between $125 million and $175 million.

Mr. ZORINSKY. Will the manager yield for a question?

Mr. COCHRAN. The Senator from Ohio has the floor and yielded to me.

Mr. METZENBAUM. I yield to the Senator from Nebraska.

Mr. ZORINSKY. I would like to ask a question of the manager of the bill. If, in the wisdom of the USDA, they chose the course of reducing over a period of time the storage paid to the commercial warehouse to such an extent to offset the amount that they would raise by the farmers' storage, what would the cost be to the USDA then? This is an option.

Mr. COCHRAN. Mr. President, I would say, if the Senator would yield, that there is nothing in the amendment that would require reduction in the payments to commercial warehousemen. It is an assumption that they would equalize payments by reducing payments to warehousemen. I think, because of the fact that we do have proven expenses, bonding requirements, and all the rest that are identified as costs of commercial storage, payments to warehousemen will continue to be paid. I rather doubt that a reduction in payments would be the way that the amendment would be administered.

The Department says that to administer the amendment would cost from $200 million to something over $300 million in just 1 fiscal year.

Mr. ZORINSKY. The chairman serves on the same committee with me, and I have heard him argue with the same Dr. Lesher on cost estimates before, when it was to his benefit that they be less.

Would the Senator not, though, say that if the option were chosen that I just hypothesized there would be no cost to the USDA?

Mr. COCHRAN. I would say, Mr. President, in further response to the Senator, that we have no way of knowing how the Department is going to interpret and administer the amendment if it is agreed to, except to hear from the Department and get its reaction and make that reaction available to the Senate.

Our information from the Department is that this would escalate the cost of administering the grain program. I assume that is true. I think you could probably argue with them that there is a more cost-effective way of administering the program.

This is another reason why I think, Mr. President, that it might be to the advantage of everyone concerned if we proceed in a different way and go through the legislative committee rather than add an amendment to an appropriations bill. I think it just indicates that there may be a reason to discuss with the Department where it gets the numbers and why it suggests that this is going to be so expensive.

I suggest to the Senator that I would join him in urging the chairman of the legislative committee, Senator HELMS, to schedule hearings—I do not know that any have been held on this subject—to see if we could make a record on which to base some legislation of this kind.

Mr. ZORINSKY. I thank the chairman. I would just like to say that on September 28, 1982, which is not too far in the past, 48 Senators on the floor of this Senate thought enough inequity existed to support this piece of legislation. So it is not the first time this has been brought up. It is not the first time it has been debated. So I feel that there is sufficient concern by many Senators.

I ask for the passage of this amendment.

Mr. METZENBAUM. Will the Senator from Nebraska yield for a question?

Mr. ZORINSKY. Yes.

Mr. METZENBAUM. Is it not a fact that on September 28, 1982, when that amendment was presented to the Senate, it was represented that the total cost would be $45 million?

Mr. ZORINSKY. That again was the estimate made by the USDA, which only reemphasizes my point that they have got more numbers over there than a calendar has. That was their estimate. And at the same time, I made the same argument then, on September 28, as I did today—that it need not cost a dime had that passed if they wanted to administer it in the way I just proposed to the chairman of the subcommittee.

Mr. METZENBAUM. I would agree they may have a lot of different numbers. But, as a fiscal conservative, I am sure the Senator would agree that there is a big difference between $45 million and $200 million to $300 million, because the $200 million to $300 million buys an awful lot of things that a lot of people in this country need very badly.

Mr. ZORINSKY. May I just point out that the reason we have a storage problem is because they do not seem to realize the difference between a billion dollars and $31 million. I refer to the fact that we are going to stop $31 million worth of textiles coming into this country from the People's Republic of China and in trade they are going to disallow 1.2 billion dollar's worth of grain, much of it produced in Nebraska, from going into the People's Republic of China. It is no wonder we have a high storage cost.

Mr. LEVIN. Mr. President, there is an unfair difference in Government payments for farmer-stored and commercially stored wheat and feedgrains, but there may also be some difference in costs which might justify some difference in the amount of the payment.

The Agriculture Committee should hold hearings on this issue and report an authorization bill to correct existing inequities, without creating new ones. That is the fair way to proceed, rather than proceeding with a broad blanket rule on this pending appropriations bill.

Mr. BAKER. Mr. President, I am always loathe to make a tabling motion until I am sure that debate is concluded. I observe the Senator has indicated that he was prepared for a vote. Therefore, I now move to table the Zorinsky amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee (Mr. BAKER). The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Alabama (Mr. DENTON) and the Senator from Alaska (Mr. STEVENS), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from South Carolina (Mr. HOLLINGS) and the Senator from Hawaii (Mr. INOUYE), are necessarily absent.

The PRESIDING OFFICER (Mr. HUMPHREY). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 63, nays 33, as follows:

[Rollcall Vote No. 176 Leg.]

YEAS—63

Armstrong	Hecht	Pell
Baker	Heinz	Percy
Biden	Helms	Proxmire
Bradley	Humphrey	Quayle
Byrd	Kassebaum	Riegle
Chafee	Kasten	Roth
Chiles	Lautenberg	Rudman
Cochran	Laxalt	Sasser
Cohen	Leahy	Simpson
D'Amato	Levin	Specter
Danforth	Lugar	Stafford
Dodd	Mathias	Stennis
Dole	Matsunaga	Symms
Domenici	Mattingly	Thurmond
East	McClure	Tower
Garn	Metzenbaum	Trible
Goldwater	Mitchell	Tsongas
Gorton	Moynihan	Wallop
Hatch	Murkowski	Warner
Hatfield	Nunn	Weicker
Hawkins	Packwood	Wilson

NAYS—33

Abdnor	Dixon	Jepsen
Andrews	Durenberger	Johnston
Baucus	Eagleton	Kennedy
Bentsen	Exon	Long
Bingaman	Ford	Melcher
Boren	Glenn	Nickles
Boschwitz	Grassley	Pressler
Bumpers	Hart	Pryor
Burdick	Heflin	Randolph
Cranston	Huddleston	Sarbanes
DeConcini	Jackson	Zorinsky

NOT VOTING—4

Denton	Inouye	Stevens
Hollings		

So the motion to lay on the table amendment No. 1439 was agreed to.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. COCHRAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ANDREWS and Mr. MATTINGLY addressed the Chair.

The PRESIDING OFFICER. The Senator from North Dakota is recognized.

AMENDMENT NO. 1441

(Purpose: Directing the Secretary of Agriculture to carry out the original commitments to farmers under the payment-in-kind (PIK) program)

Mr. ANDREWS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Dakota (Mr. ANDREWS) proposes for himself and Mr. BENTSEN, and amendment numbered 1441:

On page 26, line 11, following the figure $9,673,636,000, insert the following: ": Provided, That the Secretary of Agriculture is directed in connection with all commodities, under the payment-in-kind program, particularly cotton, to carry out the original commitment to producers."

Mr. ANDREWS. Mr. President, this is an important amendment because there are some problems under the PIK program in going along with original commitments, not only in cotton, on which I defer to my great friend and our colleague, Mr. President, the chairman of the subcommittee (Mr. COCHRAN), but also in the case of grain where commitments were made that certain land could be idled and would qualify and all of a sudden they are asking for double summer fallow. It has been cleared on both sides of the aisle. Mr. President, I understand that the chairman of the subcommittee is willing to accept the amendment, and I would urge its adoption.

Mr. COCHRAN. Mr. President, we have reviewed the amendment and it does indicate simply that the Secretary shall carry out commitments to producers under the payment-in-kind program. This does not add on any new funds in the bill. We recommend that it be accepted.

Mr. EAGLETON addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri is recognized.

Mr. EAGLETON. May I ask the distinguished Senator from North Dakota, what will be the cost of this amendment?

Mr. ANDREWS. Actually, there should be no cost to the amendment because all it says is that the Secretary shall carry out the original commitments made to farmers under PIK program.

Mr. EAGLETON. Will the PIK program cost more if this amendment becomes law than if it does not become law?

Mr. ANDREWS. If the Secretary was about to, as we have heard rumors, back away from some commitments and not honor those commitments, it could possibly cost more, yes. But the language is very direct. It

merely says that in the case of PIK, which as the Senator from Missouri realizes so well, Mr. President, was hatched up in a hurry and sent out, the Secretary of Agriculture shall honor the commitments made to the farmers. You might call it a fair play amendment, Mr. President.

Mr. EAGLETON. Passing the argument as to whether this is living up to a commitment or not, I would like to zero in on cost. The Senator says this amendment could possibly add to the cost of the PIK program. Does he know by how much?

Mr. ANDREWS. I have no idea, Mr. President.

Mr. EAGLETON. Has the Department of Agriculture been asked for its comment on this amendment?

Mr. ANDREWS. The Department has not been asked for comment. I might add to my good colleague, Mr. President, that I visited with my former colleague and the chairman of the committee on the other side of Capitol Hill, Mr. WHITTEN, who suggested this, Mr. COCHRAN, who has a specific problem in cotton, also indicated its great importance. We have some problems in wheat and feedgrains in my part of the country and Senator MELCHER's part of the country. I talked with Senator BOREN, who has a very key cotton State, and he indicated his great desire for it. I cleared it with Senator HUDDLESTON, the ranking Democrat on the Senate Agriculture Committee. He also indicated that necessity for the amendment.

Mr. EAGLETON. I realized, Mr. President, that these various Senators are supportive of the amendment, and I am not saying that I am opposed to the amendment. The language of the amendment is self-evident that this would encourage a change in current policy by the Department of Agriculture and that that change is going to cost some money. I think we would be better informed about the substance of this amendment if we knew how much money is involved. Would there not be time to ask the Department of Agriculture to give us a cost estimate?

Mr. ANDREWS. Might I point out to my colleague, the Department of Agriculture cannot make specific estimates because the Department of Agriculture as always maintains that they are in good faith living up to the commitments made to the farmers. Now, if they were planning to back away from some commitments they made to the farmers early on in PIK, it is conceivable that the cost could amount to several millions of dollars. My good colleague from Missouri knows that just as well as the Senator from North Dakota knows that. But there are no definable figures.

Also, this amendment undoubtedly will be the subject of considerable conversation between now and conference time, and the conferees, in good faith, can further refine the amendment so that it is fleshed out with the type of specifics that can be gained in a couple of weeks. The important movement is to get this amendment into the bill so that it is in conference.

Mr. President, my colleague and good friend from Missouri will be on that conference, as will the Senator from Mississippi and I. I am sure we can flesh it out and get those specifics determined.

Mr. EAGLETON. Mr. President, I assure my colleague that I will ask the Department what this amendment will cost. We are in the process of appropriating money. This is an appropriations bill, and we should know how much amendments we are considering will add to the cost of the bill. The Senator's amendment is going to cost considerable money. I have no estimate of what it might be, but it will be more than a pittance. If we do not know today and are not going to find out today, I guess we will have to find out sometime between now and the conference.

Mr. ANDREWS. It is my hope and feeling that my colleague from Missouri is as interested as I am in seeing that the commitments to the farmers are lived up to.

Mr. BENTSEN. Mr. President, I am pleased to join with my distinguished colleague, the Senator from North Dakota (Mr. ANDREWS) in offering this amendment.

This amendment directs the Secretary of Agriculture to carry out the original commitment to producers, particularly cotton farmers, under the payment-in-kind program.

Mr. President, this amendment will help prevent an inequity in our farm program which could be very damaging to cotton farmers in Texas and throughout the Nation.

I think that USDA should give the same treatment to cotton farmers under the payment-in-kind program that has been given to wheat and feed grain producers. This seems a very simple thing, but unfortunately it has not been done in this case.

USDA SHORT OF PIK COMMODITIES

When USDA found that it did not own enough wheat or feed grains to meet its PIK commitments under these programs, farmers were asked to submit bids to sell USDA these commodities which the farmer owned and which were stored under the loan or reserve programs. USDA then accepted the low end of these bids.

The remaining wheat and feed grains which USDA will need for the PIK program will be obtained by requiring some farmers to place their 1983 crop grain in the loan and then forfeit that grain to USDA. USDA will then sign that grain back over to the farmer as his PIK payment. This last provision, which is included in all PIK contracts, in effect allows USDA to buy a farmer's grain from him at the loan rate for use in the PIK program.

USDA assured farmers that this takeover provision would be used only as a last resort. And in the grain programs it has been so used. USDA has first offered to buy wheat and feed grains through free competitive bids.

THE BID PROCESS

These bids were expressed as percentage, representing the percentage of the crop which the farmer would get back from USDA in return for selling it early for the PIK program. USDA offered to forgive the loan on the commodity if the farmer would give the grain to USDA. In addition, since this offer alone was not competitive, USDA also offered to give back to the farmer a part of the commodity in lieu of an additional cash payment. This additional amount, expressed as a percentage, is what the farmer was asked to bid on.

For example, if a farmer had 100 bushels of wheat in storage and submitted a bid of 20 percent, he was offering to take 20 bushels of wheat plus forgiveness of the loan on all 100 bushels in return for signing the remaining 80 bushels over to USDA to use in the PIK program. Likewise, if a farmer offers 100 bales of cotton with a 7-percent bid, he is saying he will sell 93 bales of that cotton to USDA in return for forgiveness of the loan on all 100 bales plus 7 bales of that cotton for himself. Obviously, these percentage bids can be converted into cash prices for comparison with actual market prices, and this is what farmers did in determining their bids.

COTTON'S PROBLEM

USDA asked for cotton bids after the bids for wheat and feed grains. In wheat USDA accepted bids up to 20 percent and in feed grains up to 25 percent. USDA wanted to keep the price down for cotton, so they decided to put a cap on the cotton bids—to set a ceiling above which farmers could not submit bids. This cap was set at 7 percent, which at the time should have been an attractive offer.

However, just as USDA announced the cotton offer with the 7 percent cap the cotton market shot up. Suddenly the cap was below the market price. The market price for PIK cotton contracts—base quality of Strict Low Middling 1 1/16 inch—now is about 62 cents per pound, which translates to a PIK bid of about 11 percent. Thus this cap prevented cotton farmers from having any chance to bid at all.

Had USDA removed this cap, cotton farmers could have had the same opportunity to make free competitive bids that wheat and feed grain producers have had. USDA is not required to accept any of these bids. Such an open bidding process is the epitomy of the free market system, and if USDA had permitted it for cotton they would

now have a wide range of bids. They could then look at those bids and tell, through the free market, exactly how much cotton could be bought at exactly what cost both through the bids and through the takeover option. USDA could then choose the best combination.

IMPACT ON FARMERS

As I pointed out, if USDA does not acquire cotton through the bid process they will have to acquire massive amounts through takeovers of 1983 crop cotton. The estimated shortfall in cotton is in the range of 800,000 to 1,000,000 bales.

What happens to the farmers then? Much of the cotton crop is sold on forward contracts. Such contracting is especially heavy in the Rio Grande Valley of Texas, in California, and in certain other areas of the Cotton Belt. Cotton is sold in February for delivery at harvest. When farmers signed up for the PIK program, no one expected the resulting heavy turnout. Farmers thus expected USDA stocks to be adequate to cover the PIK program. In addition, USDA had assured farmers that the takeover option in the PIK contract would be used only as a last resort. Therefore, many farmers sold on forward contracts both their 1983 crop cotton and the cotton they expected to receive through the PIK program. In some cases the contracts to sell the 1983 crop cotton were signed even before the signup for the PIK program.

Assume a farmer is growing one bale of cotton and will get one bale of cotton under the PIK program. Assume also that he has forward contracted both those bales of cotton, as many farmers have. If USDA now takes the farmer's 1983 crop cotton and gives it back to him as his PIK payment, the farmer then has only one bale of cotton to deliver but he has sold two bales. Who is going to straighten out that legal mess? If USDA takes a large amount of 1983 crop cotton for the PIK program then farmers, merchants, and even USDA could wind up locked in a massive tangle of lawsuits.

Any amount of cotton that USDA buys through the bid process will lessen that problem, and so cotton farmers will have a very legitimate complaint if they are not even given an opportunity to offer cotton through that bid process.

Mr. President, I ask unanimous consent that a copy of a letter which I sent to Secretary of Agriculture Block regarding this issue be inserted in the RECORD following my remarks.

EQUITY FOR ALL

Mr. President, the essence of what this amendment asks is equity for all farmers. We want only the same treatment for cotton farmers that has been given to wheat and feed grain farmers. To do any less will severely damage the credibility of the Department of Agriculture and impair the future workings of our farm program, as well as causing heavy losses for cotton farmers this year.

I urge my colleagues to join with me in supporting this needed amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., June 14, 1983.

Hon. JOHN R. BLOCK,
Secretary, Department of Agriculture, Washington, D.C.

DEAR MR. SECRETARY: I am deeply concerned about the possibility of discrimination against cotton farmers in the handling of the Payment In Kind program.

When it became apparent that the Department of Agriculture's stocks of wheat and feed grains would be inadequate to meet the commitments under the PIK program, USDA put out bids for these commodities. A number of these bids, up to the 20 percent level for wheat and 25 percent for feed grains, were accepted. Those above that level were rejected and the remainder of USDA's commitment will be filled by exercising the "plant for PIK" option.

In seeking to replenish USDA's inadequate cotton stocks, however, the cotton bids were capped at only 7 percent. This was a good bid at the time, but immediately after this offer was made the cotton market moved sharply upward. Rather than increase this ceiling or remove it entirely, as was done with grains, USDA merely extended the offer. Extending the offer will not attract sufficient supplies of cotton and will force the use of the "plant for PIK" option for almost all of this shortfall.

The impact of the "plant for PIK" option on cotton farmers will be severe. Cotton is traditionally sold through forward contracts, and farmers expected at the time of sign-up that USDA's cotton stocks would be adequate to meet the needs of the PIK program. Thus many farmers contracted both their 1983-crop cotton and the cotton they expected to get under the PIK program. If USDA takes the 1983-crop cotton for the PIK program, then the farmer will have two contracts to sell cotton but only enough cotton to fill one contract. Many lawsuits will result, possibly including suits against USDA.

In the interest of equity, I request that you immediately open bids for cotton for the PIK program with no cap on those bids. An uncapped bid will allow the free market to work unhindered. You will then be able to accurately weigh the various options, including the costs of these options, in deciding how to get the cotton to meet your PIK commitments. To delay such an action would risk missing the July 15 entitlement date for cotton in the Rio Grande Valley of Texas, and to fail to do so would result in a discriminatory act against cotton farmers that is both damaging and unnecessary.

Sincerely,

LLOYD BENTSEN.

Mr. TOWER. Mr. President, I would like to congratulate my colleague from North Dakota for offering this amendment and offer my strong support, especially as it relates to the situation facing our cotton farmers.

When the payment-in-kind program was first offered, a publication from the ASCS stated,

In some instances, producers may be required at CCC's option to obtain a 1983 CCC regular loan to use for their PIK payment. This option will be used sparingly.

Within the same publication, it was again stated that this harvest for PIK option would be used very sparingly. In ASCS meetings across the country, farmers were assured that there was plenty of cotton, and that the harvest for PIK clause was only included to cover a possible shortage of CCC owned wheat. Again, when ASCS officials were specifically asked what would happen if for some reason a shortage did occur, farmers were told that any early contracts that were entered into for the forward sale of cotton that were negotiated prior to the time that the PIK contract was approved by the county committee would not be affected.

However, since the PIK program was initiated, increases in demand both in this country and worldwide have led to rising cotton prices, and heavier than expected CCC loan redemptions. Also, poor weather has resulted in expected yields that are much lower than expected. As a consequence of these changes—which were impossible to predict—Government-owned stocks are not adequate to fulfill obligations under PIK contracts with cotton producers.

As a result of this shortfall, the USDA recently announced that the harvest for PIK option would have to be implemented for cotton. Farmers who signed up for PIK and had plenty of cotton already in the loan from 1982 will be forced to forfeit their loan early and will receive their own loan cotton back from the CCC as their PIK payment. However, those farmers who do not have any cotton in the Government loan program will be required to place this year's crop in the loan at a much lower price than what they would get on the open market. Although this cotton is then returned to the farmer as his PIK entitlement, he still ends up with considerably less than the amount of cotton he was expecting. Those producers who have forward contracted their expected PIK cotton as well as their 1983 crop, will either have to back out of their contracts or seek cotton on the open market at a much higher price than expected to fulfill their contracts. This will create a severe economic hardship for those farmers who have historically marketed their cotton most efficiently.

It is my hope that this amendment will encourage the USDA to look into ways that the original intent of the PIK program for cotton can be implemented. I strongly support the PIK program and applaud its success in reducing surpluses and bringing supply into much better balance with demand. PIK has already gone a long

way to help bring our farm economy out of the impending crisis we were facing late last year. Now, as the details of the PIK program are worked out, it is important that we do not dampen the successfulness of the program with inequities in the way farmers receive their PIK entitlements. I urge the USDA to give a hard look at the ways that have been suggested to solve our shortfall in CCC owned cotton without requiring the harvest for PIK option. I hope we can reach a fair decision for all those involved.

(The name of Mr. BOREN was added as a cosponsor of the amendment.)

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment of the Senator from North Dakota.

The amendment (No. 1441) was agreed to.

AMENDMENT NO. 1442

(Purpose: To provide funds for the purpose of maintaining, developing, and increasing the export of agricultural commodities and products of the United States)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Georgia (Mr. MATTINGLY) proposes an amendment numbered 1442.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill insert a new section as follows:

SEC. . (a) Out of any funds made available to the Commodity Credit Corporation by this Act, the Secretary of Agriculture shall utilize not less than $5,000,000, or an equivalent value of commodities owned by the Commodity Credit Corporation, to provide—

(1) direct or blended credit for foreign purchasers in excess of such credit programs otherwise funded by this Act;

(2) bonus incentives for foreign purchasers;

(3) commodity distributions or monetary assistance for United States producers; and

(4) any combination or paragraphs (1), (2), and (3);

for the purpose of maintaining, developing, or increasing the export of agricultural commodities and products, including value-added products, produced in the United States.

(b) To the extent practicable, the expenditures and contributions required by this section shall be targeted by the Secretary of Agriculture of facilitate sales of United States products in markets in which foreign competing products are, in the Secretary's determination, subsized directly or indirectly resulting in a competitive disadvantage for such United States products.

Mr. MATTINGLY. Mr. President, this amendment embodies an idea several of my colleagues and I have had for quite some time. The amendment I offer today is designed to counter the use of unfair agricultural subsidies by our trading partners which have accounted for the drastic loss of American farm exporters' fair share of foreign markets.

I say I had this idea for some time now, because I have seen firsthand the unwillingness of our trading partners to negotiate or roll back their unfair and mostly illegal farm subsidies. This certainly was apparent to me when I attended the General Agreement on Tariffs and Trade (GATT) ministerial meeting in Geneva last November. Our trading partners appeared convinced that our protests against massive export subsidies and trade barriers amount to nothing more than empty gestures and political posturing. Unfortunately, much of this perception is based upon our failures in the past to actually pursue protests and threats with meaningful action.

Because of our inability to secure any reasonable commitment from our trading partners, I introduced in the 97th session of Congress, and again this session, bills to correct the inequity created by unfair foreign subsidies in markets overseas for U.S. farm goods. The intent of those bills was to make available to American farm exporters surplus Commodity Credit Corporation (CCC) stocks to lower their cost of production and to increase export sales.

I also want to commend Senators HELMS, DOLE, COCHRAN, HUDDLESTON, and all my other colleagues for their continuing efforts to help American farmers by promoting their exports. I would hope we can all agree to act now and not let American farmers continue to suffer from the devastating export situation they face.

Sir Roy Denman, head of the delegation of the European Communities, told me with no equivocation that European subsidies were nonnegotiable. While I find his comment appalling, at the same time it motivates me to bring about fairness in agricultural trade for our farm exporters.

Therefore, the purpose and substance of my amendment I offer today is not new. It merely is another attempt to obtain relief for U.S. exporters of agricultural goods, including value-added products, and to bring about fair trade. It does not add to the amount recommended for appropriation by the committee. It would simply require the Secretary of Agriculture to utilize funds available for the activities of the CCC and would permit the Secretary to substitute surplus CCC commodities for all or a part of the funds. The provisions of the amendment permit maximum flexibility for the Secretary of Agriculture.

The mere threat of action by the United States, as provided for by Senate approval of this amendment, would be a powerful lever our trade negotiators could use at the bargaining table as they seek fair treatment. I believe the amendment sends a loud and clear message of our determination to use every available resource in an effort to stop unfair subsidies.

I know many of my colleagues share my concerns regarding this critical problem. However, we, the Congress must convince the administration to take firm and meaningful legal action to back up our protests and to help restore vitality to the agricultural sector of our economy.

The amendment asks for $5 million from available funds of the CCC or an equivalent amount of CCC-owned commodities to be used in the export area. This level of funding will allow only a small volume of expected sales; but, properly targeted, it can be very significant in sending a strong message to those we trade with who continue to use unfair subsidies.

It will give the Secretary of Agriculture wide flexibility to choose what U.S. agricultural products will be used in what amounts and in what markets.

The amendment would provide U.S. negotiators with an effective tool in discussions with our foreign trading partners who continue to use unfair practices.

Various people from my State have come to me—among them, the egg and poultry producers—with various proposals. The provision of this amendment encompass a lot of things about which they have come to me, as well as people from other States.

For example, it would allow giving the amount of surplus butter equal to a foreign subsidy to foreign purchasers of, say, poultry or eggs.

I urge the support of all Senators for this amendment.

Mr. COCHRAN. Mr. President, I compliment the Senator from Georgia for offering this amendment. He brings to the attention of the Senate a very important issue. This area needs the full support and activity of the Department of Agriculture if we are going to compete successfully in the international marketplace to help move some of the surplus commodities in an effective way, to help get market prices up, and to create a better opportunity for our farmers to operate at a profit.

This amendment would require that at least $5 million of CCC funds, or the equivalent in CCC-owned commodities, be spent for various export promotion activities in fiscal year 1984. The export promotion activities may include the following.

First. Direct or blended credit, in excess of that otherwise funded by the 1984 Appropriations Act;

Second. Bonus incentives for foreign purchasers;

Third. Commodity distributions or monetary assistance for U.S. producers.

To the extent practicable, activity is to be directed to markets where the United States is at a competitive disadvantage, due to competitors' subsidies.

The Omnibus Budget Reconciliation Act of 1982 directed USDA to spend $175 million on export promotion programs in each of fiscal years 1983-85. In fiscal year 1984, it is anticipated they will spend $100 million on direct export credits, and $75 to $90 million in areas as yet unspecified. If this plan remains unchanged, it will more than accommodate the Mattingly amendment by spending more than $5 million on direct export credit programs.

Therefore, the amendment would have no adverse impact on budget numbers. We think it is a good idea, and we recommend that the amendment be accepted.

Mr. EAGLETON. We have no objection, Mr. President.

Mr. HELMS. Mr. President, I support the amendment of the Senator from Georgia, and I urge the Senate to adopt it. It is another much-needed effort to stand up for American farmers and to counter the unfair trade practices of other countries. Moreover, it is not a new expenditure. It simply earmarks funds that are already being appropriated and is a cost-effective action to counter foreign export subsidies.

The EEC is undoubtedly the greatest violator of free and unsubsidized trade in agricultural products. For years, the United States has conducted ongoing bilateral and multilateral negotiations in an attempt to persuade the EEC to stop its predatory trading practices. But to no avail. Just last week, we ended 6 months of intensive bilateral negotiations with the EEC on agricultural trade problems with absolutely no satisfactory settlement. This recent failure follows last November's GATT Ministerial in Geneva where the EEC was successful in blocking a concerted effort on the part of a number of nations to resolve the issue of agricultural export subsidies.

It is becoming increasingly evident that the United States must take stronger steps to persuade other nations to stop employing predatory trading practices and to protect U.S. markets and U.S. farmers in the face of heavy and unfair competition in the international market. That is certainly what the Committee on Agriculture, Nutrition, and Forestry intended when we reported S. 822—the Agricultural Export Equity and Market Expansion Act of 1983. I believe this is also the intent of the amendment offered by the Senator from Georgia and therefore I strongly support it. I agree with the Senator from Georgia that this amendment will help send a strong signal to those nations using unfair subsidies that the United States will no longer sit idly by and watch our markets erode.

The United States cannot afford to be passive on this issue. For every year that goes by while the other nations capture markets through predatory export subsidies, this country suffers from lost exports. Lost export markets cause not only declines in farm income, growing agricultural surpluses, and higher taxpayer costs, but also fewer jobs and less economic growth throughout the entire economy. Lost sales also have a negative impact on the U.S. balance of payments and contribute to our escalating trade deficit.

At recent hearings before the Joint Economic Committee on agriculture trade issues, Under Secretary for International Affairs and Commodity Programs, Dan Amstutz testified that "subsidies of the EEC alone have cost the United States $5 to $6 billion a year in exports since 1980. If conditions do not change, the loss could be up to $8 billion by 1987."

I believe we must make every effort to insure that conditions do change. And I believe this amendment will be part of that effort by helping the United States regain and retain its competitive edge in world agricultural markets. Therefore, I support the amendment and urge its adoption.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 1442) was agreed to.

AMENDMENT NO. 1443

(Purpose: To pay additional claims for the elderly feeding program)

Mr. LEVIN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Michigan (Mr. LEVIN) proposes an amendment numbered 1443.

Mr. LEVIN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 49, following line 22, add the following:

"For an additional amount for the elderly feeding program, $875,000, to pay outstanding claims for meals served in fiscal year 1979."

Mr. LEVIN. Mr. President, the amendment I am offering today will provide an additional $875,000 for the elderly feeding program, to pay outstanding debts that are owed to eight States by the Department of Agriculture for meals served to the elderly during fiscal year 1979. An increase in the appropriation for this program is necessary to pay back Michigan and seven other States that did not receive a complete reimbursement from the U.S. Department of Agriculture of case in lieu of assistance for meals that were served to the elderly during 1979. This is an acknowledged debt. The Department of Agriculture clearly wants to pay these small debts, and they willingly acknowledge that these debts are in fact owing.

The problem was first brought to my attention recently when I received a copy of a letter from the director of the Office of Services to the Aging in Michigan, Olivia P. Maynard, to the State treasurer, Mr. Robert A. Bowman. The letter requested Mr. Bowman's assistance in recapturing the $656,147 owed to the State of Michigan by the USDA from 1979. On May 17, 1983, I wrote to Secretary Block calling the situation to his attention and asking him to take appropriate action to remedy the problem. On June 10, 1983, I received a response to my letter to the Secretary from George A. Braley, Deputy Administrator of Special Nutrition Programs, which informed me that "the appropriated funds for fiscal year 1979 were expended." The letter went on to say: "We are cognizant of the hardship Michigan and other States may have experienced as a result of this and hope that it can be remedied in the near future."

Mr. President, I received assurances from the USDA since first notifying the Department of its claim during 1980. While the USDA has repeatedly recognized its obligation to Michigan and the other States affected by the shortfall, it has not sought to obtain from the Congress the funding necessary to make good on its assurances that the money owed would be forthcoming.

In December 1981, the Acting Director of the Food Distribution Division of the USDA wrote to the former director of the Office of Services to the Aging in Michigan and indicated that the USDA would request the funds necessary to pay back the State. His letter states: "Please be advised that we remain cognizant of the situation and are making every effort to obtain the necessary funds to pay Michigan and a few other States. It is hoped that the funds will become available soon."

But it is now June 1983, and the State of Michigan, along with seven other States, has yet to be reimbursed by the USDA because of lack of an appropriation. The seven other States—Pennsylvania, Georgia, South Carolina, Wisconsin, Iowa, Utah, and Arizona—have smaller claims than does the State of Michigan. Nevertheless, each of these States has a valid claim against the Department which should have been remedied long ago.

Mr. President, I appreciate the willingness of Senator EAGLETON, ranking minority member of the Subcommittee on Agriculture Appropriations and the chairman of the subcommittee, Senator COCHRAN, to accept this

amendment. It will insure that our Government pays its debts, owing since 1979 to eight of our States.

I believe the amendment is agreeable to the managers of the bill.

Mr. COCHRAN. Mr. President, I compliment the Senator from Michigan for offering this amendment. It relates to the failure of the Department of Agriculture to pay valid claims amounting to $864,000 to certain States. What has happened is this: In 1979; the elderly feeding program was a separate appropriation account. Now, it comes under the food donations program. Since it is an entitlement program, the amount of money Congress appropriates for this purpose cannot be exceeded. This is what happened in this case. They simply ran out of money before all the claims were received. There was no cutoff time, under the law, for submitting claims. But there is language in this bill stating that in 1984, final reimbursement claims for service of meals, submitted within 90 days following the month for which the reimbursement is claimed, shall be reimbursed from funds appropriated.

Mr. President, these are valid claims; they remain unpaid, and I recommend that the amendment be accepted.

Mr. EAGLETON. Mr. President, I wish to join as a cosponsor of the amendment that is offered by my colleague from Michigan, and I ask unanimous consent that it be so ordered.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. EAGLETON. Mr. President, this amendment provides additional funding to the Department of Agriculture to pay valid, fiscal year 1979 claims submitted by elderly feeding program projects. Under this program, projects are reimbursed in either cash or commodities for meals served to eligible recipients. Current law provides no time limit within which claims must be submitted. The claims for fiscal year 1979 in question were submitted to USDA over 3 years ago, but have never been paid because USDA had no funds available with which to pay them. USDA had neglected to inform us until just last week that these valid claims were on the books and had not been paid.

I would be remiss not to reemphasize the point already made by the Senator from Mississippi that we have added new language to the bill this year which requires that, for fiscal year 1984, only final reimbursement claims for service of meals submitted within 90 days following the month for which reimbursement is claimed shall be eligible for reimbursement. This language should help insure that this late payment problem does not reoccur in the future.

Mr. President, the issue is clear. We owe these elderly feeding projects money for meals they served, and we have done so for almost 4 years. It is about time we paid the bill. I urge the adoption of the amendment.

Mr. RIEGLE. Mr. President, I am pleased to join my distinguished colleague from Michigan, Senator LEVIN, in supporting an amendment that provides additional funds for the elderly feeding program, $875,000, to pay outstanding claims for meals served in fiscal year 1979.

The elderly feeding program and its related nutrition services evolved from nutrition demonstration projects first funded under the Older Americans Act Amendments of 1968. These projects were designed to develop techniques for improving diets, fostering social interaction, and facilitating the delivery of social services for elderly persons. The meals are intended to improve the health of the program participants, and to attract isolated older persons to a place where services and opportunities are available.

Congregate nutrition services are available at least once each day, 5 days per week along with outreach, transportation, counseling, recreation, nutrition education, information and referral, and other support services. In many cases, congregate "meal sites" have evolved into senior centers which act as community focal points for the needs of older persons. In addition, for many elderly people congregate meals, or "meals on wheels," may be the difference between continuing to live independently and being institutionalized.

Home delivered nutrition programs are available for those individuals in need. Home delivered meals are served at least once per day to individuals who are homebound by reason of illness, incapacitating disability, or who lack adequate transportation to a congregate site.

All of these services are utilized by a large and still growing number of elderly Americans, with many more still on a waiting list. In Detroit, for example, the home-delivered meal service covers 1,500 people. The waiting list is 1,500. The estimated need is 16,800. In 1981, the Detroit Health Department delivered two meals a day at a cost of $1.43 to the homebound, utilizing over 800 volunteers to do the delivery. With increased funds, larger numbers of needy people will be able to be helped rather than having to live with hunger.

Funding for these valuable services is allotted to State agencies on aging which in turn award funds to area agencies on aging for administration within specified planning and service areas. Area agencies provide funds to agencies and organizations for the delivery of a wide range of supportive services—with special emphasis on access, in-home and legal services—and congregate and home-delivered nutrition services.

Despite the importance of this program, Federal reimbursement of 1979 State claims has still not occurred. For example, eight States—Pennsylvania, Georgia, South Carolina, Michigan, Wisconsin, Iowa, Utah and Arizona—still have claims that have not yet been paid. The toal cost of these claims is $863,846. The Department of Agriculture acknowledges the validity of these claims and supports efforts to resolve this problem. The amendment that is currently being proposed by Senator LEVIN would remedy this situation by providing enough funds to make up for this particular deficit.

I join with Senator LEVIN in his commitment to these elderly feeding programs and urge all of my colleagues to support this amendment.

The PRESIDING OFFICER. Is there further debate?

Mr. LEVIN. Mr. President, let me just in passing thank the floor managers of this bill for their cooperation, both of them, and their staffs, who worked very closely with us on this. It is a very small item, and it took more staff time probably than the amount would indicate it should, but the amount is a real one and the principle is an important one that this Government should pay its debts. Both floor managers of this measure have responded to that principle I think beautifully, and I am very grateful to them.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan.

The amendment (No. 1443) was agreed to.

Mr. COCHRAN. Mr. President, we are at a point now where we have just a few amendments that are scheduled to be considered.

I hope Senators who do have amendments that are in order will come to the Chamber and call up these amendments so we can move along in the consideration of the bill.

I am hoping that there will be no more than maybe two or three record votes on the remainder of these amendments that are to be considered.

In the meantime, Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO 1444

Mr. HELMS. Mr. President, I have an amendment which I sent to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an amendment numbered 1444.

Mr. HELMS. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 44, strike "for the period October 1, 1983 through August 15, 1984" on lines 20 and 21;

On page 47, strike ", for the period October 1, 1983 through July 10, 1984" on lines 14 and 15; and

On page 48, strike ", for the period October 1, 1983 through September 6, 1984" on lines 6 and 7.

Mr. HELMS. Mr. President, I offer this amendment in order to have truth in packaging in this appropriations bill. Just as I commended the chairman and members of the committee last year for their honest approach to the budget numbers, this year I feel obliged to raise an objection to the large increases for food stamps and other nutrition programs which are virtually concealed in this bill.

I make that observation as chairman of the authorizing committee, the Committee on Agriculture, Nutrition, and Forestry.

It is appropriate that this bill is for the fiscal year 1984 because the report, like the book, has some confusing language in it. I know it is not intentional, but nonetheless a casual reading of the report would not precisely disclose what it involved.

The contention is made that "The amount provided is the same as the budget requests" as if—and I repeat for emphasis—as if the appropriation is the same as the request by the administration.

Mr. President, this is not the case at all. Rather the same funding has been recommended but for a shorter period of the fiscal year; in other words, only partial-year funding.

The net result is that the full-year funding for all of these programs could be, and undoubtedly will be, substantially above the request made by the administration.

I wish to be careful in my choice of words. I think we should stop playing games with the numbers in terms of Federal spending. Whatever we intend to spend, we should be forthright and precise as to what we contemplate spending and what we are voting to approve in terms of spending.

We are not doing that when we approve partial-year funding, particularly when the amount for the partial year is the same as the funding for the entire previous year.

It is a little bit ironic that this legislation comes before us at the very time we are considering the fiscal year 1984 budget. If we pass this bill as it stands, the Senate will be acknowledging that we have given up on spending restraint, and if it passes in its current form, I believe that the President will veto this bill, and I frankly could and would not blame him for doing so.

It should be clear that this bill is a prime candidate to be one of the first, if not the first, appropriations bills to be vetoed because of the excessive spending contained in it.

I do not mean to be blunt, but I think we should have truth in spending, and I do not suggest when I say that there is any deliberate attempt to conceal what we are spending. There just is not sufficient clarity in the way we are presenting the figures for it to be fully understood by all Senators let alone the public and let alone the taxpayers who, after all, are footing the bill.

As to this amendment, all it would do, Mr. President, is this: It would strike the partial-year dates which are included in the bill. These are included for the child nutrition programs, for the special supplemental food program for women, infants, and children, and the food stamp program.

The effect would, therefore, be to provide 12 months funding rather than the 10 and 11 months appropriation periods which are included.

And I point out that if these appropriations are prorated out to full-year funding, the increase in spending would be well over $1 billion.

Now, I am among those Senators who feel we have seen enough of these supplemental appropriations bills. I think it is bad enough when we have to increase spending because of unforeseen circumstances but when we build into the spending process a plan to spend more money in a future supplemental then I do not think we are being fair to ourselves and I do not think we are being fair to the taxpayer.

If more money is needed down the line, we can take a look at that through the authorizing committee. We can study it and we can report out whatever is necessary. But to engage in this partial-year funding mechanism, which disguises how much money we really intend to spend, is not fair to anyone involved.

Having said that, Mr. President, I have been advised by the White House that the President supports this amendment as consistent with his budget, and I say again that if we do not adopt this amendment, we are running not a slight risk, but a great risk, that this entire bill will be vetoed. I guess it boils down to whether we want to hold to what has been reported or whether we want a bill.

The President may decide to veto this bill for other reasons even if this amendment is adopted. But the point is we will lessen the chance somewhat of a veto if this amendment is adopted, and I urge its adoption.

Mr. COCHRAN. Mr. President, first let me state that I share with the Senator from North Carolina the hope that the President will sign this appropriations bill. There is a considerable amount of funding in the bill for programs that the Senator from North Carolina fully supports, and that the Senator from Mississippi fully supports. We are trying to make sure that we have adequate resources available for soil conservation practices and many other programs that are vitally important to the well-being of those who are trying to make a living on the farms and on the ranches of this great Nation. We know they are hard pressed in their effort to do that.

As we pointed out earlier today, we are trying our very best to be forthright and candid with the Senate in the area of funding levels for the child nutrition, food stamp, and WIC programs.

As I pointed out at that time, the President's request is accompanied by a request for legislation that would involve substantial changes reducing the costs of the feeding programs, specifically the child nutrition programs and the food stamp programs.

At this time, however, Congress has not enacted those legislative changes, so that under current law and under eligibility standards prescribed by current law, the amount of funding that is being requested, by the President is going to be inadequate over the course of the next fiscal year to pay for the programs.

The reason for that is that eligibility for benefits under these two programs is defined by law. The Government makes a commitment that if a person has a certain income level, and if other qualifications are met, he is entitled to benefits under the child nutrition programs or the food stamp program. This committee, in my judgment, ought to provide whatever level of funding is required so that the Government can meet its obligations under the law that creates that eligibility for benefits.

If we were to decide we are spending too much money for food stamps or in the child nutrition programs, we should not refuse the appropriate and adequate level of funds to cover the Government's obligations. Rather, the Congress ought to reduce the cost of the program by eliminating from eligibility persons who are now by the terms of the law eligible for the benefits.

I think we do not really have an argument about the fact that the Government has an obligation once it defines that obligation by law to provide the funds to meet the obligation. That is really what this amendment brings to the Senate's attention.

The Senator is absolutely correct that unless there are changes made by law in eligibility, the amount of money appropriated in this bill will not be

adequate to fully fund the program for the entire fiscal year 1984. We point out in the bill the dates on which it is anticipated that the Government will run out of money in these programs. We specify those dates not for the purpose of trying to hide anything, but for the purpose of trying to show clearly to the Senate and to anyone interested the fact that the requested funding is going to be inadequate unless changes are made in the eligibility of recipients under this program.

As a matter of fact, it is expected that the costs of these programs will be some $1.3 billion more than the funding level provided in this bill unless changes are made legislatively.

I am fully confident that if the changes are not made, the administration will come in with a request for a supplemental appropriation, as they have done this year.

I might say that in the recently passed supplemental appropriations bill there was provided over $1 billion for the food stamp program because, while some changes were made in eligibility, and some costs were restrained, we still incurred obligations under the law that exceeded the anticipated levels at the beginning of the last fiscal year.

Last year, there was a difference in the way this committee responded to this situation. Senators may remember that because of the prolonged process in getting passage of a budget resolution and the delay that that caused to appropriations bills coming to the floor, we were almost through the legislative year before we had an opportunity to bring the appropriations bill for the Department of Agriculture and related agencies to the floor. There was no real time available for any legislative changes that would have brought the cost of the program in line with the administration's budget request.

This year there is time available, so rather than appropriate now the total amount expected to be needed to fully fund the program under existing law, we simply appropriate the amount requested, but point out that unless existing law is changed, those funds will be exhausted on certain specified dates during the next fiscal year.

This gives the legislative committee ample opportunity to work its will if changes are needed to comply with the President's request. The President has not just requested a certain level of funding, but the administration has also requested that legislative changes be made so that the requested appropriation will provide adequate funding for the benefits as defined by law.

That is the reason why the dates are included in the bill, and I am hoping the Senate will understand the issue here. It certainly is not that the committee is trying to hide anything or disguise the real cost of these programs. We all know that these, particularly the food stamp program, have become very expensive items and that is the big ticket item that is identified in these amendments.

I am hoping the amendment will be rejected, although I certainly sympathize with the motives of the Senator from North Carolina in bringing this to the attention of the Senate. I assure him and others that there certainly is no effort being made to disguise the truth about this. More funds are going to be needed unless legislative changes are made.

Mr. HELMS. Mr. President, I certainly appreciate the comments of my friend from Mississippi. I point out that he and I work very closely together on the Committee on Agriculture, Nutrition, and Forestry, and there is no member of that committee for whom I have greater respect.

To whatever extent we have a disagreement on this, certainly there is not any suggestion whatsoever of concealment on his part. It is the circumstances which do whatever concealing is in existence in the measure.

The question is this: Which comes first? Do we set an appropriations level and then determine how much has to be done to the authorizing legislation, as we have done in the past? Do we operate in an orderly manner and let the authorizing committee, which is the Committee on Agriculture, Nutrition, and Forestry, determine legislative changes under its purview, which is uniquely the responsibility of the committee?

That is the point the Senator from North Carolina is making. Are we going to take responsible action or are we going to just assume that no legislative changes will be made? That is what this bill proposes to do and certainly that is the effect.

Now, some Senators may say that this bill is policy neutral. But it is not neutral. The attempt, for whatever may be its motivation, is to set in motion a guarantee that a supplemental request will be needed next year. The same result may be a consequence of the proposal of the Senator from North Carolina, but at least this amendment would have been a straightforward effort to set the process straight. That is the reason, as chairman of the relevant authorizing committee, I do not believe we ought to continue to be involved in partial year funding. We need to appropriate the proper amount at the outset for the entire fiscal year.

Let me say, again, Mr. President, to the distinguished occupant of the chair, to Senators present here on the floor, and to Senators who may be listening in their offices on the loudspeakers, that we run a very real risk of a veto of this bill. Now, I will not say to Senators that adoption of the pending amendment will eliminate that risk, but certainly this amendment will diminish the risk of veto. And it may boil down to whether we want to reject this amendment or do we want a bill that will be enacted into law and signed into law by the President.

So I urge approval of the amendment. I respectfully differ with my friend from Mississippi. This is one of the rare times that we do differ, because he is a distinguished Member of the Senate, he is my friend and I treasure my association with him on the Committee on Agriculture, Nutrition, and Forestry.

I hope the amendment will be approved.

The PRESIDING OFFICER. Is there further debate?

Mr. EAGLETON. Mr. President, I would like to make three points with respect to the amendment as offered by the Senator from North Carolina.

Point one, the bill reported by the committee funds the nutrition programs under a current services concept. What the committee has proposed is a hold-harmless approach, allowing the authorizing committees to take action on the legislative proposals of the administration if they desire to do so.

However, what we are not proposing is that the benefits under these programs be reduced while the authorizing committees decide if they want to reduce them or not. There is a sequence of events in the Congress. The sequence, in brief, is that authorizing comes first. They decide what the parameters of the program are and then funds are appropriated pursuant to that authorization.

Point two, to stretch out the food stamp dollars for the full fiscal year may very well result in across-the-board benefit reductions for all of the program participants. This would do nothing to reduce fraud or abuse in the program, but instead would mean that every poor person, whether they be an elderly person or a child or a working parent, would have their food allotment reduced. Food banks and soup kitchens throughout the country have seen dramatic increases in participation in their programs by food stamp recipients who cannot make their food dollars stretch out for the whole month. The pending amendment would only make that situation worse, in my opinion.

Finally, point three, with respect to WIC—and I think the Senator's amendment is particularly egregious, to say the least, with respect to WIC—the President's budget proposed a level of funding which would only support a participation level of 2.14 million people. The administration's current estimates are that WIC participation will reach between 2.8 and 3 mil-

lion people by the end of fiscal year 1983. The pending amendment could, therefore, result in 900,000 participants—and participants in WIC are pregnant women, infants, and children that have been shown to have a nutritional deficiency—900,000 such participants would be dropped from the program.

So, from my point of view, for those three reasons, Mr. President, I recommend voting against the Helms amendment.

(Mr. ABDNOR assumed the chair.)

Mr. DOLE. I will just take 1 minute. Mr. President, I wish to join the Senator from Mississippi and the Senator from Missouri in opposition to the amendment. I think, first of all, if there are still areas of waste or fraud that we ought to address in the food stamp program, then that is the responsibility we have in the authorizing committee and one that we are going to fulfill. There is always room for improvement in a program like food stamps, but, during the last 2 years we have gone about as far as we can in benefit reductions to recipients.

As chairman of the Nutrition Subcommittee, I think I have made it clear over the past few months that we are not just going to turn our backs, because we cannot do any more in food stamps. I think we have an obligation in all the programs over which we have jurisdiction to continuously monitor these programs to determine whether or not we can reduce the Federal cost and reduce the cost to the taxpayers in ways that will more effectively target benefits and increase program efficiency.

Overall, we have done a substantial amount of cost reduction in the food stamp program—over $2 billion per year—and in the child nutrition programs. Maybe we ought to be spending a little more on the WIC program, because it is very cost effective.

It would be my hope that we could defeat this amendment for the reasons outlined by the distinguished subcommittee chairman and ranking minority member. I think they have presented an evenhanded approach to funding the domestic nutrition programs.

If we are going to force the Congress, directly or indirectly, to either reduce benefits across the board or somehow make massive budget cuts in the program, I think that is a choice that we should properly make through the authorizing legislation, and the regular committee process.

Mr. President, for the first time since 1977, we do not have to make any major changes in the food stamp program. Last year, the program was reauthorized for 3 years, and this year we do not have to raise the spending ceiling in order to accommodate supplemental appropriations. Also, we do not have to fulfill any reconciliation instructions. After the layer upon layer of massive changes during the last 6 years, this program deserves a period of stability.

In my view, we have made a lot of progress in addressing problem areas in the nutrition programs, and a lot of it is due to the efforts of the distinguished chairman of the committee, Senator HELMS. but we have to monitor these programs continuously. We have a few social programs under the jurisdiction of the Finance Committee—medicaid, welfare, and other programs. I would indicate that in some of those areas we have gone about as far as we can go in budget cuts. There are a lot of other areas on the spending side over which we have jurisdiction that have hardly been touched at all. We are looking at some of those programs in the Senate Finance Committee to see if we can make appropriate savings.

Mr. President, the fiscal year 1984 agriculture appropriations bill which we are now considering contains partial-year funding for the Federal nutrition programs: it funds the special supplemental food program for women, infants, and children (WIC) through July 10; it funds the school lunch and other child nutrition programs through August 15; and it funds the food stamp program through September 6.

The Appropriations Committee funded these programs for only part of the year, because the funding levels contained in the President's request were too low to carry the programs through the full year unless major benefit reductions are enacted.

Therefore, I oppose the amendment introduced by the chairman of the Agriculture Committee. This amendment would maintain the same funding level as in the committee bill, but it would require this funding to be spread over the entire 12 months.

EVENHANDED APPROACH OF APPROPRIATIONS COMMITTEE

Mr. President, the Agriculture appropriations bill reported by the committee under the distinguished leadership of the Senator from Mississippi, Mr. COCHRAN, represents an evenhanded approach to funding for domestic food assistance.

With regard to the food stamp program, this bill provides the amount of funds requested by the administration, but specifies that these funds are available only through September 6, 1984. If the Congress subsequently enacts the administration's proposed budget cuts totaling $766 million in food stamps, then no additional food stamp funds will be needed. If Congress does not enact these budget reductions, supplemental appropriations would be provided next year to carry the program through the remainder of September.

Spreading the funding level for child nutrition programs over the full year is an attempt to gain leverage for the administration's proposed budget cuts of $300 million, which would be in addition to the $1.5 billion a year in cuts enacted in 1981. These cuts reduced child nutrition funding by 30 percent and school lunch enrollment by about 3 million children.

The appropriations bill provides $1.060 billion for WIC through July 10, in order to maintain WIC participation at 2.8 million persons. This is the number of low-income women, infants, and children that CBO estimates will be participating in WIC at the end of fiscal year 1983. Under the Helms amendment, the $1.060 billion would be spread over the entire 12 months of fiscal year 1984, which USDA estimates would serve 2.15 million persons next year.

CONCLUSION

Mr. President, this amendment should be defeated, because it implies benefit reductions for the nutrition programs if the partial-year funding is stretched over the entire 12-month 1984 fiscal year.

Mr. President, I oppose the amendment.

Mr. COCHRAN. Mr. President, I remember when I served in the House of Representatives there was a great debate about the fact that the food stamp program had gone completely out of control. The distinguished occupant of the chair probably remembers that debate when it was first brought up. There was a great deal of argument over how we would control the cost of this runaway program, the cost that was going to escalate to as much as $5 billion a year.

There were great differences of opinion about how you go about controlling the cost, because it was a period of high unemployment and economic recession. The cost of the program went up automatically, in effect, because if a person was entitled to benefits under the terms of the law, the Government appropriated the dollars to meet its obligation.

There are a lot of programs like that.

It is not a pure entitlement program, because it does come up each year for direct appropriations under the law by which it was created. But it was never intended, and this came out in debate several years ago and I am sure other Senators are familiar with this, that the Congress would act to control the program by capping the level of spending available during each fiscal year. That was tried. That is what is being attempted here, in a way.

I am not suggesting that the amendment is not straightforward, because it certainly is. But what it would do, in effect, is hold the level of funding at a point below which we anticipate the programs to actually cost.

The point is that in the House we tried to legislate control of this program by imposing a cap—by saying, "During this fiscal year, we will spend no more than $5 billion on the food stamp program."

As I remember, about 8, 9, or 10 months of the year went by, and we were about to run into that cap. The question became, did the Congress sit back and watch all of the beneficiaries of these programs lose total benefits or suffer across-the-board cuts for the balance of the year by the Congress abiding by the legislated cap?

What happened was, the Congress voted to raise the cap. We went through this every year—imposing a cap and then voting to raise it.

I am afraid that is what we will be putting ourselves through, Mr. President, if we adopt this amendment. We would, in effect, be approaching a limit on funding that we know is not going to be adequate to provide benefits to those who are eligible for benefits under the law.

For that reason, I am hoping the Senate will see that we are making an effort to fully acquaint Senators with the facts about the inadequacy of the requested funding unless legislative changes are made to cut the cost of the program. If we are going to cut the cost of the program, these cuts ought to be made by the authorizing committee, not by the Appropriations Committee.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the Chair.

First let me point out for the record that what we are talking about is a food stamp program which would cost for this fiscal year $11.6 billion. The emphasis of this amendment, Mr. President, is not on the merits of individual programs. What we are really talking about is the integrity of the appropriations process.

This happens to be the first and only bill reported by the Appropriations Committee which includes partial-year funding, the only one. All the other programs in all the other Departments have been given full-year funding. I have to wonder what is so unique about these programs that causes us to make an exception in the process for them alone.

I am willing to enter into any sort of agreement with my friends who are members of the Agriculture Committee and Senators who are not. But I agree with the administration, and the administration agrees and supports this amendment, that partial-year funding involves arithmetic that will mislead not only Members of Congress but the public in terms of the cost. This is the reason that the cost of government has escalated.

I have worked with Senator DOLE in so many areas to reduce spending. It pains me to differ with Senator DOLE and Senator COCHRAN, two of my best friends in the Senate. But I just do not understand why we should single out one group of programs for partial-year funding when partial-year funding has not been included for any other department or any other program in Government.

The reason why the Appropriations Committee did not recommend higher levels of funding is, perhaps, that the total cost would have given great concern to a lot of people who are watching the cost of the Federal Government.

I am in sympathy with a lot of programs, but I think we ought to be up front and forthright and say what they are going to cost. Then, if not enough has been appropriated, the authorizing committee can monitor it, study it, and make whatever recommendations to the Senate that would be appropriate.

I say to the Senator as chairman of the Agriculture Committee I will be glad to call hearings and schedule a markup for anything that is necessary, but I am just arguing for the process. I confess a measure of concern when we single out one group of programs for partial-year funding. If we start this sort of business with one program, it is going to spill over into others.

The budget process of the Senate is already in trouble. We all know that. It may be that it has broken down. But I certainly do not want the appropriations process to follow in that sort of difficulty. I frankly have that concern, Mr. President, if this amendment is not approved.

I say again the administration strongly supports this amendment, and I would hope we would approve it.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there any further debate?

Mr. MELCHER. Mr. President, I wonder if it would be objectionable before we go to the vote on the Helms amendment to lay it aside temporarily to get an amendment that I have that is going to be accepted?

Mr. HELMS. Mr. President, I certainly have no objection to accommodating the Senator if that is his wish.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

AMENDMENT NO. 1445

(Purpose: To provide an appropriation of $5,000,000 for additional Animal Cancer Research within the amount appropriated in the bill)

Mr. MELCHER. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Montana (Mr. MELCHER) proposes an amendment numbered 1445.

On page 8, line 10, strike out the period and insert the following: ": *Provided further*, That of the appropriations hereunder not less than $5,000,000 shall be available for additional animal cancer research to carry into effect the provisions of Public Law 96-469."

Mr. MELCHER. Mr. President, this proposal is not an add-on. It is earmarked within the $57,682,000 of basic research money that is available to Agricultural Research Service. We would include an additional $5 million for animal cancer research.

There is in the bill, contemplated among that $57 million-plus for research by the Agricultural Research Service, approximately $7,250,000 that would be for animal or bird cancer research. I am suggesting that we earmark another $5 million of those funds in order to make sure that we have a greater effort in animal cancer research. There is considerable need for pursuing it with a little more vigor.

The amount we appropriate annually for our research on humans is about a billion dollars to the National Institutes of Health. So the amount I am proposing seems very low. Nevertheless, it is a very important part of the cancer research we do.

We do have economic loss in domestic animals that are produced for consumption here in this country or for export, so that is one facet of it. To minimize that economic loss, we need to continue our cancer research on animals through the Department of Agriculture annually. The two dovetail together—that is, the research we do on animals and the research we do for human beings.

As an example of that, there has been an outstanding breakthrough in animal cancer research that occurred just this past spring, when the Ribi Immune Chem Research Laboratory in Hamilton, Mont., got licensed by the Department of Agriculture for immunotherapy treatment for cancer eye in cattle and sarcoid tumors in horses. This type of vaccine proved to be successful in the tests that were run on both cattle and horses, ranging from 75 percent up to 93 percent cure.

This laboratory has told us that they filed with the Food and Drug Administration a notice of claimed investigational exemption for a new drug. If that is accepted by the Food and Drug Administration, the Ribi Immune Chem Co. will conduct clinical trials to determine the treatment's value for use in combating human cancer.

In addition to that, Mr. President, at this spring's meeting of the American Association for Cancer Research, a couple of very interesting papers were given on the subject of the "Effect of

Antibodies to Bacteria Containing Choriogonadotropin Like Protein on Growth of a Transplantable Tumor" and another one along the same line, the "Effects of Antibodies to Choriogonadotropin (CG) in Malignant Growth. III. Lewis Lung Carcinoma."

I mention all this, Mr. President, because the public law we are adding earmarked funds for specifically allows for grants to be given to colleges and accepted research laboratories throughout the country to further the research for animal cancer control.

I strongly urge the acceptance of the amendment. I think it is very reasonable and wise.

Mr. COCHRAN. Mr. President, I thank the Senator from Montana for offering this amendment and bringing to the attention of the Senate the fact that it is very important for the Government to continue its work in animal cancer research. We are advised by the Agricultural Research Service that it is conducting about $6.5 million of research in this area in fiscal year 1983. The amendment would clearly indicate the intention of Congress that a specified amount of money would be made available for this work. It does not add any new money to the bill. We recommend that the amendment be accepted.

Mr. EAGLETON. Mr. President, I have no objection to the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 1445) was agreed to.

Mr. MELCHER. Mr. President, I wonder if it would still be agreeable and in order for a brief colloquy to transpire between myself and the manager of the bill.

Mr. COCHRAN. Mr. President, I ask unanimous consent that we set aside the Helms amendment for the purpose of a colloquy with the Senator from Montana.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I understand the legislative appropriations conference report is at the desk. Is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, I hope we can take that up next if the managers would agree to temporarily lay aside the pending measure. I believe the minority leader is on his way to the floor.

I am told that the Senate is ready for the vote now on the Helms amendment. I believe we can do the legislative appropriations conference report, though, without a rollcall. If we could wait just a minute to see if I can clear that, it might expedite it.

Mr. COCHRAN. If the Senator will yield, we can proceed, then, with the colloquy.

Mr. BAKER. Yes, Mr. President.

Mr. MELCHER. Mr. President, the Senate recently approved, in the Senate supplemental appropriations bill, an add-on for soil conservation work, approximately $35 million. The add-on is in several conservation programs for use throughout the United States. Since that supplemental appropriations conference report has not come back for final action by the Senate, I ask the chairman of the Subcommittee on Agricultural Appropriations if it is likely that that amount or nearly that amount will be accepted by the conferees, and if whatever is accepted by the conferees is included in this bill, can they be melded together for a sensible, sound conservation effort in the coming year?

Mr. COCHRAN. Mr. President, if the Senator will yield, we are very hopeful that the amount of funding that is contained in this bill, together with that provided in the supplemental appropriations, will be adequate to help move us forward in the effort to protect the soil and water resources of the Nation. We know we are confronted with an increasingly serious problem when we find in our farmland resources today—we are seeing some 10 times per acre per year eroding away into the streams, silting up the streams, and causing flood damage in many areas.

In my State, I know we have seen the ravages of the flooding and erosion occur in a very dramatic way in this year.

There is, in this bill, about $600 million for the Soil Conservation Service and about $220 million for the Agricultural Stabilization and Conservation Service. These are conservation agencies which are charged with the responsibility of administering technical assistance programs for farmers, landowners, and ranchers, providing funds which, in many cases, are matched with local funds to help create protection for land and water resources.

I cannot assure the Senator, however, that the conference on this bill or on the supplemental appropriations bill will keep the total amount of funds that we have provided for soil conservation activities, but I can assure the Senator, and do that in behalf of the Senate, that I will urge acceptance of the Senate figures that were added in the supplemental.

I do know, too, that the chairman of the House Appropriations Committee is a strong proponent and supporter of soil conservation activities. I am optimistic that a substantial portion of the funds that were included in that bill at the request of the Senator from Montana will be retained. I could be surprised, and I cannot make that assurance, but I certainly do assure the Senator that I will make every effort to see that a substantial amount of those funds or all of them are retained in that bill.

I appreciate the Senator for bringing that to our attention at this time.

Mr. MELCHER. I thank my friend from Mississippi.

Mr. COCHRAN. Mr. President, inasmuch as the majority leader was considering asking that we turn to the legislative appropriations conference report and I do not see him on the floor at this time, I suggest the absence of a quorum.

The PRESIDING OFFICER. (Mr. WILSON). The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, as I indicated earlier, the conference report on the legislative appropriations bill is here. I have consulted with the minority leader, with the distinguished chairman of the Rules Committee, and the chairman of the Appropriations Committee, and I am prepared on this side to go forward with consideration of that conference report at this time, if the minority leader is.

Mr. BYRD. Mr. President, I have checked the matter on this side. There is no objection.

Mr. BAKER. I thank the minority leader.

Mr. President, then I ask unanimous consent that the business pending before the Senate be temporarily laid aside and the Senate proceed to the consideration of the conference report on H.R. 3135, the legislative branch appropriations conference report.

I further ask unanimous consent that there be a 2-minute time limitation to be equally divided.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

LEGISLATIVE BRANCH APPROPRIATIONS, 1984—CONFERENCE REPORT

Mr. D'AMATO. Mr. President, I submit a report of the committee of conference on H.R. 3135 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The bill clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3135) making appropriations for the legislative branch for the fiscal year ending June 30, 1984, and for other purposes, having met, after full and free conference, have

agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of today, June 29, 1983.)

Mr. D'AMATO. Mr. President, the conference agreement on H.R. 3135, legislative branch appropriations for fiscal year 1984, provides $1,473 million in new budget authority for the legislative branch. This is $2 million under the amount provided on this floor last week in Senate consideration of the bill. I stated at that time that the committee-reported bill was six-tenths of 1 percent over the 1983 level, including funds provided in the Senate-passed version of the supplemental appropriations bill. Now we are five-tenths of 1 percent over the same fiscal year 1983 level.

On the substantive Senate amendments to the legislative branch appropriation bill, the following outcome was reached. The conferees recommend an appropriation of $14,653,000 for the Office of Technology Assessment and a new personnel ceiling of 139. For the Architect of the Capitol, the agreement provides $167,000 for additional security equipment for the Capitol Grounds, $90,000 for new office intrusion alarm installations, no funds for a computerized graphics system, and report language which retains the driver-messenger in the Office of the Architect but which precludes him from transporting the Architect or other employees of the Office between their domiciles and place of employment. The agreement also deletes language requiring the Commission on the West Central Front to appoint a consulting architect to aid in the restoration of the west front. This issue will be before the conferees on the supplemental appropriations bill, which contains the funds for the west front restoration, and I intend to pursue it further in that forum. Finally, Mr. President, the conferees agreed on the appropriation of $36,620,000 and five new positions for the Congressional Research Service and language providing for additional review of the CRS budget. However, that language requiring the additional budget review was deleted on the House floor earlier today on a point of order. The result is that the agreement before the Senate appropriates $36,620,000 for CRS and makes no change in the way the CRS budget is handled.

If no other Senators wish debate, I urge the Senate to adopt the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. BYRD. Mr. President, I yield back the time on my side.

Mr. D'AMATO. I yield back my time.

The conference report was agreed to.

Mr. D'AMATO. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, the conference report on H.R. 3135 provides $1.5 billion in new budget authority for fiscal year 1984. Including prior-year outlays, fiscal year 1984 outlays associated with the reported bill would be $1.5 billion.

These amounts are consistent with the assumptions in the fiscal year 1984 first concurrent resolution on the budget.

I support the conference report and commend the subcommitte for keeping spending within the budget and the President's request.

I ask unanimous consent that a table comparing the bill to the fiscal year 1984 budget resolution, the House bill, and the President's request be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

LEGISLATIVE BRANCH SUBCOMMITTEE SPENDING TOTALS

[In billions of dollars]

	Fiscal year 1984	
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed	[1]	0.2
H.R. 3135, conference agreement	1.5	1.3
Total for legislative branch subcommittee	1.5	1.5
Senate subcommittee allocation under first budget resolution	1.5	1.5
H.R. 3135:		
President's request	1.5	1.5
House-passed [2]	1.5	1.5
Senate-passed	1.5	1.5
Conference agreement	1.5	1.5

[1] Less than $50 million.
[2] Assumes Senate level for Senate operations.

Mr. D'AMATO. Mr. President, I ask unanimous consent that the amendments reported in disagreement be considered en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will state the amendments in disagreement.

The bill clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 1 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SENATE

MILEAGE OF THE VICE PRESIDENT AND SENATORS AND EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, AND MAJORITY AND MINORITY WHIPS

MILEAGE OF THE VICE PRESIDENT AND SENATORS

For mileage of the Vice President and Senators of the United States, $60,000.

EXPENSE ALLOWANCES OF THE VICE PRESIDENT, THE PRESIDENT PRO TEMPORE, MAJORITY AND MINORITY LEADERS, AND MAJORITY AND MINORITY WHIPS

For expense allowances of the Vice President, $10,000; the President Pro Tempore of the Senate, $10,000; Majority Leader of the Senate, $10,000; Minority Leader of the Senate, $10,000; Majority Whip of the Senate, $5,000; and Minority Whip of the Senate, $5,000; in all, $50,000.

SALARIES, OFFICERS AND EMPLOYEES

For compensation of officers, employees, clerks to Senators, and others as authorized by law, including agency contributions and longevity compensation as authorized, which shall be paid from this appropriation without regard to the below limitations, as follows:

OFFICE OF THE VICE PRESIDENT

For the Office of the Vice President, $1,031,000.

OFFICE OF THE PRESIDENT PRO TEMPORE

For Office of the President Pro Tempore, $139,000

OFFICES OF THE MAJORITY AND MINORITY LEADERS

For Offices of the Majority and Minority Leaders, $881,000.

OFFICES OF THE MAJORITY AND MINORITY WHIPS

For Offices of the Majority and Minority Whips, $291,000.

CONFERENCE COMMITTEES

For the Conference of the Majority and the Conference of the Minority, at rates of compensation to be fixed by the Chairman of each such committee, $506,000 for each such committee; in all, $1,012,000.

OFFICES OF THE SECRETARIES OF THE CONFERENCE OF THE MAJORITY AND THE CONFERENCE OF THE MINORITY

For Offices of the Secretaries of the Conference of the Majority and the Conference of the Minority, $156,000.

OFFICE OF THE CHAPLAIN

For Office of the Chaplain, $83,000.

OFFICE OF THE SECRETARY

For Office of the Secretary, $6,602,000.

ADMINISTRATIVE, CLERICAL, AND LEGISLATIVE ASSISTANCE TO SENATORS

For administrative, clerical, and legislative assistance to Senators, $94,900,000.

OFFICE OF THE SERGEANT AT ARMS AND DOORKEEPER

For Office of the Sergeant at Arms and Doorkeeper, $32,123,000.

OFFICES OF THE SECRETARIES FOR THE MAJORITY AND MINORITY

For Offices of the Secretary for the Majority and the Secretary for the Minority, $775,000.

AGENCY CONTRIBUTIONS

For agency contributions for employee benefits, as authorized by law, $15,354,000.

OFFICE OF THE LEGISLATIVE COUNSEL OF THE SENATE

For salaries and expenses for the Office of the Legislative Council of the Senate, $1,280,000.

OFFICE OF SENATE LEGAL COUNSEL

For salaries and expenses of the Office of Senate Legal Counsel, $545,000.

EXPENSE ALLOWANCES OF THE SECRETARY OF THE SENATE, SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE, AND SECRETARIES FOR THE MAJORITY AND MINORITY OF THE SENATE

For expense allowances of the Secretary of the Senate, $3,000; Sergeant at Arms and Doorkeeper of the Senate, $3,000; Secretary for the Majority of the Senate, $3,000; Secretary for the Minority of the Senate, $3,000; in all, $12,000.

CONTINGENT EXPENSES OF THE SENATE

SENATE POLICY COMMITTEES

For salaries and expenses of the Majority Policy Committee and the Minority Policy Committee, $856,000 for each such committee; in all, $1,712,000.

INQUIRIES AND INVESTIGATIONS

For expenses of inquiries and investigations ordered by the Senate, or conducted pursuant to section 134(a) of Public Law 601, Seventy-ninth Congress, as amended, section 112 of Public Law 96-304 and Senate Resolution 281, agreed to March 11, 1980, $45,698,000.

SECRETARY OF THE SENATE

For expenses of the Office of the Secretary of the Senate, $390,000.

SERGEANT AT ARMS AND DOORKEEPER OF THE SENATE

For expenses of the Office of the Sergeant at Arms and Doorkeeper of the Senate, $32,869,000.

MISCELLANEOUS ITEMS

For miscellaneous items, $9,174,000.

STATIONERY (REVOLVING FUND)

For stationery for the President of the Senate, $4,500, for officers of the Senate and the Conference of the Majority and the Conference of the Minority of the Senate, $34,500; in all, $39,000.

ADMINISTRATIVE PROVISIONS

SEC. 101. (a) Effective October 1, 1983, there is established within the Offices of the Majority and Minority Leaders the positions of Assistant to the Majority Leader for Floor Operations and Assistant to the Minority Leader for Floor Operations, respectively. Individuals appointed to such positions by the Majority Leader and Minority Leader, respectively, shall receive compensation at a rate fixed by the appropriate Leader not to exceed the maximum annual rate of gross compensation of the Assistant Secretary of the Senate.

(b) Effective October 1, 1983, the positions of Assistant to the Majority Leader for Floor Operations and Assistant to the Minority Leader for Floor Operations established by the Supplemental Appropriations Act, 1977 (2 U.S.C. 61h-5), are abolished.

SEC. 102. (a) Section 506(e) of the Supplemental Appropriations Act, 1973 (2 U.S.C. 58(e)) is amended—

(1) in the first sentence thereof, by inserting ", essential travel-related expenses (as defined hereafter in this subsection)," immediately after "actual transportation expenses"; and

(2) by inserting immediately after the third sentence thereof, the following new sentence: "As used in this subsection, the term 'essential travel-related expenses' means travel expenses (other than transportation expenses) which are essential to the transaction of official business while the Senator or employee is away from his official station or post of duty.".

SEC. 103. (a) Effective October 1, 1983—

(1) there shall be, within the contingent fund of the Senate, a separate account for the "Secretary of the Senate", and a separate account for the "Sergeant at Arms and Doorkeeper of the Senate";

(2) the account for "Automobiles and Maintenance", within the contingent fund of the Senate, is abolished, and funds for the purchase, lease, exchange, maintenance, and operation of vehicles for the Senate shall be included in the separate account, established by paragraph (1), for the "Sergeant at Arms and Doorkeeper of the Senate"; and

(3) the account for "Postage Stamps", within the contingent fund of the Senate, is abolished; and funds for special delivery postage of the Office of the Secretary of the Senate shall be included in the separate account, established by paragraph (1), for the "Secretary of the Senate"; funds for special delivery postage of the Sergeant at Arms and Doorkeeper of the Senate shall be included in the separate account, established by paragraph (1), for the "Sergeant at Arms and Doorkeeper of the Senate"; and postage stamps for the Secretaries for the Majority and the Minority and other offices and officers of the Senate, as authorized by law, shall be included in the account for "Miscellaneous Items", within the contingent fund of the Senate.

(b) Any provision of law which was enacted, or any Senate resolution which was agreed to, prior to October 1, 1983, and which authorizes moneys in the contingent fund of the Senate to be expended by or for the use of the Secretary of the Senate, or his office (whether generally or from a specified account within such fund) may on and after October 1, 1983, be construed to authorize such moneys to be expended from the separate account, within such fund, established by subsection (a)(1) for the "Secretary of the Senate"; and any provision of law which was enacted prior to October 1, 1983, and which authorizes moneys in the contingent fund of the Senate to be expended by or for the use of the Sergeant at Arms and Doorkeeper of the Senate, for his offie (whether generally or from a specified account within such fund) may on and after October 1, 1983, be construed to authorize such moneys to be expended from the separate account, within such fund, established by subsection (a)(1) for the "Sergeant at Arms and Doorkeeper of the Senate".

SEC. 104. From funds available for any fiscal year (commencing with the fiscal year ending September 30, 1984), the Secretary of the Senate shall advance to the Sergeant at Arms and Doorkeeper of the Senate for the purpose of defraying office expenses such sums (for which the Sergeant at Arms and Doorkeeper shall be accountable) not in excess of $1,000 at any one time, as such Sergeant at Arms shall from time to time request; except that the aggregate of the sums so advanced during the fiscal year shall not exceed $10,000.

In accordance with the provisions of this section, a detailed voucher shall be submitted to the Secretary of the Senate by such Sergeant at Arms whenever necessary, in order to replenish funds expended.

SEC. 105. With the approval of the President Pro Tempore of the Senate, the Legislative Counsel of the Senate may make such expenditures as may be necessary or appropriate for the functioning of the Office of the Legislative Counsel of the Senate.

SEC. 106. Funds expended by the Legislative Counsel of the Senate or the Senate Legal Counsel for travel and related expenses shall be subject to the same regulations and limitations (insofar as they are applicable) as those which the Senate Committee on Rules and Administration prescribes for application to travel and related expenses for which payment is authorized to be made from the contingent fund of the Senate.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 2 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SEC. 107. Subsections (a) and (b) of section 106 of the Legislative Branch Appropriation Act 1963 (2 U.S.C. 60j) on or after October 1, 1983 shall not apply to any individual whose pay is disbursed by the Secretary of the Senate; except that, any individual who prior to such date was entitled to longevity compensation under such subsections on the basis of service performed prior to such date shall continue to be entitled to such compensation, but no individual shall accrue any longevity compensation on the basis of service performed on or after such date.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 17 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by said amendment, insert: $36,620,000

Mr. D'AMATO. Mr. President, I move that the Senate concur in the amendments of the House to the amendments of the Senate.

The motion was agreed to.

Mr. D'AMATO. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I thank the Senator from New York for his handling of this conference report, as well as the managers on the minority side.

I especially give my thanks to the manager of the agriculture appropriation bill for permitting us to lay aside that matter in order to proceed with the conference report.

AGRICULTURE APPROPRIATIONS, 1984

The Senate continued with the consideration of H.R. 3223.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from North Carolina.

Mr. COCHRAN. Mr. President, I know of no further debate that anyone seeks on this amendment, and we are prepared to go forward with the vote. I understand that the yeas and nays have been ordered.

The question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. BAKER. I announce that the Senator from Minnesota (Mr. BOSCHWITZ) and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from South Carolina (Mr. HOLLINGS) is necessarily absent.

The PRESIDING OFFICER (Mr. COHEN). Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 24, nays 73, as follows:

[Rollcall Vote No. 177 leg.]

YEAS—24

Armstrong	Helms	Symms
Denton	Humphrey	Thurmond
East	Kasten	Tower
Garn	Laxalt	Trible
Goldwater	Lugar	Wallop
Grassley	McClure	Warner
Hatch	Nickles	Wilson
Hecht	Quayle	Zorinsky

NAYS—73

Abdnor	Eagleton	Metzenbaum
Andrews	Exon	Mitchell
Baker	Ford	Moynihan
Baucus	Glenn	Murkowski

Durenberger	Melcher	

NOT VOTING—3

Boschwitz	Hollings	Stevens

So Mr. HELMS' amendment (No. 1444) was rejected.

Mr. COCHRAN. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. COCHRAN addressed the Chair.

The PRESIDING OFFICER. The Senate will come to order. We will not proceed to recognize any Senator until such time as the Senate is in order. Those Senators standing in the front row of the Senate Chamber please take their seats.

The Senator from Montana.

AMENDMENT NO. 1446

(Purpose: To prohibit the obligation and expenditure of funds appropriated under the act to provide certain agriculture incentives to persons who produce certain agricultural commodities on highly erodible land)

Mr. BAUCUS. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Montana (Mr. BAUCUS) proposes an amendment numbered 1446.

Mr. BAUCUS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

SEC. 626. (a) Except as provided in subsection (b), none of the funds appropriated by this Act may be obligated or expended to provide, to any person who produces an agricultural commodity on highly erodible land, any of the following:

(1) Price support assistance on such commodity made available under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.), the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.), or any other Act.

(2) A loan for the construction or purchase of a facility for the storage of such commodity made under section 4 of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(h)).

(3) Crop insurance for such commodity under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.).

(4) A disaster payment for such commodity made under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.).

(5) A new loan made, insured, or guaranteed, under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) or any other provision of law administered by the Farmers Home Administration, that will be used for a purpose which will contribute to excessive erosion of highly erodible land.

(b) Subsection (a) shall not apply to—

(1) any agricultural commodity planted by a person to produce any of the 1973 through 1982 crops of agricultural commodities;

(2) any agricultural commodity planted by a person before the date of enactment of this Act;

(3) any agricultural commodity planted by a person during any crop year beginning before such date;

(4) any loan described in subsection (a) made before such date; or

(5) any agricultural commodity produced using a conservation system which—

(A) has been approved by a soil conservation district and is based on technical standards set forth in the Soil Conservation Service technical guide for the soil conservation district, or

(B) in an area where no soil conservation district exists, has been approved by the Secretary.

(c) For purposes of this section—

(1) the term "agricultural commodity" means any agricultural commodity normally produced by annual tilling of the soil, including one-trip planters; and

(2) the term "highly erodible land" means land classified by the Soil Conservation Service of the Department of Agriculture as class IVe, VIe, VII, or VIII land under the Land Capability Classification systems as in effect on the date of enactment of this Act. The land capability class for a field shall be that determined to be the "predominant" class under regulations issued by the Secretary of Agriculture.

Mr. BAUCUS. Mr. President, this amendment would prevent any funds in this bill from being spent to provide Government incentives for crops grown on newly plowed, fragile grasslands. There is no doubt that denying these Government incentives for "sodbusting" is an action that must be taken as soon as possible.

My distinguished colleague from Colorado (Mr. ARMSTRONG) has been leading the fight to pass a sodbuster bill for the last several years. I am sure this Congress this year is going to somehow in some way directly face this issue and pass a bill that limits sodbusting. As I am sure the distinguished chairman of the Agricultural Subcommittee knows, the sodbuster bill drafted by Senator ARMSTRONG was passed by the Senate overwhelmingly—69 to 29—as an amendment to the 1983 agriculture appropriations bill.

The sodbuster bill enjoys the support of virtually every agriculture and conservation organization across the country. We now have the support of the administration as well. Twenty-seven Senators have cosponsored the bill introduced by the Senator from Colorado. Yet so far Congress has not acted or taken action to discourage this practice of sodbusting.

Mr. President, I ask unanimous consent that a recent Time magazine article entitled "Carving Out a New Dust Bowl" appear in the RECORD following my statement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BAUCUS. Mr. President, this June 27 article deals with some of the sodbusting that has gone on in Montana in the past several months. You have to stretch your imagination to understand what transforming a 28,000-acre ranch or a 50,000-acre ranch into cropland looks like. In case you think I misspoke those numbers, I am talking about 50,000 acres of fragile grassland going under the plow—that is nearly 78 square miles of land exposed to wind and water erosion.

The whole purpose of the sodbuster bill is to deny Government incentives to those who break up this fragile grassland. We are not trying to tell a landowner what he can or cannot do with his land. However, we are saying that the Government should not be subsidizing a practice that will lead to massive erosion problems.

The sodbuster bill will not stop erosion, we know that. It will help cut down the roughly 5 billion tons of top soil this country loses to erosion each year.

Let me stress that this action is needed quickly and that is the reason for the amendment. The time has come for us to do something. We passed it last year, it was thrown out in committee, and I think it is time that we pass a bill this year because America is very concerned about the massive dust bowl situations that will occur. It is going to be a dry year, maybe 2 dry years, and we do not know whether that is so or not; we do not know when they are going to come, but they are going to come, and to minimize another dust bowl situation we have to discourage the unnecessary breaking up of grassland. So I urge adoption of the amendment.

EXHIBIT 1

CARVING OUT A NEW DUST BOWL—SODBUSTING IS CHANGING THE FACE OF GREAT PLAINS FARMING

Earlier this month 500-h.p. diesel tractors, brand-named Big Bud 525 and Steiger Panther, pushed 60-ft.-wide chisel plows into the gentle prairie around the hamlet of Winnett, Mont., quickly transforming what once was Wayne Bratten's 28,000-acre ranch into a raw wound of overturned earth. Eastern Colorado Wheat Farmer Emmett Linnebur became a part owner of the Crow Rock Ranch near Miles City, Mont., and used a fleet of ten supertractors to tear into 50,000 of its acres for wheat planting. In recent years, tractors have bulldozed some 6.4 million acres of marginal grasslands in Montana and Colorado and an estimated 27 million acres scattered across the rest of the U.S.

While this frenzy of rangeland transformation has made money for some, for others it has raised the secter of an environmental calamity. Explains Steve Meyer, executive vice president of the Montana association of conservation districts: "When you remove the vegetation on rangelands, you're depleting a resource. If steps aren't taken, we face the possibility of another Dust Bowl."

Critics of sodbusting, as the increasingly common practice of slicing grazing lands into wheat farms is called, say that most of the marginal land of the Great Plains cannot support commercial exploitation. With less than 20 inches of precipitation a year, the region is semiarid. These marginal soils, where they are not too rocky or saline, are often too sandy for farming or are packed with calcium and lime. When overturned by plow blades, valuable topsoil only a few inches thick becomes vulnerable to wind and rain erosion; once gone, it takes decades to replace. The sodbusters are either big operators who buy land and plow on a major scale, or small ranchers who break their own land for a quick cash fix. "I want to make a buck," concedes John Greytak, 53, a former Datsun dealer and present grain operator who since 1974 has broken 250,000 acres of grazing land, mostly in Montana, and stores some 30 percent of his wheat production in giant bins (for which the Government pays him 26.5¢ per bu. each year). Robert W. Thomas has put more than 20,000 acres of northern Colorado rangeland under the plow since 1979 and claims to have made at least $1 million on the recent sale of a 9,480-acre tract of prairie land that he planted in wheat.

Sodbusters buy rangeland at prices that are relatively low because of today's depressed livestock industry, plow and plant the acreage in wheat, then sell the cultivated land, sometimes to buyers unfamiliar with the region and the fragility of the range's topsoil. Since the mid-1970s, planted prairie tracts have shot up in value because of speculation in cropland as an inflation hedge and federal farm programs such as PIK (payment in kind).

PIK allows farmers to sell federal surplus grain if they agree to plant less wheat in a given year. If a farmer with 100 acres of wheat land wishes to apply for PIK, he must first have farmed the land for two years. Once his application is accepted, he can take some or all of the land out of production in the third year and ask the Government for, say, 80 to 95 percent of the grain that the land would have produced. The farmer can then sell that wheat for the highest price he can get. The national average this year: $3.50 per bu. Last week Agriculture Secretary John R. Block offered a plan to extend PIK to the 1984 harvest in order to make further reductions in the price-depressing wheat surplus.

While not directly affecting most speculators right now, the existence of PIK has helped encourage sodbusting. In one area of Montana, for example, undeveloped land that sold for $100 an acre recently fetched more than twice that price when tilled in wheat. Says Ronald Miller, a federal district conservationist: "As long as a person can come in and almost immediately double his money, the problem is going to continue."

Loans, federal subsidies such as deficiency and disaster payments, and price supports for crops help sodbusters as well as other agricultural producers. Entrepreneurs apply for price supports and, as required by federal law, take 15 percent to 20 percent of their cropland out of production. In effect, range plowers break prairie land that may have little agricultural value and collect money for keeping it out of cultivation. Says Bernie Spanogle, district forest ranger at the Pawnee National Grassland in Colorado: "People are farming the federal crop programs, not the land."

Though land-use regulation is the virtual preserve of state and local governments, Colorado Republican Senator William Armstrong has introduced a "sodbuster bill" backed by the Reagan Administration and the Montana Stockgrowers Association, a group traditionally opposed to land-use controls. It would deny federal payments of any kind for crops grown on highly erodible land. A companion bill is pending in the House. Local officials are also beginning to take action. A new law in Weld County, Colo., requires sodbusters to prepare a conservation plan and obtain a permit from the county commissioners. This spring Colorado strengthened an existing law that permits counties to enforce conservation measures and make violators responsible for destruction caused by their plowing.

For many residents of the northern Great Plains, such legislation cannot come soon enough. Edith Phillips, 71, of Weld County, is suing Sodbuster Thomas for $150,000 because of waves of dirt that she claims are blowing off his plowed acreage and onto her homestead. Says she: "There's nothing but dust out there. You can't breathe." Admonishes Bill Brown, a Montana rancher: "The Government shouldn't be subsidizing bad farming practices."

Mr. HELMS. Mr. President, I agree with the Senator from Montana on the substance of his amendment and I commend him for bringing the matter before the Senate. He is right. The Federal Government should not be in the business of subsidizing agricultural production on lands having the potential for soil erosion problems reminiscent of the Dust Bowl days.

Farmers are plowing up fragile lands at an alarming rate. We cannot prevent this from happening, but we have a responsibility to discourage this activity.

A Montana rancher was quoted in a recent article in Time magazine, which I believe the Senator has just put in the RECORD. He discussed the sodbusting and he said: "The Government shouldn't be subsidizing bad farming practices." I could not agree more with the statement.

I say to the Senator that the Committee on Agriculture, Nutrition, and Forestry, of which I have the privilege of serving as chairman, is very concerned about this situation. The committee has already held hearings on S. 663, a bill introduced by the distinguished Senator from Colorado (Mr. ARMSTRONG), which will address this problem. In fact, the committee had scheduled for tomorrow a markup on this legislation, but I doubt that there will be very many Senators around. We will schedule that markup just as soon as we return after the recess. We anticipate that legislation will be reported with no significant problems.

We have worked closely with Senator ARMSTRONG and with the Department of Agriculture, particularly the Soil Conservation Service, on S. 663, and have a good understanding of the immediacy of the problem in some States where farmers are plowing up land that should not be put into intensive crop production. I have done everything I can as committee chairman to expedite this legislation through the legislative process.

I will be delighted and honored to work with the Senator from Montana. I will do my best, as chairman of the authorizing committee, to bring this legislation before the Senate.

Mr. JEPSEN. Will the Senator yield?

Mr. HELMS. Yes, I yield to the Senator.

Mr. JEPSEN. Mr. President, as chairman of the Subcommittee on Soil and Water Conservation, I held hearings the last session of Congress and I held hearings this session of Congress on what we call the sodbusting bill, sponsored by the Senator from Colorado, Senator ARMSTRONG. There is a unanimity of support for this. It has received great accord and great support from all areas of the conservation associations and groups.

In what we call sodbusting, which is a general term that has been given to

this, in the area of fragile soil generally, this is a very broad area and must be very carefully defined so that, indeed, we have a bill when we are finished with it. As the distinguished chairman of the Agriculture Committee has stated, we are going to have a markup. That is how fast we are moving on it. I expect that it will be passed out of the Senate. I hope that the House will act on it. We hope the Senator from Montana will help us when that time comes.

But that bill has been completed. It has had hearings and a great deal of thought has gone into defining just what the fragile soil is and how to go about getting the job done so that we are not tied up in courts for years and years once legislation is passed.

The thrust of the Senator's proposal is admirable. I support it. But I suggest that we do have the vehicle and we do have the hearings. We have had the research, we have the language, and it is coming down the pike, being carefully worked on, and thought through.

I hope that the Senator would wait and join with us to pass that when the time comes.

Mr. COCHRAN. Mr. President, I express my appreciation to the Senator from Montana for bringing this issue up at this time. I do not agree however, that we need the amendment attached to this bill.

I think the fact that we are discussing this illustrates the importance of this issue to the Senate. Having the chairman of the Agriculture Committee and the chairman of the Soil and Water Conservation Subcommittee on the floor to express the intent they have of moving the legislation forward in a timely fashion, I think, is reassuring.

I recall a year ago I chaired the hearings on the Armstrong bill and, at that time, we approached the subject with some degree of reluctance and caution because of the perceived difficulties at the Department of Agriculture for administering this kind of new program. But I am convinced that it can be done and it ought to be done.

But it does need to have the careful attention of a legislative committee. The markup session ought to be the forum in which these various issues and potential problems can be explored in detail with some considered conclusions reached. It is probably not appropriate to attach the amendment to this bill.

I am hoping the Senator will be satisfied with these assurances and the additional assurance that I will join with him in urging the majority leader to find some time on the schedule to bring the bill to the floor once the Agriculture Committee has dealt with it.

Mr. BAUCUS. Mr. President, I appreciate the representations of the chairman of the subcommittee, as well as the chairmen of the appropriation subcommittee and the authorizing committee.

I must remind the Senate that this same measure passed by a vote of 69 to 27 on the agriculture appropriations bill last year. It enjoys vast, strong support in this body. I am, therefore, very much inclined to press the issue again and push it for a vote, because the body has spoken and the issue is very dire and the need is very great.

On the other hand, I very much respect the legislative process. The authorizing committee is meeting. It has scheduled a hearing tomorrow, which probably will not take place because we will probably adjourn this evening. Nevertheless, the authorizing committee is scheduled to meet. Listening to the Senator from North Carolina, the chairman of the committee, as well as the chairman of the appropriations subcommittee, it is obvious to me that the Senate is making every effort to accommodate the wishes of the entire body to get it passed.

I see the majority leader on the floor. I am wondering if I might ask a question of our distinguished majority leader.

Assuming we get the sodbusting bill out of the authorizing committee in due course, that is, in 2 or 3 weeks, may I ask the majority leader what is the likelihood that we could get the sodbusting bill scheduled before the Senate before the August recess?

Mr. BAKER. Mr. President, I thank the Senator. In anticipation of that question, I discussed this matter with my own staff who are charged with scheduling and coordinating requests from the several committees for scheduling of time.

Let me say, first, to the Senator that I understand the importance of scheduling this measure when it is reported and as it is reported and I promise him I will make every effort to do that. Whether I can give him an outright promise to do it during those 3½ weeks between July 11 and August 7 is something I will have to explore more closely, because I fear that time will be used primarily for two things: First, the Department of Defense authorization bill, which probably will take a long time, and the remaining appropriations bills; and approriations bills, of course, must take priority.

But if we do not make it during that period, I can assure the Senator it would be my intention to schedule it as soon as possible and, in this case, it would be as soon as possible after the Labor Day recess. But I do not rule out the possibility that we could do it during the July period. I assure the Senator that if we can work it in, say, to a time between appropriations bills or other matters, I am perfectly agreeable to doing that. I will be glad to cooperate with him and the manager of the bill so that we can get the earliest possible consideration.

Mr. BAUCUS. Mr. President, might I have the majority leader's assurances that it will be brought up, say, by September 15?

Mr. BAKER. Mr. President, if the Senator will please spare me from that, I am standing here without my scheduling calendar and without my staff. There are 13 committees that have reporting jurisdiction, regular standing committees. If I make that commitment, I am afraid that I may make 1 friend and 12 enemies.

So let me stand on the commitment that I made. I will do my best to do it as soon as possible. I think the prospects are very good that we can do it as the Senator requests before the 15th of September. But spare me the absolute commitment, because I thank the Senator knows when I make a commitment I bend over backward to keep it, literally, I would rather not make it unless I am sure I can keep it.

Mr. BAUCUS. Mr. President, I appreciate the position the majority leader is in. He cannot make these kinds of commitments at any great length because of the reasons he has already indicated.

I thank the majority leader for his comments.

Mr. BAKER. I thank the Senator. I promise him I will work with him to try to see that it is scheduled as soon as possible.

Mr. BAUCUS. I thank the majority.

Mr. President, with those assurances, I feel very confident we will get this bill through quite quickly. I, therefore, withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. DOMENICI. Mr. President, is there an amendment pending?

The PRESIDING OFFICER. There is no amendment pending.

Mr. DOMENICI. Mr. President, I would like to commend my distinguished colleagues, Senators HATFIELD and COCHRAN, and my fellow members of the Senate Appropriations Committee for reporting this bill. Last year the Agriculture appropriation bill was not completed until the lameduck session in December. We are nearly 6 months ahead of last year's schedule.

I support the Agriculture appropriations bill—H.R. 3223—as reported by the committee. This is the first appropriations bill to be considered by the Senate since adoption of Senate Concurrent Resolution 27, the first concurrent resolution on the budget for fiscal year 1984.

H.R. 3223 appropriates $34.4 billion including $410 million from the permanent section 32 account, for agriculture, food assistance, and other related programs.

The bill does not fund the food stamp program, WIC program and

other child nutrition programs for the full year. If these programs are to receive their full year funds a later requirement of about $600 million will be necessary. The bill also reduces CCC funding by $500 million, which will probably be needed later in the year.

Compared to the first concurrent resolution on the budget, the bill is identical to the subcommittee's crosswalk allocation in budget authority.

Including the outlays from prior appropriations, and including possible later requirements, total budget authority equals the budget crosswalk allocation and total outlays exceed the budget crosswalk allocation by about $185 million.

Clearly the budget crosswalk to the Appropriations Committee could be assigned differently by the Appropriations Committee to its subcommittees. Further, while this bill is estimated to exceed outlays by $0.2 billion as assumed in the budget resolution for the subcommittee, I note that the two appropriation bills passed by the Senate, and amended in conference, offset these increased outlays. The HUD appropriation bill as amended in conference and the energy and water appropriation bill as passed by the Senate have outlays of about $0.6 billion below the budget crosswalks for those subcommittees. I therefore can state that the appropriation actions to date accommodate the higher outlays in this bill.

I therefore urge my colleagues to support the bill as reported by the Appropriations Committee. I am sure that the Appropriations Committee will address any items within the Agriculture Subcommittee's jurisdiction that need further consideration in a later supplemental appropriation bill.

With regard to the credit budget, the reported bill provides $17.8 billion in new direct loan obligations and $7.5 billion in new primary loan guarantee commitments. In direct loan obligations, the bill is $0.3 billion over the budget assumptions for the subcommittee. In primary loan guarantee commitments, the bill is $1.2 billion under the budget assumptions for the subcommittee.

Mr. President, I ask unanimous consent that two tables showing the relationship of the reported bill, together with possible later requirements, to the congressional spending and credit budget and the President's budget requests be printed in the RECORD at the conclusion of my remarks.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

ATTACHMENT 1.—AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES SPENDING TOTALS

[In billions of dollars]

	Fiscal year 1984	
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed	0.4	[1] 1.8
H.R. 3223, as reported by the Senate Appropriation Subcommittee June 21	34.0	20.8
Possible later requirements:		
Full-year funding food stamps	+0.1	
Full-year funding child nutrition	+0.2	+0.2
Full-year funding WIC	+0.3	+0.3
CCC funding	+0.5	
Total for agriculture, rural development, and related agencies	35.5	23.1
Senate subcommittee allocation under first budget resolution	35.4	22.9
House-passed H.R. 3223	35.5	23.1
President's request	34.1	22.0
Total compared to:		
First budget resolution allocation		+0.2
House-passed H.R. 3223		+0.2
President's request	+1.4	+1.3

[1] Includes $196 million in outlays associated with the Senate-passed fiscal year 1983 supplemental.

ATTACHMENT 2.—AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES SUBCOMMITTEE CREDIT TOTALS

[In billions of dollars]

	Fiscal year 1984	
	New direct loan obligations	New primary loan guarantee commitments
H.R. 3223, as reported by Senate committee (total for Agriculture Subcommittee)	17.8	7.6
First budget resolution assumptions	17.5	8.8
House-passed	17.8	9.4
President's request	12.3	6.5
Subcommittee total compared to:		
First budget resolution assumptions	+0.3	−1.2
House-passed		−1.8
President's request	+5.5	+1.1

Mr. DOMENICI. Mr. President, the bill before us today contains no fiscal year 1984 funding for the range caterpillar control program of the Animal and Plant Health Inspection Service. In fiscal year 1983, $160,000 was appropriated for control of the range caterpillar. This has been an ongoing program of the Department of Agriculture for several years. Although funding for this activity has been decreasing, scientists at New Mexico State University and personnel from the New Mexico Department of Agriculture have continued to battle this pest year after year. We are coming very close to eradication of the range caterpillar. Frankly, at this time, I am unsure as to whether or not funds for an Animal Plant Health Inspection Service cooperative program will be necessary in fiscal year 1984.

As many of my colleagues are aware, Federal participation in such a pest control effort is extremely important because of the landownership pattern in New Mexico and other Western States. This so-called intermingled, or checkerboard, landownership creates a situation where Federal participation on a one-third, one-third, one-third basis with State and private interests is almost mandatory to insure the effectiveness of such control programs.

In New Mexico, a range caterpillar control program is currently underway from available fiscal year 1983 funds that will treat approximately 200,000 acres of land. Until we can determine whether this program is successful in completely eradicating this pest, we will not know whether a repeat effort will be required again next summer. Our hope is that the program will be successful, and we will not need this program in the future.

For this reason, I do not seek to add funding to this bill for control of the range caterpillar. However, I am reserving the right to seek funding for this program in an appropriations measure later this year if that need arises. I would hope that if further efforts to insure the eradication of this pest are necessary, the Appropriations Committee and this body will give it due consideration.

Mr. President, I yield the floor.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

ANNOUNCEMENT OF POSITION ON HELMS AMENDMENT NO. 1444

Mr. BOSCHWITZ. Mr. President, I was not here for the rollcall vote on the Helms amendment to the agricultural appropriations bill. I would like to state that had I been here, I would have voted against that amendment. Unfortunately, I was in the building but could not be found by my staff. Therefore, I missed the vote. I would have voted against it had I been here.

AMENDMENT NO. 1447

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. BOSCHWITZ), for himself and Mr. BOREN proposes an amendment numbered 1447.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 52: On line 18 strike out "$872,000,000" and insert in lieu thereof "$936,000,000"; on line 18 strike out "$402,000,000" and insert in lieu thereof "$466,000,000"; on line 23 strike out "$650,000,000" and insert in lieu thereof "$682,000,000"; on line 24 strike out "$650,000,000" and insert in lieu thereof "$682,000,000".

Mr. BOSCHWITZ. Mr. President, I am offering an amendment which will maintain Public Law 480 funding for fiscal 1984 at the level that is necessary to assure the volume of Public

Law 480 shipments this coming fiscal year will be the same as this year's volume. This will enable American agriculture to continue to assist developing countries and famine stricken countries at a time when they need it the most, without reducing the overall level of assistance.

Mr. President, what has happened is that prices of commodities have risen and the appropriations for Public Law 480 have remained approximately the same. Since the prices have risen and since there is a great strength in the dollar, the result is that we will be able to ship fewer commodities to the hunger stricken nations of the world with the same money. The result is that we need to increase somewhat the moneys in order that the shipments to the famine afflicted portions of the world be maintained during this very difficult year.

There is drought and famine in several areas of the world, but particularly in Africa. Developing countries are facing debt crises which constrain their abilities to import goods, including food. The famine in Africa is the worst in decades. The details and severity of the famine are outlined in a number of articles that appeared in the Washington Post, and also the article on Tuesday, June 7 in the New York Times.

I ask unanimous consent, Mr. President, that that New York Times article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, June 7, 1983]

FAMINE IN AFRICA IS CALLED WORST IN A DECADE

(By Bernard Weinraub)

WASHINGTON, June 6.—A drought affecting 18 countries in Africa is causing increasing concern among United States and international relief officials, who say that the region faces the worst food shortages since the early 1970's when at least 200,000 to 300,000 people starved to death.

Donald C. Kimmel, director of the Food and Agricultural Organization's office here, said that reports reaching the organization made it clear that "we are coming into something far worse than what we had in 1972-73." The organization itself has termed the situation in Africa "extremely serious."

State Department officials, who are pressing for an increase in the United States' $244 million food aid program for Africa, said that border and internal unrest in nations such as Ethiopia, Chad, Mozambique and Angola had seriously compounded the food shortages. Roads have been shut, stranding trucks carrying food supplies, and thousands of farmers have fled to urban and border regions, the officials said.

With many African nations suffering their second year of drought—and with an estimated five million refugees within Africa—the food shortages present "a forbidding picture," said a World Bank official. What makes the situation ominous, he said, is that the drought and food shortages are not limited to one area, as in the early 1970's, but are afflicting nations all through the continent south of the Sahara.

In recent days a private F.A.O. report received here has painted an especially bleak portrait of nations such as Chad, where "starvation deaths are reported," Ethiopia, the Central African Republic, Mozambique, Tanzania, Botswana, Lesotho and Swaziland.

Food experts noted that nations outside Africa, such as Cambodia, Indonesia, Nepal and the Philippines, have also been serverely affected by drought. But, officials said, the situation in Africa is especially serious because this is the second year in a row that nations there have suffered drought.

Beyond this, officials said, inept bureacracies and a lack of government machinery to deal with food emergencies have left some African nations almost powerless to deal with the crisis. "Look at Chad," said one United States official. "Every few months you get a new government and a new agricultural minister. There are 50 miles of paved roads in the country. You go to the Agriculture Ministry and they don't even have pens and pencils."

Underlying the overall problem is the crucial issue of Africa's birth rate and food production. In the last few years the birth rate has risen at a rate of about 3 percent annually, which is double the increase in the continent's food production.

United States, Food and Agriculture Organization and World Bank officials declined to estimate how many Africans have starved to death in recent months. Officials said, essentially, that it was impossible to determine how many children and adults had died of dehydration and illnesses related to hunger.

SIX NATIONS AFFLICTED IN 1970'S

Officials recalled that in a belt of six countries south of the Sahara, perhaps 300,000 Africans, and possibly far more, were believed to have died of starvation in the early 1970's, largely because of drought. The countries—some of them affected by the current drought—were Mauritania, Senegal, Mali, Upper Volta, Niger and Chad.

F.A.O. officials said that 18 countries had been especially hard hit by the current drought. They are Botswana, Cameroon, Cape Verde, Chad, Ethiopia, Ghana, Djibouti, Lesotho, Mali, Mauritania, Morocco, Mozambique, South Africa, Swaziland, Tanzania, Togo, Zambia and Zimbabwe. Three of these—Morocco, South Africa and Zimbabwe—are suffering drought but not experiencing serious food shortages, F.A.O. officials said.

In recent weeks, Edouard Saouma, director general of the F.A.O. in Rome, has sent telegrams to 27 nations, including the United States, seeking urgent assistance in "helping African countries bilaterally and multilaterally" in buying food and protecting livestock production.

United States officials indicated that the State Department would probably seek an additional $18 million in emergency food aid for stricken African nations, bringing the overall total of food assistance to the continent for this year to $262 million. Last year Africa received $266.2 million in food aid.

AFRICAN EXPORTS LAGGING

Mr. Kimmel, the F.A.O. representative here, said that the food situation in Africa seemed worse than the situation a decade ago, partly because many African countries had found themselves unable to earn foreign exchange from traditional export products such as cocoa, rubber and coffee, whose prices are depressed on the world market. At the same time, he noted, industrial nations have sought to reduce their imports because of economic restraints.

"In times of bumper harvests, major exporting nations are less willing to step up food aid because of the costs," Mr. Kimmel said. "Someone has to pay for it. Someone has to pay to ship it."

Although World Bank and United States officials emphasized the seriousness of the immediate African situation, their concern also focused on the long-term impact of the drought on Africa's food needs. In southern Africa, for example, river levels are at 50-year lows, leading to "salt water intrusion on the land that kills everything you want to grow," said one State Department official.

Moreover, officials pointed out, a "vicious cycle" exists in many African nations in which population pressures force families to eke out livelihoods on barely arable lands, thus exploiting and exhausting the land and preventing it from recovering fertility. At the same time land is increasingly being used for livestock and many areas are deprived of forest cover because trees are cut for fuel.

Mr. BOSCHWITZ. Mr. President, this is not the time to reduce our assistance to these countries, as would be the case if we adopted the committee's recommendation for fiscal year 1984.

While the committee's recommendation indicates a slight increase in the value of shipments, the volume of shipments under Public Law 480 will decline by 6 percent in fiscal year 1984. That is nearly 400,000 tons of food, Mr. President. That is an important amount, particularly when we see so much famine in so many parts of the world, and particularly, as I say, Mr. President, in Africa.

My amendment would maintain that volume of shipments for fiscal year 1984 and it would only be maintained at the same level as fiscal year 1983. This will require a total appropriation of $1.148 million, about $96 million more than the committee recommendation, which is $1.052 million. This includes an increase of $64 million in title I and title III appropriations, and $32 million in title II appropriations.

Mr. President, as you may know, title I is the concessional loan title of Public Law 480. Title II is the grant portion. We would increase the title I concessional loans by $64 billion, and the title II grants by $32 million. Both are considered outlays inasmuch as title I loans are concessional loans, but those loans have been repaid in the past and should be repaid this year. So, in a way, the increase that we are asking for really, is only $32 million to meet the needs of the world hunger which is so acute at this moment.

Mr. President, at a time when developing countries are struggling against financial crises, famine, and other calamities we should not reduce the real level of our assistance under Public Law 480, the food for peace program.

The real level of assistance is the volume we ship. My amendment will help to assure that this volume does not decline.

Mr. President, I ask unanimous consent to have printed in the RECORD a table making certain comparisons.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COMPARISON OF PUBLIC LAW 480 APPROPRIATIONS FISCAL YEAR 1983 (ESTIMATED), AND FISCAL YEAR 1984 UNDER THE COMMITTEE RECOMMENDATION AND THE BOSCHWITZ AMENDMENT

	Fiscal year		
	1983	1984 committee	1984 Boschwitz
Titles I and III	$859,000,000	$872,000,000	$936,103,000
Title II	650,000,000	650,000,000	681,786,000
Total program level	1,509,000,000	1,522,000,000	1,617,999,000
Costs financed from receipts, prior year balances and CCC funds	−481,000,000	−470,000,000	−470,000,000
Total appropriation	1,028,000,000	1,052,000,000	1,147,999,000

PUBLIC LAW 480 TITLES I AND III: FISCAL YEAR 1984 APPROPRIATIONS REQUIRED TO SHIP SAME TONNAGES AS IN FISCAL YEAR 1983

	Fiscal year	
	1983	1984
Feedgrains	$36,525,000	$38,199,000
Wheat	503,197,000	519,399,000
Rice	118,908,000	133,954,000
Cotton	11,261,000	14,000,000
Vegetable oils	107,300,000	119,777,000
Initial payment to exporters [1]	−27,201,000	−23,000,000
Total commodity costs	749,990,000	802,329,000
Ocean transportation	109,010,000	133,774,000
Total expenses	859,000,000	936,103,000

[1] Initial payments to exporters are payments by importers to exporters to meet U.S. obligations. The President is authorized to require such payments upon delivery and the payments diminish required appropriations.

PUBLIC LAW 480 TITLE II FISCAL YEAR 1984 APPROPRIATIONS REQUIRED TO SHIP SAME TONNAGES AS IN FISCAL YEAR 1983

	Fiscal year	
	1983	1984
Feedgrains	$47,941,000	$47,515,000
Wheat and products	184,614,000	208,788,000
Rice	20,470,000	22,089,000
Vegetable oils	105,140,000	114,091,000
Dairy products	15,873,000	15,873,000
Other foods	35,002,000	32,470,000
Total commmodity costs	409,040,000	440,826,000
Ocean transportation	240,960,000	240,960,000
Total expenses	650,000,000	681,786,000

Mr. COCHRAN. Mr. President, I reluctantly rise to oppose this amendment offered by the Senator from Minnesota. I do so with the full understanding that he has made some very compelling arguments in support of the amendment. The only reason I can identify for opposing the amendment is that, frankly, there is no provision in the budget resolution to increase the funding level. We are going along with the President's requested level of funding for this program for this next year. We are right at a point where we are up against the constraints of the budget resolution and we do not want to get the bill vetoed.

There has been some suggestion already today, in discussion of some earlier amendments, that this bill may be targeted as one of the first bills that the President is urged to veto by some members of his staff or others in the administration. I am hoping we can avoid that, Mr. President.

I am hoping that, in conference with the House, we can work out a report which both the Senate and the House can approve and which the President can sign. That is certainly going to be my objective. Adding this amendment, although the program has a great deal of merit, I think, is going to make it more difficult for us to work in conference toward getting the kind of conference report that we shall need in order to keep the bill from being vetoed.

I am sympathetic to the need to sell more of our agricultural commodities in foreign markets. I think that we already do have some additional requests from the administration for authority to make donations to countries which are not able to purchase our agricultural commodities, even under the concessional sales provisions of the Public Law 480 program. Congress has not yet provided the full authority the administration has requested. But here we are, with an abundance of surpluses—corn, wheat, dairy products—a wide range of surplus commodities which can be donated, which would be an act that is consistent with the effort to remove this burden from market prices so that our farmers who are operating at a loss in some cases can enjoy an opportunity for a profit.

I am hoping that we can see more of our surplus farm commodities used to help feed those in foreign countries who cannot adequately provide for their own nutritional needs. We have many unmet needs here at home as well, of course. I think an effort is being made to meet that obligation.

It is with a great deal of reluctance, Mr. President, that I urge the Senate to reject the amendment. The Senator from Minnesota, I know, has done a great deal of work in this area of identifying unmet needs in the area world hunger, and I congratulate him for that. But I do not think that this amendment is going to help us get a bill which the President can sign. That is my main concern. I reluctantly urge the Senate to oppose the amendment.

Mr. BOSCHWITZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent to add as cosponsors to this amendment Senators BOREN and BAUCUS.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment of the Senator from Minnesota.

The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. BAKER. I announce that the Senator from Arizona (Mr. GOLDWATER), and the Senator from Alaska (Mr. STEVENS), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from South Carolina (Mr. HOLLINGS), is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 61, nays 36—as follows:

[Rollcall Vote No. 178 Leg.]

YEAS—61

NOT VOTING—3

Goldwater	Hollings	Stevens

So the amendment (No. 1447) was agreed to.

Mr. BOSCHWITZ. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LEVIN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. COCHRAN. Mr. President, we have reached a point where we have only one other technical amendment.

We understand the Senator from New York, who had an amendment, is prepared to put a colloquy in the RECORD and not push for a vote on the amendment.

Is that correct?

Mr. MOYNIHAN. I thank the distinguished manager of the legislation. That is correct.

Senator GORTON, Senator DOMENICI, and I wish to do that if we may.

Mr. COCHRAN. Mr. President, there was an amendment also provided for in the order by the Senator from New Hampshire (Mr. HUMPHREY). We have been advised that he does not intend to offer that amendment.

So, I ask unanimous consent that the order previously entered be amended by striking the provision for the amendment of the Senator from New Hampshire (Mr. HUMPHREY) and the amendment of the Senator from New York (Mr. MOYNIHAN).

The PRESIDING OFFICER (Mr. SPECTER). Without objection, it is so ordered.

Mr. COCHRAN. Mr. President, I yield to the Senator from New York for the purpose of engaging in his colloquy.

Mr. MOYNIHAN. I thank the distinguished Senator from Mississippi.
